4. Site Assessments	17

1. Introduction

Purpose of the Strategic Housing Land Availability Assessment

- 1.1 The Strategic Housing Land Availability Assessment (SHLAA) is an important part of the evidence base to support the delivery of housing. This assessment forms an essential part of the planning process by helping to ensure an adequate supply of land for housing. It uses a robust evidence-based approach, which is a key principle of the National Planning Policy Framework (NPPF).

Relationship to the Rushcliffe Local Plan

- 1.2 The SHLAA provides essential evidence for the delivery and review of the Rushcliffe Local Plan. It is, in effect, a technical evidence-base for the identification of ‘deliverable’¹ and ‘developable’² sites for new housing over a period of around 15 years. Rushcliffe Local Plan consists of Local Plan Part 1: Core Strategy (adopted December 2014), and Local Plan Part 2: Land and Planning Policies (adopted October 2019).

SHLAA Methodology

- 1.3 An [overarching methodology](#) for preparing and updating the SHLAA has been developed in partnership with Broxtowe Borough Council, Gedling Borough Council, Erewash Borough Council and Nottingham City Council. In addition, each council has evidenced its own assumptions on relation to density, lead-in times and build-out rates, windfall allowance; and non-implementation rates through a separate appendix to the methodology [SHLAA webpage](#). An [interactive map](#) is also available showing the location of all the sites on the Borough Council’s website.
- 1.4 The following table identifies where information related to each assessment category can be found in Rushcliffe’s SHLAA report.

¹ and ² as defined by the National Planning Policy Framework

Table 1: SHLAA Categories in Rushcliffe SHLAA Report Compared to the Overarching Methodology

Category in Methodology	Category in Rushcliffe SHLAA report
SHLAA ref	Site Reference
Site name	Site Name
Street name	Part of Site Name, where relevant
Locality/area	Parish/town
Type of settlement	Type of site
Ward	N/A
Parish	Parish/Town
Dwelling capacity (net)	Dwelling Capacity
Site area (ha)	Site Area (Hectares)
Developable area (ha)	N/A
Density	Density (Dwellings/Hectare)
Brownfield or greenfield status	Brownfield or greenfield
Brownfield Land Register	Site on Brownfield Land Register
Planning status	Status
Planning application ref	Planning Reference
Planning application type	N/A (Abbreviation of status contained in planning reference)
Type of development	N/A (Type can be deduced from SHLAA conclusion in text and/or planning reference)
Type of site	Dwelling Capacity
Construction status	Status
Existing use	N/A
Site source	Site Source
Constraint – Green Belt	Green Belt
Constraint – Heritage assets.	Historic Environment
Constraint – Ecology	Nature Conservation / Green Infrastructure
Constraint – Agricultural Land	Agricultural Land
Constraint – Flooding	Flood Risk
Constraint – Air quality	Air Quality/Contamination
Constraint – Land contamination	Air Quality/Contamination
Constraint – Highways and access	Highways and Access
Constraint – Coal referral area	Other Issues
Constraint – Ownership issue	Deliverability
Overcoming constraints	Deliverability and/or Overall Summary
Suitability	Suitability
Availability	Availability
Achievability	Achievability
SHLAA conclusion category	Delivery
Assessment conclusion	Overall Summary
Housing delivery source	Deliverability and/or Overall Summary
Units built	Latest dwelling capacity minus number of dwellings remaining
Units remaining	Number of dwellings remaining

2. Site Assessment Results

2.1. The following series of tables contain the 2023 delivery results.

Table 2: Housing Delivery Site by Site 0-5 Years

Site reference	Parish	Site name	Total	0-5 years
SHLAA/ASL/001	Aslockton	Maltings Farm	11	11
SHLAA/ASL/004	Aslockton	Hedgcroft, Abbey Lane	1	1
SHLAA/ASL/025	Aslockton	Jesses Cottage	2	2
SHLAA/BIF/003	Barton in Fabis	South of Clifton	3000	742
SHLAA/BIF/004	Barton in Fabis	Top Yard Farm, Rectory Place	5	5
SHLAA/BIN/006	Bingham	Land north of 72 Carnarvon Place	3	3
SHLAA/BIN/007	Bingham	Daisy Chain 19 Long Acre	1	1
SHLAA/BIN/008	Bingham	Buggins Cottage, Chapel Lane	1	1
SHLAA/BIN/009	Bingham	33 Tithby Road	1	1
SHLAA/BIN/011	Bingham	First Floor over no's 15-17, Union Street	2	2
SHLAA/BIN/012	Bingham	1 Rockingham Grove	1	1
SHLAA/BIN/015	Bingham	Land north of Bingham (planning application)	621	621
SHLAA/BIN/018	Bingham	1 Long Acre East	1	1
SHLAA/BIN/019	Bingham	3 Derry Lane	1	1
SHLAA/BUN/002	Bunny	Land west of Grange Farm, Moor Lane, Bunny	4	4
SHLAA/CAR/001	Car Colston	Carhill Grange	1	1
SHLAA/CB/002	Colston Bassett	Fernhill Farm	1	1
SHLAA/CB/005	Colston Bassett	Land west of School Lane	1	1
SHLAA/CBI/005	Cropwell Bishop	Land East of Church Street	42	42
SHLAA/CBI/006	Cropwell Bishop	4 Hardy's Close	1	1
SHLAA/CBI/008	Cropwell Bishop	Dovecote House, 28 Fern Road	1	1

Site reference	Parish	Site name	Total	0-5 years
SHLAA/CBI/009	Cropwell Bishop	8 Stockwell Lane	2	2
SHLAA/CBI/013	Cropwell Bishop	Manor House, 42 Fern Road	3	3
SHLAA/CBI/016	Cropwell Bishop	Land between 6 and 10 Fern Road	1	1
SHLAA/CBU/001	Cropwell Butler	Lings Barn Farm	1	1
SHLAA/CBU/002	Cropwell Butler	Lings Barn Farm 2	1	1
SHLAA/CBU/003	Cropwell Butler	4 Revell's Farm, The Fosse	1	1
SHLAA/CBU/004	Cropwell Butler	Granary, 1 Rookery Farm	1	1
SHLAA/CBU/005	Cropwell Butler	Wolds Pastures, Hoe Lane	1	1
SHLAA/CLI/001	Clipston on the Wolds	Blackberry Farm, Wolds Lane	1	1
SHLAA/COS/001	Costock	The Market Garden, Ash Lane	1	1
SHLAA/COS/002	Costock	Bunny Hill Riding School	1	1
SHLAA/COS/010	Costock	24A Chapel Lane	1	1
SHLAA/COT/001	Cotgrave	Land RO Mill Lane/The Old Park	210	110
SHLAA/COT/009	Cotgrave	Land South of Hollygate Lane (1)	90	66
SHLAA/COT/010	Cotgrave	Land South of Hollygate Lane (2)	40	40
SHLAA/COT/011	Cotgrave	Land South of Hollygate Lane (3a)	74	74
SHLAA/COT/015	Cotgrave	98 Ring Lees	1	1
SHLAA/COT/060	Cotgrave	Fosse Farm Cottage, The Fosse	1	1
SHLAA/EBR/004	East Bridgford	Old Hill Barn 113A Kneeton Road	1	1
SHLAA/EBR/008	East Bridgford	J Higgs Lowdham Limited, 10 Kirk Hill	1	1
SHLAA/EBR/010	East Bridgford	Land south of Butt Lane	44	44
SHLAA/EBR/011	East Bridgford	Builders Yard, Dovecote Road	1	1
SHLAA/EBR/012	East Bridgford	North of Butt Lane	88	88
SHLAA/EBR/014	East Bridgford	23 Main Street	1	1
SHLAA/EBR/016	East Bridgford	57 Kneeton Road	1	1
SHLAA/EBR/018	East Bridgford	2 Hackers Close	4	4

4. Site Assessments.

Aslockton

Site reference	SHLAA/ASL/001	Site name	Maltings Farm
Parish/town	Aslockton	Site area (hectares)	0.5
Dwelling capacity	11	Density (dwellings/hectare)	20
Site source	Planning Application	Planning reference	17/02582/OUT 18/01569/OUT 21/00981/PAQ
Allocated site reference		Status	Extant outline planning permission
Number of dwellings remaining	11	Source of number of dwellings	Planning Application

Green Belt	Aslockton is not within the Green Belt - No Constraint
Flood Risk	Flood zone 1. EA map indicates that a small area within the northern section of the site is at a medium risk of surface water flooding.
Landscape assessment	Aggregate score in LVIA: 48/100. The site comprises one pastoral field with adjoining farmstead. The site lies immediately north of, and is accessed via Abbey Lane. There are a number of PRow's within the study area as well as conservational interests, but neither are directly related to the site. There is an overall medium landscape value within the study area and an associated scheduled monument 'Cranmer's Mound'. There is a low susceptibility to change due to the perception of the site as an extension of the edge. The sensitivity of the landscape character is low overall. Visually, there are no distinct indicators of value within the study area. There is a medium number of potential receptors due to the site forming part of the village edge, however the overall susceptibility is low. Overall, there is a low visual sensitivity.
Green Infrastructure	Existing woodland should be retained as amenity/natural green space. Site is small and only offers limited opportunities to deliver significant open space. However if brought forward with neighbouring development there may be opportunities to provide more significant GI.
Historic Environment	Maltings Cottages are identified as Local Interest Buildings. Development would impact on their agricultural setting.
Nature conservation	No designated nature conservation assets within the site or in close proximity. However site contains a small deciduous wood, a priority habitat, which is identified within the Biodiversity Opportunity Map. Hedgerows should be protected and enhanced to aid connectivity of woodland and other habitats. Phase 1 habitat survey at the application stage should determine presence of protected or priority species and priority habitats.
AQMA/contamination	Site is not within AQMA.
Community facilities	Limited community facilities within Aslockton, Primary school, tea room, Church Hall and the Cranmer Public House. No convenience store.
Highways and access	Access likely to be achievable, close to edge of village speeds may be high. 30mph extents may need altering. Questionable sustainability.
Accessibility	Bus stops located on Main Street which is a 5 minute walk. Hourly bus service to Bingham and West Bridgford during the day only with no evening or Sunday service. 3 buses weekday and 9 buses at weekends to Newark, 3 services a day to Grantham. Railway station is a five minute walk. Train services to Nottingham, Grantham and Skegness (10 per day).
Other issues	
Agricultural land	Land is Grade 2 (best and most versatile)
Deliverability	Reserved matters application under consideration for 7 dwellings. An additional permission for the conversion of buildings to 4 dwellings approved under 21/00981/PAQ so overall capacity now 11. The site is therefore minor residential development so deliverable within 5

years.

Delivery Period	3 Years	Delivery	5 Year Tranche - 0-5 Years
-----------------	---------	----------	----------------------------

Overall summary

The site is subject to two outline permissions which were both granted on appeal in January 2019. 17/02582/OUT was for up to 10 units and 18/01569/OUT was for up to 6 units. Reserved matters application under consideration for 7 dwellings. The site is therefore minor residential development so deliverable within 5 years. An additional permission for the conversion of buildings to 4 dwellings approved under 21/00981/PAQ so overall capacity now 11

Aslockton

Parish/town	Aslockton	Site area (hectares)	0.9
Dwelling capacity	4	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	20/02861/FUL
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	4	Source of number of dwellings	Planning Application

Green Belt	Aslockton is not within the Green Belt - No Constraint
Flood Risk	Flood zone 1. None of the site identified as being at risk of surface water flooding.
Landscape assessment	Aggregate score in LVIA: 50/100. The site comprises one relatively well maintained pastoral field. The site lies immediately north of a single row of houses of Abbey Lane. There are a number of PRow's within the study area as well as conservational interests, but neither are directly related to the site. There is an overall medium landscape value within the study area and an associated scheduled monument 'Cranmer's Mound'. There is a low susceptibility to change due to the perception of the site as an extension of the edge. The sensitivity of the landscape character is low overall. Visually, there are no distinct indicators of value within the study area. There is a medium number of potential receptors due to the site forming part of the village edge, however the overall susceptibility is low. Overall, there is a low visual sensitivity.
Green Infrastructure	Site is small and only offers limited opportunities to deliver local amenity space. However if brought forward with neighbouring development there may be opportunities to provide more significant GI.
Historic Environment	There are no designated heritage assets within or in close proximity of this site. Records indicate presence of ridge and furrow within the eastern area of the site. Also possible ring ditches. The site is located between two areas where archaeological features of likely Iron Age origin have been identified, and the site has a high potential to contain archaeological remains relating to the surrounding landscape. Site does contain enclosure and ring ditch.
Nature conservation	No nature conservation assets within the site or in close proximity. It is however bounded by hedgerows in varied condition which are a LBAP habitat and the pasture may contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within AQMA
Community facilities	Limited community facilities within Aslockton, Primary school, tea room, Church Hall, small shop and the Cranmer Public House.
Highways and access	One of the reasons for refusal for application 20/02861/FUL was the failure of the application to demonstrate that the width of the vehicular access was sufficient to enable two vehicles to pass and parking and turning provision was not demonstrated wither. A second reasons for refusal was the noise disturbance on the amenity of properties either side of the access on Abbey Lane.
Accessibility	Bus stops located on Main Street which is a 5 minute walk. Hourly bus service to Bingham during the day only with no evening or Sunday service. Railway station is a five minute walk. Train services to Nottingham, Skegness (10 per Day) and Liverpool Lime street (1 per day).
Other issues	
Agricultural land	Land is Grade 2 (best and most versatile)

Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	4	Source of number of dwellings	Planning Application

Deliverability Site submitted on behalf of the landowner within the 2014 SHLAA - no further correspondence. Delivery unknown.

Delivery Period N/A **Delivery** Could be suitable if policy changes 5+ years

Overall summary The site was originally submitted through the 2014 SHLAA as a developer submission with an assumed capacity of around 15 units. The site has subsequently been put forward as a planning application for 4 units. The application was refused in January 2021. Aslockton is not identified as a Key Settlement within the adopted Core Strategy. As Aslockton has limited services and facilities the village has not been identified in Local Plan part 2 as an other village where additional housing development could occur. The site is not constrained by significant heritage, flooding, landscape or biodiversity constraints which cannot be avoided, mitigated or compensated. Although the SHLAA did not previously highlight access as a constraint, the application failed to demonstrate that adequate access was achievable. The site is identified as Grade 2 agricultural land (best and most versatile) and the loss of this resource cannot be mitigated. Recent planning appeal decisions have supported the Council's position that further development (beyond infill or exception sites for local need) should not be permitted in Aslockton. This application for four units was refused on the basis that site would extend the built up area of the settlement and would have a harmful impact on the character and form of the settlement. As the most recent submission, it is assumed the site is now being promoted for 4 units instead of 15.

Aslockton

Site reference	SHLAA/ASL/003	Site name	Land North of Abbey Lane
Parish/town	Aslockton	Site area (hectares)	2.6
Dwelling capacity	65	Density (dwellings/hectare)	26
Site source	Developer/Landowner Submission	Planning reference	15/01204/OUT
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	65	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Aslockton is not within the Green Belt - No Constraint
Flood Risk	Flood zone 1. EA map indicates that approx. half of the site is at low risk of surface water flooding with small pockets to the south of the site at medium risk.
Landscape assessment	Aggregate LVIA score: 61/100. The site comprises one relatively well maintained arable field. The site lies immediately north of a single row of houses of Abbey Lane. There are a number of PRow's within the study area with Footpath FP3 running along the sites eastern boundary. There are some conservational interests within the study area which are not directly related to the site. There is an overall medium landscape value within the study area and an associated scheduled monument 'Cranmer's Mound'. There is a low susceptibility to change due to the perception of the site as an extension of the edge. The sensitivity of the landscape character is low overall. Visually, there are no distinct indicators of value within the study area. There is a medium number of potential receptors due to the site forming part of the village edge, however the overall susceptibility is low. Overall, there is a low visual sensitivity.
Green Infrastructure	Site offers limited opportunities to deliver local amenity space. However if brought forward with neighbouring development there may be opportunities to provide more significant GI. Right of way should be protected and its environment improved. Integration with this route should be delivered.
Historic Environment	There are no designated heritage assets within the site or directly adjacent to the site. The former Maltings are however of local interest. There is enclosure and ring and ditches of unknown date. Desk-based Archaeological Assessment and Geo-physical survey suggests potential for later-prehistoric to Roman features in the centre of the site, and towards the south and southwest and recommends trial trenching to determine significance and appropriate mitigation through recording and design. Aslockton Conservation Area is adjacent to the site however and its setting could be adversely affected.
Nature conservation	No nature conservation assets within the site or in close proximity. It is however bounded by hedgerows in varied condition which are a LBAP habitat. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within a AQMA
Community facilities	Limited community facilities within Aslockton, Primary school, tea room, Church Hall, small shop and the Cranmer Public House.
Highways and access	No objection to planning application from NCC. The principle of a residential development on this parcel of land is acceptable from a highway point of view as a satisfactory junction onto Abbey Lane can be provided to serve the site and as a transport statement has demonstrated that the proposal would not have a detrimental impact on highway safety or on junctions in the vicinity of the development. Improvements to footways to the centre of Aslockton.

Site reference	SHLAA/ASL/003	Site name	Land North of Abbey Lane
Parish/town	Aslockton	Site area (hectares)	2.6
Dwelling capacity	65	Density (dwellings/hectare)	26
Site source	Developer/Landowner Submission	Planning reference	15/01204/OUT
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	65	Source of number of dwellings	Details obtained through external Site Submission

Accessibility	Bus stops located on Main Street which is a 5 minute walk. Hourly bus service to Bingham during the day only with no evening or Sunday service. Railway station is a five minute walk. Train services to Nottingham, Skegness (10 per Day) and Liverpool Lime street (1 per day).
Other issues	
Agricultural land	Land is Grade 2 (best and most versatile)
Deliverability	Representations have been submitted during Local Plan Part 2 and through the review of the strategic plan therefore the site is considered to be available. Planning permission which was refused. The dismissal of the subsequent appeal means that the site is not suitable now.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary

The site was refused permission for up to 65 dwellings in December 2016. It continues to be promoted through the Local Plan process. Aslockton is not identified as a Key Settlement within the adopted Core Strategy. As Aslockton has limited services and facilities the settlement has not been identified in Local Plan Part 2 as an other village where additional housing development could occur. The site is not constrained by significant access, biodiversity or flooding constraints which cannot be avoided, mitigated or compensated. Impacts on the setting of the Conservation Area are a constrain and the landscape assessment determined that the site was of greater sensitivity than neighbouring sites, due to its close proximity to this area. The site is identified as Grade 2 agricultural land. Recent planning appeal decisions (including the decision regarding this site) have supported the Council's position that further development (beyond infill or exception sites for local need) should not be permitted in Aslockton.

Deliverability	Permission expired during 2018/19. No resubmission.

Delivery Period	1 Year	Delivery	5 Year Tranche - 11 -15 Years
-----------------	--------	----------	-------------------------------

Overall summary	Permission expired during 2018/19. No resubmission. No delivery within first 5 years
-----------------	--

Aslockton

Site reference	SHLAA/ASL/022	Site name	South of Abbey Lane
Parish/town	Aslockton	Site area (hectares)	5.5
Dwelling capacity	75	Density (dwellings/hectare)	14
Site source	Developer/Landowner Submission	Planning reference	18/02271/OUT
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	75	Source of number of dwellings	Planning Application

Green Belt	The site is not located within the Green Belt
Flood Risk	Approx. half of the site identified as being in Flood Zone 2 and 3. Small parts of the site at low or medium risk of surface water flooding
Landscape assessment	SN06 – Aslockton Village Farmlands The overall landscape strategy is ‘Conserve and Enhance’. The landscape condition is moderate. The character strength is strong. The area has a relatively uniform character of arable fields, linear blocks and clumps of woodland and small distinctive rural villages (LCA 2009).
Green Infrastructure	Existing hedgerows and scrubland should be retained.
Historic Environment	No Historic Environment Constraints
Nature conservation	No designated nature conservation assets within the site or in close proximity. However site contain hedgerows and scrubland, which are priority habitats and which are identified within the Biodiversity Opportunity Map. Hedgerows should be protected and enhanced to aid connectivity to other habitats. Phase 1 habitat survey at the application stage should determine presence of protected or priority species and priority habitats.
AQMA/contamination	Not within or in the vicinity of AQMA
Community facilities	Limited community facilities within Aslockton, Primary school, tea room, Church Hall, small shop and the Cranmer Public House.
Highways and access	Advice from highways on the planning application is that access can be achieved to the site, subject to certain works.
Accessibility	Bus stops located on Main Street which is a 10-15 minute walk. Hourly bus service to Bingham during the day only with no evening or Sunday service. Railway station is a five minute walk. Train services to Nottingham, Skegness (10 per Day) and Liverpool Lime street (1 per day).
Other issues	
Agricultural land	The site is identified as grade 2 agricultural land (BMV).
Deliverability	No developer on board, a land promoter is involved. The site appears to be in single ownership and no apparent ransom strips.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Outline planning application for up to 75 units refused Jan 2019. Aslockton is not identified as a Key Settlement within the adopted Core Strategy. As Aslockton has limited services and facilities the village has not been identified in Local Plan part 2 as an other village where additional housing development could occur. The site is not constrained by significant access, heritage, landscape or biodiversity constraints which cannot be avoided, mitigated or compensated. Parts of the site are in Flood Zones 2 and 3. The sequential and exception tests must therefore be applied and it must be demonstrated that there are no other available sites at a lower risk of flooding. The site is
------------------------	---

Aslockton

Site reference	SHLAA/ASL/027	Site name	North of Abbey Lane West of Mill Lane
Parish/town	Aslockton	Site area (hectares)	16.8
Dwelling capacity	385	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	385	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is not located within the green belt.
Flood Risk	Parts of the site are identified at varying risk of flooding from both watercourses and from surface water.
Landscape assessment	SN06 – Aslockton Village Farmlands The overall landscape strategy is ‘Conserve and Enhance’. The landscape condition is moderate. The character strength is strong. The area has a relatively uniform character of arable fields, linear blocks and clumps of woodland and small distinctive rural villages (LCA 2009).
Green Infrastructure	The watercourse together with hedgerows should be retained and these features should be retained and enhanced.
Historic Environment	No designated heritage assets within the site. HER indicates that flint and medieval pottery has been found in the site. A view out from the edge of the conservation area may extend over this site from a public right of way.
Nature conservation	No nature conservation designations. The site is intensively farmed, however there are hedgerows around it which may have nature conservation value, together with a watercourse.
AQMA/contamination	The site is not within or within proximity of an Air Quality Management Area.
Community facilities	Limited community facilities within Aslockton, Primary school, tea room, Church Hall, small shop and the Cranmer Public House.
Highways and access	access would only be possible directly off Abbey Lane. Abbey Lane at this point is narrow, has no footways, is national speed limit and has ditches either side of it.
Accessibility	Bus stops located on Main Street which is a 10-15 minute walk. Hourly bus service to Bingham during the day only with no evening or Sunday service. Railway station is a five minute walk. Train services to Nottingham, Skegness (10 per Day) and Liverpool Lime street (1 per day).
Other issues	
Agricultural land	Land is Grade 2 (best and most versatile).
Deliverability	Site is in single ownership with no known house builder involvement.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Aslockton is not identified as a Key Settlement within the adopted Core Strategy. As Aslockton has limited services and facilities the settlement has not been identified in Local Plan Part 2 as an other village where additional housing development could occur. The site is not constrained by significant biodiversity issues. . The site may be in the setting of the conservation area. The site is identified as Grade 2 agricultural land and parts of the site are at risk of flooding. Recent planning

Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	385	Source of number of dwellings	Details obtained through external Site Submission

appeal decisions (including the decision regarding this site) have supported the Council's position that further development (beyond infill or exception sites for local need) should not be permitted in Aslockton.

Bingham

Site reference	SHLAA/BIN/001	Site name	Land off Chapel Lane (north of railway)
Parish/town	Bingham	Site area (hectares)	122
Dwelling capacity	2400	Density (dwellings/hectare)	
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	2400	Source of number of dwellings	Assumption made on best estimate

Green Belt	The land is not located within the green belt.
Flood Risk	Areas of the site are identified as at risk of flooding from watercourses. Areas also identified as at risk from surface water flooding at varying degrees of risk. Some remodelling of flood area on adjacent site may have benefitted part of this area - revised flood maps will need to be submitted to demonstrate this.
Landscape assessment	SN06 – Aslockton Village Farmlands The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength is strong. The area has a relatively uniform character of arable fields, linear blocks and clumps of woodland and small distinctive rural villages (LCA 2009).
Green Infrastructure	The site at present is under intensive farming, therefore opportunity to significantly improve the provision of green infrastructure within the area
Historic Environment	In the setting of spire of Church of St. Mary and All Saint, (Grade 1). Margidunum is a Scheduled Ancient Monument. This is located either side of the Foss Way, including land within the site's north west corner in the vicinity of the B692 roundabout. HER registers flint finds within western area, close to the Foss Way. Potential harm to archaeological features that may be significant excavations to the north for A46 improvement works encountered paleochannels and iron age features. Development should avoid where possible, obscuring views of the spire from Chapel Lane. Linear and circular features around Parson's Hill may indicate possible archaeological remains. Anglo Saxon burial site located adjacent to the site near Parsons Hill (precise location of find unknown). HER identifies Palaeolithic to Neolithic finds (flints) recovered from hill walking. Archaeological investigation – nature of archaeology should be readily detectable via magnetometry survey in support of any allocation and/or planning application.
Nature conservation	Land largely in agricultural use. Hedgerow cover is limited and should be enhanced. A number of drains run across the site and these should be retained and enhanced to provide for wildlife corridors.
AQMA/contamination	The site is not within or in close proximity of an air quality management area. Small areas of made ground within the site which can be a source of potential contamination. Buffer area around petrol station also identified as a potential source of contamination.
Community facilities	Bingham has a full range of facilities available within the town centre.
Highways and access	The northern part of the site could possibly be accessed from the Chapel Lane Roundabout. Accessibility and connectivity would be more difficult to achieve the further east that you go in the site without new accesses onto the trunk road network and bridges over the railway line.
Accessibility	Parts of the site are within proximity to Bingham Railway station but with limited access with direct routes only being along ProWs. There is limited connectivity to the rest of the town in terms of private vehicle access. There are numerous bus stops close to the edges of the west of the site, however buses run on an hourly frequency at best To Bingham Nottingham and

Number of dwellings remaining	2400	Source of number of dwellings	Assumption made on best estimate

	Newark, however the majority of the site is located away from the walking cycling and public transport network.
Other issues	Powerlines cross the site
Agricultural land	The site is mainly grade 2 and grade 3 agricultural land.
Deliverability	One landowner. No house builders involved at present. Neighbouring strategic site has secured a national housebuilder and is progressing well in its early phases.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary A large strategic site which is adjacent to the strategic allocation (North of Bingham) that is currently under construction. There are identified constraints that would require further consideration in particular in relation to accessibility, connectivity and flood risk. Estimated dwelling capacity is a maximum estimate for the site as a whole, although three options have been put forward as site submissions. The site is in single ownership.

Bingham

Bingham

Site reference	SHLAA/BIN/015	Site name	Land north of Bingham (planning application)
Parish/town	Bingham	Site area (hectares)	61.67
Dwelling capacity	1050	Density (dwellings/hectare)	16
Site source	Planning Application	Planning reference	10/01962/OUT and numerous REMS/VARs
Allocated site reference	Policy 21	Status	Under Construction - over 25% of dwellings completed
Number of dwellings remaining	621	Source of number of dwellings	Planning Application

Green Belt	The site is not within the Green Belt.
Flood Risk	The site is primarily at very low risk of flooding (less than 0.1% each year) from rivers but there are areas either side of the Car Dyke which runs through the site that are between low (between 0.1% and 1%) and high (3.3%) risk of flooding from rivers. With similar areas across the site at low to high risk of surface water flooding too. Planning permission has secured the delivery of a flood storage reservoir on the east of Chapel Lane (which has been constructed) along with the Car Dyke Management Scheme works (also complete) to alleviate flooding risks on the site. In addition, two balancing ponds have been built within the site on the west side of Chapel Lane.
Landscape assessment	<p>The site is within the Aslockton Village Farmlands DPZ (SN06). The landscape strength of the DPZ is strong and the landscape condition is moderate. The overall strategy for the DPZ is to conserve and enhance. There are no areas that are protected because of their landscape importance within or adjoining the site.</p> <p>Given the completion of the initial phases of residential development at the northern corner and to the east of Chapel Lane, further development is unlikely to have an adverse impact on the existing landscape character.</p>
Green Infrastructure	The centre of the site is within 400 metres walking distance of areas of existing open space/balancing ponds that have been laid out as part of the ongoing residential development of the site on both the east and west sides of Chapel Lane. The Car Dyke watercourse also runs west-east across the southern part of the site. This has been re-modelled to create a meandering BGI corridor. The site would not result in the loss of accessible BGI.
Historic Environment	<p>There are no designated heritage assets within the site but there are three scheduled monuments in the surrounding area. The nearest is the "Henge 850 metres southeast of Foss Road Farm" which lies beneath a car park within the Moorbridge Road Industrial Estate (approximately 110 metres from the sites southern boundary). The Roman small town of Margidunum lies 300 metres to the north and Bingham Medieval Settlement lies approximately 500 metres to the southeast. The nearest Listed Buildings are mostly located in and around the centre of Bingham with all but two being within Bingham Conservation Area.</p> <p>The HER identifies various flint finds across the site on the west side of Chapel Lane and beyond the northern boundary of the site on the east side of Chapel Lane. These date from Palaeolithic to Neolithic eras and were recovered following a parish fieldwalking project in 2004-2009.</p>
Nature conservation	<p>The site is not adjacent to any designated site of nature or conservation interest.</p> <p>Development of the site may result in the loss of some hedgerows within the site.</p> <p>The provision of new onsite open space has been secured under the existing planning</p>

Site reference	SHLAA/BIN/015	Site name	Land north of Bingham (planning application)
Parish/town	Bingham	Site area (hectares)	61.67
Dwelling capacity	1050	Density (dwellings/hectare)	16
Site source	Planning Application	Planning reference	10/01962/OUT and numerous REMS/VARs
Allocated site reference	Policy 21	Status	Under Construction - over 25% of dwellings completed
Number of dwellings remaining	621	Source of number of dwellings	Planning Application

	permission for the site.
AQMA/contamination	The site is not within or in close proximity of a AQMA.
Community facilities	Bingham has a full range of facilities available within the town centre.
Highways and access	The A46 can be accessed via Chapel Lane and the improved junction with the A6097 (Bridgford Street) north of the allocation.
Accessibility	<p>The site adjoins Bingham key settlement and has direct pedestrian routes into Bingham via Chapel Lane/Kirkhill (approx. 16 minutes walk).</p> <p>The site is within 400 metres of bus stops on Chapel Lane that provides hourly services into Bingham (the Bingham Circular) during the day. In addition planning obligations have been secured for a bus service contribution to be paid towards the provision of new bus services or to extend or re-route existing bus services to serve the development.</p>
Other issues	
Agricultural land	On the east side of Chapel Lane the site is classified as Grade 1 or 2 agricultural land, albeit construction of the approved residential development is now substantially underway in those areas. On the west side of Chapel Lane the site is classified as mainly Grade 3b with an smaller area of Grade 3a land in the north corner upon which the initial phases of residential development have been completed.
Deliverability	A number of phases underway

Delivery Period	5 years	Delivery	5 Year Tranche - 0-5 Years
-----------------	---------	----------	----------------------------

Overall summary	All phases have full planning permission. 3 developers building at present (Barratts, Taylor Wimpey and David Wilson). The site is available now, suitable now and achievable now. Delivery rates should be 100dpa+ until completion.

Bingham

Site reference	SHLAA/BIN/036	Site name	North of Grantham Road East of Bingham
Parish/town	Bingham	Site area (hectares)	5.2
Dwelling capacity	104	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	104	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not located within the green belt
Flood Risk	A very small part of the site is identified as at risk of flooding from watercourses. Parts of the site are also at risk of flooding from surface water.
Landscape assessment	SN06 – Aslockton Village Farmlands The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength is strong. The area has a relatively uniform character of arable fields, linear blocks and clumps of woodland and small distinctive rural villages (LCA 2009).
Green Infrastructure	The site at present is under intensive farming, therefore opportunity to improve the provision of green infrastructure within the area
Historic Environment	No designated heritage assets. HER indicates Palaeolithic to Neolithic flint finds recovered from field walking by BHTA as part of the History of Settlement of Bingham Parish Project, 2004-2009.
Nature conservation	No designated nature conservation interests. The sites are surrounded by hedgerows and there is grassland, which are priority habitats.
AQMA/contamination	The site is not within or in proximity to an air quality management area.
Community facilities	Bingham has a full range of facilities available within the town centre.
Highways and access	Access for the eastern part of the site would have to come from the A52 or through adjacent SHLAA submissions. Access to the western part of the site could only be achieved
Accessibility	The site is on the outskirts to the east of the centre of Bingham Town Centre. The nearest bus stops are located just over 5 minutes walk away on Grantham Road. These bus stops facilitate 5 bus routes, including routes to Grantham and Nottingham. The nearest train station to the site, Bingham Station, is over 20 minutes walk away from the site.
Other issues	A set of power lines cross the edge of the eastern field
Agricultural land	The provisional agricultural land classification is grade 3.
Deliverability	The site is in single ownership and consists of two fields that are not adjacent to each other.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site lies outside of the town of Bingham, which is a key settlement. There are no identified constraints in relation to green belt. The site is some distance from facilities, and certain services are currently identified as being at capacity. Access to the site would involve third party land and creating a new access on to the A52 Trunk Road, which Highways England do not normally allow.
------------------------	--

Bunny

Site reference	SHLAA/BUN/001	Site name	Bunny Brickworks
Parish/town	Bunny	Site area (hectares)	2.4
Dwelling capacity	100	Density (dwellings/hectare)	30
Site source	Housing Allocation	Planning reference	
Allocated site reference	Policy 23	Status	Previously refused planning permission
Number of dwellings remaining	100	Source of number of dwellings	Development Plan Document

Green Belt	The site is inset from the green belt
Flood Risk	Site not within an area identified at risk of flooding from watercourses. East of the site is identified as a source of potential surface water flooding.
Landscape assessment	Landscape appraisal score 52/100. The site is situated on the southern edge of the village of Bunny, adjacent to a landfill site and Bunny Trading Estate, as well as a line of housing. The site includes an area of TPO and slopes gently up towards the south. Within the study area, there is a low landscape value due to the degraded and industrial character of the site's immediate surroundings. The landscape susceptibility is medium as the site would form a block of development and have a perceived increase in density on the sparsely populated village edge. Overall the landscape sensitivity is low. There is very limited visual value associated with the site, as well as a low visual susceptibility arising from the dense vegetation on the site boundaries, which currently screens it from view. The visual sensitivity is overall low.
Green Infrastructure	Hedgerows could be maintained and enhanced in order to provide enhanced green infrastructure, together with the retention of some of the more established trees and scrub within the site.
Historic Environment	No identified heritage assets either within the site or within the setting of the site.
Nature conservation	No identified designations. Part of the site formally a Local Wildlife Site but designation longer applies. Some trees hedgerows and scrub exist within the site which could contain LBAP habitats.
AQMA/contamination	N/A
Community facilities	Facilities within the village (centre of which is around 1km away from the centre of the site) include petrol station/small shop, primary school and a pub.
Highways and access	Existing access onto the A60. A60 is 50MPH at this point.
Accessibility	Bus stop 200 metres from the entrance of the site. Half hourly frequency during the day. Site connected to village by narrow footpath alongside the east of the A60. Footpaths along both sides of Gotham Lane serving the north of the site.
Other issues	
Agricultural land	The site is identified as Grade 3 agricultural land. However it is not in agricultural use and has areas of hardstanding.
Deliverability	The site is allocated for mixed use development. EIA screening submitted. The council has confirmed an EIA would not be required. Outline planning application refused. No known developer therefore 6-10 years.

Delivery Period	3 years	Delivery	5 Year Tranche - 6-10 Years
-----------------	---------	----------	-----------------------------

Overall summary	The site is allocated for mixed use development. EIA screening submitted. The council has confirmed an EIA would not be required. Outline planning application refused. No known

Bunny

Site reference	SHLAA/BUN/004	Site name	Land north of Bunny CofE Primary School
Parish/town	Bunny	Site area (hectares)	3.5
Dwelling capacity	60	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	60	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site lies within the Green Belt.
Flood Risk	Site not within an area identified at risk of flooding from watercourses. Small areas at slight risk of surface water flooding
Landscape assessment	SN04: Cotgrave and Tollerton Village Farmlands The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character (LCA 2009).
Green Infrastructure	Trees and hedgerows should be retained and corridors enhanced.
Historic Environment	In the setting of Grade II listed Garden walls and outbuildings of Walled Garden formerly at Bunny Hall. The Grade I listed Bunny Hall is located to the south east and the Grade I listed Church of St Mary and adjoining wall is located to the south.
Nature conservation	
AQMA/contamination	The site is not within or in the vicinity of an air quality management area.
Community facilities	Facilities within the village (centre of which is around 1km away from the centre of the site) include petrol station/small shop, primary school and a pub.
Highways and access	Unknown if safe access could be achieved onto Loughborough road. This is an A road.
Accessibility	Bus stops located approximately 100 metres from the entrance of the site with an half hourly frequency during the day. No access to any rail connections. Site connected to village by footpath alongside the A60.
Other issues	
Agricultural land	Grade 2 agricultural land.
Deliverability	Site being promoted. No known developer.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site lies adjacent to Bunny which is an other village. The site lies within the green belt and is in the setting of a listed building. There are no apparent physical constraints to development however.

Bunny

Site reference	SHLAA/BUN/005	Site name	Bunny Trading Estate
Parish/town	Bunny	Site area (hectares)	2.4
Dwelling capacity	40	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	40	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is within the Green Belt
Flood Risk	Site not within an area identified at risk of flooding from watercourses. Small areas at slight risk of surface water flooding
Landscape assessment	
Green Infrastructure	Hedgerows could be maintained and enhanced in order to provided enhanced green infrastructure.
Historic Environment	No identified heritage assets either within the site or within the setting of the site.
Nature conservation	
AQMA/contamination	
Community facilities	Facilities within the village (centre of which is around 1km away from the centre of the site) include petrol station/small shop, primary school and a pub.
Highways and access	Access could be provided onto Gotham Lane however visibility to the east may not be satisfactory given the bend in the road. Road is also 60 MPH at this location.
Accessibility	Bus stop 300 metres from the entrance of the site. Half hourly frequency during the day. Site connected to village by footpath alongside the east of the A60. No access to any rail connections.
Other issues	N/A
Agricultural land	The site not is not in agricultural use
Deliverability	Site being promoted. No known developer. Clearance of the site would be required and further investigation into whether a safe access could be provided into and out of the site.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Whilst the site consists of previously developed land, it is located within the Green belt. Redevelopment may be possible so long as the development meets green belt tests, and also the loss of employment policies within the local plan (CS policy 4 and LAPP policy 15). Development capacity should be treated with caution given the green belt location.
------------------------	--

Bunny

Site reference	SHLAA/BUN/009	Site name	Land to the east of Loughborough Road
Parish/town	Bunny	Site area (hectares)	1.1
Dwelling capacity	9	Density (dwellings/hectare)	8
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Green Belt
Flood Risk	The majority of the site is at medium risk of surface water flooding. There is also a small part of the site in flood zone 2 as part of Fairham Brook crosses the site.
Landscape assessment	No detailed assessment undertaken. The overall landscape strategy is Conserve and Enhance. - High quality setting within the former grounds of Bunny Hall within the valley of Fairham Brook. The site lies within the Cotgrave and Tollerton Village Farmlands DPZ. The strength of character of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes.
Green Infrastructure	Area TPO runs along sites eastern and Northern boundary. There are strong hedgerows around the site, together with occasional mature trees along the hedgerow and within the site.
Historic Environment	In the setting of Bunny Hall (Grade 1). Within the conservation area.
Nature conservation	Area TPO runs along sites eastern and Northern boundary. There are strong hedgerows around the site, together with occasional mature trees along the hedgerow and within the site. Tree canopy covers approx. half the site.
AQMA/contamination	N/A
Community facilities	Facilities within the village (centre of which is around 1km away from the centre of the site) include petrol station/small shop, primary school and a pub.
Highways and access	Unknown whether satisfactory access can be achieved.
Accessibility	Bus stops are located adjacent to the site. Half hourly frequency during the day with routes from Loughborough to Nottingham via Bunny. Site connected to village by footpath alongside the east of the A60.
Other issues	
Agricultural land	Not in agricultural use
Deliverability	Owner supporting the building of properties on the site

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	Development of this site would constitute inappropriate development in the Green Belt as it does not constitute limited infilling. The site is located beyond the built-up area of the settlement within the Nottingham and Derby Green Belt, in a location where the Core Strategy identifies that growth will be to satisfy local need and this need will be primarily be met through infill and rural exception development. Other key constraints on the site which would limit the developable area are the extent of tree coverage and the situation of part of the site in Flood Zone 2 due to Fairham Brook crossing the site. The proximity of the Grade 1 Listed Building (Bunny Hall) and location of the site within the conservation area are also key constraints.
------------------------	--

Bunny

Site reference	SHLAA/BUN/010	Site name	Land to the East of Loughborough Road (2)
Parish/town	Bunny	Site area (hectares)	1.8
Dwelling capacity	40	Density (dwellings/hectare)	22
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	40	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Green Belt
Flood Risk	Although in Flood Zone 1, the southern part of the site is identified as being at a high risk of surface water flooding.
Landscape assessment	SN04: Cotgrave and Tollerton Village Farmlands The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character (LCA 2009).
Green Infrastructure	Trees and hedgerows should be retained and corridors enhanced
Historic Environment	Southern part of the site within the setting of the Walled Garden, which is listed. Conservation area adjacent to the site.
Nature conservation	Large trees in several locations across the site. Hedgerows run around the site in addition to through the site itself. Large wooded area adjacent to the site to the east.
AQMA/contamination	The site is not within or in the vicinity of an air quality management area
Community facilities	Facilities within the village (centre of which is around 1km away from the centre of the site) include petrol station/small shop, primary school and a pub.
Highways and access	Unknown if safe access could be achieved onto Loughborough road. This is an A road.
Accessibility	Bus stops adjacent to the western boundary of site. Half hourly frequency during the day with routes from Loughborough to Nottingham. Site connected to village by footpath alongside the east of the A60.
Other issues	
Agricultural land	Grade 2 agricultural land
Deliverability	Site being promoted as recently as 2013. Unknown if there is a developer with an option on the site.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site lies within the Green Belt, on Grade 2 (very good) quality agricultural land. Although there is no risk of flooding from any watercourse, there is a high risk of surface water flooding on part of the site to the south. Directly adjacent to the south lies the walled gardens formerly of Bunny Hall which are Grade II listed and the surrounding parkland which is on the HER. Bunny Conservation Area lies directly adjacent to the site. Development of this site would constitute inappropriate development in the Green Belt as it does not constitute limited infilling. It is in a location where the Core Strategy identifies that growth will be to satisfy local need and this need will be primarily be met through infill and rural exception development.
------------------------	--

Bunny

Site reference	SHLAA/BUN/011	Site name	Brook View Stables, Loughborough Road
Parish/town	Bunny	Site area (hectares)	3.5
Dwelling capacity	70	Density (dwellings/hectare)	
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	70	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Green Belt
Flood Risk	No risk of flooding from any watercourse. Northern half of the site is subject to high risk of surface water flooding. The majority of the remainder of the site is subject to low/medium surface water flooding.
Landscape assessment	SN04: Cotgrave and Tollerton Village Farmlands The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character (LCA 2009).
Green Infrastructure	hedgerows could be maintained and enhanced in order to provided enhanced green infrastructure
Historic Environment	The site is adjacent to the conservation area.
Nature conservation	Local Wildlife Site (Fairham Brook) is adjacent to the most northerly part of the site.
AQMA/contamination	Not within or within close proximity to an air quality management area
Community facilities	Facilities within the village (centre of which is around 1km away from the centre of the site) include petrol station/small shop, primary school and a pub.
Highways and access	Adjacent to A60. Unknown whether safe access and egress could be achieved
Accessibility	Bus stops are located adjacent to the site. Hourly frequency during the day with routes from Loughborough to Nottingham via Bunny. Site connected to village by footpath alongside the east of the A60.
Other issues	
Agricultural land	Grade 3 agricultural land
Deliverability	Promoted by landowner. No known developer on board

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site is located to the south of Bunny within the Green Belt. Current uses are mainly stables and open grass paddocks for horses, as well as free range hens. Land adjacent the site on the opposite side of the A60 is residential ribbon development. Although not within it, Bunny Conservation Area lies adjacent to the North of the site, so considerations for any impacts on its setting would need to be made. The site itself is relatively flat. The site is in walking distance to Bunny village centre, and half-hourly bus service with connections to Nottingham and Loughborough can be accessed directly adjacent to the site.

