

Hello

I am writing with my comments about the Planning Policy at Radcliffe-on-Trent. I understand that there has to be some building of approximately 400 new houses in Radcliffe-on-Trent.

My main concern is the increased amount of traffic from the sites with potential for building at least 180 houses or more and in particular RAD1 and RAD3.

My suggestion would be that the number of houses be reduced on each site and the building spread across different sites. This would mean that the traffic flow would be less from each individual site especially those sites with high numbers for potential homes.
