

Do you agree that the Local Plan should allocate greenfield land for housing development at East Bridgford for around 100 homes in total?

Yes

.....

No

.....

Please provide any comments you wish to make to support your response.

The greenfield land should be maintained as originally intended. All 'brown field' sites in Nottingham & Nottinghamshire should be exhausted before the 'greenfield sites' are considered.

The green field sites around East Bridgford are productive agricultural fields. UVA the current infrastructure surrounding food production here should be retained for this purpose.

Do you support the proposed allocation for housing development of the following sites at East Bridgford:

FD absolutely necessary

	Yes	No
Site EBR06 - Closes Side Lane (West) (estimated capacity around 20 homes)	<input type="radio"/>	<input type="radio"/>
Site EBR07 - Closes Side Lane (East) (estimated capacity around 20 homes)	<input type="radio"/>	<input type="radio"/>
Site EBR08 - Land North of Butt Lane (estimated capacity around 15 homes)	<input checked="" type="radio"/>	<input type="radio"/>
Site EBR10 - Land South of Butt Lane (estimated capacity around 45 homes)	<input type="radio"/>	<input type="radio"/>

Please provide any comments you wish to make to support your answers.

For each of the proposed housing sites, you may like to give your views on what development should look like, in terms of the design, mix and layout of new housing and other uses (for example, open space) on site.

To allow the ability for existing elderly residents to decline from existing properties and remain in the village community site EBR08 could be developed with their needs in mind particularly as bungalows.

This would then free up existing properties for new residents to East Bridgford

I am writing to register my opinion on the building of 410 houses on Ruddington's green belt area. I strongly oppose such a development on the basis that our compact little village is barely able to sustain its current number of local residents.

Our schools, doctors surgeries, village amenities, etc are at bursting point. This will have a detrimental effect on all villagers in the sense that all amenities will be so over stretched that they won't be able to provide good quality services.

Ruddington village is a very desirable location to live BECAUSE of its beautiful natural surroundings that will cease to exist once new housing developments are built. It is my hope that plans to build 410 new houses will fail.