Cotgrave

Site reference	SHLAA/COT/001	Site name	Land RO Mill Lane/The Old Park
Parish/town	Cotgrave	Site area (hectares)	12.0
Dwelling capacity	210	Density (dwellings/hectare)	15
Site source	Housing Allocation	Planning reference	20/03248/OUT, 22/02336/REM
Allocated site reference	LAPP policy 2.1	Status	Extant outline planning permission
Number of dwellings remaining	210	Source of number of dwellings	Planning Application

Green Belt	The LAPP removes the site from the Green Belt
Flood Risk	The site as identified in the SHLAA is not within an area of flood risk. Parts of the site are at risk of flooding from surface water.
Landscape assessment	Landscape appraisal score 48/100. The site is comprises two arable fields and some rough ground on the north-eastern edge of the village of Cotgrave. To the immediate north of the site is Cotgrave Country Park, which is a considerable recreational resource for the area. There is an overall low landscape value within the study area and a low susceptibility to change due to the perception of the site as an extension of the edge. The sensitivity of the landscape character is low overall. Visually, Cotgrave Country Park is an indicator of value, but there is little else of value. There is a medium number of potential receptors and the site forms part of the backdrop to the village, but it is of overall low susceptibility. Overall, there is a low visual sensitivity.
Green Infrastructure	GI within Cotgrave Country Park and along the Grantham Canal corridor. Potential to improve. Opportunities to enhance the northern and eastern fringes of the site to provide a buffer to these features, together with the public footpath corridor that runs across the western part of the site.
Historic Environment	Geophysics indicate that there is a high probability of archaeology within the western area of the site
Nature conservation	Adjacent to Cotgrave Country Park and the Grantham Canal corridor, which are Local Wildlife Site designations.
AQMA/contamination	None identified.
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Access is achievable together with the adjacent sites through the provision of a roundabout.
Accessibility	Within walking distance of Cotgrave connection, which runs at least 3 times an hour during Monday-Friday daytime, with services in the evenings and weekends. Site is close to Cotgrave precinct and other retail facilities on Bingham Road.
Other issues	
Agricultural land	The land is grade 3 agricultural land
Deliverability	The site is allocated for housing through Local Plan Part 2 and has an outline planning permission granted for up to 210 dwellings and reserved matters under consideration with housebuilder on board. It is considered that part of the development is deliverable within 5r years on this basis.

Delivery Period	6 Years	Delivery	5 Year Tranche - 0-5 Years
-----------------	---------	----------	----------------------------

Site reference	SHLAA/COT/001	Site name	Land RO Mill Lane/The Old Park
Parish/town	Cotgrave	Site area (hectares)	12.0
Dwelling capacity	210	Density (dwellings/hectare)	15
Site source	Housing Allocation	Planning reference	20/03248/OUT, 22/02336/REM
Allocated site reference	LAPP policy 2.1	Status	Extant outline planning permission
Number of dwellings remaining	210	Source of number of dwellings	Planning Application

Overall summary

The site is allocated for housing through Local Plan Part 2 and has an outline planning permission granted for up to 210 dwellings and reserved matters under consideration with housebuilder on board.

Cotgrave

Site reference	SHLAA/COT/002	Site name	Land at Main Road
Parish/town	Cotgrave	Site area (hectares)	2.0
Dwelling capacity	50	Density (dwellings/hectare)	25
Site source	Developer/Landowner Submission	Planning reference	18/01116/FUL
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	50	Source of number of dwellings	Planning Application

Green Belt	The site (COT/A in the Green Belt Review) performs well against Green Belt purposes. The removal of this site for development would represent urban sprawl in an outlying location beyond the settlement boundary. The site scored 16, placing the site within the medium-high category of Green Belt importance. 2 points higher than the score for the area as a whole, mainly due to encroachment into the countryside, this reflects the overall conclusion that the site is of medium-high Green Belt importance.
Flood Risk	Site located within zone 1 flood risk area. Parts of the site at risk from surface water flooding.
Landscape assessment	Landscape appraisal score 48/100. Site COT/002 is a small rectangular piece of equestrian grazing land just to the north of the Cotgrave village boundary. It is slightly removed from the village boundary, with a TPO on its southern edge. There is a low landscape value and susceptibility in the study area due to the high degree of human influence and the perception of the site as an extension of the urban edge, albeit slightly removed from the existing boundary. Overall there is a low landscape sensitivity. The visual value is low, although the presence of Cotgrave Country Park is a positive factor. There is a low visual susceptibility owing to the limited contribution of the site to the visual amenity. Overall there is a low visual sensitivity.
Green Infrastructure	Hedgerows could be maintained and enhanced in order to provided enhanced green infrastructure.
Historic Environment	Nothing identified in the area.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established hedgerows which are a LBAP habitat and the pasture may contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Not within or adjacent to an Air Quality Management Area.
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The site is located some distance away from the local centre. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Extend 30 mph limit / Village Gateway to include site. Extend footway to Fields view.
Accessibility	Within walking distance of main Cotgrave bus service, which runs at least 3 times an hour during Monday-Friday daytime. Relatively close to retail facilities on Bingham Road.
Other issues	
Agricultural land	Grade 3 agricultural land in use for grazing.
Deliverability	Site had developer involved in 2018. Subject to resolving constraints, site is considered deliverable. Site not promoted since the planning application was submitted.

Site reference	SHLAA/COT/002		Site name	Land at Main Road	
Parish/town	Cotgrave			Site area (hectares)	2.0
Dwelling capacity	50		Density (dwellings/hectare)	25	
Site source	Developer/Landowner Submission		Planning reference	18/01116/FUL	
Allocated site reference			Status	Previously refused planning permission	
Number of dwellings remaining	50		Source of number of dwellings	Planning Application	
Delivery Period	N/A		Delivery	Could be suitable if policy changes 5+ years	

Overall summary

Site is considered to be of medium-high Green Belt importance due to its outlying location and the effect of urban sprawl. The site is not however constrained by access, heritage, biodiversity or flooding issues that cannot be mitigated. Planning application refused for residential development on green belt and highways grounds.

Cotgrave

Site reference	SHLAA/COT/003	Site name	Land R/O and to the west of Main Road
Parish/town	Cotgrave	Site area (hectares)	6.3
Dwelling capacity	125	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	125	Source of number of dwellings	Assumption made on best estimate

Green Belt	Adjoining Cotgrave on two boundaries, removal of this site would round of the North West edge of the settlement without intruding beyond existing development along Main Road. It would not result in a reduction in the distance between Radcliffe on Trent or Nottingham's main urban area. However, the absence of encroaching development and close proximity to the historic centre of Cotgrave increase the land's overall performance against Green Belt purposes. Overall the site scores 13 and is therefore of low-medium Green Belt importance.
Flood Risk	the site is not identified as at risk of flooding from watercourses. Parts of the site are at risk of flooding from surface water. Environment Agency advises that 10 metre easements would be required adjacent to any watercourses.
Landscape assessment	LVIA aggregate score: 46/100. The site is a series of arable fields to the north-west of the historic centre of Cotgrave and is part of the setting to 'The Limes', a Grade II listed house. Cotgrave Footpath 15 crosses the site in its south-western corner and contributes to the medium recreational value in the study area. Overall there is a low landscape value. The landscape susceptibility is also low as the site acts as an extension to the settlement with no notable loss of key characteristics. This level of susceptibility occurs despite the proximity of the site to the historic village core. There is low landscape sensitivity overall. Visually, the site has a limited recreational value and does not contribute to the visual amenity for both residential and recreational receptors. It has an overall low visual sensitivity.
Green Infrastructure	None identified within or adjacent to the site. There is a small watercourse within the northern part of the site. This corridor could be maintained and enhanced as green infrastructure to the north of the site.. There is also a public right of way, which could also be enhanced as a GI corridor.
Historic Environment	Nothing on site, but within the setting of listed church which is grade I and the Limes, which is grade II. There is a series of earthworks forming banked enclosures and hollows in southern half of the site. However age and function is unknown.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established mature hedgerows and contains a small watercourse which are a LBAP habitat and the pasture may contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	No issues identified.
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Extend 30 mph limit / Village Gateway to include site. No other issues.
Accessibility	Within walking distance of main Cotgrave bus service, which runs at least 3 times an hour

Site reference	SHLAA/COT/003	Site name	Land R/O and to the west of Main Road
Parish/town	Cotgrave	Site area (hectares)	6.3
Dwelling capacity	125	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	125	Source of number of dwellings	Assumption made on best estimate

Other issues	during Monday-Friday daytime. The site is well located to retail facilities on Bingham Road.
Agricultural land	Grade 3 agricultural land.
Deliverability	Site has house builder involvement. Subject to constraints being resolved, the site is considered deliverable.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is not constrained by significant access, biodiversity, flood risk, or landscape issues and is closely located to the settlement's services and facilities. Proximity of the site to the historic core and setting of listed buildings (most notably the Grade 1 listed church) is a constraint which would require mitigation. This is recognised in the Heritage Assessment, Green belt review and landscape appraisal.
------------------------	--

Cotgrave

Site reference	SHLAA/COT/004	Site name	Land off Woodgate Lane
Parish/town	Cotgrave	Site area (hectares)	4.1
Dwelling capacity	80	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	80	Source of number of dwellings	Assumption made on best estimate

Green Belt	Whilst the sewage treatment works would physically contain the site to the north, this facility is not prominent and development would constitute an urban intrusion into the countryside along Woodgate Lane. There are no elements of inappropriate development, when viewed from the urban edge the land is open countryside in character. Due to the scale of the site, its removal from the Green Belt would not significantly reduce distance between Cotgrave and Nottingham's main urban area. However this does not outweigh the intrusive location. The land scored 14 against Green Belt purposes, reflecting the overall conclusion that it is of low-medium Green Belt importance.
Flood Risk	Not identified as at risk of flooding from any source.
Landscape assessment	Landscape appraisal score 46/100. The site is an arable field on the north-western settlement edge of Cotgrave; it is crossed by Cotgrave Footpath 15 and forms part of a strong rural edge to the settlement. There is an overall low landscape value on site due to the low level of conservation interests and the degree of human influence in the study area. The landscape susceptibility is also low, owing to development of the site resulting in no notable loss of key characteristics and an extension of the urban edge. Overall the landscape sensitivity is low. In terms of visual amenity, there is a recreational value and views to All Saints Church, but overall the value of the visual amenity is low. The site is part of the visual amenity for residential receptors and is situated on the village edge; it has a medium visual susceptibility. Overall there is a low visual sensitivity.
Green Infrastructure	Existing hedgerows around the site could be maintained or enhanced, together with the public right of way corridor through the site. 10m easement either side of watercourse should be incorporated into the design.
Historic Environment	Nothing identified. Public footpath provides corridor view towards the church in the centre of the village.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established hedgerows which are a LBAP habitat. Hedgerow quality and connectivity should be preserved and enhanced. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Nothing identified
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The site is some distance away from the local centre. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Would require upgrade of Woodgate Lane to bring up to adoptable standard, currently a private road in multiple ownership. Possible legal issues.
Accessibility	Within reasonable walking distance of main Cotgrave bus service via a public right of way. The bus runs at least 3 times an hour during Monday-Friday daytime. The site is further away from retail facilities on Bingham Road than other sites, and more so in the case of precinct

Site reference	SHLAA/COT/004	Site name	Land off Woodgate Lane
Parish/town	Cotgrave	Site area (hectares)	4.1
Dwelling capacity	80	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	80	Source of number of dwellings	Assumption made on best estimate

Other issues	Part of the site adjacent to sewage works, which is a bad neighbour and which Severn Trent advise that there should be a buffer in order to allow for future capacity improvements.
Agricultural land	The site is predominantly grade 2 agricultural land (BMV).
Deliverability	Representation received on Publication LAPP. Site is in single ownership. No known house builder with an option. Subject to constraints being resolved, the site is considered deliverable.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is not constrained by biodiversity, GI, flood risk or heritage issues that cannot be avoided or mitigated. The land does however protrude into open countryside and this is recognised within the Green Belt Review. The main constraint is the proposed access off Woodgate Lane, which is currently a private road in multiple ownership. This road would require adoption, resolution of legal ownership, and bringing up to standard.
------------------------	--

Cotgrave

Site reference	SHLAA/COT/005	Site name	Bakers Hollow
Parish/town	Cotgrave	Site area (hectares)	2.4
Dwelling capacity	50	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	50	Source of number of dwellings	Assumption made on best estimate

Green Belt	This area of Green Belt land is contained by development on Bakers Hollow and White Furrows. Its removal and development would not result in a prominent intrusion into the Green Belt, or a reduction in the distance between Cotgrave and Clipston. However, due to the weak defensive boundary, the complete removal of this field from the Green Belt should be considered. This would create a larger intrusion and greater settlement sprawl across more open countryside. Having scored 10, if restricted to the SHLAA site, the Green Belt land within this area is considered being of low Green Belt importance.
Flood Risk	Site not identified as at risk of flooding from any source
Landscape assessment	Landscape appraisal score 49/100. The site is an intensively managed arable field located on the western edge of Cotgrave, which forms a small part of the rural setting to the village. The high degree of human influence contributes to the low landscape value, as does the limited number of conservation interests. There would be no notable loss of key characteristics and the site would appear as an extension to the existing urban edge. Within the study area, there is an inherent low landscape sensitivity in the study area, which is derived from the low landscape value and low landscape susceptibility. In terms of visual amenity there is a low visual value, although there is inherent recreational value in the study area. The visual susceptibility is also low; the site has a limited contribution to the experience of receptors. Overall the visual sensitivity is low.
Green Infrastructure	Opportunity to establish buffer between the site and the wider countryside to provide a soft edge to the settlement
Historic Environment	The site does not contain or preserve the setting of any statutory or non-statutory heritage assets.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established mature hedgerows on three sides. Hedgerow quality and connectivity should be preserved and enhanced. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Nothing identified
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Access Ok. Wish to see new footway to connect site to Village.
Accessibility	The site is around 15 minutes walk from the main Cotgrave bus service, which runs at least 3 times an hour during Monday-Friday daytime. Other less frequent buses run Hourly during Monday-Saturday daytime only. The site is further away from retail facilities on Bingham Road than other sites, and more so in the case of precinct. Narrow footways along Plumtree Rd/Bakers Hollow

Site reference	SHLAA/COT/005	Site name	Bakers Hollow
Parish/town	Cotgrave	Site area (hectares)	2.4
Dwelling capacity	50	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	50	Source of number of dwellings	Assumption made on best estimate

Other issues	
Agricultural land	Land predominantly Grade 3 agricultural land, with small area of Grade 2 agricultural land at the site's south west corner.
Deliverability	Land in single ownership however no known house builder with an option on the land. Promoted still at LAPP examination. Subject to constraints being resolved, the site is considered deliverable.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site is not constrained by significant biodiversity, heritage, flood risk, or access constraints that cannot be avoided or mitigated. Land is adjacent to the main built form of the village. Considered to be of low Green Belt importance.

Cotgrave

Site reference	SHLAA/COT/006	Site name	The Brickyard
Parish/town	Cotgrave	Site area (hectares)	8.2
Dwelling capacity	80	Density (dwellings/hectare)	15
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	80	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is of low importance when assessed against Green Belt purposes which seek to restrict sprawl and prevent the merging of settlements, consequently it scored 3 points less the wider strategic area. The presence of The Brickyard has reduced the ability of the Green Belt to safeguard the land from encroachment. It is also a local interest building which may be of importance to the special character of the area. The Green Belt score of 11 reflects the overall conclusion that the site is of low-medium Green Belt importance.
Flood Risk	Site not at risk of flooding from rivers. Area of the site is identified as at risk of flooding from surface water.
Landscape assessment	Landscape appraisal score 49/100. The site is situated on the south-western edge of Cotgrave and comprises pastoral land and woodland. There is an inherent low landscape value within the study area, owing to the high degree of human influence and detractors, as well as the lack of tranquillity. Landscape susceptibility is also low, although loss of the woodland as both an ecological and recreational resource and the increased prominence of the site in its surroundings will both be issues affecting the susceptibility of the landscape character to development on site. Visually, there is little value except for a minor recreational value arising from the presence of the woodland on the site and at its western boundary. The susceptibility of the visual amenity to change is also low. Overall the landscape sensitivity is low, as is the visual sensitivity.
Green Infrastructure	There are a number of potential opportunities for the enhancement of green infrastructure on the site, including the retention and enhancement of hedgerow corridors, tree clusters and grasslands around the site.
Historic Environment	The Brickyard building is identified as a property of local interest. This early 19th century brickworks includes kilns which survive on site. Development of land around the building may affect its setting. Non designated heritage assets also include a WW2 rifle range at west side of site.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP habitat and the pasture may contain locally important neutral grassland plant species. The site also contains trees and scrubland which may also be a LBAP habitat. Hedgerow quality and connectivity should be preserved and enhanced. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Nothing identified
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The site is some distance away from the local centre. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Access Ok, would wish to new footway to connect site to Village.

Site reference	SHLAA/COT/006	Site name	The Brickyard
Parish/town	Cotgrave	Site area (hectares)	8.2
Dwelling capacity	80	Density (dwellings/hectare)	15
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	80	Source of number of dwellings	Details obtained through external Site Submission

Accessibility	the site is within a 15 minute walk to the main Cotgrave bus service. This runs every 20 minutes to Nottingham. Site is comparatively remote compared to other sites to retail facilities within the village, but is well located for the main primary school.
Other issues	
Agricultural land	The site is identified as being grade 3 agricultural land.
Deliverability	No deliverability information within the submission. Wider area not being promoted for development and ownership is unknown (only the area in the centre of the site was being promoted for development). No house builder involvement.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Site contains a variety of local priority habitats, a local interest building and other heritage assets (WW2 Rifle range). Access issues and flood risk are not however concerns. The Green Belt Review concluded the land is of low-medium Green Belt importance.
------------------------	--

Cotgrave

Site reference	SHLAA/COT/007	Site name	Land behind Firdale (Colston Gate)
Parish/town	Cotgrave	Site area (hectares)	29
Dwelling capacity	170	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	65	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Cotgrave East Strategic Area. It scored 11 within the Green Belt Review 2022. Whilst the A46 offers a strong strategic boundary, the use of this strategic highway as the inner Green Belt boundary would remove a significant area from the Green Belt within which development would be harder to constrain. The topography undulates significantly in this open area, increasing perceptions of urban sprawl. Land either side of Colston Gate is arable and not well contained by established and robust field boundaries. Within the southern area the urban edge is contained by woodland. Development beyond this tree belt would not be connected to the settlement edge. There is some distance between this area and the nearest settlement of Cropwell Bishop. This strategic area is predominantly agricultural and woodland, together with part of a country park and a green burial site. All of these uses are countryside uses. Whilst the Green Belt extends close to the centre of Cotgrave, there are no designated or non-designated heritage assets that would be affected but the areas development to the east of the town.
Flood Risk	Site not at risk of river flooding from watercourses. Site frontage to Colston Gate identified is at risk of flooding from surface water, together with the north and west of the site.
Landscape assessment	As COT7 would not be developed in isolation the landscape assessment has combined COT7 and COT6. Landscape appraisal score 53/100. The area comprises an arable field and a field of rough ground on the eastern rural edge of Cotgrave. The two fields form part of the rural setting to the village, but the human influence within the study area, as well as the lack of conservation interests contribute to the low landscape value. In terms of landscape susceptibility, development of the site would not result in the loss of key characteristics. It would appear as an extension of the urban edge, albeit a finger of development that might increase the prominence of the settlement. Overall, the landscape susceptibility and sensitivity are both low. In terms of visual amenity, there is low visual value, limited to a slight residential amenity. The visual susceptibility is medium due to the relative openness of the site to its surroundings, as well as the moderate number of potential receptors. The visual sensitivity is overall low.
Green Infrastructure	Opportunities to enhance existing hedgerows around the site. Allocation has been enlarged to include substantial GI on elevated land to the south.
Historic Environment	The site does not contain or preserve the setting of any statutory or non-statutory heritage assets.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by some hedgerows which are a LBAP habitat. Hedgerow quality and connectivity should be preserved and enhanced. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Not within or near an Air Quality Management Area
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The site is located some distance away from the village centre. It is proposed that the local centre within Cotgrave is going to be refurbished

Site reference	SHLAA/COT/007	Site name	Land behind Firdale (Colston Gate)
Parish/town	Cotgrave	Site area (hectares)	29
Dwelling capacity	170	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	65	Source of number of dwellings	Assumption made on best estimate

	and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Access should be located so visibility is not obscured by bend to the east. Village Gateway to be relocated to incorporate site. New footway to connect to village required. Consideration to be given to impact on Colston Gate Hollygate Lane junction.
Accessibility	The site is some distance away from the main bus service which runs at least 3 times an hour during Monday-Friday daytime. Other sites are closer to retail and other facilities within the village, but it is not too far to the precinct.
Other issues	Overhead power lines cross the eastern part of the site. The land rises sharply towards the southeast. Would not release the site in isolation.
Agricultural land	Grade 3 agricultural land.
Deliverability	Representation on GNSP Growth Options received from site promoter. Size of allocation has increased to accommodate GI. However no identified house builder for the site.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site is not constrained by biodiversity, heritage or landscape issues which cannot be avoided or mitigated. Development would require new footpath and may require improvements to the Colston Gate/Hollygate Lane. Due to its size, outlying location, open countryside character and prominent topography however, the site scored highly against Green Belt purposes. Site area calculated from red edge plan submitted with Growth Options. Estimated dwelling capacity taken from promoters Growth Options submission.

Cotgrave

Cotgrave

Site reference	SHLAA/COT/009	Site name	Land South of Hollygate Lane (1)
Parish/town	Cotgrave	Site area (hectares)	4.4
Dwelling capacity	75	Density (dwellings/hectare)	17
Site source	Housing Allocation	Planning reference	21/01203/OUT
Allocated site reference	LAPP policy 2.2	Status	Extant outline planning permission
Number of dwellings remaining	75	Source of number of dwellings	Development Plan Document

Green Belt	Site has been removed from the Green Belt through Local Plan Part 2
Flood Risk	Site not identified as at risk of flooding from any source
Landscape assessment	As COT9 would not be developed in isolation the landscape assessment has combined COT9 with COT10. Landscape appraisal score 47/100. Site COT9 comprises a number of fields laid to both arable farming and rough ground on the north-eastern edge of Cotgrave. The study area has a medium landscape value, partly due to the close representativeness to the prevailing landscape character and the high recreational value in the study area. The landscape susceptibility is low; this is through the development of the site causing no notable loss of key characteristics in the study area and the site being perceived as an extension of the existing urban edge. Overall the landscape sensitivity is low. Visually, there is a low value related to the site - the only aspect of value is the views towards All Saints Church in the historic centre of the village. The visual susceptibility is also low, arising from the low level of visibility of the site and the limited contribution that the site has to the experience of residential and recreational receptors in the area. There is an overall low visual sensitivity.
Green Infrastructure	Existing hedgerows could be retained wherever possible and enhanced. Public right of way through the site and enhanced to provide for a green corridor.
Historic Environment	The site does not contain or preserve the setting of any statutory or non-statutory heritage assets.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established hedgerows which are a LBAP habitat and the pasture may contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Not within or in the vicinity of an Air Quality Management Area
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The site is within walking distance of the local centre. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Would wish to see the a new road connecting Hollygate Lane and Colston Gate. May unlock other sites in the area by providing alternative to adjacent junction.
Accessibility	The site is within walking distance of the main Cotgrave bus service, which runs at least 3 times an hour during Monday-Friday daytime. Well located in terms of proximity to the precinct and other community facilities on Candleby Lane.
Other issues	
Agricultural land	Grade 3 agricultural land
Deliverability	Allocated site for housing along with adjacent sites SHLAA/COT/10 and SHLAA/COT 11. Outline planning application for 90 dwellings due to be submitted April 2021. No decision

Site reference	SHLAA/COT/009		Site name	Land South of Hollygate Lane (1)	
Parish/town	Cotgrave			Site area (hectares)	4.4
Dwelling capacity	75		Density (dwellings/hectare)	17	
Site source	Housing Allocation		Planning reference	21/01203/OUT	
Allocated site reference	LAPP policy 2.2	Status	Extant outline planning permission		
Number of dwellings remaining	75	Source of number of dwellings	Development Plan Document		

taken to date, although a decision close, therefore a cautious approach to delivery has been taken to delivery.

Delivery Period	3 years	Delivery	5 Year Tranche - 0-5 Years
-----------------	---------	----------	----------------------------

Overall summary LP2 allocated site for housing along with adjacent sites SHLAA/COT/10 and SHLAA/COT 11. The site is allocated for housing through Local Plan Part 2 and has outline planning application under consideration for up to 90 dwellings with a major housebuilder. No decision taken to date, although a decision close, therefore a cautious approach to delivery has been taken to delivery with delivery commencing in year 4.

Cotgrave

Site reference	SHLAA/COT/010	Site name	Land South of Hollygate Lane (2)
Parish/town	Cotgrave	Site area (hectares)	1.4
Dwelling capacity	40	Density (dwellings/hectare)	29
Site source	Housing Allocation	Planning reference	
Allocated site reference	LAPP Policy 2.2.	Status	Planning application under consideration
Number of dwellings remaining	40	Source of number of dwellings	Development Plan Document

Green Belt	Site has been removed from the Green Belt through Local Plan Part 2
Flood Risk	Site not identified as at risk of flooding from any source
Landscape assessment	Landscape appraisal score 46/100 The site is a field of rough ground nestled on the north-eastern edge of Cotgrave; it currently has a strong vegetated boundary on all sides and an existing line of houses on the western site boundary. The landscape value within the study area is low, mostly due to the influence of adjacent development, including the business park to the north-east of the site, as well as the lack of conservation interests. The study area is of low susceptibility to development of the site, with development of the site resulting in no loss of key characteristics and potential having a beneficial effect as the site aesthetics are improved. Overall the landscape sensitivity is considered to be low. In terms of visual amenity, there is a lack of visual value arising from the presence of the site in the study area. There are a medium number of receptors due to the site's presence on the edge of the settlement, but the strong vegetated site boundaries mean that there is a low susceptibility. Overall, the visual sensitivity is low.
Green Infrastructure	Existing hedgerows could be retained wherever possible and enhanced.
Historic Environment	The site does not contain or preserve the setting of any statutory or non-statutory heritage assets.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established hedgerows which are a LBAP habitat and the pasture may contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Not within or in the vicinity of an Air Quality Management Area
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Would wish to see the a new road connecting Hollygate Lane and Colston Gate. May unlock other sites in the area by providing alternative to adjacent junction.
Accessibility	Within walking distance of Cotgrave connection, which runs at least 3 times an hour during Monday-Friday daytime, with services in the evenings and weekends. Well located in terms of proximity to the precinct and other community facilities on Candleby Lane.
Other issues	
Agricultural land	Grade 3 agricultural land
Deliverability	LP2 allocated this site for housing along with adjacent sites SHLAA/COT/09 and SHLAA/COT 11. Outline planning application submitted Jan 2021 for 45 dwellings by Manor Homes. All three sites comprising the allocation now are subject to outline planning applications. Given

Number of dwellings remaining	40	Source of number of dwellings	Development Plan Document

the site's progression, the site is available now, suitable now and achievable now.

Delivery Period	2 years	Delivery	5 Year Tranche - 0-5 Years
-----------------	---------	----------	----------------------------

Overall summary LP2 allocated this site for housing along with adjacent sites SHLAA/COT/09 and SHLAA/COT 11. Outline planning application submitted Jan 2021 for 45 dwellings by Manor Homes. All three sites comprising the allocation now are subject to outline planning applications. Given the site's progression, the site is available now, suitable now and achievable now.

Cotgrave

Site reference	SHLAA/COT/011	Site name	Land South of Hollygate Lane (3a)
Parish/town	Cotgrave	Site area (hectares)	3.7
Dwelling capacity	74	Density (dwellings/hectare)	20
Site source	Housing Allocation	Planning reference	22/02335/REM
Allocated site reference	LAPP Policy 2.2	Status	Extant outline planning permission
Number of dwellings remaining	74	Source of number of dwellings	Development Plan Document

Green Belt	Site has been removed from the Green Belt through Local Plan Part 2
Flood Risk	Site is within flood zone 1 and is not at risk of surface water flooding.
Landscape assessment	As COT11a would not be developed in isolation the landscape appraisal has assessed COT, 9, COT10 and COT11a as one parcel of land. Landscape appraisal score 54/100. Site COT/011 is a series of arable fields, rough ground and equestrian grazing along Hollygate Lane on the north-eastern edge of Cotgrave. The site stretches from the urban edge towards countryside, but often has a degraded feel with frequent industrial influences. The landscape value of the study area is assessed as medium; this is a result partly of the high recreational value and close representativeness to the prevailing landscape character as assessed by Nottinghamshire County Council. Development of the site would result in an illogical extension of the urban edge as a finger perpendicular to the existing settlement line, extending the settlement into the rural setting. Despite this, the landscape susceptibility is considered to be low and the overall landscape sensitivity is low. Visually, there is a low value, although the Grantham Canal has recreational value. There are a medium number of receptors and a general overall low visibility of the site, feeding into a low visual susceptibility. Overall there is a low visual sensitivity.
Green Infrastructure	There are no GI or open space assets within the site. If developed alongside COT9 multifunctional GI could be delivered.
Historic Environment	There are no designated heritage assets within the site. Grantham Canal is located close to the boundary, however it is unlikely to affect the setting of this site significantly.
Nature conservation	There are no designated nature conservation assets within the site. Grantham Canal is located close to the boundary, however it is unlikely to affect this site significantly.
AQMA/contamination	Not within or in the vicinity of an Air Quality Management Area
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Would wish to see the a new road connecting Hollygate Lane and Colston Gate. May unlock other sites in the area by providing alternative to adjacent junction. Would require multiple points of access to the highway. As well as footway improvements.
Accessibility	Within walking distance of Cotgrave connection, which runs at least 3 times an hour during Monday-Friday daytime, with services in the evenings and weekends. Reasonably located in terms of proximity to the precinct.
Other issues	Would not release the site in isolation.
Agricultural land	Grade 3 agricultural land
Deliverability	LP2 allocated this site for housing along with adjacent sites SHLAA/COT/09 and SHLAA/COT 10. Outline planning application has been submitted (October 2020) by the housebuilder

Site reference	SHLAA/COT/011		Site name	Land South of Hollygate Lane (3a)	
Parish/town	Cotgrave			Site area (hectares)	3.7
Dwelling capacity	74		Density (dwellings/hectare)	20	
Site source	Housing Allocation		Planning reference	22/02335/REM	
Allocated site reference	LAPP Policy 2.2	Status	Extant outline planning permission		
Number of dwellings remaining	74	Source of number of dwellings	Development Plan Document		

(Barratts/DWH) for up to 100 homes. Outline planning permission granted, and reserved matters application under consideration for 74 dwellings. The site is suitable now available now and achievable now.

Delivery Period	3 years	Delivery	5 Year Tranche - 0-5 Years
-----------------	---------	----------	----------------------------

Overall summary LP2 allocated this site for housing along with adjacent sites SHLAA/COT/09 and SHLAA/COT 10. Outline planning application has been submitted (October 2020) by the housebuilder (Barratts/DWH) for up to 100 homes. Outline planning permission granted, and reserved matters application under consideration for 74 dwellings. The site is suitable now available now and achievable now.

Cotgrave

Site reference	SHLAA/COT/012	Site name	Land west of Cotgrave
Parish/town	Cotgrave	Site area (hectares)	14.84
Dwelling capacity	220	Density (dwellings/hectare)	19
Site source	Site submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	250	Source of number of dwellings	Planning Application

Green Belt	This area of Green Belt prevents the expansion of Cotgrave west. The Green Belt in this location prevents the merging of Cotgrave with Clipston and the land, though free from inappropriate development, is visually affected by the prominence of the edge of the town. Whilst identified as being of low-medium Green Belt importance, the prevention of sprawl and subsequent score of 14 indicates the site is of medium rather than low Green Belt importance.
Flood Risk	Site not identified as at risk of flooding from watercourses, however there is a corridor within the site that is identified as at risk from surface water flooding.
Landscape assessment	Landscape appraisal score 58/100 The site is comprises two arable fields on the western edge of Cotgrave; they are crossed by a PRoW and have a second PRoW on their western boundary. Overall, the landscape value of the study area is medium due in part to the amount of recreational value and the attractive rural setting that the western half of the study area forms in relation to the village itself. There is a low landscape susceptibility to change, however, as no notable key landscape characteristics are lost through development of the site. The landscape sensitivity is overall low. In terms of visual amenity, there is a low value, but the susceptibility to change is medium as the site forms part of the rural setting for both recreational and residential receptors. Overall the visual sensitivity is medium.
Green Infrastructure	The existing hedgerows could be retained and enhanced.
Historic Environment	The site does not contain or preserve the setting of any statutory or non-statutory heritage assets.
Nature conservation	There are mature hedgerows along some of the boundaries of the site as well as one through it. Hedgerows are identified as a LBAP priority habitat. There is also a wooded area to the south of the site.
AQMA/contamination	Not within or in the proximity of an Air Quality Management Area
Community facilities	full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The site itself is some distance from the local centre. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available. Majority of facilities are located at the opposite end of the town.
Highways and access	Access ok subject to visibility being proven. Extend 30 mph limit / Village Gateway to include site. Extend footway to back into village.
Accessibility	Majority of the site is some distance away from the main Cotgrave Connection bus service. The 822 runs hourly along Plumtree Road during Monday-Saturday daytime and not at all during evenings and weekends. Less conveniently located for access to retail and community facilities than some other sites, although access to main primary school is reasonably short.
Other issues	Site could not be released without the release of adjacent site at Bakers Hollow. 150 dwellings suggested by site agent and carried forward into the SHLAA. Possibly could

Site reference	SHLAA/COT/012	Site name	Land west of Cotgrave
Parish/town	Cotgrave	Site area (hectares)	14.84
Dwelling capacity	220	Density (dwellings/hectare)	19
Site source	Site submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	250	Source of number of dwellings	Planning Application

	accommodate significantly more as site unconstrained by features and topography.
Agricultural land	The site is identified as grade 2 agricultural land (BMV).
Deliverability	Site being promoted for development with no obvious physical constraints, however there is no indication that a house builder is involved at this stage.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Although the site is not constrained by designated or non-designated biodiversity or heritage assets and there are no significant highways, flood risk or landscape concerns, the land's performance against Green Belt purposes is a notable constraint. 30 MPH limit would need extending.
------------------------	--

Cotgrave

Site reference	SHLAA/COT/013	Site name	Land off Main Road and south of Gozen Lodge
Parish/town	Cotgrave	Site area (hectares)	0.6
Dwelling capacity	15	Density (dwellings/hectare)	25
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>The site is in an outlying location approximately 260 metres north of the current Green Belt boundary. The site could not be removed in isolation as this would weaken the Green Belt north of the village and necessitate the removal of more Green Belt land.</p> <p>Its removal from the Green Belt would result in intrusive development in a prominent location.</p> <p>Although the removal of the land would not significantly reduce between Cotgrave and villages to the north, and it does not contribute to the setting of the historic centre of Cotgrave, given the site's isolated location in a prominent position, and its open countryside character, the site scored 15. This reflects the land's low-medium Green Belt importance.</p>
Flood Risk	Land is within Flood zone 1 and not at risk of surface water flooding.
Landscape assessment	Total aggregate score: 50/100. The site comprises an arable field situated on a ridgeline to the north of the village of Cotgrave. It is isolated from the main village edge, but is situated adjacent to an individual residential property. Overall, there is a medium landscape sensitivity in the study area as a result of the low landscape value and medium landscape susceptibility. The study area is fairly degraded and unattractive with few conservation interests; all of which contributes to the low landscape value. However the site's location as isolated from the main settlement edge contributes to the medium landscape susceptibility; however there is a low landscape sensitivity overall. There are no elements of visual value attributed to the site within the study area, and the site does not contribute to local views - these characteristics contribute to an overall low visual sensitivity.
Green Infrastructure	Site is small and only offers limited opportunities to deliver local amenity space.
Historic Environment	Several archaeological features nearby including Medieval Cemetery, a 17th century windmill (destroyed early 20thC in storm) and a disused quarry site of unknown date. All are on the opposite side of Main Road however. Archaeological investigation advisable.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. Site is bounded by hedgerows which are a local priority habitat. These should be protected and enhanced to aid habitat connectivity.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The site itself is some distance from the local centre. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Questionable from a sustainability and connectivity standpoint. Unlikely to meet visibility criteria at access due to close proximity of crest. Would require 215m x 2.4m visibility to be provided in both directions. Unlikely to be supported by Highway Authority

Site reference	SHLAA/COT/013	Site name	Land off Main Road and south of Gozen Lodge
Parish/town	Cotgrave	Site area (hectares)	0.6
Dwelling capacity	15	Density (dwellings/hectare)	25
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Accessibility	COT13 is approximately 1km from the centre of Cotgrave and the nearest bus stop is 400m south of the site on Main Road. Regular bus services to Nottingham can be accessed at this stop that run every 20 minutes during the day. Relatively close to retail facilities on Bingham Road.
Other issues	
Agricultural land	Site is identified as Grade 3 agricultural land.
Deliverability	Land has recently been promoted during Further Options. Site considered deliverable within 5 years if allocated. No known developer on board.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is not constrained by significant biodiversity, heritage or flood risk issues which cannot be avoided or mitigated. The site's outlying location and unsustainable/unconnected location is a significant constraint. Access onto Main Road is close to the crest on the road and therefore considered unsuitable.
------------------------	--

Cotgrave

Site reference	SHLAA/COT/014	Site name	Land east of Hollygate Lane
Parish/town	Cotgrave	Site area (hectares)	4.7
Dwelling capacity	90	Density (dwellings/hectare)	19
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	90	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>The land is located north of the Grantham Canal and east of Hollygate Lane, both of which are robust defensible boundaries. Development in this location would constitute prominent sprawl into open countryside.</p> <p>Adjacent to the Grantham Canal, the sites provides a rural setting to this local historical feature.</p> <p>Given the sprawl that would occur, the safeguarding of open countryside and the importance of the site to the setting of the canal, the land scored 14. This reflects land of low-medium Green Belt importance.</p>
Flood Risk	Low-lying land adjacent to the Canal is identified as Flood zone 3. 1/100 year risk of flooding.
Landscape assessment	Total aggregate score 53/100. COT/014 comprises arable and rough land just off Hollygate Lane in Cotgrave, immediately south-east of the new Hollygate Park housing development. There is a low landscape value within the study area due to the relatively degraded character and lack of conservation interests, amongst other factors. The site is isolated from the main settlement edge, but its proximity to the existing adjoining development means that the landscape susceptibility is low overall. The low landscape value and susceptibility contribute to a low landscape sensitivity. There are no elements of visual value, but there is a medium visual susceptibility due to the site forming part of the rural outlook for both residential and recreational receptors. Overall the visual sensitivity is low.
Green Infrastructure	The site does not contain any existing GI assets. It is however adjacent to the Canal which is a strategic green corridor. The amenity of this corridor should not be adversely affected. The landscape assessment suggests a buffer screen the development from the canal. Opportunities to enhance the corridor should be incorporated into the design.
Historic Environment	Adjacent to Grantham Canal, a non-designated Heritage asset. Development of COT14 would have a visual impact along an otherwise rural section of the canal route.
Nature conservation	The Grantham Canal runs along the south of the site. The Grantham Canal is identified as a Local Wildlife Site. It is also bounded by hedgerows which are a local priority habitat.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Unlikely to present an issue from a highway perspective subject to achieving requisite visibility standards. Would need new footway along frontage and suitable crossing point over Hollygate Lane to access footway /cycle way into Cotgrave.
Accessibility	The site is 800m from the centre of the village and a bus stop is located just north of the site

Site reference	SHLAA/COT/014	Site name	Land east of Hollygate Lane
Parish/town	Cotgrave	Site area (hectares)	4.7
Dwelling capacity	90	Density (dwellings/hectare)	19
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	90	Source of number of dwellings	Details obtained through external Site Submission

on Hollygate Lane. The N30, N32 and T3 service's currently provides limited bus services to various designations Monday-Saturday daytime only. The 33 runs hourly to Nottingham and Radcliffe on Trent off stops on Harvest Drive. Cotgrave Connection runs every 20 minutes along Colston Gate.

Other issues

Agricultural land

Deliverability

Site is identified as Grade 3 agricultural land.

Agent acting on behalf of Barwood Homes who control land at the site.

Delivery Period

N/A

Delivery

Could be suitable if policy changes 5+ years

Overall summary

The site is not constrained by access issues which cannot be resolved. However its location adjacent to the Grantham Canal may result in adverse affects on the Canal's biodiversity, heritage and recreational interest/benefits. Low-lying land is identified as Flood zone 3 (1/100 year risk of flooding). Green Belt concludes the site to be of low-medium Green Belt importance.

Cotgrave

Agricultural land	
Deliverability	Planning permission for minor residential development. Deliverable within 5 years.

Delivery Period	1 year	Delivery	5 Year Tranche - 0-5 Years
Overall summary	Planning permission for minor residential development. Deliverable within 5 years.		

Cotgrave

Site reference	SHLAA/COT/016	Site name	Cotgrave Wood
Parish/town	Cotgrave	Site area (hectares)	15.7
Dwelling capacity	100	Density (dwellings/hectare)	6
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is located within the Green Belt.
Flood Risk	The site is located in flood zone 1 and is not at risk from surface water flooding.
Landscape assessment	NW04 Cotgrave Wooded Clay Wolds - The character strength of the area is moderate. The area has a rural character with arable farming and pockets of woodland as key features. There is a minor amount of fragmentation where fields have expanded in the south and north of the area and increases in urban elements and alterations to roads exert an increasingly urbanising influence. The site itself is heavily wooded with areas of scrubland forming a screen around Cotgrave from the wider countryside. The site also slopes steeply
Green Infrastructure	The woodland should be protected and enhanced wherever possible.
Historic Environment	No designated assets located within or near to the site.
Nature conservation	No designated sites located within or near to the site. The site is mainly covered by a broadleaf lowland wood. Development could lead to a significant loss of biodiversity=y
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Access cannot be confirmed. No apparent form of access could be achieved from the towns edge
Accessibility	Access to and from the site would be taken from an unnamed road that does not have a footpath on either side and does not provide a direct link to Cotgrave. The nearest bus stop is located in Cotgrave approximately 2km away or a half hour walk. Permissive paths through the woodland connect the site to the southern edge of Cotgrave, providing a quicker public connection to the village, but this may not be desirable.
Other issues	
Agricultural land	Grade 3.
Deliverability	The landowner is promoting the site.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary The site is located within the green belt and provides screening between Cotgrave and the wider countryside. The site slopes significantly and development of the site may lead to the significant loss of biodiversity. Cannot be considered suitable.

Cotgrave

Site reference	SHLAA/COT/061	Site name	South of Hollygate Lane (East)
Parish/town	Cotgrave	Site area (hectares)	8.4
Dwelling capacity	170	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	170	Source of number of dwellings	Assumption made on best estimate

Green Belt	This site comprises half of COT/E within the Green Belt Review. Due to the land's location in the open countryside south of Hollygate Lane and the adverse effects upon the setting of the Grantham Canal COT/E scored less favourably against Green Belt purposes than the neighbouring site COT/D. As the site contains significant elements of urban encroachment and would not result in a significant reduction in the Green Belt between Cotgrave and settlements north and east, the land scored 10 (low Green Belt value) against Green Belt purposes and overall the land is assessed as being of low Green Belt importance.
Flood Risk	Northern part of the site identified as at risk of flooding from rivers and streams. Larger area across the site at risk from surface water flooding.
Landscape assessment	Landscape appraisal score 54/100. Series of arable fields, rough ground and equestrian grazing along Hollygate Lane on the north-eastern edge of Cotgrave. The site stretches from the urban edge towards countryside, but often has a degraded feel with frequent industrial influences. The landscape value of the study area is assessed as medium; this is a result partly of the high recreational value and close representativeness to the prevailing landscape character as assessed by Nottinghamshire County Council. Development of the site would result in an illogical extension of the urban edge as a finger perpendicular to the existing settlement line, extending the settlement into the rural setting. Despite this, the landscape susceptibility is considered to be low and the overall landscape sensitivity is low. Visually, there is a low value, although the Grantham Canal has recreational value. There are a medium number of receptors and a general overall low visibility of the site, feeding into a low visual susceptibility. Overall there is a low visual sensitivity.
Green Infrastructure	There are no GI or open space assets within the site. If developed alongside COT9 multifunctional GI could be delivered.
Historic Environment	There are no designated heritage assets within the site. Grantham Canal is located close to the boundary, however it is unlikely to affect the setting of this site significantly.
Nature conservation	There are no designated nature conservation assets within the site. Grantham Canal is located close to the boundary, however it is unlikely to affect this site significantly. Ponds and hedgerows within the site that should be retained and or enhanced in terms of their nature conservation value
AQMA/contamination	Not within or in the vicinity of an Air Quality Management Area
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Site access would have to be achieved through the proposed allocation
Accessibility	Within walking distance of Cotgrave connection, which runs at least 3 times an hour during Monday-Friday daytime, with services in the evenings and weekends. Reasonably located in terms of proximity to the precinct.

Site reference	SHLAA/COT/061		Site name	South of Hollygate Lane (East)	
Parish/town	Cotgrave			Site area (hectares)	8.4
Dwelling capacity	170		Density (dwellings/hectare)	20	
Site source	Developer/Landowner Submission		Planning reference		
Allocated site reference			Status	No formal allocation or no extant planning permission for residential development	
Number of dwellings remaining	170		Source of number of dwellings	Assumption made on best estimate	
Other issues					
Agricultural land	Grade 3 agricultural land				
Deliverability	Site being promoted by national house builder. Delivery would be dependent on if access can be achieved through the proposed allocation.				
Delivery Period	N/A		Delivery	Could be suitable if policy changes 5+ years	
Overall summary	Proximity to the Grantham Canal and the biodiversity, heritage and recreational benefits it provides is a constraint. The site constitutes a prominent intrusion into the Green Belt / open countryside and the land adjacent to the Canal is within flood zones 2 and 3.				

