Response To Rushcliffe Local Plan Part 2: Land And Building Policies - **4196**
Further Options

I am writing to you in respect of the potential site for housing development at Adbolton Lane, Lady Bay, West Bridgford.

FOR THE FOLLOWING REASONS:-

The Lady Bay community does not want to see the start of a whole new encroachment on the green belt which will affect traffic and infrastructure, such as schools and healthcare. We oppose the removal of the land from the green belt.

Likewise, the coverage of such a large area in hard standing and the resultant loss of greenspace would increase the risk of flooding as the absorbency of the land would be significantly reduced.

In addition, there would be a significant threat to wildlife habitat in the area, especially in the vicinity of Pinder's Pond, as this would be directly affected by the extent of the proposed development.

But perhaps the most serious impact would be on the lost village of Adbolton, a site of important archaeological interest which lies directly beneath the potential development. The remains include not only dwellings but also the remains of the church and sacred ground, which dates back to the Domesday Book.

ALSO TRENT BV. IS ALREADY OVER USED - OFTEN UNPAID
NEW HOUSES = INCREASED TRAFFIC (1 HOUSE = 1 CAR DRIVEN)
I hope that raising these issues has proved useful and can be used along with all other opposing comments to stop this unnecessary, unrequired and unwanted development. CAN THE SCHOOL, HER. CLINICS AND PRESENT SHOPS REALLY COPE?

Yours sincerely, LADY BAY HAS "VILLAGE" FEEZ - NOT A NOTTINGHAM CITY SU

In writing to you in respect of the potential site for housing
development at Adbolton Lane, Lady Bay, West Bridgford.

The Lady Bay community does not want to see the start of a whole
new encroachment on the green belt which will affect traffic and
infrastructure, such as schools and healthcare. We oppose the removal
of the land from the green belt.

Otherwise, the coverage of such a large area in hard standing and the
substantial loss of greenspace would increase the risk of flooding as the
sorbency of the land would be significantly reduced.

In addition, there would be a significant threat to wildlife habitat in the
area, especially in the vicinity of Pinder's Pond, as this would be
directly affected by the extent of the proposed development.

It perhaps the most serious impact would be on the lost village of

Response To Rushcliffe Local Plan Part 2: Land And Building Policies –
Further Options

I am writing to you in respect of the potential site for housing development at Adbolton Lane, Lady Bay, West Bridgford.

The Lady Bay community does not want to see the start of a whole new encroachment on the green belt which will affect traffic and infrastructure, such as schools and healthcare. We oppose the removal of the land from the green belt.

Likewise, the coverage of such a large area in hard standing and the resultant loss of greenspace would increase the risk of flooding as the absorbency of the land would be significantly reduced.

In addition, there would be a significant threat to wildlife habitat in the area, especially in the vicinity of Pinder's Pond, as this would be directly affected by the extent of the proposed development.

But perhaps the most serious impact would be on the lost village of Adbolton, a site of important archaeological interest which lies directly beneath the potential development. The remains include not only dwellings but also the remains of the church and sacred ground, which dates back to the Domesday Book.

I hope that raising these issues has proved useful and can be used along with all other opposing comments to stop this unnecessary, unrequired and unwanted development.

Yours sincerely,

R

I am writing to you in respect of the potential site for housing
development at Adbolton Lane, Lady Bay, West Bridgford.

The Lady Bay community does not want to see the start of a whole
new encroachment on the green belt which will affect traffic and
infrastructure, such as schools and healthcare. We oppose the removal
of the land from the green belt.

Otherwise, the coverage of such a large area in hard standing and the
resultant loss of greenspace would increase the risk of flooding as the
permeability of the land would be significantly reduced.

In addition, there would be a significant threat to wildlife habitat in the
area, especially in the vicinity of Pinder's Pond, as this would be
directly affected by the extent of the proposed development.

Perhaps the most serious impact would be on the lost village of
Adbolton, a site of important archaeological interest which lies directly
beneath the potential development. The remains include not only
foundings but also the remains of the church and sacred ground, which
date back to the Domesday Book.

We believe that raising these issues has proved useful and can be used
in conjunction with all other opposing comments to stop this unnecessary,
unnecessary and unwanted development.

sincerely,

JAWright
