**SAVE ALL THESE BATTERIES
FOR RECYCLING.**

We CANNOT accept car or similar batteries for recycling through this scheme.

Household Battery Collection Bag

HOW TO USE THIS BAG

We currently throw away over 600 million batteries in the UK every year. The main method of disposal for batteries is sending them to landfill sites, which are rapidly running out of space. By recycling your household batteries, you can significantly reduce the amount of battery waste we generate. This bag will be recycled after use.

- simply place your used or unwanted batteries - including AAA, AA, C and D size household batteries as well as button, mobile phone, laptop and rechargeable batteries in this bag.
- PLEASE DO NOT OVERFILL THIS BAG.
- Place bag on any of your bins on collection day and our collectors will remove it and leave you a new bag.
- for more information about household battery recycling please call our customers services centre