Cotgrave

Site reference	SHLAA/COT/064	Site name	Woodlands, The Fosse
Parish/town	Cotgrave	Site area (hectares)	0.65

Cotgrave

Site reference	SHLAA/COT/065	Site name	Land East of Main Road / North of Field View Road
Parish/town	Cotgrave	Site area (hectares)	12
Dwelling capacity	12	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	12	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Green Belt. Not assessed as part of Green Belt review supporting Local Plan Part 2
Flood Risk	The site is not identified as at risk of flooding from any source
Landscape assessment	Not assessed as an individual site. SN04 – Cotgrave and Tollerton Village Farmlands The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character (LCA 2009).
Green Infrastructure	Significant tree and scrub cover, loss of which cannot be mitigated
Historic Environment	HER identifies an old quarry and a medieval cemetery in the vicinity of the site
Nature conservation	The site is heavily covered by trees and scrubland.
AQMA/contamination	Not within or within the vicinity of an Air Quality Management Zone
Community facilities	Full range of facilities exist within Cotgrave. Cotgrave is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. It is proposed that the local centre within Cotgrave is going to be refurbished and upgraded in the near future. A leisure Centre and gym is also available.
Highways and access	Access would be directly onto 60MPH road
Accessibility	Within walking distance of Cotgrave connection, which runs at least 3 times an hour during Monday-Friday daytime, with services in the evenings and weekends. Reasonably located in terms of proximity to convenience store.
Other issues	
Agricultural land	Grade 3 agricultural land
Deliverability	No known developer on board

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	There are potentially several barriers of this site. It is currently green belt, however the site is also covered by significant tree and scrub, the loss of which could not be mitigated.		

Cotgrave

Site reference	SHLAA/COT/066	Site name	Land rear of 59 Bingham Road
Parish/town	Cotgrave	Site area (hectares)	0.03

Cotgrave

Site reference	SHLAA/COT/067	Site name	Land at Owthorpe Road, Cotgrave
Parish/town	Cotgrave	Site area (hectares)	23
Dwelling capacity	300	Density (dwellings/hectare)	
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	300	Source of number of dwellings	Assumption made on best estimate

Green Belt	Land is located within the Green Belt. However the area was not assessed within the LP Green Belt Review as the land had not yet been submitted for allocation. The land is in an outlying location. Its removal would comprise significant urban sprawl along Owthorpe Road. Land slopes towards the A46 increasing the sites visibility from this direction.
Flood Risk	Site not identified as being at risk of flooding from any source
Landscape assessment	NW04 - Cotgrave Wooded Clay Wolds - Landscape condition is moderate (Features are well maintained, although fields have expanded for intensive arable farming). Character Strength is moderate (rural character with pockets of woodland as key features. Roads exert an increasingly urbanising influence).
Green Infrastructure	
Historic Environment	There are no heritage assets identified within the site, or in close proximity
Nature conservation	There are no designated assets within the site or in lose proximity. Land is bounded by woodland to the north - a local priority habitat.
AQMA/contamination	
Community facilities	Some distance away from facilities within Cotgrave
Highways and access	Site is adjacent to Owthorpe Road and the junction with the A46.
Accessibility	Connected to Cotgrave by Owthorpe Road. No footpaths or cycle routes. No public transport passes the site.
Other issues	Site is being proposed as a mixed use site. Broad assumption made that half the site could be residential. This will confirmed after conclusions of Growth Study are published in 2020
Agricultural land	Grade 3
Deliverability	Land is in single ownership and submission during Growth Study call for sites indicates the land is available. Until publication of the Growth Study however the delivery of this site is considered unknown.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
Overall summary	Land is in single ownership and submission during Growth Study call for sites indicates the land is available. Site is being promoted for an employment led mixed use scheme and not to be available for housing.		

Cropwell Bishop

Site reference	SHLAA/CBI/001	Site name	Land to the south of Nottingham Rd and east of Kinoulton Rd (1)
Parish/town	Cropwell Bishop	Site area (hectares)	3.5
Dwelling capacity	70	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	80	Source of number of dwellings	Assumption made on best estimate

Green Belt	Apart from nos. 67 and 69 Nottingham Road, the se (CBI/G in the Green belt Review) is very much open countryside with a clear delineation between it and Nottingham Road. There is also a lack of defensible boundary to the south of the site. Scoring 13, it is considered that the site is low-medium importance when assessed against the purposes of including land within it.
Flood Risk	The site is not identified as at risk of flooding from watercourses. The northern part of the site is identified as at risk of flooding from surface water.
Landscape assessment	The landscape assessment scored CBI1a: 54/100. The site comprises one pastoral field and lies south of the main thoroughfare through Cropwell Bishop, Nottingham Road. There is a good network of PRoW's within the study area and a recreational walkway along Grantham Canal. There are some conservational interests within the study area which are not directly related to the site. There is an overall medium landscape value within the study area and an attractive village setting. There is a low susceptibility to change due to the perception of infill and a continuation of the existing. The sensitivity of the landscape character is low overall. Visually, there are no distinct indicators of value within the study area. There is a medium number of potential receptors due to the site forming part of the village core, situated along a busy road. The overall visual susceptibility is medium as the site as the site is part of the village setting. Overall, there is a relatively low visual sensitivity.
Green Infrastructure	The site does not contain any existing GI or publicly accessible open spaces. Limited opportunities to provide significant GI. Site is in close proximity to the Memorial Playing Fields.
Historic Environment	There are no designated heritage assets within or adjacent to the site. It is however a former Gypsum quarry site and unquarried area include medieval building platforms, hollows and trackway. Local interest buildings to north on corner of Kinoulton Road and Nottingham Road.67 and 69 Nottingham Road are identified as local interest buildings .
Nature conservation	There are no identified nature conservation interests within the site. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	The site is not within an air quality management area.
Community facilities	Cropwell Bishop contains a shop, public houses, hairdresser, butcher and sandwich shop.
Highways and access	Should be acceptable, would prefer to see access taken off of Nottingham Road as Kinoulton Road Junction has substandard visibility.
Accessibility	The village is served by the 833, which connects Nottingham to Radcliffe on Trent/Sutton Cum Granby via Cropwell Bishop. The service is between Monday and Saturday only with no service on Sundays. The site is around 500-600 metres from the village's convenience shop and the primary school but closer to those retail and community buildings Nottingham Road.

Site reference	SHLAA/CBI/001	Site name	Land to the south of Nottingham Rd and east of Kinoulton Rd (1)
Parish/town	Cropwell Bishop	Site area (hectares)	3.5
Dwelling capacity	70	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	80	Source of number of dwellings	Assumption made on best estimate

Other issues	There is a mine entry identified in the south eastern corner of the site. Possible past gypsum activities or trial bore for coal.
Agricultural land	The site is identified as Grade 3 agricultural land. The land is left as pasture.
Deliverability	Representation received during consultation on LAPP Further Issues and Options, indicating willingness to develop the site.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary

LP2 allocated one site for housing development at Cropwell Bishop (CBI/005). It was not considered appropriate or necessary to identify any further sites adjacent to the village. Any further significant development adjacent to the village would be contrary to adopted local plan policies which states development should be limited to infill or exception sites for local needs. This site is not constrained by access, heritage, biodiversity or flooding issues that cannot be mitigated and it is located close to public transport services on Nottingham Road. Although within the Green Belt the land is deemed to be of low-medium Green Belt importance. The land is considered to have greater landscape and visual sensitivity than some other sites on the edge of Cropwell Bishop.

Cropwell Bishop

Site reference	SHLAA/CBI/002	Site name	Land north of Memorial Hall (1)
Parish/town	Cropwell Bishop	Site area (hectares)	4.2
Dwelling capacity	90	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	90	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>Site CBI/A in the Green Belt Review. The site rises lightly away from Nottingham Road. Whilst the site is in agricultural use, it is well contained from the wider countryside by the Grantham Canal to the west, the Memorial Hall and Grounds to the south and hedgerow to the north.</p> <p>Whilst development of the site would encroach into the countryside, sprawl would be limited to the west by the course of the Grantham Canal, and would not significantly reduce the distance between Cropwell Bishop and Cotgrave to the west. With a score of 12, it is concluded that the site is of low-medium importance when assessed against the five purposes for including land within it.</p>
Flood Risk	The site is not at risk of flooding from watercourses. Parts of the site are at risk of flooding from surface water.
Landscape assessment	Landscape appraisal score 58/100. The site comprises two arable fields and lies north of Cropwell Bishop Memorial Hall off Nottingham Road. There is a good network of PRoW's within the study area with Cropwell Bishop BW10 and FP12 running along the sites eastern and western boundaries. there is also a recreational walkway along Grantham Canal adjacent to the site. There are some conservational interests within the study area which are not directly related to the site. There is an overall medium landscape value within the study area and an attractive village setting. There is a low susceptibility to change due to the perception of a slight increase in urbanisation. The sensitivity of the landscape character is low overall. Visually, there are some indicators of value relating to Grantham Canal. There is a medium number of potential receptors due to the site forming part of the village edge. The overall visual susceptibility is medium as the site as the site is part of the village setting. Overall, there is a medium visual sensitivity.
Green Infrastructure	There is existing Green Infrastructure adjacent to the canal in the form of the Grantham Canal corridor. In addition there is a public footpath that runs along the sites western boundary and a public bridleway along its eastern boundary. Hedgerow corridors should be retained and enhanced, along with the public right of way corridors.
Historic Environment	There are no designated historic assets within or adjacent to the site. The Grantham canal is a historic non-designated heritage asset and runs along the western boundary of the site. Archaeology consists of clay pits which cut through medieval banks and ridge and furrow remains.
Nature conservation	There are no identified nature conservation interests within the site. The field is in agricultural use. The western boundary is a substantial corridor of the former Grantham Canal. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	The site is not located within and Air Quality Management Area.
Community facilities	Cropwell Bishop contains a shop, public houses, hairdresser, butcher and sandwich shop.

Site reference	SHLAA/CBI/002	Site name	Land north of Memorial Hall (1)
Parish/town	Cropwell Bishop	Site area (hectares)	4.2
Dwelling capacity	90	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	90	Source of number of dwellings	Details obtained through external Site Submission

Highways and access	<p>Mercia Avenue is 5.7m wide and Hoe View Road is 6.8m wide. Based in these widths the highway design guide states they can serve up to 150 and 400 dwellings respectively. As there is no record of any accidents at either of the two junctions, and they appear to meet the requisite visibility standards, there are no specific Highway related issue that would prohibit up to 120 dwellings on this site being put forward for consideration.</p> <p>The east and the west of the site would have to remain undeveloped in order to provide a 10 metre easement to a watercourse, in part to retain two public rights of way.</p>
Accessibility	The village is served by the 833, which connects Nottingham to Radcliffe on Trent/Sutton Cum Granby via Cropwell Bishop. The service is between Monday and Saturday only with no service on Sundays. The site is around 500-600 metres from the village's convenience shop and the primary school but closer to those retail and community buildings Nottingham Road.
Other issues	The east and the west of the site would have to remain undeveloped in order to provide a 10 metre easement to a watercourse, to retain two public rights of way within the site and to protect the setting of the Grantham Canal, a non-designated heritage asset.
Agricultural land	The site is identified as Grade 3 agricultural land.
Deliverability	The site is being promoted on behalf of the landowner by a house builder.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	<p>LP2 allocated one site for housing development at Cropwell Bishop (CBI/005). It was not considered appropriate or necessary to identify any further sites adjacent to the village. Any further significant development adjacent to the village would be contrary to adopted local plan policies which states development should be limited to infill or exception sites for local needs. The site is not significantly constrained by heritage, biodiversity, landscape or flooding issues that cannot be mitigated and it is located close to public transport services on Nottingham Road. Although within the Green Belt the land is deemed to be of low-medium Green Belt importance. Access is achievable for up to 120 dwellings off Mercia Avenue although this would have to be through an existing residential cul-de-sac.</p>
------------------------	--

Cropwell Bishop

Site reference	SHLAA/CBI/003	Site name	Land north of Memorial Hall (2)
Parish/town	Cropwell Bishop	Site area (hectares)	5.7
Dwelling capacity	110	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	70	Source of number of dwellings	Assumption made on best estimate

Green Belt	Site CBI/B in the Green Belt Review is contained on its western boundary by the Grantham Canal, however it differs from site CBI/A in terms of its Green Belt importance as part of the site is more prominent than CBI/A on its approach to Hoe Hill and its width is greater in distance. It is considered therefore that development of the site would lead to a greater degree of sprawl. Scoring 14, it is concluded that the site is towards the upper end of low-medium green belt importance when assessed against the purposes of including land within it.
Flood Risk	The site is not at risk of flooding from watercourses. Parts of the site are at risk of flooding from surface water flooding.
Landscape assessment	Landscape appraisal assesses CBI2 and CBI3 together as CBI3 would not be developed in isolation. Land scored 66/100. The site comprises four fields of arable and rough/ equestrian character. The site lies north of Cropwell Bishop Memorial Hall. There is a good network of PRoW's within the study area with Cropwell Bishop BW10 and FP12 running along the sites eastern and western boundaries. there is also a recreational walkway along Grantham Canal adjacent to the site. There are some conservational interests within the study area which are not directly related to the site. There is an overall medium landscape value within the study area and an attractive rural character. There is a medium susceptibility to change due to the rural character of the site and the visibility. The sensitivity of the landscape character is medium overall. Visually, there are some indicators of value relating to Grantham Canal. There is a medium number of potential receptors due to the site forming part of the village edge. The overall visual susceptibility is medium as the site as the site is part of the village edge. Overall, there is a medium visual sensitivity.
Green Infrastructure	Existing hedgerows and grassland that has the quality to be identified as a Local Wildlife Site, a non-statutory designation. The Grantham Canal corridor also runs along the western boundary. Where possible, the grassland should be retained and its biodiversity value enhanced, together with the retention of hedgerows and corridors along the public rights of way.
Historic Environment	There are no designated historic assets within or adjacent to the site. The Grantham canal is a historic non-designated heritage asset and runs along the western boundary of the site. It is recorded as a monument record in the County Council's Historic Environment Record. Archaeology consists of clay pits which cut through medieval banks and ridge and furrow remains.
Nature conservation	One of the fields in the northern half of the site is identified as a Local Wildlife Site (Hoe hill Pasture) on the basis that it is a rich, dry calcareous grassland community. The Grantham Canal adjacent to the site is also identified as a Local Wildlife Site on the basis that it is a long stretch of disused canal providing a good variety of aquatic, marsh, and dry grassland communities. The remaining three fields are in agricultural use. The western boundary is the substantial corridor of the former Grantham Canal. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.

Site reference	SHLAA/CBI/003	Site name	Land north of Memorial Hall (2)
Parish/town	Cropwell Bishop	Site area (hectares)	5.7
Dwelling capacity	110	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	70	Source of number of dwellings	Assumption made on best estimate

AQMA/contamination	The site is not within or adjacent to an air quality management zone.
Community facilities	Cropwell Bishop contains a shop, public houses, hairdresser, butcher and sandwich shop.
Highways and access	Access off of Nottingham Road unlikely to be acceptable without significant alterations to infrastructure. A four arm roundabout incorporating Kinoulton Road would be required which may prove difficult to engineer to the appropriate standard. Would most likely require 3rd party land. The access would be better located to the West of the Village Hall but again this would require 3rd party land. If only 150 dwellings (in combination with CBI02) it may be possible to serve off of Mercia Avenue.
Accessibility	The village is served by the 33 and 833, which connects Nottingham to Radcliffe on Trent/Sutton Cum Granby via Cropwell Bishop and to Bingham respectively. The service is between Monday and Saturday only with no service on Sundays. The site is around 500-600 metres from the village's convenience shop and the primary school but closer to those retail and community buildings Nottingham Road.
Other issues	None identified
Agricultural land	The site is identified as grade 3 agricultural land.
Deliverability	The site is being promoted by agents acting on behalf of the landowner. There is no known developer interest in the site through an option agreement.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	<p>LP2 allocated one site for housing development at Cropwell Bishop (CBI/005). It was not considered appropriate or necessary to identify any further sites adjacent to the village. Any further significant development adjacent to the village would be contrary to adopted local plan policies which states development should be limited to infill or exception sites for local needs. The site is not constrained by flooding issues that cannot be mitigated. The site includes a local wildlife site, ridge and furrow and clay pits. All of which would be lost if the site were allocated and developed. In addition the site is deemed to be of greater landscape and visual sensitivity than the majority of sites on the edge of Cropwell Bishop. Access onto Nottingham Road would require significant road improvements. Proximity to the Grantham Canal, a historical, recreational and biodiversity asset is also a constraint. Impacts on this locally important feature should be mitigated. Absence of recent representation from landowner indicates that land may not be deliverable.</p>
------------------------	---

Cropwell Bishop

Site reference	SHLAA/CBI/004	Site name	Land north of Fern Road (2)
Parish/town	Cropwell Bishop	Site area (hectares)	1.5
Dwelling capacity	35	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	35	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Site CBI/F in the Green Belt Review. Land scored 11 against Green Belt purposes representing a site of low Green Belt importance. Whilst part of the area assessed is prominent, it is considered that the vast majority of the area assessed is contained by development and therefore scores low in relation to sprawl and countryside encroachment.</p> <p>It is considered that the land is of low Green Belt importance when assessed against the purposes for including land within it.</p>
Flood Risk	The site is within Flood zone 1. A small area in the north western corner of site is at a low risk of surface water flooding.
Landscape assessment	Aggregate LVIA Score: 61/100. The site comprises two small fields of pastoral and rough/equestrian character. The site lies north of Fern Road on the eastern edge of the village. There is a good network of PRoW's within the study area with Cropwell Bishop FP2 intersecting the site. There are some conservational interests within the study area which are not directly related to the site. There is an overall medium landscape value within the study area and an attractive rural edge to the village. There is a medium susceptibility to change due to the rural character of the site. The sensitivity of the landscape character is medium overall. Visually, there are no indicators of value. There is a medium number of potential receptors due to the site forming part of the village edge. The overall visual susceptibility is medium as the site as the site is part of the village edge. Overall, there is a low visual sensitivity.
Green Infrastructure	Existing hedgerows provide wildlife corridors/shelter belts and a footpath which crosses the site north/south. There are limited opportunities, due to the scale of the site to provide comprehensive multi-functional GI. Areas of natural greenspace which preserve hedgerows/create shelter belts, protect the RoW and create wildlife corridors and amenity space could be incorporated into the design of the scheme.
Historic Environment	There are no designated historic assets within the site. Site contains building platforms, trackways and remains of field system, central to site (along Cropwell Butler Road frontage). Two buildings of local interest are located in close proximity. 54/56 Fernhill Road is opposite the site and 6 Stockwell Lane is next to the site. Setting of St Giles Church (Grade I) may be adversely affected.
Nature conservation	There are no designated nature conservation assets within the site or in close proximity. It is however bounded by and contains hedgerows in varied condition which are a LBAP habitat. Maps indicate a pond is located on the site's northern boundary (these are also a LBAP habitat). The pasture may contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Cropwell Bishop contains a shop, public houses, hairdresser, butcher and sandwich shop.

Site reference	SHLAA/CBI/004	Site name	Land north of Fern Road (2)
Parish/town	Cropwell Bishop	Site area (hectares)	1.5
Dwelling capacity	35	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	35	Source of number of dwellings	Assumption made on best estimate

Highways and access	No concerns in principle, provided subsequent applications can demonstrate visibility can be achieved. There is problem with speeding in this area with vehicles approaching from the North. Visibility is constrained by bends in the road either side as well as a crest in the vertical alignment. May require extension of existing 30mph limit / village gateway signs. We would also wish to see the footway back into the village improved.
Accessibility	The village is served by the 33 and 833, which connects Nottingham to Radcliffe on Trent/Sutton Cum Granby via Cropwell Bishop and to Bingham respectively. The service is between Monday and Saturday only with no service on Sundays. Site is close to convenience store and primary school and some of the retail and community facilities on Fern Road/Nottingham Road.
Other issues	
Agricultural land	The land is classified as Grade 3 agricultural land.
Deliverability	The site is being promoted by agents acting on behalf of the landowner. There is no known developer interest in the site through an option agreement.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary LP2 allocated one site for housing development at Cropwell Bishop (CBI/005). It was not considered appropriate or necessary to identify any further sites adjacent to the village. Any further significant development adjacent to the village would be contrary to adopted local plan policies which states development should be limited to infill or exception sites for local needs. The site is not constrained by flooding or access issues that cannot be mitigated. Although within the Green Belt the land is deemed to be of low Green Belt importance. The site is however constrained by locally important heritage features, including ridge and furrow, and local priority habitats. The impacts on the former could not be mitigated. It is also deemed to be of greater landscape and visual sensitivity than other sites on the edge of Cropwell Bishop.

Cropwell Bishop

Site reference	SHLAA/CBI/005	Site name	Land East of Church Street
Parish/town	Cropwell Bishop	Site area (hectares)	4.8
Dwelling capacity	85	Density (dwellings/hectare)	18
Site source	Planning Application	Planning reference	20/02281/REM
Allocated site reference	LAPP Policy 7	Status	Under Construction - less than 25% of dwellings or no completions
Number of dwellings remaining	42	Source of number of dwellings	Planning Application

Green Belt	The site will be removed from the green belt upon the adoption of Local Plan Part 2
Flood Risk	The site is within Flood zone 1. Land within the lower lying area of the site, closer to Cropwell Bishop and the Sewage Treatment Works is identified as being at a high risk of surface water flooding, with medium and low risk areas also.
Landscape assessment	Aggregate LVIA score: 54/100. The site is part of a wider arable field on the north-eastern edge of Cropwell Bishop and is crossed by / bounded by a number of public rights of way. There is an overall low landscape sensitivity within the site. The landscape value is medium, owing in part to the well managed quality of the study area, which offers a variety of recreational assets, as well as including the attractive rural fringe to the village. The landscape susceptibility is low despite the loss of a small portion of the rural setting to the village. Visually, the rural setting contributes to the value, but this remains low overall given the lack of other contributors. The visual susceptibility, however, is medium as the site forms part of the rural outlook for both residential and recreational receptors in the study area. The visual sensitivity overall is medium.
Green Infrastructure	The site is bounded by public footpaths which link Cropwell Bishop with the wider rights of way network and open countryside. These should be retained and impacts on their recreational enjoyment minimised through provision of multifunctional GI and open spaces.
Historic Environment	There are no designated historic assets within the site. One building of local interest is located in close proximity on Church Street. Heritage Environment Record identifies a bank and hollows off church Street. It is also close to the historic village core. Archaeology - pump and spring on spring hill, central to site. No archaeological investigation however springs are often a focus for activity
Nature conservation	There are no designated nature conservation assets within the site or in close proximity. It is however bounded by hedgerows in varied condition which are a LBAP habitat. Hedgerow quality and connectivity should be preserved and enhanced in accordance with wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Cropwell Bishop contains a shop (co-op), public houses, hairdresser, butcher and sandwich shop. These are all within a 5 minute walk of the site.
Highways and access	Would probably require mini roundabout due visibility constraints. If only 70 dwellings, a single point of access would suffice.
Accessibility	The village is served by the 833, which connects hourly to Bingham via the Vale of Belvoir and West Bridgford. There is no service in the evenings or weekends. Ad hoc services serving Radcliffe on Trent. Site is particularly close to convenience store and primary school.
Other issues	The area to the north is adjacent to the Sewage Treatment Works and residential development in this area is not compatible with this use.
Agricultural land	The land is classified as Grade 3 agricultural land.

Cropwell Bishop

Site reference	SHLAA/CBI/010	Site name	Hoe View Road Garage Block
Parish/town	Cropwell Bishop	Site area (hectares)	0.08
Dwelling capacity	0	Density (dwellings/hectare)	
Site source	Site Survey	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not located within the green belt
Flood Risk	The site is not identified as at risk of flooding from any source
Landscape assessment	N/A
Green Infrastructure	N/A
Historic Environment	No historic assets
Nature conservation	No nature conservation interests
AQMA/contamination	The site is not within or in the vicinity of an air quality management area
Community facilities	Cropwell Bishop contains a shop, public houses, hairdresser, butcher and sandwich shop.
Highways and access	access to former garage court exists
Accessibility	The village is served by the 822, which connects hourly to Bingham via the Vale of Belvoir and West Bridgford. There is no service in the evenings or weekends. Ad hoc services serving Radcliffe on Trent. The site is around 500-600 metres from the village's convenience shop and the primary school but closer to those retail and community buildings Nottingham Road.
Other issues	
Agricultural land	Not in agricultural use
Deliverability	Not being promoted for development. Constrained by layout of neighbouring properties

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	The site is constrained in terms of the layout of surrounding properties, leading to possible amenity issues for existing and future occupants. Unsuitable for development
------------------------	--

Cropwell Bishop

Site reference	SHLAA/CBI/011	Site name	Land north of Fern Road
Parish/town	Cropwell Bishop	Site area (hectares)	7.5
Dwelling capacity	150	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	150	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is located within the Green Belt.
Flood Risk	The site is located within flood zone 1. The site is not a risk from surface water flooding.
Landscape assessment	VB01 Vale of Belvoir - The character strength of the area is strong. The area has a consistent rural character with few urban features. It is a flat arable landscape with large regular field patterns and pockets of woodland. The pattern varies closer to the settlements, where smaller pastoral fields create a sense of enclosure. Land alters between arable farming which is slightly more open and the more enclosed and intimate pastoral fields. However the rural landscape has distinctive church towers and spires which are visible above scattered wooded edged settlements and occasional individual large farm buildings are consistent across the DPZ. The site rises fairly steeply from N-S and the southern part of the site is prominent.
Green Infrastructure	Existing hedgerows provide wildlife corridors/shelter belts. There are limited opportunities, due to the scale of the site to provide comprehensive multi-functional GI. Areas of natural greenspace which preserve hedgerows/create shelter belts and create wildlife corridors and amenity space could be incorporated into the design of the scheme.
Historic Environment	There are no designated assets within or near to the site.
Nature conservation	There are no designated nature conservation assets within the site or in close proximity. It is however bounded by and contains hedgerows in varied condition which are a LBAP habitat.
AQMA/contamination	The site is not within or in the vicinity of an air quality management area
Community facilities	Cropwell Bishop contains a shop, public houses, hairdresser, butcher and sandwich shop.
Highways and access	Access cannot be confirmed. Unknown if site can be accessed from the west through the new development. Access onto Fern Road would be straight onto a National Speed Limit road.
Accessibility	The village is served by the 33 and 833, which connects Nottingham to Radcliffe on Trent/Sutton Cum Granby via Cropwell Bishop and to Bingham respectively. The service is between Monday and Saturday only with no service on Sundays. Site is near to convenience store and primary school and some of the retail and community facilities on Fern Road/Nottingham Road.
Other issues	
Agricultural land	Grade 3.
Deliverability	Site is being promoted by a landowner.

Delivery Period		Delivery	Could be suitable if policy changes 5+ years
-----------------	--	----------	--

Overall summary	The site does not appear to be constrained by most formal designations. The site lies within the Green Belt. The site slopes steeply in parts and is prominent to the south.

Cropwell Bishop

Site reference	SHLAA/CBI/018	Site name	Land at Cropwell Bishop
Parish/town	Cropwell Bishop	Site area (hectares)	60
Dwelling capacity	1100	Density (dwellings/hectare)	
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	1100	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Green Belt
Flood Risk	The site is not at risk of flooding from rivers or the sea. Pockets of land at risk from varying degrees of surface water flooding
Landscape assessment	SN06 – Aslockton Village Farmlands The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength is strong. The area has a relatively uniform character of arable fields, linear blocks and clumps of woodland and small distinctive rural villages (LCA 2009).
Green Infrastructure	There is existing Green Infrastructure I in the form of the Grantham Canal corridor. There is also existing woodland on Hoe Hill. Hedgerow corridors should be retained and enhanced, along with the public right of way corridors.
Historic Environment	Grantham Canal 7 mile post is Grade II Listed and located east of Foss Bridge. Grantham Canal itself is a non-designated heritage asset. Many buildings and structures along its length are identified within the HER. This includes locks and kilns. Site includes significant length of the canal between the Foss Way and Cropwell Bishop. If developed it could significantly affect the historic rural setting of the canal, including the various buildings, structures and features, including the listed 7 mile post. Potential harm to archaeological features. Especially around Hoe Hill. Avoid development encroaching close to the canal. Utilise this undeveloped area to enhance the canal as a GI asset/corridor. Archaeological investigation – nature of archaeology should be readily detectable via magnetometry survey in support of any allocation and/or planning application.
Nature conservation	Local Wildlife Sites within the site 2/500 Grantham Canal and 2/506 Berry Hill pond. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated. Woodland and canal corridor would need protecting and enhancing.
AQMA/contamination	Not within or within proximity to an air quality management area. Significant areas identified as potentially contaminated land from quarrying activities and areas of worked ground.
Community facilities	Cropwell Bishop contains a shop, public houses, hairdresser, butcher and sandwich shop.
Highways and access	Access would have to come of Nottingham Road, the old Fosse Way and/or Cropwell Bishop Road, all of which are country roads. A46 T runs close to the site.
Accessibility	The village is served by the 33 and 833, which connects Nottingham to Radcliffe on Trent/Sutton Cum Granby via Cropwell Bishop and to Bingham respectively. The service is between Monday and Saturday only with no service on Sundays. The site is some distance from the village's convenience shop and the primary school but closer to those retail and community buildings Nottingham Road.
Other issues	Submitted for mixed use development with a large area of employment land to the west of the submission. There are a number of public rights of way that pass through the site.

Site reference	SHLAA/CBI/018	Site name	Land at Cropwell Bishop
Parish/town	Cropwell Bishop	Site area (hectares)	60
Dwelling capacity	1100	Density (dwellings/hectare)	
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	1100	Source of number of dwellings	Assumption made on best estimate

	Intensive Livestock Unit on western edge of site submitted.
Agricultural land	Grade 3 agricultural land.
Deliverability	The area being promoted contains a significant amount of third party land. Query whether all of the site should be considered as available.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary

The site has been promoted with a dwelling capacity of between 450-650 dwellings. Even discounting areas of the site that is woodland and the Grantham Canal, this dwelling capacity is low compared to similar sized sites across the Borough. The site is located within the Green Belt. It is a large site relative to the adjacent village of Cropwell Bishop. There are a number of identified constraints to the site that would require some form of mitigation. Some areas of the wider site have not been promoted for development by the respective landowner(s) so uncertain as to whether the whole of the submission is available for development.

East Bridgford

Site reference	SHLAA/EBR/001	Site name	Land behind Kirk Hill (east)
Parish/town	East Bridgford	Site area (hectares)	0.7
Dwelling capacity	15	Density (dwellings/hectare)	15
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Green Belt	Part of larger Green Belt assessment site EBR/H. The wider site is assessed. The site is the only one which lies partially within the conservation area. Whilst it performs an average Green Belt function in preventing sprawl, it does perform well in assisting in preventing countryside from encroachment and in preserving the setting of historic settlement. Scoring 17 it is concluded that the site is of medium to high Green Belt importance when assessing against the purposes for including land within it.
Flood Risk	Site not at risk of flooding from any source.
Landscape assessment	LVIA aggregate score: 55/100. The site comprises one field with rough/ equestrian character and is accessed via Kirk Hill. There is a strong network of PRow's within the study area with East Bridgford FP26 running along the sites south-western boundary. There are some conservational interests within the study with the site forming part of the local conservation area. There is an overall high landscape value within the study area along with a strong aesthetic character, attractive rural setting and distinctive townscape. There is a low susceptibility to change due to the perception of infill. The sensitivity of the landscape character is low overall. Visually, there are no indicators of value. There is a low number of potential receptors due to the site forming part of the edge of a small village. The overall visual susceptibility is low due to the strong level of screening by vegetation and built form. Overall, there is low visual sensitivity.
Green Infrastructure	None on site. Existing hedgerows could be retained and enhanced as GI, together with footpath corridors.
Historic Environment	The northern part of the site lies within the East Bridgford Conservation Area. Potential for undefined archaeology given edge of village position. Listed buildings to the north and west have no relationship to this site, mill buildings relate to village rather than rural environment
Nature conservation	The site is not one of nature conservation importance. There are hedgerows around the site and hedgerows are identified as a LBAP priority habitat.
AQMA/contamination	Not within or in close proximity to an air quality management zone.
Community facilities	East Bridgford contains a primary school, pub, small shop, post office and small village hall. The site is within walking distance of the majority of these facilities.
Highways and access	Current access unlikely to be suitable without widening. Would need a overall corridor of 7.5m to provide acceptable road. Access point directly adjacent to 60mph speed limit, hence applicant would need to prove visibility is achievable. Speed Limit / Gate Gateway to be relocated.
Accessibility	Rushcliffe Villager runs in close proximity to the site. There is an hourly service during the day, with none in the evenings or Sundays. The site is very well located in relation to the village's centre. Further bus routes in proximity to the site include the 91, 354, N49 and N50.
Other issues	
Agricultural land	The site is predominantly Grade 2 agricultural land with a small area to the west classified as

Site reference	SHLAA/EBR/001	Site name	Land behind Kirk Hill (east)
Parish/town	East Bridgford	Site area (hectares)	0.7
Dwelling capacity	15	Density (dwellings/hectare)	15
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Deliverability	Grade 3. Although the site is not in agricultural use and part of the site is a tennis court.
	Site being promoted on behalf of landowner. No known option for development or house builder involved.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
------------------------	-----	-----------------	--

Overall summary	There is capacity within the local medical centre to accommodate additional residents. The site is not at risk of flooding and impacts on local biodiversity assets could be mitigated. Due to the importance of the site to the setting of East Bridgford's' historic core the land is considered to be of medium-high Green Belt importance. Access onto Kirk Hill is currently unsuitable and land is partly identified as Grade 2 agricultural land (best and most versatile).
------------------------	--

East Bridgford

Site reference	SHLAA/EBR/002	Site name	Land behind Kirk Hill (west)
Parish/town	East Bridgford	Site area (hectares)	3.4
Dwelling capacity	78	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	78	Source of number of dwellings	Assumption made on best estimate

Green Belt	Part of larger Green Belt assessment site EBR/H. The wider site is assessed. The site is the only one which lies partially within the conservation area. Whilst it performs an average Green Belt function in preventing sprawl, it does perform well in assisting in preventing countryside from encroachment and in preserving the setting of historic settlement. Scoring 17 it is concluded that the site is of medium to high Green Belt importance when assessing against the purposes for including land within it.
Flood Risk	Site not at risk of flooding from any source.
Landscape assessment	As EBR2 would not be developed in isolation, the appraisal has assessed EBR1 and EBR2 as one site. Landscape appraisal score 67/100. The site comprises two fields with rough/equestrian character and is accessed via Kirk Hill. There is a strong network of PRoW's within the study area with East Bridgford. FP26 intersecting the site and FP27 running along its south-eastern boundary. There are some conservational interests within the study with the site forming part of the local conservation area. There is an overall medium landscape value within the study area along with a strong aesthetic character, attractive rural setting and distinctive townscape. There is medium susceptibility to change due to the perceived loss of historic vernacular through increased urbanisation. The sensitivity of the landscape character is medium overall. Visually, there are no indicators of value. There is a medium number of potential receptors due to the site forming part of the village edge near the busy A6097 road. The overall visual susceptibility is medium due to the scale of the site within a small village and views between gaps in vegetation. Overall, there is medium visual sensitivity.
Green Infrastructure	None on site. Existing hedgerows could be retained and enhanced as GI, together with footpath corridors.
Historic Environment	The site frontage facing onto Kirk Hill lies within the East Bridgford Conservation Area.
Nature conservation	The site is not one of nature conservation importance. There are hedgerows around the site and hedgerows are identified as a LBAP priority habitat.
AQMA/contamination	Not within or in close proximity to an air quality management zone.
Community facilities	East Bridgford contains a primary school, pub, small shop, post office and small village hall. The majority of the site is within walking distance of the majority of these facilities.
Highways and access	Access of 40mph road in village. Would require measures to reduce speeds and make acceptable, including lowering speed limit, traffic calming, frontage development and new footway linking into East Bridgford.
Accessibility	Rushcliffe Villager runs in close proximity to the site. There is an hourly service during the day, with none in the evenings or Sundays. The site is very well located in relation to the village's centre. Further bus routes in proximity to the site include the 91, 354, N49 and N50.
Other issues	
Agricultural land	Site is around one-third Grade 2 and two-thirds Grade 3 agricultural land.
Deliverability	Site being promoted on behalf of landowner. No known option for development or house

Site reference	SHLAA/EBR/002	Site name	Land behind Kirk Hill (west)

Dwelling capacity	78	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	78	Source of number of dwellings	Assumption made on best estimate

builder involved.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary

There is capacity within the medical centre to accommodate additional residents. The site is not at risk of flooding and impacts on local biodiversity assets could be mitigated. Due to the importance of the site to the setting of East Bridgford's historic core the land is considered to be of medium-high Green Belt importance. The land is considered to be the most landscape and visually sensitive of all the sites on the edge of East Bridgford. Access onto Kirk Hill is also currently unsuitable and would require footpath on Kirk Hill. Furthermore the land is partly identified as Grade 2 agricultural land (best and most versatile).

East Bridgford

Site reference	SHLAA/EBR/003	Site name	Land North of Kneeton Road
Parish/town	East Bridgford	Site area (hectares)	12.1
Dwelling capacity	124	Density (dwellings/hectare)	10
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	124	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site scored 16 and 17 which means that the site is of medium-high green belt importance when assessed against the purposes for including land within it. Due to the adverse impact on the neighbouring heritage assets and the historic setting of East Bridgford the land is fundamentally constrained by the Green Belt designation.
Flood Risk	Not at risk of flooding from watercourses. However a small part of the site is at risk of surface water flooding.
Landscape assessment	Landscape appraisal score 64/100. The site comprises one well maintained arable field and is located immediately north of Kneeton Road. There is a good network of PRoW's within the study area with East Bridgford FP12 intersecting the site and FP11 running along its north-western boundary. There are some conservational interests within the study with the site adjacent to a listed building and forming part of the local conservation area. There is an overall medium landscape value within the study area with attractive long distance views of the surrounding landscape. There is medium susceptibility to change due to the perceived increased prominence of the village. The sensitivity of the landscape character is medium overall. Visually, there are no indicators of value. There is a low number of potential receptors due to the site forming part of the village edge. The overall visual susceptibility is medium due to the scale of the site within a small village and long distance views and prominent ridgeline. Overall, there is medium visual sensitivity.
Green Infrastructure	Nothing identified on-site The existing hedgerows should be retained where possible and enhanced, and the footpath corridor could be enhanced as a GI corridor
Historic Environment	Development of this portion of land would impact on two heritage assets which are a distinct and unique feature to East Bridgford (namely the setting of East Bridgford Manor and the East Bridgford conservation area).The Manor and Manor Lodge are both Grade II listed buildings. The site protects the setting of these buildings. The land adjacent to Kneeton Road, including Manor Lodge, is within East Bridgford's Conservation Area. Impacts are unlikely to be mitigated by screening which itself would affect their setting.
Nature conservation	The site is not one of nature conservation importance. There are hedgerows around the site and hedgerows are identified as a LBAP priority habitat.
AQMA/contamination	Not within or in close proximity to an air quality management zone.
Community facilities	East Bridgford contains a primary school, pub, small shop, post office and small village hall. The majority of the site is within walking distance of the majority of these facilities.
Highways and access	Two access points of 30mph and 60mph road on edge of village. Would require significant measures to reduce speeds and make acceptable, including lowering speed limit, traffic calming, frontage development and new footway linking back into East Bridgford.
Accessibility	The site is some distance away from the main bus route which is located south of the site along Main Street. There is an hourly service during the day, with none in the evenings or Sundays. The site reasonably close to some local facilities but not as well located as some other sites.

Site reference	SHLAA/EBR/003	Site name	Land North of Kneeton Road
Parish/town	East Bridgford	Site area (hectares)	12.1
Dwelling capacity	124	Density (dwellings/hectare)	10
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	124	Source of number of dwellings	Assumption made on best estimate

Other issues	Public footpaths cross the site and run along its north western boundary.
Agricultural land	Site is predominantly classified as Grade 3 agricultural land, with part classified as Grade 2.
Deliverability	Site is being actively promoted by Taylor Wimpey.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Site is located adjacent to East Bridgford. There is capacity within the medical centre to accommodate additional residents. Whilst the site is not constrained by biodiversity or flooding issues that can not be avoided or mitigated, impacts on the setting of the Manor and Manor Lodge are a significant constraint that cannot be mitigated. Due to the impact on these buildings and the setting of the conservation area the land is deemed to be of medium-high Green Belt importance. Landscape and visual sensitivity is also greater than the majority of other sites. The land is also identified as high grade (best and most versatile) land.

East Bridgford

East Bridgford

Site reference	SHLAA/EBR/005	Site name	Land at Lammas Lane
Parish/town	East Bridgford	Site area (hectares)	1.5
Dwelling capacity	35	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	35	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>The site is identified as EBR/C in the Green Belt Review that supports local plan part 2. It lies east of Lammas Lane and is consists of small field. The site is relatively flat and contains no urbanising features therefore any potential development of the site would lead to countryside encroachment and some sprawl. As with the majority of sites around East Bridgford, it is considered that there is a potential impact on historic setting of East Bridgford if the site were to be developed.</p> <p>Scoring 13, it is concluded that the site is of low-medium Green Belt importance when assessed against the purposes for including land within it.</p>
Flood Risk	Site not identified as at risk of flooding from any source.
Landscape assessment	<p>Landscape appraisal score 58/100 The site is made up of one pastoral field with minimal management and is accessed via Lammas Lane running adjacent to the sites north-western boundary. There is a network of PRoW's within the study area with East Bridgford FP19 running adjacent to its south-western boundary. There are some conservational interests within the study with the site forming part of the local conservation area. There is an overall medium landscape value within the study area due to a well vegetated appearance and tranquil character. There is medium susceptibility to change due to sense of a loss of enclosure along Lammas Lane, loss of tranquillity and a perceived increase in urbanisation. The sensitivity of the landscape character is medium overall. Visually, there are no indicators of value. There is a low number of potential receptors due to a high level of screening by vegetation. The overall visual susceptibility is low due to screening. Overall, there is low visual sensitivity.</p>
Green Infrastructure	Nothing identified on-site The existing hedgerows should be retained where possible and enhanced.
Historic Environment	Site is in the setting of East Bridgford's' conservation area, with its boundary running along the eastern. Panoramic (wide) view (medium to long distance) identified across the site.
Nature conservation	The site is not one of nature conservation importance. There are hedgerows around the site and hedgerows are identified as a LBAP priority habitat.
AQMA/contamination	Not within or in close proximity to an air quality management zone.
Community facilities	East Bridgford contains a primary school, pub, small shop, post office and small village hall. The site is within walking distance of the majority of these facilities.
Highways and access	Unlikely to be acceptable without upgrading Lammas Lane to allow for two way traffic, and new footways.
Accessibility	The site is some distance away from the main bus route. Rushcliffe Villager runs in close proximity to the site. There is an hourly service during the day, with none in the evenings or Sundays. The site is comparatively less well located in terms of proximity to local services and compared to other sites.
Other issues	

Site reference	SHLAA/EBR/005	Site name	Land at Lammas Lane
Parish/town	East Bridgford	Site area (hectares)	1.5
Dwelling capacity	35	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	35	Source of number of dwellings	Details obtained through external Site Submission

Agricultural land	Site is identified as grade 2 agricultural land.
Deliverability	Site is promoted for development by landowner. No house builder involved.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Site is located adjacent to East Bridgford. There is capacity within the medical centre to accommodate additional residents. Although not constrained by significant heritage, biodiversity, landscape or flooding issues, access is unacceptable without upgrading Lammas Lane to allow two way traffic and providing a footpath. The site is also identified as containing Grade 2 agricultural land.

East Bridgford

Site reference	SHLAA/EBR/006	Site name	Closes Side Lane (west)
Parish/town	East Bridgford	Site area (hectares)	0.9
Dwelling capacity	20	Density (dwellings/hectare)	22
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	20	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>This site and EBR7 form part of a larger Green Belt block identified in the LAPP Green Belt Review as EBR/D. EBR/D is situated to the north east of the settlement and is flat in nature. As with most sites that surround the settlement, it is adjacent to the conservation area and it is considered that its removal from the Green Belt and subsequent development may have an impact on the setting of the conservation area.</p> <p>With a score of 13, it is considered that the site is of low to medium Green Belt importance when assessed against the purposes for including land within it.</p>
Flood Risk	The site is not at risk of flooding from any source.
Landscape assessment	<p>Landscape appraisal score 46/100. The site comprises one field with pastoral and rough/equestrian characteristics. The site lies immediately north of Closes Side Lane. There is a network of PRoW's within the study area. There are some conservational interests within the study with the site lying adjacent to the local conservation area. There is an overall low landscape value within the study area due to a number of human detractors and some areas of poor management. There is a low susceptibility to change with no real loss of character and the perception of an extension to the urban fringe. The sensitivity of the landscape character is low overall. Visually, there are no indicators of value. There is a medium number of potential receptors as the site forms part of the village edge. The overall visual susceptibility is low due to the urban feel of the village edge. Overall, there is low visual sensitivity.</p>
Green Infrastructure	Nothing identified on-site The existing hedgerows should be retained where possible and enhanced.
Historic Environment	<p>Properties adjacent to this land on Cherry Holt Lane are within East Bridgford's Conservation Area. Impacts on the conservation area is limited as the site is bounded to west and south by existing modern housing development. Whilst the site provides a rural aspect, this is not prominent from within the conservation area. Any impact likely minimal subject to usual development practice.</p>
Nature conservation	The site is not one of nature conservation importance. There are hedgerows around the site and hedgerows are identified as a LBAP priority habitat.
AQMA/contamination	Not within or in close proximity to an air quality management zone.
Community facilities	East Bridgford contains a primary school, pub, small shop, post office and small village hall. The site is within walking distance of the majority of these facilities.
Highways and access	Fosters Close is currently unadopted but should be shortly. Once complete the new road/access should be able to serve up to 50 dwellings in total.
Accessibility	The site is around 10-15 minute walk from the main bus route which runs hourly during the day. There is an hourly service during the day, with none in the evenings or Sundays. The site reasonably close to some local facilities but not as well located as some other sites.
Other issues	
Agricultural land	The site is identified as Grade 2 agricultural land.

