Dear Richard

Please see below the comments of Normanton on the Wolds parish council min regard of the Rushcliffe Local Plan Part 2 consultation:

Comments from the Normanton on the Wolds Parish Council are as follows:

1. Given the substantial scale of the newly constructed Edwalton and Cotgrave developments and the cumulative impact of these and the proposed additional Cotgrave and Keyworth developments leading to much increased traffic levels on the A606 Melton Road from the Wheatcroft roundabout to now improved A46 we request consideration be given to noise attenuation measures/green infrastructure to protect the amenity of residents and visitors to our conservation village from excessive traffic noise on the A606 corridor.

2. We request careful consideration is given as to the impact of increased traffic levels from any future developments in Keyworth on Platt Lane in particular at the junction of Platt Lane/A606 and on Station Road Plumtree to ensure the safety of all road users and pedestrians.

3. We request careful consideration is given to water run off management at any new developments in Keyworth. Watercourses run through our village, and through many residents’ gardens, which are downstream from Keyworth. We seek to prevent excessive additional water flow whilst at the same time avoiding measures which might lead to a drying up of the watercourses.

4.
