**yes**

**Yes** .....

Please provide any comments you wish to make to support your response. If you answered NO, please could you identify which site(s) on the edge of West Bridgford or Clifton should be removed from Green Belt and identified as suitable for development and why.

(please continue on a separate sheet if necessary)

### Housing sites within the Main Urban Area

	Yes	No
Site WB1 – Abbey Road Depot (potential capacity around 50 homes)

At any other location (please specify which)		

Please provide any comments you wish to make to support your answers. For any of the sites, this could include comments on the services and facilities required to support development and the design, mix and layout of development.

**Yes** .....

**Bingham is a key settlement. All of the key settlements have a good range of services which can be improved through increased levels of development. They also have good public transport links to the built up area of Greater Nottingham, including Nottingham City centre. Subject to sustainability tests it is possible that additional greenfield sites can be identified and it would be wrong to close this option at this stage. It may well be that development in key settlements performs better against these tests than sites adjacent to West Bridgford such as Clifton Pastures .**

**The design of new development is a crucial factor in whether new development is acceptable to local people. Government ministers have rightly pointed out that even large developments can more readily be accepted if designed ‘in sympathy with’ both the natural environment and the existing architectural style in a given area and in consultation with local people. The Borough Council have demonstrated an entirely ‘developer led’ approach which results in unsightly development which destroys the cohesion of local communities.