Site reference	SHLAA/EBR/006	Site name	Closes Side Lane (west)
Parish/town	East Bridgford	Site area (hectares)	0.9
Dwelling capacity	20	Density (dwellings/hectare)	22
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	20	Source of number of dwellings	Assumption made on best estimate

Deliverability Site being promoted by landowner. No known house builder involved.

Delivery Period N/A **Delivery** Could be suitable if policy changes 5+ years

Overall summary Site is located within East Bridgford. There is capacity within the medical centre to accommodate additional residents. The site is not constrained by significant heritage, biodiversity, landscape or flooding issues and access from Fosters Court is acceptable. The land is considered to be of low-medium Green Belt importance. It is however identified as containing Grade 2 agricultural land.

East Bridgford

Site reference	SHLAA/EBR/007	Site name	Closes Side Lane (east)
Parish/town	East Bridgford	Site area (hectares)	1.0
Dwelling capacity	20	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	20	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	This site occupies the same area as Green Belt site EBR/D. It is situated to the north east of the settlement and is flat in nature. As with most sites that surround the settlement, it is adjacent to the conservation area and it is considered that its removal from the Green Belt and subsequent development may have an impact on the setting of the conservation area. With a score of 13, it is considered that the site is of low to medium Green Belt importance when assessed against the purposes for including land within it.
Flood Risk	The site is not at risk of any source of flooding.
Landscape assessment	As EBR7 would not be developed in isolation without EBR6, the appraisal has assessed both as one parcel of land. Landscape appraisal score 48/100. The site is made up of two fields with pastoral and rough/ equestrian characteristics. The site lies immediately north of Closes Side Lane. There is a network of PRoW's within the study area with East Bridgford FP19 running adjacent to the sites north-eastern boundary. There are some conservational interests within the study with the site lying adjacent to the local conservation area. There is an overall low landscape value within the study area due to a number of human detractors and some areas of poor management. There is a low susceptibility to change with no real loss of character and the perception of an extension to the urban fringe. The sensitivity of the landscape character is low overall. Visually, there are no indicators of value. There is a medium number of potential receptors as the site forms part of the village edge. The overall visual susceptibility is low due to the urban feel of the village edge. Overall, there is low visual sensitivity.
Green Infrastructure	Nothing identified on-site. The existing hedgerows and should be retained where possible and enhanced.
Historic Environment	Whilst the site provides a rural aspect, this is not prominent from within the conservation area. Any impact likely minimal subject to usual development practice.
Nature conservation	The site is not one of nature conservation importance. There are hedgerows around the site and hedgerows are identified as a LBAP priority habitat.
AQMA/contamination	Not within or in close proximity to an air quality management zone.
Community facilities	East Bridgford contains a primary school, pub, small shop, post office and small village hall. The site is within walking distance of the majority of these facilities.
Highways and access	Fosters Close is currently unadopted but should be shortly. Once complete the new road /access should be able to serve up to 50 dwellings in total.
Accessibility	The site is around 10-15 minute walk from the main bus route which runs hourly during the day. There is an hourly service during the day, with none in the evenings or Sundays. The site reasonably close to some local facilities but not as well located as some other sites.
Other issues	None identified
Agricultural land	The site is grade 2 agricultural land

Overall summary	Under construction		

East Bridgford

Site reference	SHLAA/EBR/009	Site name	Land to East of Springdale Lane
Parish/town	East Bridgford	Site area (hectares)	1.1
Dwelling capacity	25	Density (dwellings/hectare)	26
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	25	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>This is site EBR/G in the Green Belt Review. The site is located to the south of the main village of east Bridgford, and it is considered that the site performs an important Green Belt function in preventing sprawl and encroachment into the countryside. Development would reduce the distance between East Bridgford and Newton Village however the reduction in distance physically, perceptually and visually is not considered to be significant given the topography, the features on the ground in terms of vegetation and the lack of connection between this site and Newton. Whilst the land does not contribute to the setting of any designated assets, the presence of ridge and furrow, which is important to the historical setting of East Bridgford, increases the lands performance against the forth Green belt purpose. With a score of 17, it is concluded that the site is of medium-high Green Belt importance when assessed against the purposes of including land within it.</p>
Flood Risk	<p>The site is not identified as at risk of flooding from any source.</p>
Landscape assessment	<p>Landscape appraisal score 56/100. The site comprises one pastoral field and lies immediately south of Springdale Lane. There is a strong network of PRoW's within the study area with East Bridgford FP25 running adjacent to the sites southern boundary. There are some conservational interests within the study area but none which directly influence the site. There is an overall medium landscape value within the study area due to a reasonably well maintained and attractive scenic quality with some levels of degradation and some human detractors. There is a medium susceptibility to change with no real loss of key characteristics but increased density and urbanisation due to finger of development. The sensitivity of the landscape character is medium overall. Visually, there are no indicators of value. There is a low number of potential receptors as the site is on the village edge. The overall visual susceptibility is low due to the levels of visibility and the site forming part of the urban edge. Overall, there is low visual sensitivity.</p>
Green Infrastructure	<p>Nothing identified on-site The existing hedgerows and should be retained where possible and enhanced.</p>
Historic Environment	<p>The site is not within or adjacent to the conservation area. Whilst the Townscape appraisal identifies a wide panoramic view from the conservation area, it should be noted that this is not from the edge of the conservation area. The site does contain ridge and furrow and is also identified as a positive open space.</p>
Nature conservation	<p>The site is not one of nature conservation importance. There are hedgerows around the site and hedgerows are identified as a LBAP priority habitat.</p>
AQMA/contamination	<p>Not within or in close proximity to an air quality management zone.</p>
Community facilities	<p>East Bridgford contains a primary school, pub, small shop, post office and small village hall. The site is within walking distance of the majority of these facilities.</p>
Highways and access	<p>As per SHLAA, Springdale Lane is Private Road, and too narrow to accommodate two way traffic. We would not support unless the road is widened and brought up to an adoptable standard.</p>

Site reference	SHLAA/EBR/009	Site name	Land to East of Springdale Lane
Parish/town	East Bridgford	Site area (hectares)	1.1
Dwelling capacity	25	Density (dwellings/hectare)	26
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	25	Source of number of dwellings	Assumption made on best estimate

Accessibility	The site is within walking distance to the main bus route that serves the village. Rushcliffe Villager 1 serves parts of the village. There is an hourly service during the day, with none in the evenings or Sundays. The site reasonably close to most local facilities, which are to the north of the site.
Other issues	Promoted in 2009 as rural exception site only along the frontage of Springdale Lane.
Agricultural land	The site is identified as grade 2 agricultural land.
Deliverability	Site promoted for rural exception development with Waterloo Housing Group. Not being promoted at present.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Site is located adjacent to East Bridgford. There is capacity within the medical centre to accommodate additional residents. Impacts on local biodiversity can be avoided or mitigated. Site is constrained by presence of ridge and furrow however and Springdale Lane is Private Road that is too narrow to accommodate two way traffic. This is a significant constraint. Land is also identified as Grade 2 (best and most versatile) agricultural land, and is of medium-high green belt importance.
------------------------	---

East Bridgford

Site reference	SHLAA/EBR/010	Site name	Land south of Butt Lane
Parish/town	East Bridgford	Site area (hectares)	2.1
Dwelling capacity	44	Density (dwellings/hectare)	19
Site source	Planning Application	Planning reference	19/00784/OUT 22/01268/REM
Allocated site reference		Status	Extant outline planning permission
Number of dwellings remaining	44	Source of number of dwellings	Planning Application

Green Belt	Site proposed for allocation in the LAPP and thus will be removed from the green belt.
Flood Risk	The site is within Flood zone 1 and is not at risk of surface water flooding.
Landscape assessment	LVIA aggregate score 59/100. The site comprises an arable field on the eastern edge of East Bridgford, adjacent to the Millennium Wood. Within the study area, there is a low landscape sensitivity derived from a medium landscape value and low landscape susceptibility. The medium landscape value is attributed in part to the high landscape quality, as well as the medium level of conservation interests and recreational assets. Development of the site would result in the extension of the settlement edge - albeit in the a finger of development - and this contributes to the low landscape susceptibility. There is a low visual value, although the site sits adjacent to East Bridgford Conservation Area. However, the visual susceptibility is medium as there are open views available of the site, which forms part of the visual amenity for both residential and recreational receptors. Overall, there is a medium visual sensitivity.
Green Infrastructure	A public footpath crosses the site, linking East Bridgford with the Millennium Wood. This footpath and its amenity should be preserved. Opportunities exist to provide a landscape tree buffer on the external eastern boundary which links to the Millennium Wood.
Historic Environment	No identified historical assets within the site. First building in conservation area (Medical Centre) is modern and of no special interest, main requirement is to avoid overt frontage development which would detract from the character of Butt Lane as a rural approach to the village. Careful consideration of access design and frontage landscaping are key.
Nature conservation	There are no designated nature conservation assets identified within or in close proximity of the site. It is however bounded by hedgerows and Millennium Wood is located south of the site. These are priority habitats which should protected and enhanced.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	East Bridgford contains a primary school, pub, small shop, post office and small village hall. The site is within walking distance of the majority of these facilities.
Highways and access	Unlikely to present an issue from a highway perspective subject to achieving requisite visibility standards. Would need new footway along frontage to connect to existing. On south side of Butt Lane. 30 mph speed limit and Village gateway would need extending to incorporate new access.
Accessibility	Rushcliffe Villager runs in close proximity to the site. There is an hourly service during the day, with none in the evenings or Sundays. The site reasonably close to most local facilities.
Other issues	
Agricultural land	The site is identified as being Grade 2 agricultural land.
Deliverability	The site is part of an allocation within the LAPP. Outline planning permission granted February 2020 and S106 signed Feb 2021. Variation of condition submitted 1 March 2021. There has been a recent refusal of a reserved matters application however this has been resubmitted with a lower number of dwellings.

Site reference	SHLAA/EBR/010	Site name	Land south of Butt Lane

Delivery Period	2 years	Delivery	5 Year Tranche - 6-10 Years
-----------------	---------	----------	-----------------------------

Overall summary The site is part of an allocation within the LAPP. Outline planning permission granted February 2020 and S106 signed Feb 2021. Variation of condition submitted 1 March 2021. There has been a recent refusal of a reserved matters application however this has been resubmitted with a lower number of dwellings.

Deliverability	Planning permission for minor residential development. Deliverable within 5 years.

Delivery Period	1 year	Delivery	5 Year Tranche - 0-5 Years
Overall summary	Planning permission for minor residential development. Deliverable within 5 years.		

East Bridgford

Site reference	SHLAA/EBR/012	Site name	North of Butt Lane
Parish/town	East Bridgford	Site area (hectares)	4
Dwelling capacity	88	Density (dwellings/hectare)	20
Site source	Housing Allocation	Planning reference	20/02465/FUL
Allocated site reference	Policy 8.1	Status	Extant full planning permission, S106 agreed or not required
Number of dwellings remaining	88	Source of number of dwellings	Development Plan Document

Green Belt	The site was removed from the Green Belt through LP2.
Flood Risk	The site is not at risk of flooding from watercourses. Parts of the site are at risk from surface water flooding low-medium)
Landscape assessment	Combined assessment, including site EBR11 and EBR08. Aggregate score 51/100. The site comprises three fields within agricultural use on the east of the village of East Bridgford and sits to the north of Butt Lane and the south of Closes Side Lane. There is a network of PRoW within the study area with East Bridgford FP21 running through the site itself; the East Bridgford Conservation Area also borders the site. The overall landscape value within the study area is low due to the strong urban fringe character, as well as the degradation of landscape features such as hedgerows. There is a low susceptibility to change with development of the site constituting a perceived extension to the urban fringe. When combined with the low value of the landscape, this results in a low sensitivity of the landscape of the study area to development of the site. The site has a small amount of visual value in its role as part of the setting to the adjacent conservation area, but little else - a low visual value overall. The site forms part of the visual amenity for residential and recreational receptors and as such is of medium visual susceptibility. The overall visual sensitivity is medium.
Green Infrastructure	Public right of way crosses the site. The existing hedgerows and should be retained where possible and enhanced. The public right of way corridor has potential to be enhanced as a green infrastructure corridor.
Historic Environment	There are no heritage assets within the site. The south western corner of the site adjoins the conservation area. No features of note lie along this boundary and the development in this part of the conservation area is quite modern, therefore the impact on the setting would be minimal.
Nature conservation	There are no designated nature conservation assets identified within or in close proximity of the site. It is however bounded by hedgerows. Hedgerows are priority habitats which should be protected and enhanced.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	East Bridgford contains a primary school, pub, small shop, post office and small village hall. The site is within reasonable walking distance of the majority of these facilities.
Highways and access	Outside Village envelope on 60 mph road. Would require significant measures to reduce speeds and make acceptable, including lowering speed limit, traffic calming, frontage development and new footway linking but into East Bridgford. Access road width would need to be 5.5m if serving this and adjacent sites. Which is considered suitable for up to 150 dwellings.
Accessibility	Rushcliffe Villager runs is around 500 metres from the site. There is an hourly service during the day, with none in the evenings or Sundays. The site is reasonably close to most local facilities.

Site reference	SHLAA/EBR/012		Site name	North of Butt Lane	
Parish/town	East Bridgford		Site area (hectares)	4	
Dwelling capacity	88		Density (dwellings/hectare)	20	
Site source	Housing Allocation		Planning reference	20/02465/FUL	
Allocated site reference	Policy 8.1		Status	Extant full planning permission, S106 agreed or not required	
Number of dwellings remaining	88		Source of number of dwellings	Development Plan Document	

Other issues	None identified	
Agricultural land	General maps indicate that the site consists of grade 2 agricultural land (BMV).	
Deliverability	The site is an allocation within the LAPP. Full planning permission granted for 88 dwellings under reference 20/02465/FUL and will be determined in 2021 (May). No identified barriers to delivery. Given progress, the site is considered to be available now, suitable now and achievable now.	

Delivery Period	3 years		Delivery	5 Year Tranche - 0-5 Years	
-----------------	---------	--	----------	----------------------------	--

Overall summary	The site is an allocation within the LAPP. Full planning permission granted for 88 dwellings under reference 20/02465/FUL and will be determined in 2021 (May). No identified barriers to delivery. Given progress, the site is considered to be available now, suitable now and achievable now.	
------------------------	--	--

East Bridgford

Site reference	SHLAA/EBR/013	Site name	Land off Brickyard Lane
Parish/town	East Bridgford	Site area (hectares)	1.4
Dwelling capacity	35	Density (dwellings/hectare)	25
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	35	Source of number of dwellings	Assumption made on best estimate

Green Belt	Green belt score 17/25. The site is located to the south of the main village of East Bridgford. It is considered that the site performs an important Green Belt function in preventing sprawl and encroachment into the countryside. Development would reduce the distance between East Bridgford and Newton Village however the reduction in distance physically, perceptually and visually is not considered to be significant given the topography, the features on the ground in terms of vegetation and the lack of connection between this site and Newton. Development of this portion of land would impact on both designated and non-designated heritage assets in terms of the setting of the conservation area and key views from it and on ridge and furrow. Overall, the land is of medium-high green belt importance (when assessed against the purposes of including land within the Green Belt).
Flood Risk	The site is not at risk of flooding from any sources.
Landscape assessment	Landscape score 54/100 The site comprises one field used for equestrian grazing which contains a PRow and lies immediately south of Springdale Lane. A medium landscape value is apparent within the study area, contributed to by the high level of recreational amenity, as well as the number of conservation interests. The site forms a somewhat illogical extension to the village, pushing a finger of development into the rural surroundings, but despite this the overall susceptibility to change within the landscape is low. Overall, the sensitivity of the landscape resource is also low. Visually, the site has little value in its surroundings other than as part of the setting to the conservation area. There is also a low visual susceptibility, derived from the low visibility of the site and its position just off a quiet residential street. The visual sensitivity is overall low.
Green Infrastructure	Public right of way crosses the site. The existing hedgerows and should be retained where possible and enhanced. The public right of way corridor has potential to be enhanced as a green infrastructure corridor.
Historic Environment	The site lies just outside of the boundaries of the conservation area and is overlooked by key views out from the conservation area, these identified key views represent positive features of the conservation area and any loss of such views must, under paragraph 201 of the NPPF 2019, be considered harmful to the special character and appearance of the conservation area. Evidence of ridge and furrow on the site.
Nature conservation	There are no designated nature conservation assets identified within or in close proximity of the site. It is however bounded by hedgerows. Hedgerows are priority habitats which should be protected and enhanced.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	East Bridgford contains a primary school, pub, small shop, post office and small village hall. The site is within reasonable walking distance of the majority of these facilities.
Highways and access	For more than 5 dwellings access would have to be provided via an Adopted Highway. Both Springdale Lane and Brunt's Lane are Restricted Byways as such are not public highway. Therefore gaining access may prove problematical from a legal standpoint. There is also a public footpath running diagonally across the site which may need diverting.

Site reference	SHLAA/EBR/013	Site name	Land off Brickyard Lane
Parish/town	East Bridgford	Site area (hectares)	1.4
Dwelling capacity	35	Density (dwellings/hectare)	25
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	35	Source of number of dwellings	Assumption made on best estimate

Accessibility	The site is within walking distance to the main bus route that serves the village. Rushcliffe Villager 1 serves parts of the village. There is an hourly service during the day, with none in the evenings or Sundays. The site reasonably close to most local facilities, which are to the north of the site.
Other issues	
Agricultural land	General maps indicate that the site consists of grade 2 agricultural land (BMV).
Deliverability	Site being promoted by landowner. No known developer support however the site is of a size which would be attractive to small to medium house builders.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	. Impacts on local biodiversity can be avoided or mitigated. Site is constrained by presence of ridge and furrow and development would have a detrimental impact on the setting of the conservation area which cannot be mitigated. Springdale Lane and Brunt's Lane are private roads which are too narrow to accommodate two way traffic. This is a significant constraint. Land is also identified as Grade 2 (best and most versatile) agricultural land. Identified as medium-high Green Belt importance

East Bridgford

Site reference	SHLAA/EBR/033	Site name	East of East Bridgford Village extension
Parish/town	East Bridgford	Site area (hectares)	8.2
Dwelling capacity	160	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	160	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is located within the green belt
Flood Risk	The site is not at risk of flooding from rivers and streams. Surface water flood risk across parts of the site, with an area at high risk
Landscape assessment	SN05 – East Bridgford Escarpment Farmlands The overall landscape strategy is ‘Enhance’. The landscape condition is moderate. The character strength is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Views to urban area are frequent and exert an influence on the area
Green Infrastructure	Protect existing hedgerows within and around the site. Potential opportunity to enhance the corridor of the public right of way through the site as a green corridor
Historic Environment	The site is not within or adjacent to a conservation area. There are no other designated or non-designated heritage assets identified
Nature conservation	The area contains grassland, intensive farmland and hedgerows. No formal or informal nature conservation designations
AQMA/contamination	The site is not within or within proximity to and AQMA
Community facilities	East Bridgford contains a primary school, pub, small shop, post office and small village hall. The site is within walking distance of the majority of these facilities.
Highways and access	Potential to access the site from the proposed development to the west. Also potential to access from Butt Lane, although the road is National speed limit at present.
Accessibility	The site is within close proximity to two bus stops which are to the west of the site. The bus stops are operated by 5 bus lines which operate hourly. The site is reasonably close to the local centre facilities.
Other issues	PROW and powerlines pass through the site.
Agricultural land	The provisional agricultural land classification identifies that the land is Grade 2
Deliverability	Stagfield state that they control all of the land within the site. Stagfield are a housebuilder therefore, subject to technical matters being addressed the site is considered to be deliverable

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	The site is located within the Green Belt and is adjacent to an existing housing allocation. No major technical constraints identified at this stage., Some constraints in relation to surface water flood risk across parts of the site.		

East Bridgford

Site reference	SHLAA/EBR/034	Site name	East of East Bridgford Village extension 2

East Bridgford

Site reference	SHLAA/EBR/036	Site name	Land at Springdale Lane West of A46
Parish/town	East Bridgford	Site area (hectares)	7.8
Dwelling capacity	180	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the green belt
Flood Risk	The site is not at risk of flooding from watercourses. Parts of the site are at risk from surface water flooding.
Landscape assessment	SN05 – East Bridgford Escarpment Farmlands The overall landscape strategy is 'Enhance'. The landscape condition is moderate. The character strength is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Views to urban area are frequent and exert an influence on the area
Green Infrastructure	Protect existing hedgerows within and around the site. Potential opportunity to enhance the corridor of the public right of way though the site as a green corridor.
Historic Environment	There are no identified designated or non designated heritage assets located within or adjacent to the site.
Nature conservation	There is a small watercourse within the site, and some hedgerows around it. No identified features of nature conservation interest.
AQMA/contamination	The site is not within or within proximity to an air quality management area.
Community facilities	Some distance from the facilities located within the village of East Bridgford.
Highways and access	Not within or adjoining an adopted highway.
Accessibility	Access to the site is via Springdale lane which is largely farm track. The site is not serviced by public transport with the nearest bus services operating along Main Street, north of the site.
Other issues	Public right of way crosses the site. Adjacent to A46. Potential source of noise.
Agricultural land	The site is identified as grade 2 agricultural land.
Deliverability	The site is in one ownership. No known developer. Could any come forward in conjunction with neighbouring land.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
Overall summary	Assessed in isolation the site is located within the green belt divorced from any settlement. The site by itself does not have access to an adopted highway.		

East Bridgford

Site reference	SHLAA/EBR/037	Site name	Land at Closes Side Lane West of A46
Parish/town	East Bridgford	Site area (hectares)	14.6
Dwelling capacity	330	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the green belt
Flood Risk	Site is not at risk of flooding from watercourses. Some surface water flood risk across parts of the site.
Landscape assessment	SN05 – East Bridgford Escarpment Farmlands The overall landscape strategy is 'Enhance'. The landscape condition is moderate. The character strength is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Views to urban area are frequent and exert an influence on the area
Green Infrastructure	The site is surrounded by hedgerows with some trees within them.
Historic Environment	No designated or none designated heritage assets identified as being affected by the site.
Nature conservation	No identified features of nature conservation interest. The site is surrounded by managed hedgerows.
AQMA/contamination	The site is not within or within proximity to an air quality management area
Community facilities	Some distance from the facilities located within the village of East Bridgford.
Highways and access	The site is isolated from the adopted highway network. Access would have to be through adjacent land.
Accessibility	The site is some distance away from East Bridgford. Access to the site is some an unadopted track.
Other issues	Adjacent to A46. Potential source of noise
Agricultural land	The provisional agricultural land classification is grade II
Deliverability	One landowner, no known housebuilder. No direct access to the site from the highway network.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
Overall summary	Assessed in isolation the site is located within the green belt divorced from any settlement. The site by itself does not have access to an adopted highway.		

East Leake

Site reference	SHLAA/EL/001	Site name	Land West of Field End Close
Parish/town	East Leake	Site area (hectares)	11.4
Dwelling capacity	170	Density (dwellings/hectare)	15
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	East Leake is not within the Green Belt - no constraint.
Flood Risk	Small corridor through the middle of the site at risk from surface water flooding
Landscape assessment	LVIA for the site notes the change in landscape character to the site and its immediate locality will be "moderate/major significance of effect." If the site was to be developed. Development of the site would mark a major extension of the village into the adjacent countryside and it does not reflect the current scale and layout of the village as it gradually tapers out along West Leake Road. It is clear that the development will also have an effect on visual amenity to users of nearby rights of way.
Green Infrastructure	Requirement to maintain and enhance what hedgerows are left around the fringes of the site
Historic Environment	Archaeological alert
Nature conservation	The site is adjacent to the Great Central Railway, which is a wildlife corridor.
AQMA/contamination	Site is not within an AQMA.
Community facilities	Full range of facilities exist within East Leake. The village is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The village also benefits from a library and a leisure centre.
Highways and access	There are outstanding fundamental highways objections to the refused planning application
Accessibility	The site does not lie on a direct bus route. The nearest bus stop is more than 500 metres from the site in the centre of East Leake. The site is beyond the 1.25km walking distance from the village centre as required within the Neighbourhood Plan.
Other issues	
Agricultural land	The site is classified as Grade 2 agricultural land.
Deliverability	Land agent submitted planning application on the site, which was refused on a number of grounds. No known housebuilder involved.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	<p>Whilst school and medical centre capacities are a constraint within East Leake, this site raises no significant biodiversity, flooding, heritage, landscape or highways access issues. It does however contain Grade 2 (best and most versatile) agricultural land and is beyond the 1.25km walking distance from the village centre as required by the Neighbourhood Plan. In addition the site is situated beyond the railway line, where the neighbourhood plan policies restrict development. Potential issues in relation to access. The area is also of medium-high landscape sensitivity. PP refused twice for residential development, latest application 19/02319/OUT. Due to the identified constraints, not considered suitable for development.</p>

East Leake

Site reference	SHLAA/EL/003	Site name	Brook Furlong Farm
Parish/town	East Leake	Site area (hectares)	5.6
Dwelling capacity	90	Density (dwellings/hectare)	
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	90	Source of number of dwellings	Assumption made on best estimate

Green Belt	East Leake is not within the Green Belt - No Constraint
Flood Risk	Southern part of the site at risk of flooding from watercourses and from surface water.
Landscape assessment	LVIA aggregate score 52/100. The site is comprises two fields used for equestrian grazing with mature vegetated boundaries on the eastern edge of East Leake. Despite the proximity of East Leake conservation area, there is a low landscape value within the study area; this is contributed to by the degree of human detractors and lack of tranquillity. Development of the site would extend the settlement beyond the existing urban edge and form a potentially illogical extension to the village, although no notable key characteristics would be lost. This factors into a low landscape susceptibility. The landscape sensitivity is also low overall. In terms of visual value, the site has recreational value but little else. There is a low visual susceptibility arising from the site being generally obscured from view by mature boundary vegetation. Overall there is a low visual sensitivity.
Green Infrastructure	Opportunity to for a new development to incorporate measures to maximise GI opportunities with the Kingston Brook lying approximately 50 metres to the south of the site.
Historic Environment	East Leake Conservation Area located approximately 350 metres from the site (as the crow flies). No other recorded heritage assets within or in close proximity to the site.
Nature conservation	Kingston Brook is identified in the Biodiversity Opportunity Map as a potential river restoration project. This lies approximately 50 metres to the south of the site. No identified nature conservation assets within the site or in close proximity. It is however bounded by hedgerows in varied condition which are a LBAP habitat and the pasture may contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with wider landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated. Biodiversity Mapping Report also identifies that there are "long term opportunities to improve the management of and link between existing grasslands along the Kingston Brook and to the edge of East Leake" (ref 180).
AQMA/contamination	Site is not within an AQMA.
Community facilities	Full range of facilities exist within East Leake. The village is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The village also benefits from a library and a leisure centre.
Highways and access	Access via Stonebridge Drive may be possible, however road is narrow and may not be of adequate width to serve more development unless an emergency access is provided.
Accessibility	Nearest bus stop, for the Navy 1 line, lies at the end of Stonebridge Drive, approximately 500 metres from the site.
Other issues	
Agricultural land	The site is identified as Grade 2 (BMV) with a small area to the south classified as Grade 4.
Deliverability	Site is being promoted by a land agent. No developer attached. Most recently submitted to

Site reference	SHLAA/EL/003	Site name	Brook Furlong Farm

Deliverability	Under construction and well underway by a national housebuilder. 46 dwellings complete during 2021-2022

Delivery Period	5 years	Delivery	5 Year Tranche - 0-5 Years
Overall summary	Under construction and well underway by a national housebuilder. 46 dwellings complete during 2021-2022		

East Leake

Site reference	SHLAA/EL/005	Site name	Land off Rempstone Road (south)
Parish/town	East Leake	Site area (hectares)	30.3
Dwelling capacity	575	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	East Leake is not within the Green Belt - No Constraint
Flood Risk	Site is within Flood Zone 1. The Environment Agency surface water flooding maps indicate that there is no risk of surface water flooding on the site.
Landscape assessment	LVIA aggregate score of 57/100. The site consists of three arable fields on the south-western tip of the village of East Leake and forms part of a ridgeline which contains the village from the south. There is a low landscape value in the study area due to the lack of both conservation and recreation interests. The landscape susceptibility is medium owing to the site forming an illogical finger of development which also brings housing onto the ridgeline and increases the prominence of the settlement as a whole in its surroundings. There is, however a low landscape sensitivity overall when taking into account the low landscape value. There are long views within the study area, but otherwise a low visual value. The site forms part of the rural setting for the village and the ridgeline setting and medium number of potential receptors contributes to a medium visual susceptibility. Overall, the visual sensitivity is low. Site is located on the Rempstone Road Ridge Line where Neighbourhood Plan Policy E1 restricts development that breaks the skyline.
Green Infrastructure	The site does not contain GI or open space assets. There are limited opportunities to incorporate significant GI, beyond amenity spaces.
Historic Environment	No designated or non designated heritage assets identified within the site. C couple of fingerposts identified as non-designated heritage assets adjacent the site.
Nature conservation	The site is not one of nature conservation importance. There are hedgerows around the site and hedgerows are identified as a LBAP priority habitat.
AQMA/contamination	Site is not within an AQMA.
Community facilities	Full range of facilities exist within East Leake. The village is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The village also benefits from a library and a leisure centre.
Highways and access	Issues with sustainability, cumulative impact on nearby junctions, visibility from Rempstone Road onto Loughborough Road, and width of Rempstone Road beyond site. Even less sustainable given distance from Village Centre
Accessibility	Nearest bus stop, for the Navy 1 line, lies at the end of Kirk Ley Road, directly opposite the site. Further bus stops are just east of the site on Rempstone Road which provide further access to the Navy 1 bus route. The site is beyond the 1.25km walking distance from the village centre and therefore contrary to the adopted Neighbourhood Plan.
Other issues	
Agricultural land	The site is identified as Grade 2 (BMV).
Deliverability	

Site reference	SHLAA/EL/005	Site name	Land off Rempstone Road (south)
Parish/town	East Leake	Site area (hectares)	30.3
Dwelling capacity	575	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Potential dwelling capacity has been derived from SHLAA methodology average of 19 dph gross for sites of similar scale. Land is not constrained by significant heritage or biodiversity issues which cannot be mitigated. Highways infrastructure on Rempstone Road/Loughborough Road will require improvement. Site is beyond the 1.25km walking distance from the village centre and therefore contrary to the adopted Neighbourhood Plan. It also sits atop a ridgeline identified in the Neighbourhood Plan.

East Leake

Site reference	SHLAA/EL/006	Site name	Land north of Lantern Lane
Parish/town	East Leake	Site area (hectares)	14.11
Dwelling capacity	195	Density (dwellings/hectare)	13
Site source	Housing Allocation	Planning reference	17/02292/OUT; 20/02632/REM
Allocated site reference	Policy 3.2	Status	Under Construction - over 25% of dwellings completed
Number of dwellings remaining	134	Source of number of dwellings	Planning Application

Green Belt	East Leake is not within the Green Belt - No Constraint
Flood Risk	Flood Zone 1. Part of the site crossing from east to west (covering approx. one tenth of the site) is at risk of surface water flooding, the majority of which is at low risk but with a small part at high risk.
Landscape assessment	LVIA aggregate score 63/100. The site comprises a large parcel of land with pastoral and rough/ equestrian characteristics and is situated immediately north of Lantern Lane. There is a network of PROW within the study area with East Leake FP27 centred through the site. There are some conservational interests within the study area, including some TPOs, several listed buildings and a conservation area but none are directly related to the site. There is an overall low landscape value within the study area with some areas of degradation and human detractors. There is a medium susceptibility to change with some loss of rural characteristics and setting and a large extension to the urban edge. The sensitivity of the landscape character is medium overall. Visually, there are no real indicators of value with conservation area bearing little relation to the site. There is a medium number of potential receptors as the site forms part of the village edge. The overall visual susceptibility is medium as the site is part of the villages rural setting, and the rise in landform increasing visibility. Overall, there is medium visual sensitivity.
Green Infrastructure	A public footpath crosses the site provided access to the wider countryside. This should be preserved. Site does offer opportunities to provide accessible multifunctional GI. This is recognised in the recent planning application that proposed open space along the sites northern and eastern external boundaries.
Historic Environment	No designated or non designated heritage assets within or in close proximity of the site. The submitted planning application suggested there is a low to moderate potential for medieval deposits and artefactual material, based on the presence of ridge and furrow earthworks within the application site. There is a low potential for the recovery of archaeological remains from all other periods.
Nature conservation	The ecological assessment supporting the planning application found some features of a nature conservation interest on the site. For example, the site supports hedgerows that offer nesting opportunities for birds foraging bats. There is also an ephemeral pond that may offer opportunities for amphibians. East Leake Bridleway Vergers Local Wildlife Site is adjacent to the site to the north. The Rushcliffe Golf Course SSSI and a number of local wildlife sites are within 2km of the Site. The desk study returned results of great crested newts within 1.65km of the site. There are two ponds on and near site, which could support great crested newts. The site offers forging and commuting opportunities for bats as well as habitat suitable for farmland birds.
AQMA/contamination	Site is not within an AQMA.
Community facilities	Full range of facilities exist within East Leake. The village is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The village also benefits from a library and a leisure centre.

Site reference	SHLAA/EL/006	Site name	Land north of Lantern Lane
Parish/town	East Leake	Site area (hectares)	14.11
Dwelling capacity	195	Density (dwellings/hectare)	13
Site source	Housing Allocation	Planning reference	17/02292/OUT; 20/02632/REM
Allocated site reference	Policy 3.2	Status	Under Construction - over 25% of dwellings completed
Number of dwellings remaining	134	Source of number of dwellings	Planning Application

Highways and access	Will require upgrade of Lantern Lane to adoptable standard. Complex legal issues mean that this aspect is still unresolved on the existing development currently under construction to the west of the site. Concerns about the number of dwellings served off of a single point of access (Lantern Lane). Existing housing numbers, combined with consented site, are already close to the maximum recommended limit of 400 from a single point.
Accessibility	Nearest bus stop, for the Navy 1 line, is on Gotham Road, some 500 metres from the site. These services run 2-3 times per hour. Site is just within the 1.25km walking distance from the village centre required within the Neighbourhood Plan.
Other issues	
Agricultural land	The site is identified as being predominantly Grade 3 agricultural land, with a small corner of Grade 2 land to the south east.
Deliverability	Outline planning permission approved at appeal and subsequently allocated through LP2. Reserved matters permission granted for an 100% affordable housing scheme by Miller in partnership with Platform Housing with funding secured from Homes England. The site is considered to be suitable now, available now and achievable now.

Delivery Period	4 Years	Delivery	5 Year Tranche - 0-5 Years
Overall summary	Outline planning permission approved at appeal and subsequently allocated through LP2. Reserved matters permission granted for an 100% affordable housing scheme by Miller in partnership with Platform Housing with funding secured from Homes England. Under construction		

East Leake

Site reference	SHLAA/EL/007	Site name	Land off West Leake Road
Parish/town	East Leake	Site area (hectares)	43.47
Dwelling capacity	740	Density (dwellings/hectare)	12
Site source	Developer/Landowner Submission	Planning reference	18/02692/OUT 19/02319/OUT
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	740	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not in the green belt
Flood Risk	Northern part of site is at risk of flooding from the Kingston Brook. Small parts of the site are at a low risk of surface water flooding.
Landscape assessment	NW02 – East Leake Rolling Farmland The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength of the area is strong. The area has a strong intact rural character with arable pasture farming, prominent small woodlands, villages and a network of farmsteads key features.
Green Infrastructure	Site offers opportunities to provide accessible multifunctional GI.
Historic Environment	No designated or non designated heritage assets within or in close proximity of the site.
Nature conservation	West Rushcliffe District Disused Railway, Local Wildlife Site, runs along the eastern boundary of the site. Uncommon species of botanical and zoological importance.
AQMA/contamination	Site is not within an AQMA.
Community facilities	Full range of facilities exist within East Leake. The village is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The village also benefits from a library and a leisure centre.
Highways and access	Unknown if access can be achieved.
Accessibility	Nearest bus stop over 1km away on Main Street. Served by the Navy Line which runs 3 times per hour during the day. The site is beyond the 1.25km walking distance from the village centre and therefore contrary to the adopted Neighbourhood Plan.
Other issues	The site is beyond the built area of the settlement as defined by policy E1 of the East Leake Neighbourhood Plan where development will only be permitted where strong justification provided. And only where it respects the linear pattern of the settlement
Agricultural land	Grade 2 and 3.
Deliverability	The site is being promoted for development.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site submission indicates a capacity of 515 dwellings, however experiences within Rushcliffe on sites similar size would indicate a capacity of dwellings, once a discount of 10% of the area is applied for the area at risk of flooding on the northern part of the site. Outline planning permission refused twice for most of the site that lies to the south of West Leake Road as contrary to spatial strategy, the locational strategy in the East Leake neighbourhood plan, access issues and landscape harm. The majority of the site is not constrained physically however the southern part of the site is on land that rises quite steep. Parts of the site is BMV agricultural land It I unknown if access can be achieved and the local road network could accommodate this scale of development. West Leake Road is narrow, there is a low bridge between the main part of the

-----------------	--

East Leake

Site reference	SHLAA/EL/019	Site name	Land east of Stonebridge Drive (smaller)
Parish/town	East Leake	Site area (hectares)	4.05
Dwelling capacity	65	Density (dwellings/hectare)	16
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	65	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is not located within the Green Belt.
Flood Risk	Majority of site in flood zone 1 but southern part located in flood zone 2/3. The same area is at risk from surface water flooding.
Landscape assessment	LVIA aggregate score 52/100. The site is comprises two fields used for equestrian grazing with mature vegetated boundaries on the eastern edge of East Leake. Despite the proximity of East Leake conservation area, there is a low landscape value within the study area; this is contributed to by the degree of human detractors and lack of tranquillity. Development of the site would extend the settlement beyond the existing urban edge and form a potentially illogical extension to the village, although no notable key characteristics would be lost. This factors into a low landscape susceptibility. The landscape sensitivity is also low overall. In terms of visual value, the site has recreational value but little else. There is a low visual susceptibility arising from the site being generally obscured from view by mature boundary vegetation. Overall there is a low visual sensitivity.
Green Infrastructure	Opportunity to for a new development to incorporate measures to maximise GI opportunities with the Kingston Brook lying approximately 50 metres to the south of the site.
Historic Environment	East Leake Conservation Area located approximately 350 metres from the site (as the crow flies). No other recorded heritage assets within or in close proximity to the site.
Nature conservation	Kingston Brook is identified in the Biodiversity Opportunity Map as a potential river restoration project. This lies approximately 50 metres to the south of the site. No identified nature conservation assets within the site or in close proximity. It is however bounded by hedgerows in varied condition which are a LBAP habitat and the pasture may contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with wider landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated. Biodiversity Mapping Report also identifies that there are "long term opportunities to improve the management of and link between existing grasslands along the Kingston Brook and to the edge of East Leake" (ref 180).
AQMA/contamination	Site is not within an AQMA.
Community facilities	Full range of facilities exist within East Leake. The village is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The village also benefits from a library and a leisure centre.
Highways and access	Access via Stonebridge Drive may be possible, however road is narrow and may not be of adequate width to serve more development unless an emergency access is provided.
Accessibility	Nearest bus stop, for the Navy 1 line, lies at the end of Stonebridge Drive, approximately 500 metres from the site.
Other issues	

Site reference	SHLAA/EL/019	Site name	Land east of Stonebridge Drive (smaller)

East Leake

Site reference	SHLAA/EL/035	Site name	Land to the rear of Burton Walk
Parish/town	East Leake	Site area (hectares)	0.8
Dwelling capacity	16	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not in the Green Belt
Flood Risk	Small area of the site to the south is within Flood zone 3
Landscape assessment	NW02 – East Leake Rolling Farmland The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength of the area is strong. The area has a strong intact rural character with arable pasture farming, prominent small woodlands, villages and a network of farmsteads key features.
Green Infrastructure	The area lies broadly within the Kinston Brook Green Infrastructure corridor. Opportunities identified within this corridor include improved flood mitigation.
Historic Environment	There are no identified features of historic interest
Nature conservation	The site is not one of nature conservation importance. There are hedgerows around the site and hedgerows are identified as a LBAP priority habitat. A small copse exists to the west of the site.
AQMA/contamination	The site is not within or within proximity to and Air Quality Management Area
Community facilities	Full range of facilities exist within East Leake. The village is a key settlement with a local centre that includes convenience (local supermarket) and a limited number of comparison shops, public houses and fast food establishments. The village also benefits from a library and a leisure centre.
Highways and access	No direct access to highway network
Accessibility	Navy 1 runs along Kirk Ley Road approx. every 20 minutes during the daytime Monday-Saturday
Other issues	
Agricultural land	Provisional Agricultural Land Classification grade 2
Deliverability	The site is being promoted by the landowner, however access to the site would require third party land.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary The site lies within the countryside adjacent to East Leake. Main barrier to delivery is that the site cannot presently be accessed.

Gotham

Site reference	SHLAA/GOT/001	Site name	Land to the rear of former British Legion
Parish/town	Gotham	Site area (hectares)	1.1
Dwelling capacity	25	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	25	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Site is identified as GOT/B within Local Plan Part 2 Green Belt Review. The site is enclosed by development on two sides with the Community Centre and Sports Pavilion to the east and Telephone Exchange to the west (on the southern half of this boundary). Whilst these do not form the physical boundary between open countryside and the built up area, the presence of these existing features/boundaries reduce the Green Belt's importance against restricting sprawl and preventing the merging of settlements.</p> <p>The site should score lower overall, however the land has naturally regenerated and the site is countryside in character rather than settlement fringe. The overall score of 11 reflects land which is of low-medium Green Belt importance.</p>
Flood Risk	Flood zone 1. EA map identifies a small area of the site as being at low risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 56/100. The site comprises one field with rough/ equestrian characteristics. There are some PRoW's within the study area with Gotham BW3 running along the sites south-western boundary. There are few conservational interests within the study area, none of which directly influence the site. There is an overall low landscape value within the study area due to some levels of degradation and a high degree of human influence. There is a medium susceptibility to change with a slight loss of rural character despite sites domesticated nature. The sensitivity of the landscape character is medium overall. Visually, there are no indicators of value. There is a medium number of potential receptors as the site is on the village edge. The overall visual susceptibility is medium due to the levels of visibility, particularly from the west and the site forming part of the settlement edge. Overall, there is low visual sensitivity.
Green Infrastructure	Site currently provides accessible natural greenspace for local residents. There is limited opportunity to retain or enhance this use given the size of the site and development proposed.
Historic Environment	There are no designated heritage assets within or in close proximity of this site. Old mineral railway line runs along the western boundary.
Nature conservation	Gotham Hill Pasture SSSI and LWS is 300m north and easily accessible via the track which borders the site. Site is notified due to its species-rich grassland. Unlikely that site could be adversely affected by the scale of this development. Advice from Natural England will confirm this. The Biodiversity Mapping Report identifies the site as being located within an area where the grassland should be improved in the short term. Whilst development would result in the loss of habitat, it could facilitate improvements (quality and connectivity) within remaining areas. Nottinghamshire County Council and Nottinghamshire Wildlife Trust highlight that the scrub and grassland may have ecological value
AQMA/contamination	Site is not within an AQMA.
Community facilities	Village contains a limited number of community facilities -small convenience store/post office, village hall (currently closed) and three public houses.

Site reference	SHLAA/GOT/001	Site name	Land to the rear of former British Legion
Parish/town	Gotham	Site area (hectares)	1.1
Dwelling capacity	25	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	25	Source of number of dwellings	Assumption made on best estimate

Highways and access	The track is adopted Highway, however it is currently considered unsuitable for residential use. Developer would need to provide a 4.8m carriageway, 2.0m footway and 0.7m service strip. Not sure if this possible within the existing extents of highway.
Accessibility	The site is within a 5 minute walk of the village centre which has basic facilities. Bus stops on Nottingham Road provide services to Nottingham, East Leake and Loughborough. These services run 2-3 times per hour. It is close to most of the villages facilities and the main bus route.
Other issues	Right of Way is adjacent to the site. Land itself is used by residents as an informal recreational area (dog walking etc.).
Agricultural land	Part of site is identified as Grade 3, although not in agricultural use.
Deliverability	Landowner's representation on LAPP Publication draft mean that the site is available for development.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The positives in relation to the site are that it is of low landscape value and low-medium green belt importance when assessed against the purposes for including land within it. It is close to most of the villages facilities and the main bus route. The negatives against the site are that it may have ecological value and provides for a green corridor out of the village north toward Gotham Hills. Gaining access to the site would also be difficult unless third party land could be acquired. Public Bridleway would need to be incorporated if site is allocated for development. Site recommended as a preferred housing site in the Gotham Neighbourhood plan should further housing allocations be necessary in future plan reviews.

Gotham

Site reference	SHLAA/GOT/002	Site name	Land north of Kegworth Road / Home Farm (west)
Parish/town	Gotham	Site area (hectares)	2.5
Dwelling capacity	58	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	50	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>GOT2 comprises the western two thirds of site GOT/A in the Green Belt Review. The enclosure of this parcel of Green Belt land on three sides and its robust rear boundary significantly reduces its performance against the purposes of checking unrestricted sprawl and the prevention of merging.</p> <p>The enclosure of the site by prominent residential developments reduce its performance against the purpose of safeguarding countryside.</p> <p>Whilst the land is important to the setting of the former school (Grade II listed) and Home Farm (a local interest building) this does not increase its Green Belt above a low-medium importance. This is reflected in a score of 11.</p>
Flood Risk	Flood zone 1
Landscape assessment	<p>Aggregate LVIA score: 62/100. The site comprises one field sub-divided for equestrian purposes with areas of well and poorly managed character. There are some PRow with Gotham FP2 running along the western boundary of the site and intersecting FP22 which runs adjacent to the sites northern boundary. There are few conservational interests within the study area.</p> <p>There is an overall medium landscape value within the study area due to a combination of well managed and degraded spaces. There is a low susceptibility to change with the perception of development as infill. The sensitivity of the landscape character is low overall. Visually, there are some benches and picnic areas along FP22, as well as signs of recent improvements and usage. There is a medium number of potential receptors as the site is part of the settlement edge. The overall visual susceptibility is medium partly due to open views from the south. Overall, there is medium visual sensitivity.</p>
Green Infrastructure	Site is proposed as local green space in the Gotham Neighbourhood Plan. A right of way borders the site and permissive pedestrian route follows the old minerals line behind. These provide access to the wider countryside, including Gotham hill. Direct access to these routes should be provided. Given the scale of development there are limited opportunities for significant onsite GI, beyond linked amenity space/natural green space.
Historic Environment	The old school is Grade II Listed and Home Farm is a local interest building. The development of this field would adversely affect the setting of these historic assets, especially Home Farm which has a historic relationship with the neighbouring land. Ridge and furrow, trackway and mound - possibly mill mound given size and position near the brow of the hill. Ridge and Furrow not pronounced.
Nature conservation	There are no designated nature conservation interest within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP habitat. Pasture may contain locally valuable neutral grassland species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report (BOMR). BOMR also identifies the neighbouring former minerals line as connection between grassland sites. Adverse effects should be avoided, mitigated or as a last resort compensated.

Site reference	SHLAA/GOT/002	Site name	Land north of Kegworth Road / Home Farm (west)
Parish/town	Gotham	Site area (hectares)	2.5
Dwelling capacity	58	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	50	Source of number of dwellings	Assumption made on best estimate

AQMA/contamination	Site is not within an AQMA.
Community facilities	Village contains a limited number of community facilities -small convenience store/post office, village hall (currently closed) and three public houses.
Highways and access	No issues, subject to achieving visibility.
Accessibility	The site is within a 5 minute walk of the village centre which has basic facilities. Bus stops on Nottingham Road provide services to Nottingham, East Leake and Loughborough. These services run 2-3 times per hour. It is close to most of the villages facilities and the main bus route.
Other issues	
Agricultural land	Site is classified as grade 3 agricultural land
Deliverability	Promoted on behalf of landowner during Further options consultation, although agent is no longer promoting the site therefore uncertain on availability.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary

The positives in relation to the site are that it is of low-medium green belt importance when assessed against the purposes for including land within it. It is reasonably close to most of the villages facilities and the main bus route. Highways have indicated that access could be achieved to the site subject to visibility. On the other side, the site is of medium landscape value, and development of the site could cause a degree of harm to designated and non-designated heritage assets. The site is designated as a local green space in the Gotham Neighbourhood Plan. Due to this designation very special circumstances would need to exist in order for the site to be suitable for development.

Gotham

Site reference	SHLAA/GOT/003	Site name	Land at Redroofs Moor Lane

Gotham

Site reference	SHLAA/GOT/004	Site name	Land South of Pygall Avenue
Parish/town	Gotham	Site area (hectares)	2.4
Dwelling capacity	55	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	50	Source of number of dwellings	Assumption made on best estimate

Green Belt	It is proposed that the site is taken out of the Green Belt. The emerging Gotham Neighbourhood Plan identifies proposes that the site be designated as a local green space.
Flood Risk	Flood zone 1. EA map identifies the south east corner of the site as being at high risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 46/100. The site is made up of two fields with rough/ equestrian characteristics. There are some PRoW's within the study area but none which directly influence the site. There are few conservational interests within the study area, with one listed building situated on the south-eastern corner of the site boundary. There is an overall low landscape value within the study area due to a combination of some degraded spaces and high levels of human influence. There is a low susceptibility to change with no notable loss of key characteristics and an extension of the urban fringe. The sensitivity of the landscape character is low overall. Visually, there are no indicators of value present. There is a medium number of potential receptors as the site is part of the settlement edge. The overall visual susceptibility is low partly due to the site being unimportant to visual amenity. Overall, there is low visual sensitivity.
Green Infrastructure	The site is proposed to be allocated as a local green space in the Gotham Neighbourhood plan. The site is small and offers limited opportunities, beyond small amenity spaces, for green infrastructure. If allocated and developed as part of a larger housing scheme, greater opportunities to include GI and open space exist.
Historic Environment	There are no designated heritage assets within or in close proximity of this site. Evidence of Ridge and Furrow to the west of the site and an undated bank feature to south.
Nature conservation	Gotham Disused Railway Line LWS (woodland) borders the site on its western boundary. The LWS separates the site from Gypsum Way. It is bounded by established mature hedgerows which are a LBAP habitat. The pasture is identified as existing grassland within the Biodiversity Opportunity Mapping Report (BOMP) and may contain locally valuable neutral grassland species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated
AQMA/contamination	Site is not within an AQMA.
Community facilities	Village contains a limited number of community facilities -small convenience store/post office, village hall (currently closed) and three public houses.
Highways and access	Likely to be acceptable, provide existing road width is greater than 4.8m
Accessibility	The site is within a 5 minute walk of the village centre which has basic facilities. Bus stops on Nottingham Road provide services to Nottingham, East Leake and Loughborough. These services run 2-3 times per hour. It is close to most of the villages facilities and the main bus route.
Other issues	
Agricultural land	Site is identified as Grade 3.

Site reference	SHLAA/GOT/004	Site name	Land South of Pygall Avenue
Parish/town	Gotham	Site area (hectares)	2.4
Dwelling capacity	55	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	50	Source of number of dwellings	Assumption made on best estimate

Deliverability	Site promoted on behalf of landowner and land promoter.
----------------	---

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary

The positives in relation to the site is that it is assessed as being of low-medium green belt importance when considered against the purposes for including land within it. The site has been adjudged to have low landscape value. The site is within walking distance of most facilities and is five minutes away from the main bus route. Access could be provided to the site provided Hall Drive is wider than 4.8 Metres. Negatives in relation to the site include impact on non designated heritage assets. Northern field contains ridge and furrow of intermittent quality. Site adjacent to Local Wildlife Site. Site is identified a local green space within the Gotham Neighbourhood Plan. As such this is a significant policy constraint to development and very special circumstances would need to be demonstrated to justify its development.

Gotham

Site reference	SHLAA/GOT/005	Site name	Land east of Gypsum Way /The Orchards
Parish/town	Gotham	Site area (hectares)	4.5
Dwelling capacity	70	Density (dwellings/hectare)	18
Site source	Housing Allocation	Planning reference	19/02915/FUL
Allocated site reference	LAPP policy 9	Status	Planning application under consideration
Number of dwellings remaining	70	Source of number of dwellings	Development Plan Document

Green Belt	The area is not in the green belt in Local Plan Part 2
Flood Risk	Flood zone 1. EA map identifies land within the site as being at high, medium and low risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 46/100. The site comprises several field boundaries with a mixture of pastoral, rough/equestrian and urban characteristics. There are some PRow's within the study area but none which directly influence the site. There are few conservational interests within the study area, with one listed building situated on the eastern edge of the site boundary. There is an overall low landscape value within the study area due to a combination of some degraded spaces and high levels of human influence. There is a low susceptibility to change with no notable loss of key characteristics and an extension of the urban fringe. The sensitivity of the landscape character is low overall. Visually, there are no indicators of value present. There are a medium number of potential receptors as the site is part of the settlement edge. The overall visual susceptibility is low partly due to the site being unimportant to visual amenity. Overall, there is low visual sensitivity.
Green Infrastructure	The scale of the development offers opportunities to provide on-site GI. Formal open/amenity space, wildlife and pedestrian/cycle corridors. LWS which borders the site should be protected and enhanced. Existing hedgerows provide local wildlife corridors that connect to the LWS.
Historic Environment	HER identifies Ridge and Furrow across much of the site plus HER Boundary Bank feature. Ridge and furrow barely evident on the ground. Listed building on adjacent Bus Depot site.
Nature conservation	Gotham Disused Railway Line LWS borders the site on its western boundary. The LWS separates the site from Gypsum Way. It is bounded by and contains established mature hedgerows which are a LBAP habitat. The pasture is identified as existing grassland within the Biodiversity Opportunity Mapping Report (BOMP) and may contain locally valuable neutral grassland species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping project. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	Village contains a limited number of community facilities -small convenience store/post office, village hall (currently closed) and three public houses.
Highways and access	Access would need to be achieved via Leake Road if the Bus depot option is no longer available.
Accessibility	The site is in close proximity to village centre (within a 5 minute walk). Bus stops on Nottingham Road provide services to Nottingham, East Leake and Loughborough. These services run 2-3 times per hour.
Other issues	Bus depot no longer forms part of the site.
Agricultural land	Site is identified as Grade 3 agricultural land although in various uses.
Deliverability	Full planning application submitted by Davidsons which is under consideration for 96

Site reference	SHLAA/GOT/005	Site name	Land east of Gypsum Way /The Orchards
Parish/town	Gotham	Site area (hectares)	4.5
Dwelling capacity	70	Density (dwellings/hectare)	18
Site source	Housing Allocation	Planning reference	19/02915/FUL
Allocated site reference	LAPP policy 9	Status	Planning application under consideration
Number of dwellings remaining	70	Source of number of dwellings	Development Plan Document

dwellings, although site capacity will remain at the LAPP capacity of 70 dwellings for the purposes of the SHLAA unless permission is granted for this number of dwellings. The application has been with the council for a period of time with some matters still outstanding that are being considered by the applicant. Given this, a cautious approach to delivery has been taken.

Delivery Period	2 Years	Delivery	5 Year Tranche - 6-10 Years
-----------------	---------	----------	-----------------------------

Overall summary Full planning application submitted by Davidsons which is under consideration for 96 dwellings, although site capacity will remain at the LAPP capacity of 70 dwellings for the purposes of the SHLAA unless permission is granted for this number of dwellings. The application has been with the council for a period of time with some matters still outstanding that are being considered by the applicant. Given this, a cautious approach to delivery has been taken.

Gotham

Site reference	SHLAA/GOT/006	Site name	Land east of Leake Road
Parish/town	Gotham	Site area (hectares)	5.8
Dwelling capacity	130	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	120	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>This site is identified as GOT/D in the Green Belt Review. The open countryside character of the land results in the Green Belt designation performing well against the purposes of checking unrestricted sprawl and safeguarding the countryside from encroachment.</p> <p>The existence of development along Leake Road and the absence of significant heritage issues however reduce the Green Belts overall importance. The land scores 13 reflecting a site which is within the higher range of sites that are of low-medium Green Belt importance.</p>
Flood Risk	Flood zone 1. EA map identifies land within the northern area of the site as being at medium and low risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 55/100. The site comprises an arable field which lies immediately east of Leake Road and to the south of the main village of Gotham. One of the key characteristics of the site is the role that it plays in forming both part of the rural setting to and southern approach of Gotham village. The study area has a low landscape value, due in part to the detractors in the surrounding area such as the gypsum works and pylons. However, there is a medium landscape susceptibility, which is due to the development of the site extending the village into its strong rural setting, and erosion of the rural southern approach to the village itself. Overall, the landscape sensitivity is low. In visual terms, there is little of visual value. However, the site forms part of the rural outlook for adjacent residential properties and is fairly open - these factors feed into a medium visual susceptibility. The visual sensitivity is overall low in this location.
Green Infrastructure	No GI or open space constraints. The site is small and offers limited opportunities, beyond small amenity spaces, for green infrastructure.
Historic Environment	There are no recorded heritage assets within the site. The historic core of the village, including the church, rectory and their grounds are however adjacent to the site. The development of the site would affect the setting when approaching along Leake Road.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP habitat and ditch. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. In accordance with the BOMR, the ditch should also be buffered to avoid diffused water pollution, connect water bodies and to protect or enhance biodiversity. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	Village contains a limited number of community facilities -small convenience store/post office, village hall (currently closed) and three public houses.
Highways and access	No significant constraints. Would require new footway connecting back to Gotham. Would wish to see frontage development to decrease vehicle speeds.
Accessibility	The site is within a 5 minute walk of the village centre which has basic facilities. Bus stops on Nottingham Road provide services to Nottingham, East Leake and Loughborough. These

Site reference	SHLAA/GOT/006	Site name	Land east of Leake Road
Parish/town	Gotham	Site area (hectares)	5.8
Dwelling capacity	130	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	120	Source of number of dwellings	Assumption made on best estimate

	services run 2-3 times per hour. It is close to most of the villages facilities and the main bus route.
Other issues	
Agricultural land	Site is identified as Grade 3.
Deliverability	Site is being promoted by landowner therefore it is considered to be available for development subject to it being allocated.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is assessed as being of low to medium Green Belt importance when considered against the purposes for including land within it. The site is within reasonable walking distance to most facilities and its frontage is served by a regular bus service. No highways constraints. The site is assessed to be of low landscape value, but of medium susceptibility. Development may lead to erosion of strong rural setting of this part of the village.
------------------------	---

Gotham

Site reference	SHLAA/GOT/007	Site name	Land east of Hill Road
Parish/town	Gotham	Site area (hectares)	8.3
Dwelling capacity	100	Density (dwellings/hectare)	12
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	100	Source of number of dwellings	Assumption made on best estimate

Green Belt	The LAPP Green Belt Review scored 13 reflecting a Green Belt area that is of low-medium Green Belt importance. Although this parcel of Green Belt land is a significant size, it is contained by robust and permanent road boundaries and is located between residential development on Hill Road and industrial estate on Gypsum Way. The land scored poorly against merging as there are no settlements south of Gotham within the Green Belt and the presence of national grid power lines reduce the lands rural character.
Flood Risk	Flood zone 1. Small area adjacent to Leake Road is identified by the EA as being at low risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 62/100. The site comprises a medium sized parcel of land with pastoral characteristics situated adjacent to the junction between Leake Road and Gypsum Way bypass. There is a network of PRoW's within the study area, particularly to the east of Gotham, with Gotham BW14 running along the sites western boundary. There are very few conservational interests within the study area comprising a handful of listed buildings but little else. There is an overall low landscape value within the study area due to a combination of some degraded spaces, scenic quality interrupted by industry and busy road network. There is a high susceptibility to change with a perceived change in the shape of development, disrupting the existing linear settlement pattern with increased urbanisation. The sensitivity of the landscape character is medium overall. Visually, there are no indicators of value present. There are a low number of potential receptors as the site is removed from the majority of the settlement. The overall visual susceptibility is medium due to the site being part of the rural setting and visual amenity. Overall, there is low visual sensitivity.
Green Infrastructure	Grass verge along side of the road identified in the neighbourhood plan as a local green space. Significant tree belt and hedgerows which border the site provide natural greenspace and wildlife corridors. Land offers opportunities to include open space, natural greenspace and green corridors which link into the wider rights of way network.
Historic Environment	There are no recorded heritage assets within or in close proximity of this site.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established mature hedgerows/tree belts and a ditch/stream which are a LBAP habitats. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. In accordance with the BOMR, the ditch should also be buffered to avoid diffused water pollution, connect water bodies and to protect or enhance biodiversity. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	Village contains a limited number of community facilities -small convenience store/post office, village hall (currently closed) and three public houses.
Highways and access	Hill Road is private and therefore unlikely to be suitable, would not wish to see access off of Gypsum Way, hence Leake Road is the only suitable option. As this road is 30mph in this location unlikely to present a problem. We would wish see the links back into Gotham

Site reference	SHLAA/GOT/007	Site name	Land east of Hill Road
Parish/town	Gotham	Site area (hectares)	8.3
Dwelling capacity	100	Density (dwellings/hectare)	12

Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	100	Source of number of dwellings	Assumption made on best estimate

Accessibility	improved as the footway fronting the site is substandard. The site is within a 10-15 minute walk of the village centre which has basic facilities. Bus stops on Nottingham Road provide services to Nottingham, East Leake and Loughborough. These services run 2-3 times per hour.
Other issues	Half of RBC/GOT/007 is being promoted for employment. Electricity pylons cross the site.
Agricultural land	Site is identified as Grade 3.
Deliverability	Due to the size of the site, the number of units proposed (60) and the landowner's representation on LAPP Issues and Options, it is considered deliverable within 5 years of allocation.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site is identified as being of low-medium green belt importance when assessed against the purposes for including land within it. Access is considered possible of Leake Road, however Highways consider that links back to the village would need to be improved. The grass verge along the majority of the perimeter of the site is also designated green space in the adopted NP. The site is furthest away from facilities, however it is adjacent to the main bus route. The site has low landscape value but medium sensitivity. There are two sets of electricity pylons that cross the site (large and smaller).

Gotham

Site reference	SHLAA/GOT/008	Site name	Land south of Moor Lane.
Parish/town	Gotham	Site area (hectares)	0.7
Dwelling capacity	15	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Green Belt	The land is enclosed by development on three sides with residential development on the opposite side of Moor Lane and the new properties at Manor Farm. This prevents sprawl and, if developed, there would be no reduction in the distance between Gotham and settlements to the south. The presence of a robust boundary to the south provides added security against unrestricted sprawl. The absence of inappropriate development indicates the Green Belt designation has safeguarded the countryside from encroachment, however the edge of Gotham is an overriding feature and this reduces the importance of safeguarding this area of countryside. Because of these factors the land scored 9 and is of low Green Belt importance.
Flood Risk	Flood zone 1
Landscape assessment	Aggregate LVIA score: 42/100. The site comprises one pastoral field located immediately west of Moor Lane. There is a network of PRoW's within the study area, particularly to the east of Gotham, none of which directly influence the site. There are very few conservational interests within the study area comprising a handful of listed buildings but little else. There is an overall low landscape value within the study area due to infrastructure usages and equestrian characteristics detracting from scenic quality. There is a low susceptibility to change with the perception of infill development and an extension of existing urban form. The sensitivity of the landscape character is low overall. Visually, there are no indicators of value present. There are a low number of potential receptors. The overall visual susceptibility is low as the site is unimportant to the visual amenity. Overall, there is low visual sensitivity.
Green Infrastructure	No GI or open space constraints. The site is small and offers limited opportunities, beyond small amenity spaces, for green infrastructure. Hedgerows should be retained as wildlife corridors/buffers.
Historic Environment	There are no recorded heritage assets within or in close proximity of this site. Proximity to Gotham Conservation Area.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established mature hedgerows and a ditch/stream, both of which are a LBAP habitats. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. In accordance with the BOMR, the ditch should also be buffered to avoid diffused water pollution, connect water bodies and to protect or enhance biodiversity. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	Village contains a limited number of community facilities -small convenience store/post office, village hall (currently closed) and three public houses.
Highways and access	No objection in principle, however achieving the requisite visibility at the access may prove difficult due to vegetation and level difference between the site and Moor Lane.
Accessibility	The site is within a 5 minute walk of the village centre which contains a basic range of facilities. Bus stops on Nottingham Road provide services to Nottingham, East Leake and

Site reference	SHLAA/GOT/008	Site name	Land south of Moor Lane.
Parish/town	Gotham	Site area (hectares)	0.7
Dwelling capacity	15	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Other issues	Loughborough. These services run 2-3 times per hour.
Agricultural land	Representations indicate that there may be a covenant on the site in order to prevent its development.
Deliverability	The site is identified as being Grade 3 agricultural land.
	Due to the size of the site, the number of units proposed (15) and the landowner's representation on LAPP Issues and Options, it is considered deliverable within 5 years of allocation.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The positives in relation to the site is that it is of low importance when assessed against the purposes of including land within it. The site has low landscape value. It is within reasonable walking distance of most facilities within Gotham, and also the regular bus service. The negatives in relation to the site relate to the difficulty in achieving adequate access to the site which allows for requisite visibility. Possible covenant that would restrict the site's deliverability. This has not been evidenced however so it is not considered appropriate to assess the site as unavailable or unachievable.
------------------------	---

Gotham

Site reference	SHLAA/GOT/013	Site name	Land west of Hill Road
Parish/town	Gotham	Site area (hectares)	2.0
Dwelling capacity	0	Density (dwellings/hectare)	0
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	

Green Belt	The site lies within the Green Belt. Not appraised in any detailed Green Belt review in the past
Flood Risk	Small part of the site identified as at risk of surface water flooding
Landscape assessment	NW01 - Gotham and West Leake Hills and Scarps The overall landscape strategy is 'Conserve'. The landscape condition is good. The character strength of the area is strong. The hills are distinctive and consistent features across the la/landscape and exert their influence within the surrounding area. The pattern of arable, pasture and woodland is also consistent with moderate sized villages and some expanding commuter villages present on low ground (LCA 2009).
Green Infrastructure	The site should be retained as part of the green infrastructure network given its biological interest
Historic Environment	No identified issues
Nature conservation	Site is identified as a Local Wildlife Site (Hill Road Grassland). The site contains particular plant species of interest, such as orchids.
AQMA/contamination	Not within or directly affecting an air quality management area
Community facilities	Village contains a limited number of community facilities -small convenience store/post office, village hall (currently closed) and three public houses.
Highways and access	See accessibility
Accessibility	The site is potentially accessible by vehicle of Gypsum Way . A little distance away from the main facilities, which are accessed by private road. Within walking distance of bus route which runs 2-3 times per hour during the day to Nottingham and East Leake, with some services continuing to Loughborough.
Other issues	
Agricultural land	Not in agricultural use
Deliverability	Support from landowner however no known developer on board.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary Mixed use development (Employment and Residential) proposed. Located within the Green Belt, the site is also a designated Local Wildlife Site therefore site is not suitable for residential development

Gotham

Site reference	SHLAA/GOT/015	Site name	Nottingham City Transport bus depot
Parish/town	Gotham	Site area (hectares)	0.77
Dwelling capacity	15	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Green Belt	It is proposed that the site will form part of the green belt inset for Gotham
Flood Risk	Site at risk of surface water flooding
Landscape assessment	N/A
Green Infrastructure	Hedgerows around the site should be retained and enhanced
Historic Environment	Listed Building (II) Store at South Notts Bus Depot is located within the site.
Nature conservation	Some intermittent hedgerows present around the perimeter of the site
AQMA/contamination	Not within or in the vicinity of an Air quality Management Zone
Community facilities	Village contains a limited number of community facilities -small convenience store/post office, village hall (currently closed) and three public houses.
Highways and access	Existing access to the depot from Leake Road
Accessibility	The site is within a 5 minute walk of the village centre which contains a basic range of facilities. Bus stops on Nottingham Road provide services to Nottingham, East Leake and Loughborough. These services run 2-3 times per hour.
Other issues	Gotham Neighbourhood plan supports the principle of residential development on the site. NCT has vacated the site
Agricultural land	N/A
Deliverability	NCT have now closed the bus depot and relocated the fleet based there. Main issues in relation to the site consist of the Grade 2 listed barn/store and its setting, together with surface water drainage. The site is suitable however it is not being promoted for development at present.

Delivery Period	1 Year	Delivery	5 Year Tranche - 11 -15 Years
Overall summary	NCT have now closed the bus depot and relocated the fleet based there. Main issues in relation to the site consist of the Grade 2 listed barn/store and its setting, together with surface water drainage. The site is suitable however it is not being promoted for development at present.		

Gotham

Site reference	SHLAA/GOT/016	Site name	Home Farm, 10 Kegworth Road

Gotham

Site reference	SHLAA/GOT/018	Site name	Land East of Gypsum Way Phase 2
Parish/town	Gotham	Site area (hectares)	3.4
Dwelling capacity	78	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	78	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Part of GOT/F score 9. The area of Green Belt west of Gotham is screened from view by substantial tree belts, is internally subdivided by mature hedgerows and is contained by the Gypsum Way. These factors reduce the importance of the Green Belt designation to the restriction of sprawl and preventing the merging of settlements.</p> <p>The screening of the land from external viewpoints and the pastoral fields however increase the perception that, from within the site, the land is open countryside.</p>
Flood Risk	The northern part of the site is at low risk of surface water flooding. No identified risks of flooding from rivers and streams.
Landscape assessment	46/100. The site comprises several field boundaries with a mixture of pastoral, rough/equestrian and urban characteristics. There are some PRoW's within the study area but none which directly influence the site. There are few conservational interests within the study area, with one listed building situated on the eastern edge of the site boundary. There is an overall low landscape value within the study area due to a combination of some degraded spaces and high levels of human influence. There is a low susceptibility to change with no notable loss of key characteristics and an extension of the urban fringe. The sensitivity of the landscape character is low overall. Visually, there are no indicators of value present. There is a medium number of potential receptors as the site is part of the settlement edge. The overall visual susceptibility is low partly due to the site being unimportant to visual amenity. Overall, there is low visual sensitivity.
Green Infrastructure	Part of the Gotham Hills ecological corridor. Existing network of woodland and grassland can be enhanced and buffered. There is potential for creating important links between existing habitats.
Historic Environment	No identified designated or non designated heritage assets impacted
Nature conservation	Part of the site is identified as a Local Wildlife Site (Hill Road Grassland). The site contains particular plant species of interest, such as orchids.
AQMA/contamination	The site is not within or in proximity to an air quality management area
Community facilities	Village contains a limited number of community facilities -small convenience store/post office, village hall (currently closed) and three public houses.
Highways and access	Potential access from the proposed development to the north of the site, and or possible upgrade of Eyres Lane access are possible options.
Accessibility	The site is in proximity to village centre (within a 10 minute walk) which contains a basic range of facilities. Bus stops on Leake Road provide services to Nottingham, East Leake and Loughborough. These services run 2-3 times per hour.
Other issues	
Agricultural land	The provisional land classification is grade 3
Deliverability	The site is optioned by a housebuilder who are promoting it for development.

Site reference	SHLAA/GOT/018	Site name	Land East of Gypsum Way Phase 2
Parish/town	Gotham	Site area (hectares)	3.4
Dwelling capacity	78	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	78	Source of number of dwellings	Assumption made on best estimate

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site is located within the green belt. There are no major technical constraints identified as part of this assessment.

Keyworth

Overall summary	Planning permission for minor residential development. Deliverable within 5 years. Net gain of 1		

Keywordh

Site reference	SHLAA/KEY/002	Site name	Land at Lings Lane
Parish/town	Keywordh	Site area (hectares)	12.8
Dwelling capacity	256	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located in the green belt
Flood Risk	The site is not at risk of flooding from watercourses. A small area of the site is identified as at risk of surface water flooding.
Landscape assessment	NW03 Widmerpool Clay Wolds. The character strength of the area is Strong. The area has a strong intact rural character with arable and pasture farming and pockets of woodland key features. There is a minor amount of fragmentation where fields have expanded in the south and north of the area. In these places hedgerows trees in fields are a remnant of a former pattern.
Green Infrastructure	Trees and hedgerows should be retained and enhanced.
Historic Environment	Example of Ridge and Furrow evident across some of the fields.
Nature conservation	There are no designated nature conservation interest within or adjacent to the site. There are however a number of mature hedgerows which are a LBAP priority habitat. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Not within or within close proximity to and AQMA
Community facilities	The adopted Core Strategy identifies Keywordh as a Key Settlement with a Local Centre. The Centre includes convenience (local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. Centre includes community centre with public park and play area, medical centre and gym.
Highways and access	The site is remote from the main settlement and therefore unlikely to be considered a sustainable location. Furthermore, Ling's Lane is currently a Bridleway which would have to be made up to highway adoption standard which would involve widening and the provisions of footway.
Accessibility	The site is away from the main bus route, however is within proximity to the main village centre
Other issues	Site is not adjacent to the settlement and is detached.
Agricultural land	Majority of land classed as grade 2, with some grade 3.
Deliverability	Site being promoted by landowner. No known developer on board.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	Site is currently Green Belt and is entirely divorced from the main settlement of Keywordh. Due to the undulating nature of the site parts of the site would be very visible from other areas. Development is therefore considered unsuitable on these grounds.
------------------------	---

Keyworth

Site reference	SHLAA/KEY/003	Site name	Land South of Selby Lane
Parish/town	Keyworth	Site area (hectares)	2.4
Dwelling capacity	50	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	50	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Within Nottingham and Derby Green Belt, the land is identified as KEY/H in the Green Belt Review. Part 2 of Green Belt Review concludes that this Green Belt land prevents intrusion of development into the countryside. If removed, the lack of a defensible boundary would weaken the Green Belt in this area and isolate the allotments and land between Widmerpool Lane and Stanton Lane. These areas are within the Green Belt.</p> <p>Land rises to the settlement's edge with development predominantly on the ridge line. The extension of development below the ridgeline would result in a conspicuous extension of the settlement.</p> <p>The site scored 15, indicating that it is low-medium green belt importance rather than low value. A higher score was not achieved due to absence of Green Belt settlements south Keyworth and the limited historic assets.</p>
Flood Risk	Flood zone 1
Landscape assessment	Aggregate LVIA score: 60/100. The site comprises the northern parts of two arable fields on the eastern edge of Keyworth; it benefits from long views towards the Leicestershire Wolds in the south. Despite the good condition of the landscape resource within the study area, it has a low landscape value. This is contributed to in part by the lack of conservation interests and recreational interests. The landscape susceptibility is also low, although the increased prominence of the settlement arising from development of the site and erosion of the rural setting is an issue. The landscape sensitivity is low. In terms of visual amenity there is a medium value attached to the site, in part attributed to the bench just to the north of the site which indicates value, as well as the site's value as the rural setting to the village and the long views to the Leicestershire Wolds. The susceptibility is also medium as a result as the medium number of potential receptors and high degree of visibility of the site. Overall, there is a medium visual sensitivity.
Green Infrastructure	No GI or open space constraints. The site offers opportunities to incorporate amenity and natural green space. Boundary treatments/buffer may be required to screen the site from long distance views.
Historic Environment	There are no recorded heritage assets within or in close proximity of this site.
Nature conservation	There are no designated nature conservation interest within or adjacent to the site. It is however bounded on three sides by established mature hedgerows which are a LBAP priority habitat. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keyworth as a Key Settlement with a Local Centre. The Centre includes convenience (local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also second local centre at Wolds Drive and a small collection of shops on the corner of

Site reference	SHLAA/KEY/003	Site name	Land South of Selby Lane
Parish/town	Keyworth	Site area (hectares)	2.4
Dwelling capacity	50	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	50	Source of number of dwellings	Assumption made on best estimate

	Nottingham Road and Debdale Lane. Centre includes community centre with public park and play area, medical centre and gym.
Highways and access	Access onto Selby Lane likely to be acceptable. Widmerpool Lane access shown on indicative layout may need relocating to ensure visibility is not comprised by bend adjacent to Willow Brook junction . 30mph speed limit will need to be adjusted to include site. Footway to be extended to connect to existing.
Accessibility	Village centre is a 10 minute walk. Wolds Drive is 5 minute walk. Schools are within a 10 minute walk. Bus services run along Selby Lane providing access to Nottingham. Bus stops are within a 5 minute walk, on Willow Brook and Selby Lane, these provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.
Other issues	
Agricultural land	The site is identified as Grade 3 agricultural land . Further assessment required to establish whether Grade 3a (best and most versatile) or Grade 3b.
Deliverability	Due to the size of the site, the number of units proposed (50), house builder involved with the site, and their representation on LP, it is considered deliverable within 5 years should the site ever be allocated.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	Site is located within the Green Belt. There are few constraints in the deliverability of the site other than policy constraints. Potential visual impact on the landscape would require careful consideration.		

Keyworth

Site reference	SHLAA/KEY/004	Site name	Land off Nicker Hill
Parish/town	Keyworth	Site area (hectares)	7.5
Dwelling capacity	160	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	18/02524/OUT, 19/02894/FUL, 20/00428/REM
Allocated site reference	Policy 4.1 Land of Nicker Hill	Status	Under Construction - less than 25% of dwellings or no completions
Number of dwellings remaining	121	Source of number of dwellings	Planning Application

Green Belt	The site is not identified as green belt through Local Plan Part 2
Flood Risk	Flood zone 1. EA map identifies areas within the site that are at medium risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 61/100. Situated on the north-eastern edge of Keyworth, the site is a series of both arable and pastoral fields which forms a key part of the rural setting for the village. There is a high landscape quality and close representativeness to the landscape character set out by Nottinghamshire County Council, both of which contribute to a medium landscape value. Despite the site's role as part of the rural setting to the village, there is a low landscape susceptibility to development of the site. The landscape sensitivity is also low. The site has a low visual value although the long views afforded to the north are a positive factor. There is a medium visual susceptibility which is as a result of the site being a part of the visual amenity for both recreational and residential receptors, as well as the high visibility of the site within its surroundings. Overall the sensitivity of the visual amenity is medium.
Green Infrastructure	No GI or open space constraints. Opportunities exist to provide multifunctional amenity and natural green space. Green corridors within the site should link to the existing rights of way that are in the vicinity. They should also provide wildlife corridors linking with the neighbouring LWS and wider countryside.
Historic Environment	There are no recorded heritage assets within or in close proximity of this site. BGS is a local interest building. It is however screened by a tree belt.
Nature conservation	The field adjacent to both the site and BGS is a LWS (BGS Meadow) and also identified as existing grassland within the Biodiversity Opportunity Mapping Report. It is also adjacent to Stanton-on-the-Wolds Golf Course, also designated a LWS. The land is bounded by and contains within it established mature hedgerows which are a LBAP priority habitat and the pasture may contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. The site also contains ditches which are also a priority habitat. In accordance with the BOMP, ditches should be buffered and managed to improve connectivity of water bodies, biodiversity and reduce diffuse water pollution. Adverse effects should be avoided, mitigated or as a last resort compensated. Given presence of LWS and priority habitats a Phase 1 habitat survey should be undertaken.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keyworth as a Key Settlement with a Local Centre. The Centre includes convenience (local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. The village has community centre/village hall with public park and play area, medical centre and gym.

Site reference	SHLAA/KEY/004		Site name	Land off Nicker Hill	
Parish/town	Keyworth			Site area (hectares)	7.5
Dwelling capacity	160		Density (dwellings/hectare)	21	
Site source	Developer/Landowner Submission		Planning reference	18/02524/OUT, 19/02894/FUL, 20/00428/REM	
Allocated site reference	Policy 4.1 Land of Nicker Hill		Status	Under Construction - less than 25% of dwellings or no completions	
Number of dwellings remaining	121		Source of number of dwellings	Planning Application	
Highways and access	Access onto Nicker Hill likely to be acceptable. If number of dwellings is significantly greater than 150, consideration should be given to second point of access / widened single point with appropriate turning facility. Crossing points for pedestrians and connections to adjacent bus stops need be provided. Impact on Platt Lane and Melton Road junction to be considered as part of application.				
Accessibility	Village centre is a 15 minute walk. Wolds Drive is 5 minute walk. Schools are within a 10 minute walk. Bus stops are within a 5 -10 minute walk, on Wolds Drive and Willow Brook, these provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.				
Other issues					
Agricultural land	The site is identified as Grade 3 agricultural land. Further assessment required to establish whether Grade 3a (best and most versatile) or Grade 3b.				
Deliverability	Under construction				
Delivery Period	4 years		Delivery	5 Year Tranche - 0-5 Years	
Overall summary	Under construction				

Keyworth

Site reference	SHLAA/KEY/005	Site name	Hill Top Farm, Platt Lane (1)
Parish/town	Keyworth	Site area (hectares)	2.6
Dwelling capacity	0	Density (dwellings/hectare)	
Site source	Employment Site	Planning reference	
Allocated site reference	LAPP policy 15 Employment allocations	Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is to be removed from the Green Belt through Local Plan Part 2
Flood Risk	Flood zone 1. EA map indicates that land adjacent to the ditch which borders the site is at high risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 45/100. The site includes a pastoral field and the farmstead of Hill Top Farm and slopes upwards towards its eastern corner giving the impression of a valley on the western site boundary. The landscape of the study area has a tendency to be degraded in parts and has a high degree of human influence, both of which contribute to a low landscape value. Development of the site would result in minimal loss of key characteristics and a perceived extension to the urban edge, albeit within urban fringe rather than adjacent to existing development. Overall the landscape sensitivity is low. The community sports facilities to the north-west of the site indicate some form of visual value, but this is limited and overall low. The site has minimal impact on the visual amenity of both recreational and residential receptors and as a result, the visual susceptibility is also considered to be low. The visual sensitivity is also therefore low.
Green Infrastructure	No GI or open space constraints. The site is small and offers limited opportunities, beyond small amenity spaces, for green infrastructure.
Historic Environment	There are no nationally designated heritage assets within or adjacent to the site. The cottages fronting Platt Lane and BGS are however identified as local interest buildings.
Nature conservation	There are no designated nature conservation interest within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP priority habitat. The site also contains pasture identified as existing grassland within the Biodiversity Opportunity Mapping Report. The site may therefore contain locally important natural grassland species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keyworth as a Key Settlement with a Local Centre. The Centre includes convenience (local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. The village has community centre/village hall with public park and play area, medical centre and gym.
Highways and access	Speed limit and Village gateway signs would need to be extended to include site.
Accessibility	Village centre is a 20 minute walk. Wolds Drive is 10 minute walk. Schools are within a 10 - 20 minute walk. Bus stops are within a 5 minute walk, on Nicker Hill and Station Road, these provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.

Site reference	SHLAA/KEY/005	Site name	Hill Top Farm, Platt Lane (1)

Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Other issues	
Agricultural land	The site is identified as Grade 3 agricultural land.
Deliverability	LAPP identifies the site as an employment allocation

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	The site is identified as an employment allocation in Local Plan Part 2. Therefore it is considered to be not suitable now
------------------------	--

Keyworth

Site reference	SHLAA/KEY/006	Site name	Hill Top Farm, Platt Lane (2)
Parish/town	Keyworth	Site area (hectares)	4.2
Dwelling capacity	95	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	80	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Within Nottingham and Derby Green Belt, this land comprises the southern third of the larger KEY/C site in the Green Belt Review. Part 2 of Green Belt Review scored the this larger parcel of land 17 (out of a maximum of 25) and identifies the land as being low-medium in Green Belt importance due to intrusion into an area of Green Belt.</p> <p>The reduction in the distance between Keyworth and Normanton on the Wolds would be apparent.</p>
Flood Risk	<p>Flood zone 1. EA map indicates that land adjacent to Platt Lane is at high risk of surface water flooding.</p>
Landscape assessment	<p>As KEY6 would not be developed in isolation, without KEY5. The LVIA therefore assesses both sites as one parcel of land. Aggregate LVIA score: 47/100. Situated to the north-east of Keyworth, Site KEY006 comprises pastoral land as well as the farmstead for Hill Top Farm. As KEY005, the study area is in mixed condition and locally degraded around the site itself with a strong urban fringe influence. With this in mind, the landscape value is considered to be low. Development of the site would result in an extension of the perceived urban edge, altering the urban fringe character to a stronger urban character. However, there would be no loss of key characteristics and the landscape susceptibility would be overall low. Visually, the community sports facilities opposite the site have value, but there is little else; resulting in a low visual value. The site has little bearing on the visual amenity of both recreational and residential receptors and as a result the visual susceptibility is also low. Overall both the landscape and visual sensitivities are considered to be low.</p>
Green Infrastructure	<p>No GI or open space constraints. The site offers opportunities to incorporate amenity and natural green space. Boundary treatments/buffer may be required to screen the site.</p>
Historic Environment	<p>There are no nationally designated heritage assets within or adjacent to the site. The cottages fronting Platt Lane and BGS are however identified as local interest buildings.</p>
Nature conservation	<p>There are no designated nature conservation interest within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP priority habitat. The site also contains pasture identified as existing grassland within the Biodiversity Opportunity Mapping Report. The site may therefore contain locally important natural grassland species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.</p>
AQMA/contamination	<p>Site is not within an AQMA.</p>
Community facilities	<p>The adopted Core Strategy identifies Keyworth as a Key Settlement with a Local Centre. The Centre includes convenience (local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. The village has community centre/village hall with public park and play area, medical centre and gym.</p>
Highways and access	<p>Questionable from a sustainability standpoint. Significant investment required to improve</p>

Site reference	SHLAA/KEY/006	Site name	Hill Top Farm, Platt Lane (2)
Parish/town	Keyworth	Site area (hectares)	4.2
Dwelling capacity	95	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	80	Source of number of dwellings	Assumption made on best estimate

Accessibility	pedestrian links to Village Centre. Speed limit and Village gateway signs would need to be extended to include site. Consideration should also be given to improving Platt Lane and Melton Road junction given cumulative impacts of multiple sites in vicinity.
Other issues	
Agricultural land	The site is identified as Grade 3 agricultural land. Further assessment required to establish whether Grade 3a (best and most versatile) or Grade 3b.
Deliverability	Due to the size of the site, the number of units proposed and the landowner's representation on LAPP Issues and Options, it is considered that construction could commence within 5 years and units delivered within 10 years.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is not constrained by significant heritage, flooding, landscape or biodiversity issues which cannot be avoided or mitigated. Distance from the centre of the village raises sustainability concerns and significant investment required to improve pedestrian links to the centre of the village. Medium-high green belt importance.

Keyworth

Site reference	SHLAA/KEY/008	Site name	Platt Lane
Parish/town	Keyworth	Site area (hectares)	9.0
Dwelling capacity	187	Density (dwellings/hectare)	21
Site source	Planning Application	Planning reference	18/02412/FUL
Allocated site reference	LAPP Policy 4.2	Status	Under Construction - over 50% of dwellings completed
Number of dwellings remaining	59	Source of number of dwellings	Planning Application

Green Belt	The site is to be removed from the Green Belt through Local Plan Part 2
Flood Risk	Flood zone 1. EA map indicates that land adjacent to Platt Lane is at high risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 51/100. The site is a pleasant arable field nestled on the northern edge of Keyworth. The study area has a variable landscape condition and a lack of conservation interests as well as a distinct human influence; for these reasons there is a low landscape value. In terms of susceptibility, other than the loss of attractive and well-managed farmland, there are few other issues. The site would be perceived as an infill / extension to the urban edge and the susceptibility would overall be low. The landscape sensitivity would also be low. The adjacent community sports facilities are indicators that there is visual value within the study area, but other than that there are few other factors that point to the site having any visual value. The site forms part of the visual amenity for residential receptors, but has a minor impact on the experience for recreational receptors. The visual sensitivity is overall low.
Green Infrastructure	No GI or open space constraints. The scale of development provides an opportunity to provide on-site green infrastructure (amenity, LEAP and natural green space). On-site green infrastructure would also offer opportunity to reduce landscape and visual impacts. Possible off-site contributions for improvements to neighbouring playing pitches.
Historic Environment	There are no nationally designated heritage assets within or adjacent to the site. The cottages fronting Platt Lane are however identified as local interest buildings.
Nature conservation	There are no designated nature conservation interest within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP priority habitat. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keyworth as a Key Settlement with a Local Centre. The Centre includes convenience (local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. These are closer to this site. The village has community centre/village hall with public park and play area, medical centre and gym.
Highways and access	Highways and pedestrian mitigation measures agreed through the planning application
Accessibility	Village centre is within a 20 minute walk. Wolds Drive is 10 minute walk. Schools are within a 10 - 20 minute walk. Bus stops are within a 5 minute walk, on Nicker Hill and Station Road, these provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.
Other issues	Preferred allocation within the Neighbourhood Plan.
Agricultural land	The site is identified as Grade 2 (BMV) agricultural land.

Keywordh

Site reference	SHLAA/KEY/009	Site name	Land north of Debdale Lane (1)
Parish/town	Keywordh	Site area (hectares)	5.4
Dwelling capacity	110	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	110	Source of number of dwellings	Assumption made on best estimate

Green Belt	Within Nottingham and Derby Green Belt, the land is identified as KEY/P in the Green Belt Review. Part 2 of Green Belt Review scored this parcel of land 11 out of a maximum of 25. Whilst this moderately sized site would intrude into the open countryside, the perception of urban sprawl would be limited to Debdale Lane. The site is contained by established hedgerows which provide robust defensible boundaries. Whilst the location and topography would result in encroachment into open countryside it is concluded that the site is of low-medium Green Belt importance.
Flood Risk	Flood zone 1.
Landscape assessment	Aggregate LVIA score: 49/100. The site is an arable field which rises from south to north abutting existing housing on the north-western edge of Keywordh. There is a low landscape value within the study area, contributed to by a lack of conservation interests, low perceived tranquillity and low scenic quality. The site would form an extension to the existing urban edge although the ridgeline at the north of the site would mean that there is a slight increase in prominence of the settlement. There would be no loss of key characteristics and overall the landscape susceptibility to change within the study area as a result of development of the site would be low. The landscape sensitivity would also be low. The site does not have any visual value, but there is a medium visual susceptibility. This is partly due to the site forming the rural outlook for residential receptors and having a medium visibility within the study area with slightly longer views available from the north. Overall the visual sensitivity is low.
Green Infrastructure	No GI or open space constraints. The site is small and offers limited opportunities, beyond small amenity spaces, for green infrastructure. Development would provide opportunity to link to and improve the neighbouring right of way.
Historic Environment	There are no nationally or locally designated heritage assets within or adjacent to the site.
Nature conservation	There are no designated nature conservation interest within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP priority habitat. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated. Run-off into the ditch on Debdale Lane should be prevented to avoid diffuse water pollution.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keywordh as a Key Settlement with a Local Centre. The Centre includes convenience (local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. These are closer to this site. The village has community centre/village hall with public park and play area, medical centre and gym.
Highways and access	Upgrade required to end of Debdale Lane to form suitable access.
Accessibility	Village centre is a 10 - 15 minute walk. Wolds Drive is 20 minute walk. Schools are within a

Site reference	SHLAA/KEY/009	Site name	Land north of Debdale Lane (1)

10 - 20 minute walk. Bus stops are within a 5 minute walk on Manor Road an Nottingham Road. These provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.

Other issues

Agricultural land

The site is identified as Grade 2 (BMV) agricultural land with a small corner to the south east classified as Grade 3.

Deliverability

No submission from landowner during consultation on Greater Nottingham Strategic Plan. Availability uncertain.

Delivery Period

N/A

Delivery

Could be suitable if policy changes 5+ years

Overall summary

The site is not constrained by significant heritage, flooding, landscape or biodiversity issues which cannot be avoided or mitigated. The Green Belt Review concludes that the land is of low-medium Green Belt importance. The land is identified as Grade 2 agricultural land however and Debdale Lane would require upgrading in order to provide suitable access. It is less well located in terms of access to some local facilities than some other sites. No submission from landowner during consultation on Greater Nottingham Strategic Plan Growth Options.

Keywordh

Site reference	SHLAA/KEY/010	Site name	North of Bunny Lane
Parish/town	Keywordh	Site area (hectares)	10.9
Dwelling capacity	221	Density (dwellings/hectare)	20
Site source	Planning Application	Planning reference	18/02515/FUL
Allocated site reference	LAPP policy 4.3 Land South of Debdale Lane	Status	Under Construction - over 50% of dwellings completed
Number of dwellings remaining	90	Source of number of dwellings	Planning Application

Green Belt	The site is not in the Green Belt following adoption of the LAPP
Flood Risk	Flood zone 1. EA map indicates that part of the site which drops down to Debdale Lane is at high/medium risk of surface flooding.
Landscape assessment	Aggregate LVIA score: 48/100. The site is a series of fields comprising rough ground and pasture on the western edge of Keywordh village; the site forms a block extending the existing settlement line. Within the study area, there is a low landscape value owing in part to the poorly managed and degraded rural edge and the lack of recreational opportunities. As mentioned previously, the site forms a block of development extending the urban edge with no loss of key characteristics. With this in mind the landscape susceptibility and also the landscape sensitivity are both considered to be low. Visually, there is limited value in the study area; the only element of value is the Keywordh conservation area and this is visually removed from the site itself. In terms of visual susceptibility, the site forms part of the rural outlook for residential properties, although the view is not necessarily aesthetically pleasing due to the degraded nature of the site itself. The visual susceptibility is therefore medium owing to this, the medium number of receptors and the medium visibility of the site. Overall the visual sensitivity is considered to be low.
Green Infrastructure	No GI or open space constraints. Landowner has proposed linear park on the site's external boundary. Linking Debdale Lane with Bunny Lane. This linear park is also identified within the neighbourhood plan. Fields to the north are to be retained
Historic Environment	There are no nationally designated heritage assets within or adjacent to the site. Ridge and furrow identified within northern fields that slope down to Debdale Lane.
Nature conservation	There are no designated nature conservation interest within or adjacent to the site. It is however bounded by and contains established mature hedgerows which are a LBAP priority habitat. It may also contain locally important neutral grassland. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within the Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated. Run-off into the ditch on Debdale Lane should be prevented to avoid diffuse water pollution.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keywordh as a Key Settlement with a Local Centre. The Centre includes convenience (local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. The village has community centre/village hall with public park and play area, medical centre and gym.
Highways and access	Access arrangements under consideration as part of planning application.
Accessibility	Village centre is a 5 minute walk. Wolds Drive is 15 minute walk. Schools are within a 5 - 10 minute walk. Bus stops are within a 5 minute walk, on Manor Road, Bunny Lane and the in

Keyworth

Site reference	SHLAA/KEY/011	Site name	Land south of Debdale Lane (2)
Parish/town	Keyworth	Site area (hectares)	9
Dwelling capacity	180	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	180	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Within Nottingham and Derby Green Belt, KEY11 is identified as KEY/O within the Green Belt Review. KEY/O scores 16 (medium-high). It is concluded that the removal of KEY/O from the Green Belt and its development would result in a significant intrusion into the open countryside. The land is more prominent than adjacent site KEY/N due to the site's topography which slopes north, south and west. Development on this area would be visible over a wide area increasing the perception of settlement sprawl.
Flood Risk	Flood zone 1. EA map indicates that 2 areas of the site which drop down to Debdale Lane are at high, medium and low risk of surface flooding.
Landscape assessment	AS KEY11 would not be developed in isolation without KEY10, the LVIA has assessed both sites as one parcel of land. Aggregate LVIA score: 54/100. The site forms a large block of development on pastoral land, rough ground and woodland on the western edge of Keyworth. Within the study area there is a low landscape value arising in part from the lack of recreational assets and the generally degraded nature of the rural edge. The landscape susceptibility is medium as the site will form a large urban extension and has the potential to increase the perceived urbanisation in the western half of the study area by drawing the settlement over a localised ridgeline. Overall the landscape sensitivity is low. In terms of visual amenity there is a low visual value inherent in the site. Again, the visual susceptibility is medium due to the site forming part of the rural edge for a medium number of residential receptors, as well as the site having a medium visibility within the study area.
Green Infrastructure	No GI or open space constraints. Landowners have proposed linear park on the site's external boundary. Linking Debdale Lane with Bunny Lane.
Historic Environment	There are no nationally designated heritage assets within or adjacent to the site. Ridge and furrow identified within northern fields that slope down to Debdale Lane.
Nature conservation	There are no designated nature conservation interest within or adjacent to the site. It is however bounded by and contains established mature hedgerows and a woodland (Cottons Plantation) which are LBAP priority habitats. Cottons Plantation is identified as existing woodland within the Biodiversity Opportunity Mapping Report. The pasture may contain locally important neutral grassland species. Neutral grassland is also a LBAP priority habitat. In accordance with the BOMR, Hedgerow and woodland quality and connectivity should be preserved and enhanced. Adverse effects should be avoided, mitigated or as a last resort compensated. Run-off into the ditch on Debdale Lane should be prevented to avoid diffuse water pollution.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keyworth as a Key Settlement with a Local Centre. The Centre includes convenience stores (including local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. The village has community centre/village hall with public park and play area, medical centre and gym.

Site reference	SHLAA/KEY/011	Site name	Land south of Debdale Lane (2)
Parish/town	Keyworth	Site area (hectares)	9
Dwelling capacity	180	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	180	Source of number of dwellings	Details obtained through external Site Submission

Highways and access	Significant junction works likely required to serve development. Access routes in Nottingham will need to be considered as traffic will all either pass through Village Centre or along Bunny Lane to Bradmore neither option particularly great.
Accessibility	Village centre is within a 10 minute walk. Wolds Drive is 20 minute walk. Schools are within a 5 - 10 minute walk. Bus stops are within a 5 - 10 minute walk, on Manor Road, Bunny Lane and the in the village centre. These provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.
Other issues	
Agricultural land	The site is classified as both Grade 2 and 3 agricultural land, roughly equally split. Further assessment required to establish whether Grade 3 is 3a or 3b.
Deliverability	The site is being promoted by a land agent, however no known house builder involved

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is not constrained by significant heritage, flooding, landscape or biodiversity issues which cannot be avoided or mitigated. Avoiding development within the northern fields that slope down to Debdale lane will avoid areas at risk of surface water flooding and sloping area. Significant junction works may be required as traffic will either pass through the village or along Bunny Lane to the A60. Due to the significant sprawl that would occur the Green Belt Review as it stands at present, the site is of medium-high Green Belt importance when assessed against the purposes of including land with it. Land is also Grade 2 agricultural land (BMV). The southern end of the site in particular is well located to the village centre. The site was promoted by the landowner during consultation on the Greater Nottingham Strategic Plan Growth Options, however no known house builder is involved.
------------------------	--

Keywordh

Site reference	SHLAA/KEY/013	Site name	Hillside Farm
Parish/town	Keywordh	Site area (hectares)	3.3
Dwelling capacity	70	Density (dwellings/hectare)	29
Site source	Planning Application	Planning reference	20/02670/FUL
Allocated site reference	LAPP policy 4.4 Hillside Farm Keywordh	Status	Previously refused planning permission
Number of dwellings remaining	70	Source of number of dwellings	Local Plan

Green Belt	The site is not in the green belt in the LAPP
Flood Risk	Flood zone 1. EA map indicates that small area down the centre of the site and adjacent to properties Roseland Close are at a low risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 44/100. The site is a field of rough pasture situated on the western edge of the village of Keywordh; the site has limited visibility from its surroundings and slopes downwards from the northern boundary. Within the study area, the low landscape quality and lack of recreational value contribute to a low landscape value. The site would appear as an urban extension to the settlement boundary with no loss of key characteristics and as such would have a low landscape susceptibility as well. Visually, there is little value related to the site, which does not form part of the visual amenity for any receptors; the visual susceptibility is low. Overall there is a low landscape and visual sensitivity.
Green Infrastructure	No GI or open space constraints. The site offers opportunities to incorporate amenity and natural green space. Boundary treatments/buffer may be required to screen the site.
Historic Environment	There are no nationally designated or locally identified heritage assets within or adjacent to the site.
Nature conservation	There are no designated nature conservation interest within or adjacent to the site. In accordance with the Biodiversity Opportunity Mapping Report, the hedgerow fronting Bunny Lane should be preserved and enhanced as these are a LBAP habitat. Any adverse effects should be avoided, mitigated or as a last resort compensated. Run-off into ditches should be prevented to avoid diffuse water pollution.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keywordh as a Key Settlement with a Local Centre. The Centre includes convenience (including local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. The village has community centre/village hall with public park and play area, medical centre and gym.
Highways and access	No significant constraints, subject to visibility. Depending on access position speed limit alteration may be required.
Accessibility	Village centre is a 5 minute walk. Wolds Drive is 10 -15 minute walk. Schools are within a 5 - 10 minute walk. Bus stops are within a 5 - 10 minute walk, on Manor Road, Bunny Lane and the in the village centre. These provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.
Other issues	
Agricultural land	The site is identified as Grade 2 (best and most versatile) and Grade 3 agricultural land.
Deliverability	The site is allocated within Local Plan Part 2 for housing. The site has a national housebuilder

Site reference	SHLAA/KEY/013	Site name	Hillside Farm
Parish/town	Keyworth	Site area (hectares)	3.3
Dwelling capacity	70	Density (dwellings/hectare)	29

Allocated site reference	LAPP policy 4.4 Hillside Farm Keyworth	Status	Previously refused planning permission
Number of dwellings remaining	70	Source of number of dwellings	Local Plan

and a full planning application is under consideration. Given the site's progress it is considered to be suitable now, available now and achievable now.

Delivery Period	3 Years	Delivery	5 Year Tranche - 6-10 Years
Overall summary	The site is allocated within Local Plan Part 2 for housing. There has been a refusal and a withdrawal of a planning application, therefore not considered to be achievable now		

Keyworth

Site reference	SHLAA/KEY/014	Site name	Land South of Bunny Lane
Parish/town	Keyworth	Site area (hectares)	20
Dwelling capacity	400	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	400	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Within Nottingham and Derby Green Belt, the Green Belt review split this large site into two separate parcels of land - KEY/J & KEY/K. KEY/J scored 16 out of a maximum of 25 and identifies the site as being medium-high in Green Belt importance. This Green Belt land is adjacent to Wysall Lane and it forms the setting of Keyworth and its Conservation Area. Development west of Wysall Lane below the ridgeline would be conspicuous across a wide area of open Green Belt. As a consequence this parcel of land scored poorly against the Green Belt's purpose of preventing urban sprawl. KEY/K scored 16 and is also of medium-high Green Belt Importance. This large parcel of land scored highly against those Green Belt purposes which seek to restrict sprawl and safeguard the countryside from encroachment. As the land slopes away to the south from Bunny and rises behind the Sewage Treatment Works, the expansion of Keyworth into open countryside would be conspicuous. The removal of this land would also reduce the distance between Keyworth and Bunny.</p>
Flood Risk	<p>Flood zone 1. EA map indicates that land within the centre of the site (at its lowest point) is at a high risk of surface water flooding.</p>
Landscape assessment	<p>As the site would not be developed in isolation without the land to the east the LVIA has assessed these sites as one parcel of land. Aggregate LVIA score: 61/100. Situated on the south-western edge of Keyworth, the site comprises a series of arable and pastoral fields which slope away from the village and form part of its rural setting. The value of the landscape resource within the study area is considered to be medium - this is partly a result of the medium levels of landscape and scenic quality, as well as the conservation interests available. Susceptibility to development is also medium as the site constitutes a large urban extension which will cause a loss of the strong rural setting to the village, as well as a perception of increased urbanisation and prominence of the settlement. The landscape sensitivity is also medium. In terms of the visual amenity, there is a low value despite the site's role as part of Keyworth's rural setting. However, there is a medium susceptibility arising from the site's role as part of the visual amenity experienced by both recreational and residential receptors, as well as the medium visibility of the site within its surroundings. Overall, the visual sensitivity is medium.</p>
Green Infrastructure	<p>The existing footpath which crosses the site east/west should be retained and green corridor created along its route. The site offers opportunities to incorporate amenity and natural green space. Boundary treatments/buffer may be required to screen the site.</p>
Historic Environment	<p>There are no nationally designated heritage assets within or adjacent to the site. Local records show two areas of ridge and furrow on east part of site. Ridge and furrow either side of Wysall Lane. Southern part of the site is within 100 metres of the southern conservation area boundary.</p>
Nature conservation	<p>There are no designated nature conservation interest within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP priority habitat and the pasture is identified as existing grassland within Biodiversity Opportunity Mapping report and may contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within the Biodiversity Opportunity Mapping Report. Adverse effects should be</p>

	avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keyworth as a Key Settlement with a Local Centre. The Centre includes convenience (including local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. The village has community centre/village hall with public park and play area, medical centre and gym.
Highways and access	No significant constraints, subject to visibility. Depending on access position speed limit alteration may be required. NOTE: given proximity of the four sites above consideration needs to be given to a comprehensive access scheme to serve all allocations. As access solution to site on one side of Bunny Lane may preclude access to site on opposite side and vice versa.
Accessibility	Village centre is a 5-15 minute walk. Wolds Drive is 10 -15 minute walk. Schools are within a 5 - 10 minute walk. Bus stops are within a 5 - 10 minute walk, on Manor Road, Bunny Lane and the in the village centre. These provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.
Other issues	Site is 27.2 hectares. Severn Trent require a buffer around their facilities to allow for future expansion. This would affect the south-western portion of the site. Gross developable area therefore circa 20 hectares as an estimate.
Agricultural land	The site is classified as Grade 2 agricultural land.
Deliverability	Landowner has not submitted a representation promoting the site during consultation on the Greater Nottingham Strategic Plan Growth Options. One developer (currently seeking permission for housing within the neighbouring allocated site) has however supported its allocation. No known house builders with a tie to the site.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Keyworth is identified as a Key Settlement within the adopted Core Strategy. The site is not constrained by significant heritage, flooding, landscape, access or biodiversity issues which cannot be avoided or mitigated. Located within the Green Belt, the Green Belt Review concluded that, due to the extent of the site and its prominence, the land is of medium-high Green Belt importance. The land is identified as Grade 2 Agricultural land. Landowner has not submitted a representation promoting the site during consultation on the Greater Nottingham Strategic Plan Growth Options. One house builder (currently seeking permission for housing within the neighbouring allocated site) has however supported its allocation as part of a larger strategic allocation. No known house builders with a tie to the site.

Dwelling capacity	250	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	250	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Located within the Green Belt
Flood Risk	No flood risk identified. Some areas are identified as being at risk from surface water flooding.
Landscape assessment	Landscape assessment score 61/100. There is a high landscape quality and close representativeness to the landscape character set out by Nottinghamshire County Council, both of which contribute to a medium landscape value. Despite the site's role as part of the rural setting to the village, there is a low landscape susceptibility to development of the site. The landscape sensitivity is also low. The site has a low visual value although the long views afforded to the north are a positive factor. There is a medium visual susceptibility which is as a result of the site being a part of the visual amenity for both recreational and residential receptors, as well as the high visibility of the site within its surroundings. Overall the sensitivity of the visual amenity is medium.
Green Infrastructure	The site lies within the Keyworth/Stanton on the Wolds to Radcliffe on Trent via Cotgrave and Cotgrave Country Park Ecological network, where protection, enhancement or the provision of woodland is advocated. Could also provide enhanced grassland given proximity to Stanton on the Wolds Golf Course,
Historic Environment	Not located within or within proximity to designated heritage assets.
Nature conservation	The site contains hedgerows and watercourses, which are priority habitats. The site is also adjacent to the Stanton on the Wolds Golf Course Local Wildlife Site, identified due to its grassland habitat.
AQMA/contamination	The site is not within or in proximity to an AQMA.
Community facilities	The Centre includes convenience stores and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. Centre includes community centre with public park and play area, medical centre and gym.
Highways and access	Presently the only potential access points available would be through the allocated site to the north west. There may be limitations on the amount of development that can be served by this one access.
Accessibility	Village centre is a 20 minute walk. Wolds Drive is a 10 minute walk. Schools are within a 15 minute walk. Bus stops are within 15 minute walk, on Wolds Drive and Willow Brook, these provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.
Other issues	
Agricultural land	Grade 3.

Keyworth

Site reference	SHLAA/KEY/048	Site name	Land off Nicker Hill East
Parish/town	Keyworth	Site area (hectares)	15.8
Dwelling capacity	315	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	315	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Green Belt Review score 15 (Low-medium importance). The site is in a prominent position and as such prevents significant and visually intrusive development. As a consequence the site scored well against preventing urban sprawl.</p> <p>The absence of inappropriate development within the site and the screening of properties on Nicker Hill also result in a high score against safeguarding the countryside from encroachment. The land is adjacent to parish boundary and the removal of it from the Green Belt would increase the merging of Keyworth with Stanton-on-the-Wolds.</p> <p>Although the site scored 15 (within the low-medium category of Green Belt performance) as a result of the site's Green Belt performance against 4 of the 5 Green Belt purposes, the Green Belt designation is deemed to be important to the protection of the open countryside.</p>
Flood Risk	No flood risk identified from watercourses. Some areas identified as being at risk from surface water flooding.
Landscape assessment	<p>Landscape assessment score 61/100. There is a high landscape quality and close representativeness to the landscape character set out by Nottinghamshire County Council, both of which contribute to a medium</p> <p>landscape value. Despite the site's role as part of the rural setting to the village, there is a low landscape susceptibility to development of the site. The landscape sensitivity is also low. Number of dwellings remaining	50	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Site is within the Green Belt. Land was not assessed within Local Plan Green Belt Review. This review did however assess the Green Belt at a strategic level (Keyworth South). This concluded that land south of Keyworth was of medium-high Green belt importance.
Flood Risk	Flood Zone 1
Landscape assessment	Site was not assessed as a potential LP2 housing allocations.
Green Infrastructure	
Historic Environment	The field contains ridge and furrow (Medieval to Post Medieval - 1066 AD to 1779 AD)
Nature conservation	
AQMA/contamination	Site is not within AQMA
Community facilities	The Centre includes convenience (local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. Centre includes community centre with public park and play area, medical centre and gym.
Highways and access	TBC
Accessibility	Village centre is a 5 minute walk. Schools are within a 20 minute walk. Bus stops are within 5 minute walk, within the village centre, these provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.

Delivery Period	2 Years	Delivery	Could be suitable if policy changes 5+ years
Overall summary	Site is within the Green Belt. May be suitable if policy changes.		

Radcliffe on Trent

Site reference	SHLAA/RAD/001	Site name	Land north of Nottingham Road (mixed use)
Parish/town	Radcliffe on Trent	Site area (hectares)	12.5
Dwelling capacity	200	Density (dwellings/hectare)	16
Site source	Planning Application	Planning reference	18/02806/OUT
Allocated site reference	Policy 5.1	Status	Planning application under consideration
Number of dwellings remaining	200	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not within the green belt
Flood Risk	The whole site is within Flood zone 2. A significant area of the site is at a high, medium and low risk of surface water flooding. Most recent SFRA work indicates that only the northern part of the site is at risk of flooding in a 1 in 1000 flood risk event given the defences in the area.
Landscape assessment	The LVIA aggregate score: 51/100. The site is comprises pasture and rough ground nestled into the north-western edge of Radcliffe on Trent. The landscape value of the study area is low, with little scenic quality, correlation to existing landscape character, recreational value or tranquillity. Development of the site would be perceived as infill with no notable loss of key characteristics and as such the landscape susceptibility is also low. The landscape sensitivity is low overall. The site has no visual value in its surroundings and has a limited contribution to surrounding receptors owing to its low visibility. Overall, the visual value, susceptibility and sensitivity area all low.
Green Infrastructure	The site does not contain any publicly accessible open space. It is however adjacent to a disused mineral line which provides a wildlife corridor. The site also contains hedgerows/ tree belts and a small wood which combined provide a network of wildlife corridors across the site. Due to the size of the site opportunities exist to provide multi- functional green space which also provides necessary SUDS.
Historic Environment	There are no heritage assets within or adjacent to the site
Nature conservation	There are no designated nature conservation interests within the site. It is however bounded by and contains hedgerows, tree belts (isolated trees), scrub and woodland. These are LBAP priority habitats. The Rushcliffe Biodiversity Mapping Report identifies the protection of hedgerows as a wider opportunity which should be enhanced with shelter belts. The land has been used for pasture and some has been less intensively managed. The presence of existing grassland is identified in the opportunity map. It may therefore contain locally important lowland grassland plant species. The loss of priority habitats should be avoided, mitigate or as a last resort compensated.
AQMA/contamination	No constraints identified.
Community facilities	Radcliffe on Trent is a Key Settlement with a Local Centre as identified in the Core Strategy. The Local Centre contains a wide variety of shops, public houses, cafes/restaurants, and fast food establishments. It also has a range of community facilities including a health centre, library, church hall and community centre. The village also has an infant and junior school and one Secondary School (with 6th form). Radcliffe has two publicly accessible playing fields (Wharf Lane and Bingham Road).
Highways and access	Notts CC comments: Access achievable, but would require alteration to speed limit. Improvements to footway connecting to Radcliffe likely to be required. On the limit of what would be considered a sustainable walking distance from the Village Centre. Proximity to Trunk Road means HE may have comments re-impact on adjacent junction., however thought will need to given how three junctions in close proximity will interact.
Accessibility	Site lies approximately 1km from the centre of the village. Bus stop adjacent to the site on

Allocated site reference	Policy 5.5	Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	5	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is not located within the green belt in the LAPP
Flood Risk	The site is within Flood zone 2. It is also identified as being at a low risk of surface water flooding. The site is identified as not at risk of flooding in the Greater Nottingham Strategic Flood Risk Assessment.
Landscape assessment	The aggregate LVIA score is: 32/100. The site comprises pasture and rough ground nestled into the north-western edge of Radcliffe on Trent. The landscape value of the study area is low, with little scenic quality, correlation to existing landscape character, recreational value or tranquillity. Development of the site would be perceived as infill with no notable loss of key characteristics and as such the landscape susceptibility is also low. The landscape sensitivity is low overall. The site has no visual value in its surroundings and has a limited contribution to surrounding receptors owing to its low visibility. Overall, the visual value, susceptibility and sensitivity area all low.
Green Infrastructure	The site does not contain any publicly accessible open space and the site is not of a sufficient size to deliver significant GI/open space beyond small area of amenity space. The ditch will require buffering to protect the wildlife corridor and reduce contribution to diffuse water pollution.
Historic Environment	Although within the historic core of the village, there are no heritage assets identified within or adjacent to the site.
Nature conservation	The site does not contain any designated nature conservation assets. It is bounded by a hedgerow and ditch, both of which are LBAP priority habitats and may contain local biodiversity interest. A small pond is also identified on maps. Land has not been managed and may contain locally important grassland species.
AQMA/contamination	The site is not within or in close proximity of an AQMA. No identified constraints
Community facilities	Radcliffe on Trent is a Key Settlement with a Local Centre as identified in the Core Strategy. The Local Centre contains a wide variety of shops, public houses, cafes/restaurants, and fast food establishments. It also has a range of community facilities including a health centre, library, church hall and community centre. The village also has an infant and junior school and one Secondary School (with 6th form). Radcliffe has two publicly accessible playing fields (Wharf Lane and Bingham Road).
Highways and access	Single track access to the site. Would be difficult to access site to an appropriate standard. Limit usually of up to 5 dwellings of such an arrangement.
Accessibility	Site lies approximately 400 metres from the village centre. The train station is 0.5 miles (11 minute walk) and from here there are services to Nottingham and Skegness. There are limited services to Liverpool Lime Street and Boston. There are bus stops adjacent to the site on Main Road. These are served by the Rushcliffe Mainline, Rushcliffe Villager V1, Shoplink S2 and the X6 services. They provide links to Nottingham, Bingham, Bottesford and Newton.
Other issues	

Site reference	SHLAA/RAD/002		Site name	72 Main Road	
Parish/town	Radcliffe on Trent			Site area (hectares)	0.5
Dwelling capacity	5		Density (dwellings/hectare)	10	
Site source	Housing Allocation		Planning reference		
Allocated site reference	Policy 5.5		Status	No formal allocation or no extant planning permission for residential development	
Number of dwellings remaining	5		Source of number of dwellings	Details obtained through external Site Submission	

Agricultural land	Agricultural Land Classification of 'Urban'. However it is a greenfield site adjacent to land which is Grade 3 agricultural land.
Deliverability	As no representation was received during consultation on the LAPP Issues and Options, the current intentions of the landowner are unknown and deliverability therefore less certain.

Delivery Period	1 Year	Delivery	5 Year Tranche - 6-10 Years
-----------------	--------	----------	-----------------------------

Overall summary	Site identified as a housing application within Local Plan Part 2. However, no site promotion was made during the latter stages of plan preparation and no application has been submitted. As the landowner has not expressed a recent willingness to develop the site, the site cannot be considered to be available or achievable now.
------------------------	--

Radcliffe on Trent

Site reference	SHLAA/RAD/003	Site name	Land off Shelford Road
Parish/town	Radcliffe on Trent	Site area (hectares)	19.67
Dwelling capacity	400	Density (dwellings/hectare)	20
Site source	Planning Application	Planning reference	13/02329/OUT; 18/02688/REM; 21/00945/REM
Allocated site reference	Policy 5.3	Status	Under Construction - over 25% of dwellings completed
Number of dwellings remaining	239	Source of number of dwellings	Planning Application

Green Belt	The site is not located within the green belt.
Flood Risk	The site is identified as being within Flood Zone 1. The bottom of the site is at a high risk of surface water flooding. Land in the centre, below the farm, is also at a low risk of surface water flooding.
Landscape assessment	As RAD3 will not be developed in isolation, without RAD2, the LVIA has assessed both sites as one parcel of land. The aggregate LVIA score is: 52/100. The site comprises a series of arable and pastoral fields on the eastern edge of Radcliffe on Trent, forming a block of development towards the east of the village. The landscape value in the study area is low overall, but the generally well maintained landscape quality, the representativeness of the study area with regards to the LCA and the rural edge contributed by the site within the study area all add value. In terms of susceptibility to change, development of the site would result in the creation of an extension of the settlement, with potential for increased density but overall a low landscape susceptibility. The landscape sensitivity is also low. In visual terms, the site forms part of the rural setting to the settlement but has little other visual value. In terms of visual susceptibility, the site forms the rural setting for both residential and transport receptors and has a medium visibility, resulting in a medium susceptibility. The visual sensitivity is overall low.
Green Infrastructure	Site contains hedgerows which should form the basis of wildlife/recreation corridors/buffers within and adjacent to the site. Land adjacent to the railway line is susceptible to surface water flooding and should accommodate SUDS as well as provide benefits to wildlife and recreation (as proposed in current planning application).
Historic Environment	There are no identified heritage assets within or in close proximity of the site. No archaeological alerts, however initial assessment which accompanies the planning application has found evidence of late iron age early Romano British settlement
Nature conservation	There are no designated nature conservation interests within or in close proximity of the site. The site is bounded by and contains hedgerows in varied conditions. Hedgerows are a LBAP priority habitat which should according to the Biodiversity Opportunity Mapping Report be preserved and enhanced.
AQMA/contamination	The site is not within or in close proximity of a AQMA. No constraints identified.
Community facilities	Radcliffe on Trent is a Key Settlement with a Local Centre as identified in the Core Strategy. The Local Centre contains a wide variety of shops, public houses, cafes/restaurants, and fast food establishments. It also has a range of community facilities including a health centre, library, church hall and community centre. The village also has an infant and junior school and one Secondary School (with 6th form). Radcliffe has two publicly accessible playing fields (Wharf Lane and Bingham Road).
Highways and access	Contributions to highways improvements on the A52/Nottingham Road junction required. New mini roundabout on Shelford Road required for access, contribution to bus services, and new bus stop proposed as part of the application.
Accessibility	The site lies approximately 0.9km (15-20 minutes) from the village centre. There is a bus stop

Site reference	SHLAA/RAD/003	Site name	Land off Shelford Road
Parish/town	Radcliffe on Trent	Site area (hectares)	19.67
Dwelling capacity	400	Density (dwellings/hectare)	20
Site source	Planning Application	Planning reference	13/02329/OUT; 18/02688/REM; 21/00945/REM
Allocated site reference	Policy 5.3	Status	Under Construction - over 25% of dwellings completed
Number of dwellings remaining	239	Source of number of dwellings	Planning Application

adjacent to the site on Shelford Road. The Rushcliffe Villager Service (V1) provides hourly busses to Bingham and Newton. Hourly busses to Nottingham on the same route can be accessed from a stop on Shelford Road. The main bus service through the village centre runs every 10 minutes to Nottingham and Bingham and is around a 15 minute walk away.

Other issues

Agricultural land

The majority of site is classified as Grade 2 (BMV) agricultural land.

Deliverability

Land is identified for allocation within Local Plan Part 2. In accordance with SHLAA methodology it is assumed delivery of 44 units per annum.

Delivery Period

6 Years

Delivery

5 Year Tranche - 0-5 Years

Overall summary

Land is identified for allocation within Local Plan Part 2. In accordance with SHLAA methodology it is assumed delivery of 44 units per annum.

Radcliffe on Trent

Site reference	SHLAA/RAD/004	Site name	Land between 8A and 10 Valley Road

Radcliffe on Trent

Site reference	SHLAA/RAD/005	Site name	North of Grantham Rd (south of railway line)
Parish/town	Radcliffe on Trent	Site area (hectares)	11.8
Dwelling capacity	280	Density (dwellings/hectare)	20
Site source	Housing Allocation	Planning reference	19/01353/OUT 22/01600/REM
Allocated site reference	Policy 5.4	Status	Extant outline planning permission
Number of dwellings remaining	280	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is removed from the green belt through the LAPP
Flood Risk	The site is within Flood zone 1. Land to the west of the site within Bell's Field is identified as being at a high risk of surface water flooding. Land in the middle of the site is at a low risk of surface water flooding.
Landscape assessment	The aggregate LVIA score is 50/100: The site is an arable field which runs alongside the A52 and forms a perpendicular finger to the main settlement edge of Radcliffe on Trent. Within the study area, there is a low landscape value, derived in part from the lack of recreational value and tranquillity - particularly as a result of the busy A52. The landscape susceptibility is also low -however it is noted that development of the site would result in loss of good quality arable land, as well as a perceived finger of development stretching into the rural context of the settlement. Overall the landscape sensitivity is low. In terms of visual amenity, there is no value attached to the site within its surroundings. The site does however forms a part of the rural outlook for residential receptors. Overall, the visual susceptibility is low given the limited visibility of the site, and the visual sensitivity is also low.
Green Infrastructure	There are no accessible GI or open spaces assets within the site. Ditches and hedgerows within and adjacent to the site provide wildlife corridors. Opportunities to enhance these corridors and provide multifunctional Green Infrastructure should be designed into any scheme.
Historic Environment	There are no heritage assets within the site.
Nature conservation	There are no designated nature conservation sites within the site. Saxondale Railway Local Wildlife Site is adjacent to the sites north east corner. The railway line also borders the site provide an indirect connectivity to the LWS. The site contains a drainage ditch - a local priority habitat in the LBAP. The Biodiversity Opportunity Mapping Report identifies the protection and enhancement of ditches as a borough wide objective in order to maintain ecological connectivity of water bodies and reduce diffuse water pollution.
AQMA/contamination	The site is not within or in close proximity of an AQMA. No constraints identified.
Community facilities	Radcliffe on Trent is a Key Settlement with a Local Centre as identified in the Core Strategy. The Local Centre contains a wide variety of shops, public houses, cafes/restaurants, and fast food establishments. It also has a range of community facilities including a health centre, library, church hall and community centre. The village also has an infant and junior school and one Secondary School (with 6th form). Radcliffe has two publicly accessible playing fields (Wharf Lane and Bingham Road).
Highways and access	Hudson Way unlikely to be suitable for access. Primary access will need to be off of A52. In terms of new accesses, Highways England expect Rushcliffe Borough Council to demonstrate that no reasonable alternative options exist before considering new accesses on to the A52 as a possibility.
Accessibility	The centre of the site lies approx. 1.5km from the village centre. (At its closest point the centre is approx. 1.2 km, at its furthest 1.8km). Bus stop directly adjacent to the site which is served by the 90 Fosseway Flyer (Nottingham - Newark: hourly service Mon-Sat, 2 hourly service Sundays) , 850 (2 NottsBus services each way Mon-Sat to Cropwell Bishop and

Radcliffe on Trent

Site reference	SHLAA/RAD/008	Site name	Land at Radcliffe on Trent Golf Club (west)
Parish/town	Radcliffe on Trent	Site area (hectares)	3.0
Dwelling capacity	10	Density (dwellings/hectare)	3
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Green Belt Review site RAD/H. Scored 15 representing a site of low-medium importance. This site is physically and visually disconnected from Radcliffe-on-Trent's recognised settlement edge. The removal of this land would create an outlying inset area within the Green Belt which would weaken the long term permanence of the Green Belt in this area.</p> <p>The site's disconnection from the settlement edge, the intervening tree belts and woodland combine to give the overriding perception that the site is open countryside and not settlement fringe.</p> <p>Removal of this site from the Green Belt for development would necessitate the removal of land between the site and the current Green Belt boundary, including a Local Wildlife Site and land west of Cropwell Road.</p> <p>The removal of the site would not reduce the distance between Radcliffe-on-Trent and Cropwell Bishop, and the land does not preserve the setting of a heritage asset or character of the historic settlement. Consequently, whilst the removal of site would result in a outlying development in the Green Belt and encroachment into the countryside it is concluded that the site is of low-medium Green Belt value.</p>
Flood Risk	The site is within Flood zone 1 and not at risk of surface water flooding.
Landscape assessment	The aggregate LVIA score: 68/100. The site forms part of the Radcliffe on Trent Golf Course and comprises rising land which slopes up towards the east, with long views available from the high points in the site and its surroundings. There is a medium landscape value in the study area, partly as a result of the medium landscape and scenic quality, as well as the recreational value added by features such as the Dewberry Hill open space. Development of the site would result in a block of development in a low density area, which would be prominent in its surroundings due to the landform of the site. This in turn would result in perceived increases in urbanisation and reduction in tranquillity. Overall there will be a medium landscape susceptibility and sensitivity. In visual terms, there are indicators of value in terms of the presence of the golf course and also a nearby bench which indicates the value of similar views to those enjoyed within the site. The visual value is medium. There is potential for development on the site to intrude on adjacent receptors - particularly recreational and residential receptors - and the rising land of the site means that the visibility of its eastern half is considerable. The visual sensitivity is medium overall.
Green Infrastructure	The site contains woodland/tree belts which provide ecological benefits and connections with the neighbouring wildlife site and wider countryside. These should be preserved. Aside from the members of the golf club, the land does not publicly accessible.
Historic Environment	There are no identified heritage assets within or in close proximity to the site.
Nature conservation	There are no designated nature conservation assets within the site. It is however adjacent to Dewberry Hill Local Wildlife Site (LWS) and development may enclose the western part o this LWS. The site itself is bounded by a ditch on its northern boundary and contains hedgerow, scrub and woodland which are priority habitats. The rough grassland may contain locally

Site reference	SHLAA/RAD/008	Site name	Land at Radcliffe on Trent Golf Club (west)
Parish/town	Radcliffe on Trent	Site area (hectares)	3.0
Dwelling capacity	10	Density (dwellings/hectare)	3
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Assumption made on best estimate

	important flora. The contribution of these habitats to the ecological network (including connectivity to the neighbouring LWS and wider countryside) should be preserved and enhanced. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	The site is not within or in close proximity of an AQMA. No constraints identified.
Community facilities	Radcliffe on Trent is a Key Settlement with a Local Centre as identified in the Core Strategy. The Local Centre contains a wide variety of shops, public houses, cafes/restaurants, and fast food establishments. It also has a range of community facilities including a health centre, library, church hall and community centre. The village also has an infant and junior school and one Secondary School (with 6th form). Radcliffe has two publicly accessible playing fields (Wharf Lane and Bingham Road).
Highways and access	Notts CC comments: Access should be achievable.
Accessibility	The site is 0.5 miles (a 10 minute walk) from the centre of the village. The station is 0.6 miles north (a 10 minute walk). Bus stops are located on the A52, 0.2 miles (4 minute walk) to the north. The number 90 service provides hourly services to Nottingham and Newark.
Other issues	The site rises quite steeply from Cropwell Road
Agricultural land	Agricultural Land Classification identifies the site as 'urban'. The land is not in agricultural use, but forms part of a golf course rough area.
Deliverability	Landowner representation on LP2 indicates that, subject to removal of the land from the Green Belt and compliance with relevant planning policies, the site can be made available for development

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Land was promoted as a possible allocation within LP it is therefore available for development. Whilst it is one of the closer sites to the village centre the site is beyond the existing green belt inset boundary for Radcliffe on Trent and is covered by trees, scrubland and part of a golf course, which is a sporting facility. In cases where there is a loss of a sporting facility, it is expected that there should be evidence that equal or better provision should be provided elsewhere, or that there is no demand for this part of the facility. The landscape assessment indicates that it would be unable to mitigate against the development of such prominent land, and that the visual susceptibility of the land to development is high.

Radcliffe on Trent

Site reference	SHLAA/RAD/009	Site name	Land at Radcliffe on Trent Golf Club (east)
Parish/town	Radcliffe on Trent	Site area (hectares)	3.8
Dwelling capacity	10	Density (dwellings/hectare)	2.6
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Green Belt Review site RAD/I. Located 500m west of Radcliffe-on-Trent's Green Belt boundary the removal of this site would facilitate development within an outlying Green Belt location and weaken the long term permanence of the Green Belt in this area.</p> <p>Removal of this site from the Green Belt for development would necessitate the removal of land between the site and the current Green Belt boundary, including a Local Wildlife Site and land east and west of Cropwell Road.</p> <p>As it is opposite residential development, it would not reduce the distance between Radcliffe and Cropwell Butler,</p> <p>The site scored 14 against Green Belt purposes, indicating the site is of low-medium Green Belt importance. This reflects the site's location opposite residential development on Cropwell Road, the absence of merging and of historic assets.</p>
Flood Risk	The site is within Flood zone 1. A small area of the site is at a low risk of surface flooding.
Landscape assessment	<p>The aggregate LVIA score is: 60/100. Site RAD/009 forms part of the Radcliffe on Trent Golf Course and low plateau on the perceived edge of the village. There is a medium landscape value in the study area, partly as a result of the medium landscape and scenic quality, as well as the recreational value added by features such as the Dewberry Hill open space.</p> <p>Development of the site would result in a block of development in a low density area, which would result in perceived increases in urbanisation and reduction in tranquillity, as well as a block of development which is relatively isolated from the main settlement block. Overall there will be a medium landscape susceptibility and sensitivity. In visual terms, there are indicators of value in terms of the presence of the golf course, but little else - this leads to a low visual value. There is potential for development on the site to intrude on adjacent receptors - particularly recreational and residential receptors - but the visibility of the site is restricted by landform and vegetation, giving an overall medium visual susceptibility. The visual sensitivity is low overall.</p>
Green Infrastructure	The site does not contain publicly accessible open space and there are limited opportunities to provide GI beyond amenity/natural green space.
Historic Environment	There are no identified heritage assets within or in close proximity of the site.
Nature conservation	There are no designated heritage assets within the site and there are none in close proximity. The site is bounded by hedgerows of varying conditions. Whilst the land has been managed as part of the golf course it may, where management has been less intense, contain locally important species of flora. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	The site is not within or in close proximity of an AQMA. No constraints identified.
Community facilities	Radcliffe on Trent is a Key Settlement with a Local Centre as identified in the Core Strategy. The Local Centre contains a wide variety of shops, public houses, cafes/restaurants, and fast food establishments. It also has a range of community facilities including a health centre,

Site reference	SHLAA/RAD/009	Site name	Land at Radcliffe on Trent Golf Club (east)
Parish/town	Radcliffe on Trent	Site area (hectares)	3.8
Dwelling capacity	10	Density (dwellings/hectare)	2.6
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Assumption made on best estimate

	library, church hall and community centre. The village also has an infant and junior school and one Secondary School (with 6th form). Radcliffe has two publicly accessible playing fields (Wharf Lane and Bingham Road).
Highways and access	Notts CC comments: Access should be achievable
Accessibility	The site is 0.6 miles (a 11 minute walk) from the centre of the village. The station is 0.8 miles north (a 14 minute walk). Bus stops are located on the A52, 0.3 miles (6 minute walk) to the north. The number 90 service provides hourly services to Nottingham and Newark.
Other issues	
Agricultural land	Approximately half of the site is Grade 2, approximately half is Grade 3, although not in agricultural use (part of a golf course).
Deliverability	Landowner representation on LP2 indicates that, subject to removal of the land from the Green Belt and compliance with relevant planning policies, the site can be made available for development

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Land was promoted as a possible allocation within LP it is therefore available for development. The one positive in relation to the site is that it is one of the closer sites to the village centre. The closest bus service to the site (along the A52) runs hourly. The site is some distance away from the existing green belt inset boundary for Radcliffe on Trent and is in use as part of a golf club, which is a sporting facility. In such cases it is expected that there should be evidence that equal or better provision should be provided elsewhere, or that there is no demand for this part of the facility. The landscape assessment indicates that it would be unable to mitigate against the development of such prominent land, although the visibility of the site is restricted by landform and vegetation. As with all sites around Radcliffe on Trent, a solution needs to be found in order to improve health and education provision.
------------------------	---

Radcliffe on Trent

Site reference	SHLAA/RAD/010	Site name	North of Holme Lane
Parish/town	Radcliffe on Trent	Site area (hectares)	6.4
Dwelling capacity	115	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	115	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Site RAD/K in the Green Belt Review. This area of Green Belt land is contained by the railway line and the River Trent beyond. These reduce the land's Green Belt is not required to check unrestricted sprawl or prevent merging. The land can be split into two separate areas either side of Island Lane. Land east is more visually connected to Radcliffe, where the residential properties and the recreation ground are visible. Land west of Island Lane is disconnected from Radcliffe and is open countryside in character. Half the land therefore benefits from Green Belt protection which has/is safeguarding the countryside from encroachment.</p> <p>The overall score of 13 reflects the prominence of the settlement edge east of Island Lane and the contribution of physical features which contain the site and reduce the importance of the land's Green Belt designation. The land is considered of low-medium Green Belt importance.</p>
Flood Risk	The site is Flood zone 2. Latest SFRA data identify that with present defences, the site is not at risk of flooding. The whole site is also at a low risk of surface water flooding.
Landscape assessment	The aggregate LVIA score is: 55/100. The site comprises a number of fields in equestrian usage on the north-western corner of Radcliffe on Trent. Within the study area is a low landscape value, which is partly a result of lack of representativeness of the LCA, as well as a number of human detractors present within the study area. The landscape susceptibility is medium, however, due to the fact that the site is not contiguous with the rest of the settlement and a perceived loss of rural setting with the development of the site. Overall the landscape sensitivity is low. In visual terms, there is a low value a result of the site within the study area, although the site does contribute as part of the rural setting to this side of the settlement. The site is part of the visual amenity for recreational receptors, albeit degraded, but the visibility of the site within its surroundings is low, resulting in a low visual susceptibility. The visual sensitivity is also low.
Green Infrastructure	Public right of way crosses the site east west from Island lane to the Wharf Lane Recreation Ground. Second PROW follows Island lane under the disused railway line to the River Trent.
Historic Environment	There are no identified heritage assets within the site, or in close proximity.
Nature conservation	There are no designated nature conservation assets within or adjacent to the site. The site however consists of individual paddocks which may contain locally important flora. It is also bounded by hedgerows and the tree belts along the railway embankment and Holme Lane. These are LBAP priority habitats which should be preserved and enhanced to ensure their contribution to the local ecological network is maintained. Adverse impacts on priority habitats should be avoided, mitigated, or, as a last resort compensated.
AQMA/contamination	Site is not within or in close proximity of a AQMA. No constraints identified.
Community facilities	Radcliffe on Trent is a Key Settlement with a Local Centre as identified in the Core Strategy. The Local Centre contains a wide variety of shops, public houses, cafes/restaurants, and fast food establishments. It also has a range of community facilities including a health centre, library, church hall and community centre. The village also has an infant and junior school

Site reference	SHLAA/RAD/010	Site name	North of Holme Lane
Parish/town	Radcliffe on Trent	Site area (hectares)	6.4
Dwelling capacity	115	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	115	Source of number of dwellings	Assumption made on best estimate

	and one Secondary School (with 6th form). Radcliffe has two publicly accessible playing fields (Wharf Lane and Bingham Road).
Highways and access	Current information suggests insufficient capacity, no detailed assessment made - Only access to the site is via the Green, which is not wide enough to let two cars past.
Accessibility	The site is 0.4 miles (8 minute walk) from the village centre. The railway station is 0.5 miles (11 minute walk) and from here there are services to Nottingham and Skegness. There are limited services to Liverpool Lime Street and Boston. There are bus stops within a 2 minute walk on Main Road. These are served by Rushcliffe Mainline, Rushcliffe Villager V1, Shoplink S2 and the X6 services. They provide links to Nottingham, Bingham, Bottesford and Newton.
Other issues	
Agricultural land	The site is classified as Grade 3 agricultural land.
Deliverability	Landowner representation indicates that, subject to removal of the land from the Green Belt and compliance with relevant planning policies, the site would be available for development. Access constraints however mean the site is not deliverable or developable.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	Land was promoted as a possible allocation within LP it is therefore available for development. There are a number of positives in relation to the site. Firstly the site is one of the closest sites to the village centre that is being promoted. Secondly does not score highly when assessed against the purposes for including land within the Green Belt. Thirdly, the landscape and visual sensitivity assessment indicates that it is generally of low value and of low sensitivity. Whilst the site is identified as at risk of flooding in a 1 in 1000 event on the Environment Agency's flood maps, the SFRA indicates that the site is not at risk of flooding. The major barrier in relation to the possibility of development on the land is that an appropriate access could not be achieved to the site in order to enable development as The Green is too narrow. The land is therefore considered non-deliverable or developable.
------------------------	---

Radcliffe on Trent

Site reference	SHLAA/RAD/011	Site name	Land to the north of Shelford Road
Parish/town	Radcliffe on Trent	Site area (hectares)	9.4
Dwelling capacity	150	Density (dwellings/hectare)	15
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	150	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>Land is identified as RAD/C within the Green Belt Review. As the land only shares one boundary with Radcliffe and it extends over Gibbet Hill and down towards the River Trent the Green Belt designation prevents significant and prominent urban sprawl. It also safeguards an area which is free from inappropriate development and which is open countryside in character.</p> <p>The land's contribution to the open arable landscape east of Radcliffe on Trent means the land scores well against Green Belt purposes and is considered to be of medium-high Green Belt importance.</p>
Flood Risk	The site is within Flood Zone 1. The site is not at risk of surface water flooding.
Landscape assessment	The aggregate LVIA score is 62/100. Site RAD/011 comprises arable land on the north-eastern edge of Radcliffe on Trent, which contains a ridgeline. The study area is generally of high landscape quality with strong perceptual aspects and these factor in to its medium landscape value. In terms of landscape susceptibility, development of the site would result in the loss of the strong rural edge, as well as increased prominence of housing within the surrounding area as a result of the landform of the site. The landscape susceptibility and sensitivity are both medium. Visually, there is little value derived from the site, although it does contribute to the rural setting to the settlement. The visual susceptibility is medium, however, as the site forms part of the strong rural edge for residential and recreational receptors and is highly visible in its surroundings. Overall the visual sensitivity is medium.
Green Infrastructure	There are no GI or open space constraints within the site. It is however adjacent to the River Trent which is part of the strategic green corridor and PRoW. Development should, where possible, enhance this corridor.
Historic Environment	Shelford Lodge is adjacent to the site and contains local interest buildings. Site includes archaeological remains including Neolithic flint scatters, immediately to north a medieval (possibly roman) gallows mound (Gibbet Hill) is located. The remoteness and isolation of this non-designated feature within landscape would be adversely affected.
Nature conservation	There are no designated nature conservation assets within the site. It is however bounded by the Trent Bluffs Clough LWS to the west. Indirect effects upon this site should be avoided, mitigated, or, as a last resort compensated.
AQMA/contamination	The site is not located within, or in close proximity of an AQMA.
Community facilities	Radcliffe on Trent is a Key Settlement with a Local Centre as identified in the Core Strategy. The Local Centre contains a wide variety of shops, public houses, cafes/restaurants, and fast food establishments. It also has a range of community facilities including a health centre, library, church hall and community centre. The village also has an infant and junior school and one Secondary School (with 6th form). Radcliffe has two publicly accessible playing fields (Wharf Lane and Bingham Road).
Highways and access	Access should be achievable. Is should however be considered in conjunction with

Site reference	SHLAA/RAD/011	Site name	Land to the north of Shelford Road
Parish/town	Radcliffe on Trent	Site area (hectares)	9.4
Dwelling capacity	150	Density (dwellings/hectare)	15
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	150	Source of number of dwellings	Details obtained through external Site Submission

Accessibility	<p>RBC/RAD/04 to ascertain cumulative impacts of both developments, particularly given traffic generated will most likely need to pass through the village to get to Nottingham.</p> <p>The edge of the site is 1 mile (20 minute walk) from the village centre. The railway station is 0.8 miles (15 minute walk) and from here there are services to Nottingham and Skegness. There are limited services to Liverpool Lime Street and Boston. There is a bus stop adjacent to the site on Shelford Road. The Rushcliffe Villager Service (V1) provides hourly busses to Bingham and Newton. Hourly busses to Nottingham on the same route can be accessed from a stop on Shelford Road which is a 3 minute walk. The main bus service through the village centre runs every 10 minutes to Nottingham and Bingham and is around a 15 minute walk away.</p>
Other issues	Site is located within Shelford parish.
Agricultural land	The site is approx. half Grade 2 and half Grade 4 agricultural land . Grade 2 is best and most versatile land.
Deliverability	Whilst the land was promoted during LP2 consultation (it was not allocated), no representation submitted during LP1 Growth Options consultation. Site is constrained by Green Belt and landscape issues. Could be suitable if policy changes, not available now and not achievable now.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	<p>Whilst the land was promoted during LP2 consultation (it was not allocated), and promoted again in response to a call for strategic sites. One positive in relation to the site is that it is not at risk of flooding. There are however a number of issues that would count against the site being the most suitable for housing. Firstly the site has been assessed to be of medium-high Green Belt importance when considered against the purposes for including land within it. Secondly the landscape and visual sensitivity assessment identifies that the site is of high landscape quality, and that it would be unable to provide full mitigation of the effects of development of the site. The site is also prominent as it sits on a ridgeline. There may also be detrimental effects on historic assets. As with all sites around Radcliffe on Trent, a solution needs to be found in order to improve health and education provision.</p>
------------------------	--

Radcliffe on Trent

Site reference	SHLAA/RAD/012	Site name	The Paddocks
Parish/town	Radcliffe on Trent	Site area (hectares)	3.0
Dwelling capacity	75	Density (dwellings/hectare)	25
Site source	Planning Application	Planning reference	
Allocated site reference	Policy 5.6	Status	Previously refused planning permission
Number of dwellings remaining	75	Source of number of dwellings	Assumption made on best estimate

Green Belt	Site is not located within the Green Belt.
Flood Risk	The site is within Flood zone 1. It does however contain areas which are at a risk of surface water flooding.
Landscape assessment	The site has not been assessed within the Local Plan Part 2 LVIA.
Green Infrastructure	There are no GI or open space assets, beyond hedgerows which provide local wildlife corridors. There may be opportunities to provide small scale local amenity/wildlife spaces.
Historic Environment	There are no identified heritage assets within the site, or in close proximity.
Nature conservation	There are no designated nature conservation assets within the site or in close proximity. The land may contain locally important grassland flora.
AQMA/contamination	The site is not within or in close proximity of an AQMA.
Community facilities	Radcliffe on Trent is a Key Settlement with a Local Centre as identified in the Core Strategy. The Local Centre contains a wide variety of shops, public houses, cafes/restaurants, and fast food establishments. It also has a range of community facilities including a health centre, library, church hall and community centre. The village also has an infant and junior school and one Secondary School (with 6th form). Radcliffe has two publicly accessible playing fields (Wharf Lane and Bingham Road).
Highways and access	Access achievable, but would require alteration to speed limit. Improvements to footway connecting to Radcliffe likely to be required. On the limit of what would be considered a sustainable walking distance from the Village Centre. Proximity to Trunk Road means HE may have comments re-impact on adjacent junction.
Accessibility	The site is 0.8 miles (16 minute walk) from the village centre. The railway station is a 20 minute walk away and from here there are services to Nottingham and Skegness. There are limited services to Liverpool Lime Street. Frequent busses run along Nottingham Road which connect Radcliffe on Trent to Nottingham, Bingham and beyond.
Other issues	
Agricultural land	The land is classified as urban land, however, it is a greenfield site and adjacent tot Grade 3 classified agricultural land.
Deliverability	The site is allocated and an outline planning application is under consideration, however there is no known housebuilder involvement. The site is suitable and potentially achievable however it is not considered to be available now.

Delivery Period	2 Years	Delivery	5 Year Tranche - 6-10 Years
-----------------	---------	----------	-----------------------------

Overall summary	The site is allocated and an outline planning application is under consideration, however there is no known housebuilder involvement. The site is suitable and potentially achievable however it is not considered to be available now.

Radcliffe on Trent

Site reference	SHLAA/RAD/052	Site name	Hall Farm, Grantham Road
Parish/town	Radcliffe on Trent	Site area (hectares)	47
Dwelling capacity	700	Density (dwellings/hectare)	15
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	700	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is located within the Radcliffe on Trent: South West Green Belt Strategic Area. It scores 11. The topography slopes up from the A52 and consists of large open fields with weak defensible boundaries and woodland. Development south of the A52 would constitute prominent urban intrusion into the open countryside. Development south of the A52 would not significantly reduce GB between Radcliffe and Cotgrave/or the Cropwell's. Area contains development along Cropwell Road, although it is considered that this development forms a washed over part of Radcliffe on Trent. Land further west is open countryside in character with no inappropriate development within it. The area does not contain or form the setting of designated or non-designated heritage asset.
Flood Risk	Flood Zone 1
Landscape assessment	SN04 - Cotgrave and Tollerton Village Farmlands - Landscape condition is moderate. The strength of character of the area is moderate. The area has a uniform character of arable fields with prominent village fringes.
Green Infrastructure	Land comprises arable land. There are no public rights of way within the site.
Historic Environment	No constraints identified. HER identifies Palaeolithic to Bronze Age flints found within the site. HER identifies Spellow Farm as a historic building (Historic Farmstead Survey undertaken by NCC) and it may qualify as a non-designated heritage asset (in accordance with Local Plan Part 2).
Nature conservation	No designated nature conservation assets. Land contains some hedgerows, which are a local priority habitat.
AQMA/contamination	Not within AQMA. Hall farm identified as being potential contaminated land, together with pockets of worked ground.
Community facilities	Site is separated from the village centre, services and facilities by the A52. Nearest crossing is located at the junction of Cropwell Road.
Highways and access	Access can only be achieved of the A52.
Accessibility	Site is separated from the village centre, services and facilities by the A52. Nearest crossing is located at the junction of Cropwell Road. Poor connectivity at present to walking and cycling network and not within reasonable walking distance to frequent public transport, (a limited service runs around the Radcliffe on Trent Bypass rather than through the village).
Other issues	
Agricultural land	Grade 3
Deliverability	Land is in single ownership and is therefore available. The Growth Study which supports the Greater Nottingham Strategic Plan concludes that the Hall Farm Grantham Road site is free from major constraints and suitable for development pending further site investigations.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years

Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	700	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is located within the Radcliffe on Trent: North East Green Belt Strategic Area. It scores 11. There is only one boundary with the green belt inset for Radcliffe on Trent. There are weak features (field boundaries) that could act as defensible boundaries for a closer to the village. Oatfield Lane, No Joke Plantation and Shelford Road are stronger boundaries further out. Shelford and Saxondale and the strategic allocation at Former RAF Newton are some distance away. The area contains large open fields and woodland. There are no instances of inappropriate development within this area. The area does not contain or form the setting of designated heritage asset.
Flood Risk	Parts of the site are identified as at risk from surface water flooding, particularly on the eastern side. No identified risk of flooding from rivers and streams.
Landscape assessment	Landscape score 65/100. The site comprises a series of arable fields on the eastern edge of Radcliffe on Trent, forming a large finger of development towards the east into the rural setting of the village. The landscape value in the study area is low overall, but the generally well maintained landscape quality, the number of conservation interests and the strong rural edge contributed by the site within the study area all add value. In terms of susceptibility to change, development of the site would result in the creation of a finger of development into the strong rural edge, effectively eroding this edge and creating an increased perception of urbanisation. Development on Spellow Hill will be particularly problematic in terms of increased prominence of housing in the area. Due to this, the landscape susceptibility of the study area to change is therefore medium, and the landscape sensitivity is also medium. In visual terms, the site forms a strong rural setting to the settlement and this contributes to a medium visual value. In terms of visual susceptibility, the site forms the rural setting for both residential and transport receptors and includes areas of prominent land, resulting in a medium susceptibility. The visual sensitivity is overall medium.
Green Infrastructure	Retain hedgerows and trees within the site to provide a framework for GI provision. Enhance watercourse corridor. Enhance green infrastructure along the A52, which is identified as a potential green infrastructure corridor
Historic Environment	There are no identified impacts on designated or non designated heritage assets. HER identifies Spellow Farm as a historic building (Historic Farmstead Survey undertaken by NCC) and it may qualify as a non-designated heritage asset (in accordance with Local Plan Part 2).
Nature conservation	Saxondale Railway LWS runs through the site. Whilst the majority of the site is intensively farmed, there are trees, hedgerows and a watercourse within the site
AQMA/contamination	The site is not within or in proximity of an air quality management area. Areas of potentially contaminated land to the east of Spellow Farm include a pit and legacy farming activities
Community facilities	Radcliffe on Trent is a Key Settlement with a Local Centre as identified in the Core Strategy. The Local Centre contains a wide variety of shops, public houses, cafes/restaurants, and fast food establishments. It also has a range of community facilities including a health centre, library, church hall and community centre. The village also has an infant and junior school

Site reference	SHLAA/RAD/054	Site name	East of Radcliffe on Trent
Parish/town	Radcliffe on Trent	Site area (hectares)	55
Dwelling capacity	700	Density (dwellings/hectare)	13
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	700	Source of number of dwellings	Details obtained through external Site Submission

	and one Secondary School (with 6th form). Radcliffe has two publicly accessible playing fields (Wharf Lane and Bingham Road).
Highways and access	The site can only be accessed from the south by a single track bridge over the Nottingham to Grantham Railway line.. Improvements to access would be over third party land.
Accessibility	Site lies approximately 1.6km from the centre of the village. Busses run along Grantham Road every 15 minutes during the day. Radcliffe also has a train station with services to Nottingham and Skegness although the site is some distance from this. The site is some distance from most community facilities and the village centre. Some connectivity possible with walking and cycling network to the south of the site running alongside Grantham Road, back to Radcliffe on Trent Centre and Bingham. All three non car modes are to be improved.
Other issues	There is an oil well located within the site
Agricultural land	The provisional agricultural land classification is grade 2
Deliverability	The site is within one ownership, but no known developer involved at present.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is located within the green belt. There are concerns in relation to whether the site is deliverable due to present access constraints. Whilst there are no concerns in relation to potential impacts on features of historic value, it is considered that the landscape appraisal has identified some areas of importance.

Ruddington

Site reference	SHLAA/RUD/001	Site name	Land on the east side of Loughborough Road, Ruddington
Parish/town	Ruddington	Site area (hectares)	59
Dwelling capacity	1200	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	1200	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Green Belt. The site submission extends between Ruddington and Bradmore. Development of the whole site would lead to the merging of the two settlements.
Flood Risk	The site is not at risk of flooding from watercourses. Parts of the site are identified at risk of flooding from surface water.
Landscape assessment	SN04 – Cotgrave and Tollerton Village Farmlands The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character (LCA 2009). Reasonably flat arable farm land east and west of Ruddington. Landscape is typical of the surrounding rural area, with little scenic quality. PRow are limited but provide recreational value. Topography and field boundary vegetation mean that the area of search is largely visually enclosed. Small blocks of woodland and hedgerows within the area of search offer the potential to develop a sense of place underpinned by a green infrastructure network. Ruddington has textiles heritage, notably knitting and lace, which could contribute to a distinct character for a new settlement.
Green Infrastructure	There are no existing GI assets within the site. There may however be opportunities to design multi-functional GI within any development of the site.
Historic Environment	Bradmore conservation area to the south of the site. No listed buildings within or within the setting of the site. HER identifies a potential location of a windmill alongside Mill Lane, otherwise nothing of significance identified. Potential harm to this archaeological feature, extent of this feature will be limited and its location is already well known.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by hedgerows in varied condition which are a LBAP habitat. In addition, whilst most of the site is intensively farmed, there are some areas of grassland in the north and along farm tracks. The site falls within the urban fringe Green Infrastructure zone. Development within this area must incorporate accessible infrastructure that provides recreational opportunities, wildlife benefits, and enable pedestrian and cycle access to the wider countryside.
AQMA/contamination	The site is not within or in proximity to an Air Quality Management Zone. No areas identified as potentially contaminated land.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.

Site reference	SHLAA/RUD/001	Site name	Land on the east side of Loughborough Road, Ruddington
Parish/town	Ruddington	Site area (hectares)	59
Dwelling capacity	1200	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	1200	Source of number of dwellings	Assumption made on best estimate

Highways and access	Access would have to be created of the A60, which is a 50MPH road at this location
Accessibility	The nearest bus stops are on the A60 To the north and south of the western edge of the site. These stops are served by buses to Nottingham and Loughborough, which run hourly during the day. The site is some distance from the village centre.
Other issues	
Agricultural land	The site is predominantly grade 2 agricultural land with some grade 3
Deliverability	Site is being promoted on behalf of a landowner. No known developers involved in the site. The site is under single ownership. No known issues regarding ransom strips

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The positives to this site is that there are limited constraints identified in relation to impact on heritage assets. There site is also not at risk of flooding from watercourses. The western part of the site is adjacent to a frequent bus service, although the site is not within easy walking distance of the main facilities within Ruddington. The challenges to the development of the site as a whole would merging the settlements of Bradmore and Bunny. The site also contains best and most versatile agricultural land. Indicative dwelling capacity reduced from submission to Gross no of dwellings achieved on other urban extensions within the borough to 1200 dwellings.

Ruddington

Site reference	SHLAA/RUD/002	Site name	Land Adj St Peter's Junior School
Parish/town	Ruddington	Site area (hectares)	1.9
Dwelling capacity	50	Density (dwellings/hectare)	25
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	50	Source of number of dwellings	Planning Application

Green Belt	<p>Site is Rud/C in the Rushcliffe Green Belt Review. As an outlying development within a strategically important area of the Green Belt (between Ruddington and the main urban area of Nottingham), this site performs well against those Green Belt purposes which restrict sprawl, prevent the merging of settlements and safeguards the countryside from encroachment.</p> <p>The overall score of 16 reflects the final conclusion that this land is of medium-high Green Belt importance.</p>
Flood Risk	<p>Site is within Flood Zone 1. A small area in the south east corner is susceptible to surface water flooding.</p>
Landscape assessment	<p>Aggregate LVIA score: 47/100. The site is an area of rough ground which lies to the west of the A60 and just to the north of Ruddington. There is a low landscape value within the study area as a result of the lack of conservation interests and recreational value, as well as the low scenic quality. In terms of the landscape susceptibility to change, this is medium as the site would form an urban extension between the main block of Ruddington and the cluster of properties on Old Loughborough Road, joining the two. This would lead to an increased perception of built form and potentially increased perception of coalescence between West Bridgford and Ruddington. The landscape sensitivity is low overall. Visually, the site has little value and also a low visual susceptibility given the low visibility of the site as well as the site not contributing to the visual amenity of either transport or recreational receptors. The visual sensitivity is overall low.</p>
Green Infrastructure	<p>Site may contain biodiversity assets. No other GI assets are within the site. Golf Club is adjacent and school playing fields are in close proximity. Area is identified as existing grassland in the BOMR. Development should not compromise the connectivity of these sites and the wider network of grassland sites.</p>
Historic Environment	<p>There are no heritage assets within or in close proximity to the site. Adjacent to archaeological alert ARCH/3560 - Pre 1835 Brick Kiln/Industrial complex.</p>
Nature conservation	<p>There are no designated nature conservation interests within or adjacent to the site. It is however bounded by hedgerows in varied condition which are a LBAP habitat and the pasture may contain locally important neutral grassland plant species. The BOMR identifies land surrounding the site as grassland. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.</p>
AQMA/contamination	<p>Site is not within or adjacent to a AQMA</p>
Community facilities	<p>Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green,</p>

Site reference	SHLAA/RUD/002	Site name	Land Adj St Peter's Junior School
Parish/town	Ruddington	Site area (hectares)	1.9
Dwelling capacity	50	Density (dwellings/hectare)	25
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	50	Source of number of dwellings	Planning Application

	and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	NCC policy precludes access for new developments onto major A roads except in special circumstances.
Accessibility	The nearest bus stops are on the A60. These are in close proximity of the site. These stops are served by buses to Nottingham, Loughborough and Clifton. The site is some distance from the village centre however there is a small convenience store located off Ashworth Avenue.
Other issues	
Agricultural land	Broad ALC maps identify that the land is Grade 2 agricultural land however not in agricultural use.
Deliverability	The site was promoted for development throughout LP2 preparation process, therefore it is considered to be available.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Whilst public transport passes the site, it is located away from the village centre. The site has low landscape value. Site may have biodiversity value. Main issues relate to the sites medium-high Green Belt importance together with the highways authority not allowing for the creation of new direct accesses onto major roads. Site was promoted for housing development throughout the LP2 preparation process and is therefore available.
------------------------	---

Ruddington

Site reference	SHLAA/RUD/003	Site name	Land North East of Marl Close
Parish/town	Ruddington	Site area (hectares)	6.6
Dwelling capacity	167	Density (dwellings/hectare)	20
Site source	Housing Allocation	Planning reference	19/01287/FUL
Allocated site reference	Policy 6.1	Status	Under Construction - less than 25% of dwellings or no completions
Number of dwellings remaining	134	Source of number of dwellings	Planning Application

Green Belt	The site is not located within the green belt in the LAPP.
Flood Risk	Significant areas of land adjacent to Packman Dyke and Wilford Road are within Flood Zone 3. The majority of the remaining area is within Flood Zone 2.
Landscape assessment	Aggregate LIVIA score: 55/100. Site RUD/003 is comprises a play area and set-aside field on the northern edge of Ruddington. Landscape value within the study area is low, owing in part to the lack of both conservation interests and recreational value. There is also a low landscape susceptibility, with development of the site forming an extension of the urban edge and resulting in no loss of key characteristics. The landscape sensitivity is overall low. In visual terms, there is limited value apart from the presence of the play area. However, the visual susceptibility is medium, with the site forming part of the rural setting for a medium number of receptors and generally being visible within its surroundings, particularly when viewed from the north. The visual sensitivity is medium overall.
Green Infrastructure	Loss of Sellars Field is a significant constraint. Replacement open space required. Packman Dyke is part of the ecologically important water course and GI network.
Historic Environment	There are no heritage assets within or in close proximity to the site.
Nature conservation	The land is bounded by the Packman Dyke, this ditch feeds into the Fairham Brook, and is a priority habitat, identified in the LBAP. The dyke is also identified as an existing wetland in the BOMR. In accordance with the BOMR, ditches should be buffered and managed to improve connectivity of water bodies, biodiversity and reduce diffuse water pollution. Direct adverse effects or indirect effects on nature conservation sites downstream should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within or adjacent to a AQMA
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Access off Wilford Road likely to be achievable. The problem with all major developments in Ruddington is the impact on junctions in and around the village centre. Easthorpe Street, Kirk Lane and Flawforth Lane junction would require improvement.
Accessibility	The nearest bus stops are on Wilford Road (on the site's south east corner). These are in close proximity of the site and they are served by regular buses (Navy Line 3 during the day) to Nottingham, Clifton and Ruddington. The site is relatively close to the village centre and facilities on Wilford Road.

Ruddington

Site reference	SHLAA/RUD/005	Site name	Land west of Pasture Lane
Parish/town	Ruddington	Site area (hectares)	37.21
Dwelling capacity	350	Density (dwellings/hectare)	10
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is located within the Ruddington West Strategic Area. It scored 14 within the Green Belt Review 2022. This broad area is contained by the existing edges of Clifton to the west, and, in part, Silverdale and Ruddington to the east. It is not considered that development would round off the built up area. The Fairham Brook is a feature that may contain development going out from the Clifton direction. There are few strong features that could contain development going out from the Ruddington direction south of Clifton Lane. There are intermittent hedgerows and tree belts in the fields to the north of Clifton Lane. The broad area has no topographical features and is relatively flat. This broad area in large prevents the merging of Clifton and Ruddington. Development in this location could physically join the two settlements together. Would potentially be less of an issue going out from the Clifton direction if the Fairham Brook was used as a boundary. There are some areas of inappropriate developments, particularly in the area between Clifton and the Fairham Brook, along Clifton Lane, although this ribbon development could be considered to be a washed over part of Ruddington, the majority of the area consists of arable fields that are clearly within open countryside. Some hardstanding at the former Fairham Comprehensive School remains.
Flood Risk	Land adjacent to the ditch on the southern boundary is within Flood Zone 3, as is the western edge of the site adjacent to Fairham Brook.
Landscape assessment	Aggregate LVIA score: 55/100. The site is a wedge of arable land which separates the settlements of Ruddington and Clifton. Recently there has been development on Pasture Lane near the site's eastern boundary, which contributes to the site's urban fringe character. The study area is of low landscape value, which is partly as a result of the low amount of scenic quality, as well as the lack of conservation interests and recreational value. However, owing to the potential for perceived coalescence, there is a medium landscape susceptibility. The landscape sensitivity is overall low. In visual terms, aside from the site forming a visual break between settlements, there is little visual value associated with the site. The site is a small part of the rural setting for residential receptors, contributing to a low visual susceptibility. The visual sensitivity is overall low.
Green Infrastructure	Fairham Brook is an important wildlife corridor and Green Infrastructure. This would be significantly effected if the site were developed completely. Development would offer opportunity to deliver multi functional GI, improve the biodiversity of the site, connectivity with neighbouring wildlife site assets and the performance of the wider wildlife corridor.
Historic Environment	There are no heritage assets within or in close proximity to the site.
Nature conservation	The site is directly adjacent to the Fairham Brook Nature Reserve, a Local Wildlife Site. Valued for its grassland and scrub, the site has been adversely affected by canalisation of the brook, lowering of the water table and urban edge effects. The site is also bounded by a ditch on its southern side. Ditches are a LBAP priority habitat. Development should avoid, mitigate or compensate for any direct or indirect effects on the LWS or priority habitats.
AQMA/contamination	The site is not within or in close proximity of a Air Quality Management Area.

Site reference	SHLAA/RUD/005	Site name	Land west of Pasture Lane
Parish/town	Ruddington	Site area (hectares)	37.21
Dwelling capacity	350	Density (dwellings/hectare)	10
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	The problem with all major developments in Ruddington is the impact on junctions in and around the village centre. Easthorpe Street, Kirk Lane and Flawforth Lane junction would require significant improvement.
Accessibility	The nearest bus stops are on Clifton Lane. These are in close proximity of the site and they are served by buses to Nottingham, Clifton and Ruddington which run every hour during the day. The closest part of the site is 0.7 miles (15 minute walk) from the centre of the village. There is reasonable provision of cycle routes along Clifton Lane back towards Ruddington.
Other issues	
Agricultural land	Broad ALC maps identify that the land is Grade 2 agricultural land and also 'urban' in parts. However, there are no urban features within the site.
Deliverability	Site being promoted therefore is available for development

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary Whilst most of the site is relatively free of physical constraints and relatively close to frequent public transport, it lies some distance away from the main facilities at Ruddington and Clifton. The western part of the site is located adjacent to the Fairham Brook Nature Reserve. More importantly, the site as a whole forms an important gap between Clifton and Ruddington and development of any scale would breach the strong defensible boundary at Pasture lane. Due to the significant Green Belt constraints, the land is considered not suitable.

Ruddington

Site reference	SHLAA/RUD/006	Site name	Land north west of Asher Lane
Parish/town	Ruddington	Site area (hectares)	10.26
Dwelling capacity	175	Density (dwellings/hectare)	17
Site source	Planning Application	Planning reference	18/00300/OUT & 19/01983/REM
Allocated site reference	Policy 6.4	Status	Under Construction - over 25% of dwellings completed
Number of dwellings remaining	95	Source of number of dwellings	Planning Application

Green Belt	The site is not in the green belt in the LAPP
Flood Risk	Land is within Flood Zone 1.
Landscape assessment	Aggregate LVIA score: 53/100. The site is an arable field on the south-western edge of Ruddington, adjacent to two sets of allotments. Along the south-east site boundary runs Ruddington Footpath 6, with Rushcliffe Country Park opposite. The landscape value of the study area is medium owing to the medium landscape quality, the close representativeness of the study area to the LCA, and the high recreational value. There would be no loss of key characteristics and development of the site would appear as a relatively logical extension to the settlement, albeit slightly changing the perception of Asher Lane. The landscape susceptibility is therefore low and the landscape sensitivity also low. Visually, there is a limited value. The site forms part of the visual amenity for residential receptors and there is a medium number of potential receptors; but the limited visibility of the site lends itself to a low visual susceptibility and overall a low visual sensitivity.
Green Infrastructure	The site is adjacent to the Great Central Railway Heritage Line and footpath, and the Rushcliffe Country Park. Combined these provide a recreational and wildlife route around the south and west of Ruddington. Development should enhance this Green Corridor.
Historic Environment	There are no heritage assets within or in close proximity to the site.
Nature conservation	The site is adjacent to the Ruddington Disused Railway and Rushcliffe Country park. Both are designated LWSs. Combined they provide a green wildlife corridor and recreational route around Ruddington's southern and western edge. This corridor should be protected and enhanced. The site is bounded by hedgerows which are a LBAP priority habitat. The BOMR promotes the protection and improvements of hedgerows and shelterbelts.
AQMA/contamination	The site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Various issues raised against the two planning applications, to date developer has been unable to overcome concerns relating to access to the site and mitigating against the impacts of additional traffic on the village centre. Traffic impacts are considered to be severe by the highways authority.
Accessibility	The nearest bus stop is on Musters Road. Whilst in close proximity of the site, this stop is only served by a limited number of buses (3 a day) to Keyworth. The nearest bus services to Nottingham travel along The Green. The bus stop is a 7 minute walk away and is served by regular buses to Nottingham and Clifton. The site is relatively close to the village centre.

Site reference	SHLAA/RUD/006		Site name	Land north west of Asher Lane

Ruddington

Site reference	SHLAA/RUD/007	Site name	Easthorpe House and adjacent land
Parish/town	Ruddington	Site area (hectares)	1.5
Dwelling capacity	15	Density (dwellings/hectare)	10
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>The land is identified as RUD/I within the Rushcliffe Green Belt Review. Located on the east side of the A60 Loughborough Road, the removal of Green Belt would break the settlement's established eastern boundary and intrude into the countryside. The site is contained by defensible boundaries and therefore the potential for unrestricted sprawl is reduced.</p> <p>The removal of this land from the Green Belt would not reduce the distance between Ruddington and Edwalton.</p> <p>The lands importance to the setting of the listed building and designation of the land as a historic park and garden is recognised in this Green Belt review. Whilst the site scored 13, representing a site that is of low-medium value, its location east of the A60 and the importance of the land to the setting of the listed building results in a final conclusion that the site is fundamentally constrained and of high Green Belt importance.</p>
Flood Risk	Site is within Flood Zone 1.
Landscape assessment	Aggregate LVIA score: 69/100. Site RUD/007 comprises a listed building with parkland-like surroundings that are included as part of the Ruddington Conservation Area on the western edge of the village of Ruddington. There is a medium level of landscape value within the study area, owing partly to the high landscape quality and number of conservation interests in the study area, as well as a close representativeness to the character of the LCA. The landscape susceptibility is also medium, which is derived from the loss of both a listed building and part of the conservation area, as well as the perception of extension of the settlement into open countryside. Overall, the landscape sensitivity is considered to be medium. In visual terms, there is a medium value arising from the site due to its inclusion in the conservation area, as well as the bench opposite site indicating visual value. The visual susceptibility is also medium as the site forms part of the visual amenity for both residential and transport receptors, the number of which is medium due to the site's village edge location. Visual sensitivity of the site is overall medium.
Green Infrastructure	Whilst not publicly accessible, the grounds of Easthorpe House provide visual amenity and have been identified as a positive open space in the Townscape Appraisal.
Historic Environment	Easthorpe House is a Grade II listed building. The development of this building's grounds would significantly affect the setting of the building and its listed stable block and animal pen. The southern section of the site is within Ruddington's Conservation Area and have been identified as a positive open space in the Townscape Appraisal. The grounds are also identified locally as a Historic Park and Garden. Difficult to achieve any meaningful mitigation given size of site and heritage assets present - harm to heritage assets will be inevitable and substantial
Nature conservation	There are no designated nature conservation assets within or in close proximity of the site. The site itself contains formal park land, which forms the setting of Easthorpe House. Parkland is identified as a priority habitat within the BAP.
AQMA/contamination	The site is not within or in close proximity of a Air Quality Management Area.

Site reference	SHLAA/RUD/007	Site name	Easthorpe House and adjacent land
Parish/town	Ruddington	Site area (hectares)	1.5
Dwelling capacity	15	Density (dwellings/hectare)	10
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Suitable for modest development off existing access, road would need to be constructed to an adoptable standard.
Accessibility	Regular bus services (every 12 minutes) to Nottingham Loughborough can be accessed at stops on St Marys Close and the A60 (north and south of the site). They are all within a 5 minute walk.
Other issues	
Agricultural land	Broad ALC maps identify that the land is Grade 2 agricultural land however not in agricultural use.
Deliverability	The site is available for development and was promoted as a housing allocation by the landowner during consultation on the Local Plan Part 2. Whilst the landowner is willing to convert Easthorpe House and develop its surrounding grounds for housing, the significant adverse effects on heritage assets (Grade II listed building and conservation area), and green belt designation are a significant constraint. The site would otherwise probably be deliverable.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary The site is relatively close to the village centre. However the landscape assessment identifies that the site is of high landscape quality. The impact of development on historic assets likely to be more than substantial and unlikely to provide any meaningful mitigation. Site is therefore considered non-developable.

Ruddington

Site reference	SHLAA/RUD/009	Site name	Land at Loughborough Road
Parish/town	Ruddington	Site area (hectares)	1.9
Dwelling capacity	30	Density (dwellings/hectare)	15
Site source	Planning Application	Planning reference	
Allocated site reference		Status	Planning application under consideration
Number of dwellings remaining	30	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Land is not within the Green Belt
Flood Risk	The site is within Flood Zone 1 and the site is not at risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 55/100. The site is a pocket of pasture on the eastern edge of Ruddington and is contained within the Ruddington Conservation Area. The landscape sensitivity of the site is medium overall, mostly as a result of the medium landscape value within the study area. This landscape value is derived from the number of conservation interests and recreational value, as well as the representativeness of the study area to the LCA. Landscape susceptibility is low, although removal of the mature boundary vegetation would result in a perceived loss of enclosure and affect some of the characteristics of the conservation area. The conservation area adds visual value, but there is little else which results in an overall low visual value. The site bears little relation to surrounding receptors owing to its degree of enclosure and therefore has low susceptibility in visual terms. The visual sensitivity is also low.
Green Infrastructure	Whilst not publicly accessible, the land provides visual amenity within the Conservation Area and has been identified as a positive open space in the Townscape Appraisal. Due to the size of the site there are limited opportunities to provide significant GI/open space.
Historic Environment	Site is within Ruddington Conservation Area. Potential harm to positive open space within conservation area, which covers the whole of the site. Buildings that make a positive contribution to the conservation area located either side of the site (non designated heritage asset) Panoramic view identified across the site. There are no listed buildings or locally recognised heritage assets within the site or in close proximity.
Nature conservation	There are no designated nature conservation sites within or in close proximity of the site. It is however bounded by well established hedgerows, including along the A60. Hedgerows are a LBAP habitat and their conservation and enhancement is promoted in the BOMR as they provide important wildlife corridors between habitats as well as being of biodiversity value themselves.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	NCC policy precludes access for new developments onto major A roads except in special circumstances. Would need to be through adjoining site.
Accessibility	Bus services to Nottingham and Loughborough can be accessed from two stops on the A60. These are south of the junction with Loughborough Road and within a 5 minute walk of the

Site reference	SHLAA/RUD/009	Site name	Land at Loughborough Road
Parish/town	Ruddington	Site area (hectares)	1.9
Dwelling capacity	30	Density (dwellings/hectare)	15
Site source	Planning Application	Planning reference	
Allocated site reference		Status	Planning application under consideration
Number of dwellings remaining	30	Source of number of dwellings	Details obtained through external Site Submission

Other issues	site. Services run every hour. The site is reasonably close to the village centre.
Agricultural land	Broad ALC maps identify that the site is Grade 2 agricultural land.
Deliverability	The site was promoted through Local Plan process, therefore it is considered to be available for development. Detailed planning application under consideration, however as the site is within the conservation area, its suitability is still set as 'may'.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	There are no particular issues with the site itself in terms of its proximity to facilities and accessibility to public transport. Main issues relate to achieving access to the site as no direct access can be achieved off the A60 Loughborough Road, and access could only be achieved through third party land leading to potential issues relating to ransom strips. In addition the site is identified as a positive open space within the conservation area, with a key panoramic view identified across the site from the existing gated access.
------------------------	---

Ruddington

Site reference	SHLAA/RUD/010	Site name	Land opposite Mere Way
Parish/town	Ruddington	Site area (hectares)	8.8
Dwelling capacity	180	Density (dwellings/hectare)	19
Site source	Planning Application	Planning reference	19/00535/OUT & 19/02909/REM
Allocated site reference	Policy 6.3	Status	Under Construction - over 25% of dwellings completed
Number of dwellings remaining	127	Source of number of dwellings	Planning Application

Green Belt	Land is not within the Green Belt
Flood Risk	Part of the site closest to the A60 is at a high risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 57/100. RUD/010 comprises two arable fields on the south-eastern edge of Ruddington, lying adjacent to the boundary of the Ruddington Conservation Area. The site is slightly separate from the existing settlement edge. A medium landscape value is present in the study area - this reflects the high representativeness and the medium number of conservation and recreational assets. Development of the site would result in the loss of part of the rural setting to the settlement, as well as a perceived urbanisation, especially as the site is slightly separate from the existing urban edge. Overall, both the landscape susceptibility and landscape sensitivity are medium. There is little visual value attached to the site and its low visibility means that it does not contribute greatly to the visual amenity of receptors. The visual value, susceptibility and sensitivity are all low overall.
Green Infrastructure	There are no existing GI assets within the site. There may however be opportunities to design multi-functional GI within any development of the site.
Historic Environment	There are no heritage assets within or in close proximity to the site. Potential harm to panoramic view from Loughborough Road out of conservation area, however this view is limited by significant hedgerow along western boundary.
Nature conservation	There are no designated nature conservation sites within the site, or in close proximity. Rushcliffe Country park is 200m west, beyond the A60 and business units within Ruddington Business Park. The land however is bounded by and contains hedgerows of varied age and condition. Hedgerows are identified as a LBAP priority habitat and the BOMR highlights the need to protect and enhance their quality and connectivity. Shelterbelts should also be incorporated into the design, adjacent to hedgerows in order to improve the wildlife corridors.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Would require access off the Mere Way/A60 roundabout and significant improvements to roundabout to ensure capacity of A60 is not adversely affected.
Accessibility	Regular bus services (Numbers 9, 863 and Green Line 10) to Nottingham and Loughborough can be accessed from two stops on the A60 opposite the Belmore Country Home (less than a 5 minute walk). There is also a bus stop on Mere Way, which also provides commuter services to Nottingham (Number 863). These are south of the junction with Loughborough Road and within a 5 minute walk of the site. The village centre is a 15 minute walk.

Ruddington

Site reference	SHLAA/RUD/011	Site name	Land to the east of Loughborough Road
Parish/town	Ruddington	Site area (hectares)	3.0
Dwelling capacity	60	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Land is identified as RUD/J in the Green Belt Review. This area of Green Belt land preserves the setting of Easthorpe House (Grade II listed), which is itself important to the historic setting of Ruddington. This combined with the absence of inappropriate development and the land's contribution to the areas countryside character result in a site that would otherwise be considered of low Green Belt importance.</p> <p>Whilst the enclosed nature of the site between Easthorpe House and Flawforth Lane result in a site that scores 15 (within the upper end of low-medium scale of importance) the importance of the land to the setting of Easthorpe House (and its historic park and garden), and the overlapping conservation area mean the land is of high Green Belt importance and is fundamentally constrained as it preserves the historic setting of Ruddington.</p>
Flood Risk	The site is in Flood Zone 1. A very small area within the south east corner is at medium risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 59/100. The site comprises one arable field located immediately east of A60 and north of Flawforth Lane. There are some PRow's within the study area and a distinct lack of public open space. There are a good number of conservational interests within the study area with part of the site overlapping with Ruddington Conservation Area. There is an overall medium landscape value within the study area due to the conservation area displaying strong aesthetic qualities. There is a medium susceptibility to change with the loss of part of the conservation area, and the extension of the urban fringe. The sensitivity of the landscape character is medium overall. Visually, the site is recognised as forming part of the conservation area. There is a medium number of potential receptors as the site is on the village edge and in close proximity to a busy A road. The overall visual susceptibility is medium as the site forms part of the rural amenity for the village with some open views. Overall, there is low visual sensitivity.
Green Infrastructure	Although the site does not contain accessible open space, it is identified as a positive open space in the Townscape Appraisal. It therefore provides visual amenity. Opportunities should be taken to utilise/improve hedgerows as wildlife corridors, and provide amenity/play areas.
Historic Environment	The site provides open views of Easthorpe House, which is Grade II listed. The development of this land would affect the rural setting of this building when viewed from the south on Flawforth Lane. The eastern side of the site is within Ruddington's Conservation Area. The site is identified as a positive open space which contributes to the character of the area.
Nature conservation	There are no designated nature conservation sites within the site, or in close proximity. The land however is bounded by hedgerows of varied age and condition. Hedgerows are identified as a LBAP priority habitat and the BOMR highlights the need to protect and enhance their quality and connectivity. Shelterbelts should also be incorporated into the design, adjacent to hedgerows in order to improve the wildlife corridors. In addition to hedgerows the site contains a number of mature trees.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and

Site reference	SHLAA/RUD/011	Site name	Land to the east of Loughborough Road
Parish/town	Ruddington	Site area (hectares)	3.0
Dwelling capacity	60	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

	comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Access off Flawforth Lane only. Would need to consider impact on adjacent Signalised junction and potential site opposite. Would require new footway, and crossing facilities into Ruddington across A60.
Accessibility	Regular bus services (Numbers 9, 863 and Green Line 10) to Nottingham and Loughborough can be accessed from two stops on the A60 south of the junction with Flawforth Lane (less than a 5 minute walk). The village centre is a 10 minute walk.
Other issues	
Agricultural land	Broad ALC maps identify that the land is Grade 2 agricultural land.
Deliverability	The land is available as indicated by 2017 further options consultation response. Site is not however proposed as an allocation within the emerging LP2.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
Overall summary	The positives in relation to the site are that it is relatively free from physical constraints and is a site that is closer to the village centre than most other submissions adjacent to Ruddington. A fairly frequent bus service runs along Loughborough Road. The major constraints are that harm to historic assets are likely to be more than substantial given its proximity to the conservation area and the effect development would have directly onto an unregistered park and garden and Easthorpe House. Impact on the historic setting of the village is a fundamental green belt constraint.		

Ruddington

Site reference	SHLAA/RUD/012	Site name	Old Loughborough Road
Parish/town	Ruddington	Site area (hectares)	2.8
Dwelling capacity	10	Density (dwellings/hectare)	4
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>This land is identified as RUD/E in the Rushcliffe Green belt Review. The site is located adjacent to Loughborough Road, in a prominent position on Mickleborough Hill. The Green Belt designation prevents urban sprawl that would be visible over a wide area to the south and west.</p> <p>Comprehensive hedgerow cover surrounds the site and screens neighbouring properties from view, and the absence of any inappropriate development, result in an area which is open countryside in character. This rural character is preserved by the Green Belt designation.</p> <p>The site's location is well beyond Ruddington's existing inset, within a strategically important area where the insetting of this land in isolation would not be appropriate. This would weaken the Green Belt function between Ruddington and the main urban area. Whilst the land was assessed as being of medium-high Green Belt importance (scoring 17), due to the site's outlying and prominent location on land which prevents the merging of Ruddington with the main urban area, it is concluded that the land is fundamentally constrained by its Green Belt designation, by virtue of its importance in maintaining separation between the main built up area of Ruddington and the main built up area of West Bridgford.</p>
Flood Risk	Site is not at risk of flooding
Landscape assessment	Aggregate LVIA score: 52/100. The site is made up of two pastoral fields immediately east of Loughborough Road. There are two PRow's within the study area with Ruddington BW3 running along the south-eastern boundary of the site. The study area also contains a golf course. There are few conservational interests within the study area, some TPO's and a listed building but little else. There is an overall low landscape value within the study area due to a degree of human influence and local highways affecting tranquillity. There is a medium susceptibility to change with some loss of rural character and a perceived increase in built form and density. The sensitivity of the landscape character is low overall. Visually, there are no indicators or recognition of value. There is a low number of potential receptors with some degree of enclosure and screening from vegetation. The overall visual susceptibility is low as the site is relatively well screened from surrounding road networks and residential spaces. Overall, there is low visual sensitivity.
Green Infrastructure	Although the site itself does not contain any existing GI/open space, it is adjacent to a bridleway which links Mickleborough Hill with Ruddington. This is a local green corridor which links woodland/tree belts in the area and should be protected and enhanced.
Historic Environment	<p>There are no heritage assets within or directly adjacent to the site. Southern tip of the site covered by archaeological alert ARCH/3560 - Pre 1835 Brick Kiln/Industrial complex.</p> <p>The old road right of way and thick hedgerow avoid adverse impacts on setting of Ruddington Hall (a local interest building) and its grounds.</p>

Site reference	SHLAA/RUD/012	Site name	Old Loughborough Road
Parish/town	Ruddington	Site area (hectares)	2.8
Dwelling capacity	10	Density (dwellings/hectare)	4
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Details obtained through external Site Submission

Nature conservation	The site contains grassland which may contain lowland neutral grassland species of local importance (lowland neutral grassland is a BAP priority habitat). It is also bounded by and contains mature hedgerows and tree belts which are also BAP priority habitats. The Biodiversity Opportunity Area Report (BOAR) identifies the land as existing grassland and encourages the retention of grassland strips, shelterbelts, protection and restoration of hedgerows in order to increase their biodiversity and performance as wildlife corridors.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Access achievable off of old Loughborough Road. Questionable from sustainability standpoint.
Accessibility	Regular bus services (Numbers 9, Green Line 10 and L24) to Nottingham, Loughborough and Gamston (limited local service) can be accessed from two stops on the A60 (less than a 5 minute walk). The village centre is a 20 minute walk.
Other issues	
Agricultural land	Broad ALC maps identify that the land is a mix of Grade 2 (BMV) and Grade 3 agricultural land
Deliverability	The landowner submitted representations on the LAPP, promoting the site for self build. Due to Green Belt constraints the land is not considered deliverable.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Whilst the site has some positives in relation to landscape impact, the site lies some distance away from services although within walking distance of public transport. In addition the site falls within an important area of Green Belt that prevents the merging of Ruddington and West Bridgford. Although previously promoted as a self build allocation, the site is fundamentally constrained by the GB designation and has not been allocated within the Local Plan.

Ruddington

Site reference	SHLAA/RUD/013	Site name	Land adjacent to Landmere Farm
Parish/town	Ruddington	Site area (hectares)	0.2
Dwelling capacity	5	Density (dwellings/hectare)	25
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	5	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>Similarly to RUD/F, due to the site's limited size, and lying within an area that contains a number of large properties with extensive grounds it does not score well against Green Belt purposes and has been adjudged to be of low-medium Green Belt importance against the scoring system.</p> <p>However, the site's location is well beyond Ruddington's existing inset, within a strategically important area where the insetting of this area of land would also put pressure on insetting areas of existing development surrounding this site. It is therefore concluded that the land is fundamentally constrained by the Green Belt designation and of high Green Belt importance.</p>
Flood Risk	Site is within Flood Zone 1.
Landscape assessment	LVIA has combined RUD9 and RUD10. Aggregate LVIA score: 47/100. The site is a field currently used for equestrian grazing which is situated adjacent to a cluster of development which is separate from the main settlement of Ruddington. This development has a distinctive character which arises from its well-treed appearance and the low density of existing housing. The landscape value of the study area is medium, arising from the good level of maintenance within the landscape, as well as the representativeness of the study area with relation to the LCA in which it sits. Whilst development of the site would result in the potential for perception of increased density and localised loss of character, there would be no notable loss of key characteristics and an overall low landscape susceptibility. The landscape sensitivity is low. There is little value in terms of visual amenity, and the visual susceptibility is also low due to the limited number of receptors and the screening of the site with built form and vegetation. Overall the visual sensitivity is low.
Green Infrastructure	There are no GI or open space assets within the site. Ruddington Hall grounds are adjacent and provide private semi-natural, natural greenspace. Due to the scale of development there are limited opportunities to provide on-site GI or contributions to improvements off-site.
Historic Environment	There are no heritage assets within or in close proximity to the site. Historical records indicate that archaeological interest is limited in this area.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. The paddock may contain locally important lowland grass species and the neighbouring woodland is a priority habitat.
AQMA/contamination	The site is not within or in close proximity of a AQMA.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.

Site reference	SHLAA/RUD/013		Site name	Land adjacent to Landmere Farm	
Parish/town	Ruddington		Site area (hectares)	0.2	
Dwelling capacity	5		Density (dwellings/hectare)	25	
Site source	Developer/Landowner Submission		Planning reference		
Allocated site reference			Status	No formal allocation or no extant planning permission for residential development	
Number of dwellings remaining	5		Source of number of dwellings	Assumption made on best estimate	

Highways and access	Access should be achievable, questionable in sustainability terms. No facilities nearby, no footways / cycleway in immediate area, limited bus service.
Accessibility	The nearest bus stops are on the A60. These are approximately half a mile from the site and a 10 minute walk. These stops are served by buses to Nottingham, Loughborough and Clifton.
Other issues	
Agricultural land	Broad ALC maps identify that the land is Grade 3 agricultural land however not in agricultural use.
Deliverability	As no recent representations have been received, deliverability is uncertain.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Whilst the site has some positives in relation to landscape impact, and lack of heritage assets, the site lies some distance away from services and facilities including public transport. In addition the site falls within an important area of Green Belt that prevents the merging of Ruddington and West Bridgford. The site is fundamentally constrained by the GB and has not been promoted by the landowner during past plan preparation. Consequently the site is not deliverable.

Ruddington

Site reference	SHLAA/RUD/014	Site name	Croft House
Parish/town	Ruddington	Site area (hectares)	1.3
Dwelling capacity	10	Density (dwellings/hectare)	7.6
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Land is not within the Green Belt.
Flood Risk	Land is within Flood zone 1 and not at risk of surface water flooding.
Landscape assessment	Site has not been assessed within the Green Belt Review. Neighbouring site (RUD6) has been assessed and LVIA determined the land was of low landscape and visual sensitivity.
Green Infrastructure	Site is small and only offers limited opportunities to deliver local amenity space. However if brought forward with neighbouring development there may be opportunities to provide more significant GI.
Historic Environment	Site is within Ruddington Conservation Area. Croft House itself is identified as a positive building within the conservation area and its grounds are identified as positive open space. Limited opportunity to maintain views and positive site characteristics, harm likely less than substantial but site likely cannot deliver the wider public benefits to outweigh it.
Nature conservation	There are no designated nature conservation sites within the site or in close proximity. Site is bounded by a mature hedgerow which is a LBAP priority habitat which should be preserved.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	NCC policy precludes access for new developments onto major A roads except in special circumstances. Would need to be through adjoining site.
Accessibility	Site is on the opposite side of the A60 (Loughborough Road) from the village centre. There are hourly bus services to Nottingham and Loughborough.
Other issues	
Agricultural land	Broad ALC maps identify that the land is Grade 2 agricultural land however not in agricultural use.
Deliverability	Site was being promoted through Local Plan Part 2 consultations. The site is still deemed available.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is located close to an hourly bus service and is within walking distance of the village centre. There are a number of constraints in relation to the site. Firstly the site is identified as an important open space in the conservation area. Secondly access to the site cannot be provided
------------------------	--

Site reference	SHLAA/RUD/014	Site name	Croft House
Parish/town	Ruddington	Site area (hectares)	1.3
Dwelling capacity	10	Density (dwellings/hectare)	7.6

Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Details obtained through external Site Submission

directly onto Loughborough Road and access could only be provided from adjacent sites. The site could possibly perform as open space to a wider development of the cluster of sites in this location.

Ruddington

Site reference	SHLAA/RUD/015	Site name	Land off North Road
Parish/town	Ruddington	Site area (hectares)	11.1
Dwelling capacity	230	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	230	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>The site is located within a strategically important area of Green Belt which separates Ruddington from Clifton (part of Nottingham's Main Urban Area). As the site does not contain or form the setting of any historical assets; and it is enclosed by development on two sides, with Fairham Brook and College to the north, and a ditch and hedgerow on the external boundary, the site scored 15 which is low-medium Green Belt importance.</p> <p>Whilst the site overall is considered to be of low-medium green belt importance, the issues relating to merging lead to the site being of fundamentally constrained by the sites green belt designation and therefore of high Green Belt importance.</p>
Flood Risk	The northern area of the site adjacent to Packman Dyke and Fairham Brook are within Flood zones 2 and 3.
Landscape assessment	<p>The site scored 42 within the LVIA. The site at RUD/013 comprises an arable field nestled on the north-western edge of Ruddington. The urban context of the site, as well as the lack of conservation interests and recreational interests in the study area results in a low landscape value. In addition, the development of the site would be perceived of infill - which contributes to the</p> <p>low landscape susceptibility. Overall, there is a low landscape sensitivity. Visually, the site is relatively well contained by intervening vegetation, this contributes to a low visual susceptibility. There is also very little in terms of visual value and the two combine to give a low visual sensitivity.</p>
Green Infrastructure	There are no assets within the site. However local wildlife sites are located on its eastern and western boundaries. Site is located within the Fairham Brook Ecological Network and Green and Blue Infrastructure corridor. Opportunities to maintain ecological connectivity through multi-functional GI exist, given the size of the site and the need to avoid development within the Flood zones.
Historic Environment	No heritage assets or archaeological records identified within the site or in close proximity.
Nature conservation	Fairham Brook nature reserve (a local wildlife site) is adjacent to the north west corner of the site. Impacts upon this site, including through surface water run-off direct from the site or via Packman Dyke, should be avoided. Ruddington Disused Railway is also a local wildlife site and this comprises part of the site's eastern boundary. Site is bounded by hedgerows which are a LBAP priority habitat. These should be protected to ensure ecological networks and habitat connectivity is maintained.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green,

Site reference	SHLAA/RUD/015	Site name	Land off North Road
Parish/town	Ruddington	Site area (hectares)	11.1
Dwelling capacity	230	Density (dwellings/hectare)	21
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	230	Source of number of dwellings	Details obtained through external Site Submission

	and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Point of access on to roundabout may be suitable subject to capacity calculations. More than 150 dwellings from a single point of access would require the existing road to be widened to 6.75m. Footway to be provided on both sides of North Road. Primary issue is that North Road is not adopted and therefore the position regarding access rights and ownership is unclear. This would need resolving prior any application as 200 dwellings cannot be served from a private road.
Accessibility	The closest part of the site is 0.7 miles (15 minute walk) from the centre of the village. The Navy Line 3 bus service on Clifton Road provides hourly services to Nottingham and Clifton. These services run between 6.50am and 11pm.
Other issues	
Agricultural land	The site is classified as being predominantly 'urban' with a small proportion identified as Grade 2. However there are no urban features on the site and it is used for agricultural purposes.
Deliverability	Representations during LP2 and Strategic Plan consultations indicate that the landowner is willing to develop the site. Green Belt and access constraints affect the sites suitability and consequently it's delivery.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary The positives in relation to the site is of low landscape importance and the south eastern part of the site is close to a regular bus service. The site lies comparatively some distance away from services and facilities. The site also performs an important function in preventing merging between Clifton and Ruddington, as identified by the Green Belt review. It is fundamentally constrained by the GB designation. The site consists of best and most versatile agricultural land. As it is accessed of a private road, the site is not deliverable until it is demonstrated that this issue can be resolved.

Ruddington

Site reference	SHLAA/RUD/016	Site name	Land west of Wayte Court
Parish/town	Ruddington	Site area (hectares)	0.8
Dwelling capacity	10	Density (dwellings/hectare)	13
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>Due to the site's limited size, and lying within an area that contains a number of large properties with extensive grounds it does not score well against Green Belt purposes and has been adjudged to be of low-medium Green Belt importance against the scoring system.</p> <p>However, the site's location is well beyond Ruddington's existing inset, within a strategically important area where the insetting of this area of land would also put pressure on insetting areas of existing development surrounding this site. It is therefore concluded that the land is fundamentally constrained by the Green Belt designation and of high Green Belt importance.</p>
Flood Risk	Land is within flood zone 1 and is not at risk of surface water flooding.
Landscape assessment	Site has not been assessed within the LVIA. Adjacent site (RUD 10) has been assessed and raises no major concerns in relation to landscape impacts and potential mitigation.
Green Infrastructure	Site is small and only offers limited opportunities to deliver local amenity space.
Historic Environment	There are no identified heritage assets within or in close proximity to the site.
Nature conservation	There are no designated assets within the site. Woodland behind is protected under an area Tree Preservation Order. Site contains scrubland.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Similar issues as RUD9 and RUD10. Access should be achievable, questionable in sustainability terms. No facilities nearby, no footways / cycleway in immediate area, limited bus service.
Accessibility	The nearest bus stops are on the A60. These are approximately half a mile from the site and a 10 minute walk. These stops are served by buses to Nottingham, Loughborough and Clifton.
Other issues	
Agricultural land	Land identified as being Grade 3 agricultural land, however not in agricultural use.
Deliverability	Whilst the landowner's representation during LP2 consultation indicates a willingness to develop the site, it is constrained by the Green Belt designation.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years

Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Details obtained through external Site Submission

Overall summary

Whilst the site has some positives in relation to landscape impact, and lack of heritage assets, the site lies some distance away from services and facilities including public transport. In addition the site falls within an important area of Green Belt that prevents the merging of Ruddington and West Bridgford. Landowner representation during previous LP2 consultation indicates the site is available.

Number of dwellings remaining	500	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Located within the Green Belt.
Flood Risk	The site is located within flood zone 1 and is at a low risk of surface water flooding.
Landscape assessment	<p>SN04 – Cotgrave and Tollerton Village Farmlands</p> <p>The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character (LCA 2009). Reasonably flat arable farm land east and west of Ruddington. Landscape is typical of the surrounding rural area, with little scenic quality. PRoW are limited but provide recreational value. Topography and field boundary vegetation mean that the area of search is largely visually enclosed. Small blocks of woodland and hedgerows within the area of search offer the potential to develop a sense of place underpinned by a green infrastructure network. Ruddington has textiles heritage, notably knitting and lace, which could contribute to a distinct character for a new settlement.</p>
Green Infrastructure	There will be opportunities to design multi-functional GI within any development of the site.
Historic Environment	There are no identified heritage assets within or in close proximity to the site.
Nature conservation	There are no designated nature conservation sites within the site or in close proximity.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Cannot confirm if access can be achieved.
Accessibility	The nearest bus stops are located on the A60. These are approximately half a mile from the site and a 10 minute walk. These stops are served by buses to Nottingham and Loughborough.
Other issues	
Agricultural land	Grade 2 and grade 3.
Deliverability	Promoted by landowner.
Delivery Period	N/A
Delivery	Could be suitable if policy changes 5+ years

Site reference	SHLAA/RUD/032	Site name	Land south of Flawforth Lane
Parish/town	Ruddington	Site area (hectares)	21
Dwelling capacity	500	Density (dwellings/hectare)	24
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	500	Source of number of dwellings	Details obtained through external Site Submission

Overall summary Most of the site has been submitted as part of SHLAA/RUD/059 by a different site promoter several years ago as part of a far larger area, part of the area not previously assessed

Ruddington

Site reference	SHLAA/RUD/033	Site name	Land west of Wilford Road (North Ruddington)
Parish/town	Ruddington	Site area (hectares)	30
Dwelling capacity	500	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	500	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Located within the Green Belt.
Flood Risk	The site is mainly located in flood zone 1, but the west and south western areas of the site are affected by flood zone 2 and 3. Parts of the site are at risk to surface water flooding.
Landscape assessment	Part of the site was assessed as part of the Landscape and Visual Analysis of Potential Development Sites (January 2018). The study area is of low landscape value, which is partly as a result of the low amount of scenic quality, as well as the lack of conservation interests and recreational value. However, owing to the potential for perceived coalescence, there is a medium landscape susceptibility. The landscape sensitivity is overall low. In visual terms, aside from the site forming a visual break between settlements, there is little visual value associated with the site. The site is a small part of the rural setting for residential receptors, contributing to a low visual susceptibility. The visual sensitivity is overall low.
Green Infrastructure	Fairham Brook is an important wildlife corridor and Green Infrastructure. Development would offer opportunity to deliver multi functional GI, improve the biodiversity of the site, connectivity with neighbouring wildlife site assets and the performance of the wider wildlife corridor.
Historic Environment	Within the setting of the Grade II listed Greenhouse at Ruddington Golf Club.
Nature conservation	The site does not contain any designated sites but does abut Fairham Brook Local Wildlife Site to the east, Wilwell Cutting Site of Special Scientific Interest and Local Wildlife Site to the north, and the Ruddington Disused Railway Local Wildlife Site to the south.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Cannot confirm if access can be achieved.
Accessibility	The footpath along Wilford Road provides a direct connection into Ruddington, approximately 1.2 km away. The closest part of the site is approximately 0.3 km (3 minute walk) from the nearest bus stop on Wilford Road. The Navy Line bus service provides hourly services to Nottingham and Clifton during the day.
Other issues	
Agricultural land	Grade 2.
Deliverability	Promoted by a house builder.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary The site contains a number of constraints on and around it. Firstly the area performs an important role in preventing sprawl, encroaching on the countryside and the prevention of merging Ruddington with the main built up area of Nottingham at West Bridgford and Clifton. Cannot be considered suitable .

Ruddington

Site reference	SHLAA/RUD/054	Site name	Land to the south of Edwalton Land to the south of Edwalton, Flawforth Lane
Parish/town	Ruddington	Site area (hectares)	112
Dwelling capacity	2000	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	2000	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>The site is in the Green Belt but is adjacent to the Nottingham Urban Area on the northern side of the A52. GB Review 2022 identifies the land as being within the Ruddington North East Strategic Area and has a GB score of 13. This broad area consists of rolling topography, tree belts, hedgerows and woodland. These features provide defensible boundaries within which urban sprawl could be contained. However removal of land east of Ruddington would result in an urban extension beyond Loughborough Road into open countryside. At a strategic level, this area of Green Belt prevents the merging of Ruddington and Edwalton, part of Nottingham's main urban area. The Green Belt is 1.5km in width consequently the significant removal of land in this area would be contrary to this purpose. Land within the north of this area contains a reasonable level of inappropriate development. Encroachment in this area is significant.</p> <p>In the south, adjacent to Ruddington's urban area, the land contains less inappropriate development and is open countryside in character. This rural appearance increases further to the east. Land adjacent to Loughborough Road forms the setting of Easthorpe House and stables which are listed buildings. The grounds of the house are also identified as historic parkland. Ruddington's Conservation Area extends east of Loughborough Road into the Green Belt. The area therefore contributes to Ruddington's historic significance.</p>
Flood Risk	Parts of the site at risk of flooding from watercourses and also from surface water.
Landscape assessment	Mickleborough Fringe DPZ - Rural/urban fringe. Condition of landscape is considered to be moderate as features show signs of decline or fragmentation such as loss of field patterns and fragmentation of hedgerows. Character strength of the area is weak due to varied urban uses.
Green Infrastructure	Site lies within the urban fringe and Edwalton / Sharphill Wood /Ruddington Corridor. Measures identified to enhance this area include Habitat protection, creation and enhancement (woodland and grassland)
Historic Environment	<p>No designated heritage assets within the site. Scattered archaeological finds found, including medieval pottery and flint.</p> <p>Enclosure and linear feature identified in the north east corner (adjacent to A606 and railway line). Archaeological investigation – nature of archaeology should be readily detectable via magnetometry survey in support of planning application</p>
Nature conservation	No designated nature conservation assets. Hedgerows are LBAP priority habitats.
AQMA/contamination	The site is not within or in proximity of an air quality management area. Areas having potential of contaminated land include Woodview Farm and surrounding fields.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of

	public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.
Highways and access	Access to the wider site would have to be achieved from the A60 and Flawforth Lane. Wheatcroft Roundabout at capacity and improvements are proposed to it as a result of existing planned development.
Accessibility	This is a large site submission. Large parts of the site are some distance from facilities located at Ruddington. No safe crossing points across the A52 for walking and cycling. Limited connectivity at present to the wider walking and cycling network. Not served by public transport therefore no bus stops in close proximity to the site.
Other issues	
Agricultural land	Arable land. Majority of the land is Grade 2. Grade 3 adjacent to Packman Dyke.
Deliverability	Land has been submitted following a call for strategic sites (2019). There are four landowners however and this may affect delivery.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary When assessed in its entirety there are a number of barriers to delivery in relation to the site. Firstly the site is located within the green belt and provides a gap between Ruddington and the main built up area of Nottingham. Other constraints relate to the sites connectivity to the wider area, in particular the main built up area of Nottingham by walking and cycling, agricultural land classification and areas of the site are identified as at risk of flooding from more than one source.

Ruddington

Site reference	SHLAA/RUD/059	Site name	East of Ruddington
Parish/town	Ruddington	Site area (hectares)	241
Dwelling capacity	4000	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site lies within the green belt. No assessment undertaken so far for the purposes of plan making, however development of the site to its fullest extent would lead to the merging of Ruddington and West Bridgford.
Flood Risk	Parts of the site are at risk of flooding from the Packman Dyke. Areas of the site at various risk from surface water flooding.
Landscape assessment	<p>SN03 – Mickleborough Fringe The overall landscape strategy is ‘Enhance and Restore’. The landscape condition is moderate. The character strength of the area is weak. Whilst the hills are distinctive features, other features are less distinctive with varied urban uses and pressures exerting a strong influence on the character. Small changes in land use could have a significant effect on landscape character (LCA 2009).</p> <p>SN04 – Cotgrave and Tollerton Village Farmlands The overall landscape strategy is ‘Enhance and Restore’. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character (LCA 2009).</p>
Green Infrastructure	Site lies within the urban fringe and Edwalton / Sharphill Wood /Ruddington Corridor. Measures identified to enhance this area include Habitat protection, creation and enhancement (woodland and grassland)
Historic Environment	Land east of the A60/Loughborough Road between Easthorpe House and Flawforth Lane is within the Conservation Area. The Townscape Appraisal identifies the whole field (including land within the CA) as a ‘positive open space’. Grade II Listed Animal Pen and Stables at Easthorpe House. Grade II Listed Easthorpe House. Grounds of Easthorpe House and the wider area are a non-designated Historic Park and Garden. Development of Easthorpe House Grounds would have significant effects on the non-designated Park and Garden and the rural setting of the Grade II listed buildings at Easthorpe House. Avoid development of Easthorpe House Park and Gardens, land north of Flawforth Lane that provides the open rural setting for Easthorpe House and the Conservation Area.
Nature conservation	The site contains trees, woodland, watercourses, hedgerows and grassland, all of which are LBAP priority habitats. Ridge and furrow and terraced bank south of Flawforth Lane.
AQMA/contamination	The site is not within or in proximity to an air quality management area. Some parcels of land within the area identified as having potential for contamination, including worked ground and as a result of industrial p. Potential legacy contamination from agricultural practices.
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second

Site reference	SHLAA/RUD/059	Site name	East of Ruddington
Parish/town	Ruddington	Site area (hectares)	241
Dwelling capacity	4000	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.

Highways and access	Access to the wider site would have to be achieved from the A60 and Flawforth Lane. Wheatcroft Roundabout at capacity and improvements are proposed to it as a result of existing planned development.
Accessibility	This is a large site submission. Large parts of the site are some distance from facilities located at Ruddington. No safe crossing points across the A52 for walking and cycling.
Other issues	Public rights of way cross the site. Site being promoted as possible mixed use.
Agricultural land	The provisional agricultural land classification is predominantly grade 2, with some grade 3.
Deliverability	This is a site of strategic scale with more than one landowner. Based upon the submission to the growth options consultation, significant proportion of the area being promoted does not have the support of the landowner at present.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary When assessed in its entirety there are a number of barriers to delivery in relation to the site. Firstly the site is located within the green belt and provides a gap between Ruddington and the main built up area of Nottingham. Other constraints relate to the sites connectivity to the wider area, in particular the main built up area of Nottingham by walking and cycling, agricultural land classification and areas of the site are identified as at risk of flooding from more than one source.

Ruddington

Site reference	SHLAA/RUD/060	Site name	Land at Wilford Road Ruddington
Parish/town	Ruddington	Site area (hectares)	17
Dwelling capacity	325	Density (dwellings/hectare)	19
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Ruddington West Bridgford and Clifton Strategic Area. It scored 13 within the Green Belt Review 2022. This broad area is contained by the existing edges of Clifton to the west, and, in part, Silverdale and Ruddington to the east. It is not considered that development would round off the built up area. The Fairham Brook is a feature that may contain development going out from the Clifton direction. There are intermittent hedgerows and tree belts in the fields to the north of Clifton Lane. The broad area has no topographical features and is relatively flat. This broad area in large prevents the merging of the main built up area of Nottingham and Ruddington. Development in this location could physically join the two settlements together. There is a perception that the two settlements are already joined when travelling along Clifton Lane. Merging Clifton with Ruddington would potentially be less of an issue going out from the Clifton direction if the Fairham Brook was used as a boundary, however the broad area as a whole is critically important in preventing merging. There are some areas of inappropriate developments, particularly in the area between Clifton and the Fairham Brook, along Clifton Lane, although this ribbon development could be considered to be a washed over part of Ruddington, There are areas of inappropriate development at South Nottinghamshire Academy, St Peters School and developments within the grounds of Ruddington Golf Club. However, the majority of the area consists of arable fields that are clearly within open countryside.
Flood Risk	The site is not identified as being at risk of flooding from watercourses. Parts of the site are however identified as being at risk from surface water.
Landscape assessment	The Greater Nottingham Growth Options Report (Landscape Assessment) Oct 22 highlights that The site has high potential for strategic growth. Spatially, it forms an extension to Wilford, crossing the existing defensible boundary of the A52. Adjacent urban influences such as Wilford and Ruddington are already eroding the character of site and its context, the only accesses to the site are from these urban areas. The site has no coalescence issues and feels proportionate.
Green Infrastructure	Hedgerow and corridor of the watercourse should be retained and enhanced.
Historic Environment	In the setting of the Greenhouse at Ruddington golf course (Grade 2). Non designated heritage assets identified within the site by the HER include linear cropmarks, a rectangular enclosure and a well.
Nature conservation	The site is next to Wilwell Cutting SSSI and Local Nature Reserve. This is designated for both its flora and fauna. The importance of the site would be at risk from domestic animals, modification of watercourses or the water table and changing water levels, and from increased usage of the site as a recreational facility. There are also hedgerows on the site that should be retained.
AQMA/contamination	The site is not within or in proximity of an air quality management area. Areas of made ground identified around the fringes of the western part of the site being potentially contaminated land
Community facilities	Ruddington is a Key Settlement. The village centre contains a variety of convenience and comparison stores, including a supermarket and post office. The village has two doctors

Site reference	SHLAA/RUD/060	Site name	Land at Wilford Road Ruddington
Parish/town	Ruddington	Site area (hectares)	17
Dwelling capacity	325	Density (dwellings/hectare)	19
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

	<p>surgeries (Church House Surgery and Ruddington Medical Centre). There are a number of public houses, restaurants and takeaways. The settlement has a village hall and second community space at St Peter's Rooms. Ruddington has a number of recreational open spaces - Rushcliffe Country park, Sellers Field, Elms Park, Vicarage Lane, Ruddington Green, and St Marys Community Park. The village centre and its amenities are some distance from the majority of the site.</p>
Highways and access	Access would have to be achieved of Wilford Road. Wilford Road at this point is National Speed Limit.
Accessibility	The number 3 bus passes through the site, which currently provides for an hourly service between Ruddington and Nottingham. Ruddington Lane tram stop is located around 1km away from the middle of the site which offers frequent services to the city centre and beyond. Reasonable connections to walking and cycling network that runs along the eastern side of Wilford Road.
Other issues	Part of the site is being promoted as a new base for the West Bridgford Hockey Club.
Agricultural land	The area is grade II agricultural land.
Deliverability	From the information in the submission, the site is owned by two willing landowners therefore it is available for development. No known housebuilder interest at this point in time.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	<p>Assessment based upon site submission in its entirety. The site is located within the Green Belt adjacent to West Bridgford but within Ruddington Parish. It lies immediately south for the A52 which forms a strong defensible green belt boundary. The site lies immediately adjacent to the Wilwell cutting SSSI, which is designated for both its interest in flora and fauna. This would be a major barrier to delivery given the sensitivities identified for the SSSI. The southern part of the site lies within the setting of the Greenhouse at Ruddington golf course, a listed building. It is therefore considered that the site is not suitable for development.</p>
------------------------	--

Sutton Bonington

Site reference	SHLAA/SUT/001	Site name	Land North of Park Lane
Parish/town	Sutton Bonington	Site area (hectares)	4.2
Dwelling capacity	70	Density (dwellings/hectare)	19
Site source	Housing Allocation	Planning reference	21/02283/FUL
Allocated site reference	Policy 10 Housing allocation	Status	Under Construction - less than 25% of dwellings or no completions
Number of dwellings remaining	66	Source of number of dwellings	Planning Application

Green Belt	Not Applicable. The site is not located within the Green Belt.
Flood Risk	The site is not at risk of flooding from watercourses. There is a risk across part of the site of flooding from surface water run-off.
Landscape assessment	Landscape appraisal score 52/100. The site comprises one large field with arable characteristics directly north of the junction between A6006 and Park Lane. There are some PRoW's within the study area but none which directly influence the site. There are some conservational interests within the study area, including some TPO's, listed buildings and a conservation area unrelated to the site. There is an overall medium landscape value within the study area due to a well maintained agricultural and domestic setting with an attractive avenue of trees along the Park Lane village entrance. There is a low susceptibility to change with no perceived loss of character and an extension to existing urban fringe. The sensitivity of the landscape character is low overall. Visually, there are no indicators or recognition of value. There is a medium number of potential receptors from existing residential to the north and the busy A6006 road to the south. The overall visual susceptibility is medium as the site is relatively open. Overall, there is low visual sensitivity.
Green Infrastructure	The site is surrounded by hedgerows of varying quality. The Midland Main Line runs along the eastern boundary of the site which provides for a Green Corridor.
Historic Environment	The site does not contain or have an impact on any historic assets
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by hedgerows in varied condition which are a LBAP habitat Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	The site is not within or affecting an Air Quality Management Area.
Community facilities	Sutton Bonington contains a library, post office, general store, two public houses and deli. There is a small community building as part of the library.
Highways and access	Satisfactory access should be achievable however, would require extension of existing 30mph limit and upgrades to adjacent footways would also need upgrading.
Accessibility	Within reasonable walking distance of primary school. Shop and other facilities are at least 1.3km walk away.
Other issues	Landowner does not propose wholesale development of the site and would only release it for up to 80 dwellings. Landowner wishes to see bespoke design for the dwellings with significant green space
Agricultural land	The site is classified as Grade 3 agricultural land.
Deliverability	The site is under construction

Delivery Period	2 Years	Delivery	5 Year Tranche - 0-5 Years
-----------------	---------	----------	----------------------------

Site reference	SHLAA/SUT/001	Site name	Land North of Park Lane
Parish/town	Sutton Bonington	Site area (hectares)	4.2
Dwelling capacity	70	Density (dwellings/hectare)	19
Site source	Housing Allocation	Planning reference	21/02283/FUL
Allocated site reference	Policy 10 Housing allocation	Status	Under Construction - less than 25% of dwellings or no completions
Number of dwellings remaining	66	Source of number of dwellings	Planning Application

Overall summary The site is under construction

Sutton Bonington

Site reference	SHLAA/SUT/002	Site name	Land south of Pasture Lane
Parish/town	Sutton Bonington	Site area (hectares)	1.1
Dwelling capacity	22	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	22	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Land is not within the Green Belt, therefore not applicable.
Flood Risk	The vast majority of the site is within flood zone 3, with a small area in flood zone 2. Environment Agency state that there should be at least a 10 metre easement adjacent to any watercourse to enable access to and maintenance of it. Sequential and exception test required for the site to be development
Landscape assessment	L VIA aggregate score: 61/100. The site comprises a pastoral field exhibiting a historic pattern reflecting open fields - as identified by the Nottinghamshire Historic Landscape Characterisation. This field pattern - along with other factors such as the adjacent conservation area, the high landscape and scenic quality and the degree of representativeness of the assessed landscape character - contributes to the high landscape value. There is a medium landscape susceptibility owing in part to the loss of the historic field pattern and the pastoral context of the conservation area. Visually, there is a low sensitivity - this has been derived from the medium visual value and low visual susceptibility given the site's relative visual containment in its context.
Green Infrastructure	There are no identified nature conservation issues with the site, however it contains watercourses and some intermittent hedgerows. Any development should incorporate these features into it.
Historic Environment	Land provides key glimpse out of the neighbouring Conservation Area. Whilst ridge and furrow is identified south and west of the site, none is found within it.
Nature conservation	There are no identified nature conservation issues with the site, however it contains watercourses and some intermittent hedgerows, both of which are identified as LBAP priority habitats.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Sutton Bonington contains a library, post office, general store, two public houses and deli. There is a small community building as part of the library.
Highways and access	Access likely to be achievable, however EA consent will be required with regard to the crossing the watercourse and any alterations to the existing crossing / penstock arrangement. Consideration to be to the existing bridleway.
Accessibility	There is an hourly Skylink bus service Monday - Saturday during the day to Loughborough and Nottingham via East Midlands Airport. No service during evenings and weekends. Close to most facilities within the village
Other issues	None identified
Agricultural land	The site is identified as Grade 3 agricultural land
Deliverability	Site has been identified as available for development, however flood risk issues mean the site is not suitable.

Site reference	SHLAA/SUT/002	Site name	Land south of Pasture Lane
Parish/town	Sutton Bonington	Site area (hectares)	1.1
Dwelling capacity	22	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	22	Source of number of dwellings	Details obtained through external Site Submission

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary The site is well located in relation to the village centre and facilities. The development of the site would affect a key glimpse outside of the conservation area. Whilst the site is small in nature, the largest constraints relate to the site being located in an area of flood risk from the River Soar. Site is not suitable.

Sutton Bonington

Site reference	SHLAA/SUT/003	Site name	Land South of Landcroft Lane
Parish/town	Sutton Bonington	Site area (hectares)	4.9
Dwelling capacity	95	Density (dwellings/hectare)	19
Site source	Planning Application	Planning reference	19/02079/OUT (Withdrawn)
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	95	Source of number of dwellings	Planning Application

Green Belt	The site is not located within the Green Belt
Flood Risk	The site is not at risk of flooding from watercourses. A small part of the north eastern corner of the site is at low risk of flooding from surface water runoff.
Landscape assessment	LVIA score 59/100. Comprising an arable field adjacent to recreational facilities on the north-eastern edge of the main part of Sutton Bonington, the site sits adjacent to the Sutton Bonington Conservation Area. There is a high landscape quality and high recreational value in the study area, both of which contribute to the medium landscape value. The site is close to the main urban edge, but crucially is detached from it and development would increase perceived urbanisation in the study area - both of which contribute to a medium landscape susceptibility. Overall, the landscape sensitivity is medium. Visually, the site has a low value within the context of the study area, and also has a low susceptibility due in part to its relatively low visibility in its surroundings. The visual sensitivity is also low.
Green Infrastructure	The site is surrounded by hedgerows of varying quality. Tennis courts and a bowling green are located adjacent to the site.
Historic Environment	The site is not prominent from within the conservation area, the length of boundary which it shares within the conservation area is all within the private grounds of a single property and as such there are few viewpoints easily accessible to the public from within the conservation area (St Michaels House) and its boundary with the main road (Marle Pit Hill) is screened by a bank and dense tree line, there is less screening in views from the north along College Road, however from this direction the site is seen within the context of the various sports pavilion buildings and this view does not directly affect the conservation area, although it would affect the final approach to the conservation area. Whilst College Road runs along the university campus the tree lined grass verges and the distance to which the university buildings are set back from the highway gives this a less urbanised character than might otherwise be the case. There are a number of nearby HER entries, mostly relate to remnant ridge and furrow in neighbouring fields and the village pinfold beside the current tennis pavilions. The site was outside of the core of the village and likely under agricultural use for most of its history.
Nature conservation	There are no identified nature conservation issues with the site, however the site is surrounded by hedgerows. Hedgerows are identified as LBAP priority habitats.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Sutton Bonington contains a library, post office, general store, two public houses and deli. There is a small community building as part of the library.
Highways and access	Suitable access likely to be achievable off of Landcroft Lane. Connectivity to Sutton Bonington and associated facilities very poor. The connecting footway on Marle Pit Hill is severely substandard, with no scope for improvement.
Accessibility	Bus service limited to dial a ride. Within 1km walking distance of shop. Some distance from primary school.

Site reference	SHLAA/SUT/003	Site name	Land South of Landcroft Lane
Parish/town	Sutton Bonington	Site area (hectares)	4.9
Dwelling capacity	95	Density (dwellings/hectare)	19
Site source	Planning Application	Planning reference	19/02079/OUT (Withdrawn)
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	95	Source of number of dwellings	Planning Application

Other issues	
Agricultural land	The site is classified as Grade 2 (BMV) agricultural land.
Deliverability	The site was promoted through LP2 and the emerging Strategic Plan for development by the agents of a landowner therefore it is available for development. Planning application submitted 2019 and representation on the Strategic Plan in 2020 by Gladman's for a larger development (95 units) which included adjacent land to the north east.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary

The site is relatively constraint free in terms of physical constraint. It is within walking distance of most facilities. The site is located on the edge of the conservation area, however impacts upon the setting of it are likely to be limited. Whilst the site is within an area of high landscape quality and high recreational value, the site itself is of medium landscape value and low visual sensitivity. The negatives in relation to the site is that it consists of best and most versatile agricultural land. There are also connectivity issues to the main part of the village due to a substandard footway over a railway bridge, with no scope to widen it. Recent application submitted by Gladman's for 95 units (comprising the site promoted through LP2 and the Strategic Plan and adjacent land to the north east) indicates site is available. Application was however withdrawn.

Number of dwellings remaining	30	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not within the green belt
Flood Risk	The site is not identified as being at risk of flooding from any sources
Landscape assessment	
Green Infrastructure	
Historic Environment	No identified impact on designated or non designated historic assets
Nature conservation	The site is largely grassland
AQMA/contamination	The site is not within or in proximity to and AQMA
Community facilities	Sutton Bonington contains a library, post office, general store, two public houses and deli. There is a small community building as part of the library.
Highways and access	
Accessibility	The site is a long distance from the nearest facilities. The site does have access to public transport with the nearest bus stop being located on Melton lane to the north east of the site. The busses run an hourly timetable.
Other issues	Under EMA flightpath, therefore potential noise issues.
Agricultural land	The provisional agricultural land classification is grade 2
Deliverability	Land submitted as possible allocation within LP2. Could be suitable if policy changes.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	Land submitted as possible allocation within LP2. Located away from the main settlement , but amongst some ribbon development in the Landcroft Lane area. Could be suitable if policy changes.

Tollerton

Site reference	SHLAA/TOL/001	Site name	Land at Burnside Grove
Parish/town	Tollerton	Site area (hectares)	9.2
Dwelling capacity	150	Density (dwellings/hectare)	16
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	150	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>This area of land is contained by residential development to the east and west preventing further sprawl in that direction. However the elevated position and sloping topography mean the Green Belt prevents conspicuous sprawl within the site itself. As the land does not extend beyond the existing residential areas to the east and west, the Green Belt designation does not prevent the merging of Tollerton with the Gamston Strategic Allocation (part of the main urban area of Nottingham).</p> <p>The land however does not contain inappropriate development and the consequently the character is open countryside rather than urban fringe. This character is enhanced by the rural view across the site to the north. Whilst the site is physically contained and more likely to be of low Green Belt importance, the open countryside character and visibility of the site results in a score of 11. This reflects an area of low-medium Green Belt importance.</p>
Flood Risk	The site is not at risk of flooding from watercourses. It is at risk of surface water flooding.
Landscape assessment	Landscape appraisal score 47/100. The site comprises several fields with strong arable characteristics and lies directly north of an existing line of housing along Burnside Grove. There is a good network of PRow's within the study area but none which directly influence the site. There are some conservational interests within the study area, including some TPO's, listed buildings and a conservation area unrelated to the site. There is an overall medium landscape value within the study area due to well maintained arable landscape and strong domestic setting. There is a low susceptibility to change with some loss of agricultural land but the perception of infill development. The sensitivity of the landscape character is low overall. Visually, there are no indicators or recognition of value. There is a medium number of potential receptors as the site forms part of the settlement edge. The overall visual susceptibility is low with most views of the site obscured by built form, particularly from the south and east. Overall, there is low visual sensitivity.
Green Infrastructure	The hedgerows of varying quality could be maintained and enhanced as green infrastructure buffers.
Historic Environment	The site does not contain or is in the setting of a designated heritage asset. However Archaeology indicates the presence of a Civil War gun emplacement to the west of access along southern site boundary.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by hedgerows in varied condition which are a LBAP habitat. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	The site is not located within an Air Quality Management Area.
Community facilities	Tollerton contains a primary school, a Post Office, pub petrol station, a parish office and several small shop units.
Highways and access	NCC previously advised that it would require two points of access (for 180 units), existing

Site reference	SHLAA/TOL/001	Site name	Land at Burnside Grove
Parish/town	Tollerton	Site area (hectares)	9.2
Dwelling capacity	150	Density (dwellings/hectare)	16
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	150	Source of number of dwellings	Details obtained through external Site Submission

farm access corridor is of insufficient width to serve even a modest development of less than 50 dwellings. 6Cs Design Guide Part 3 however indicates that a 5.5m carriageway can accommodate between 50 and 400 dwellings (a residential road). 6Cs also suggests 150 can be accessed from a single access point.

Accessibility	The site is located away from the main bus service (the Keyworth connection), which runs along the A606 Melton Road. Service is every 15 minutes during the day and there is also a service in the evenings and weekends. This is within a 10 minute walk of the site
Other issues	
Agricultural land	The site is almost all Grade 2 (BMV) agricultural land, with a small area classified as Grade 3.
Deliverability	The site was promoted through the Local Plan Part 2 and more recently through the Strategic Plan Growth Options, therefore is available for development.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site is not of significant importance when assessed against the purposes for including land within the Green Belt. The site is largely contained, however it is located away from some facilities and the main bus corridor (along Melton Road). Site does not perform as an important landscape feature in the landscape study. The site was promoted through the Local Plan Part 2 and more recently through the Strategic Plan Growth Options, therefore is available for development. Growth Options Study determines that land west of Tollerton, including this site is potentially suitable location for strategic development.

Tollerton

Site reference	SHLAA/TOL/002	Site name	West of Tollerton Lane and North of Medina Drive
Parish/town	Tollerton	Site area (hectares)	25.6
Dwelling capacity	512	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	512	Source of number of dwellings	Assumption made on best estimate

Green Belt	<p>The site was split into 2 for the purposes of the Green Belt Review. The northern part of the site (TOL/A) is isolated within the Green Belt but adjacent to the historical core of Tollerton (itself washed over by Green Belt) and the Green Belt designation preserves the rural setting of this area of the village. The rising topography towards Jubilee Woods increases the site's prominence in the Green Belt increases the importance of preventing of urban sprawl. The Green Belt also prevents the merging of Tollerton with the Tollerton/Gamston Strategic Allocation. Due to the northern part of the site's location between the strategic allocation and Tollerton, its prominent location in the landscape, open countryside character and its contribution to the rural setting of Tollerton the land performed well against all Green Belt purposes and is of high Green Belt importance. The significant reduction in the distance between Tollerton and the Strategic Allocation and the perception of merging fundamentally constrain the removal of the land from the Green Belt.</p> <p>The southern part of the site (TOL/B) performs similarly against Green Belt purposes. It is however adjacent to the 20th Century development of Tollerton which overlooks the land and reduces the open countryside character of the site. The Green Belt designation prevents the merging of Tollerton with the Gamston Strategic Allocation and the merging of the historic core of Tollerton with the more area of 20th Century development. The southern part of the site scored 17 reflecting the land's medium-high Green Belt importance.</p>
Flood Risk	The site is not at risk of flooding from watercourses or from surface water run-off.
Landscape assessment	Landscape appraisal score 69/100. The site comprises several fields with strong arable characteristics and is situated west of Tollerton Lane. There is a good network of PRow's within the study area that link the various settlements together. Tollerton FP4 runs through the northern section of the site and Tollerton BW5 runs along the sites northern boundary. There are some conservational interests within the study area, including some TPO's and several listed buildings. There is an overall medium landscape value within the study area due to well managed agricultural land and a strong domestic setting. There is a medium susceptibility to change with a loss of rural setting to village evident as well as a large urban extension. The sensitivity of the landscape character is medium overall. Visually, there are no indicators or recognition of value. There is a medium number of potential receptors as the site forms part of the village edge. The overall visual susceptibility is high with some long distance views of the site and surrounding landscape. Overall, there is medium visual sensitivity.
Green Infrastructure	Other than the hedgerow corridors there is no identified green infrastructure within the site. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
Historic Environment	This land provides a visual break between the historic core of Tollerton and the more recent 20th century developments closer to the A606. The removal and development of the land would merge these areas and significantly affect the setting of the historic settlement. Tollerton Hall, its grounds, St Peters Church and Bassingfield House are Grade II listed and are on the opposite side of Tollerton Lane. HER identifies ridge and furrow within the site

Site reference	SHLAA/TOL/002	Site name	West of Tollerton Lane and North of Medina Drive
Parish/town	Tollerton	Site area (hectares)	25.6
Dwelling capacity	512	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	512	Source of number of dwellings	Assumption made on best estimate

	although site now under intensive farming methods which has removed this evidence.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by hedgerows in varied condition which are a LBAP habitat. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Not within or affecting and Air Quality Management Area. No areas of land identified as potentially contaminated.
Community facilities	Tollerton contains a primary school, a Post Office, pub petrol station, a parish office and several small shop units.
Highways and access	Would require two points of access. Possible upgrade to Tollerton Lane /A606 and Cotgrave Lane junctions. Questionable from a sustainability standpoint lack of facilities in Tollerton means mainly car based travel.
Accessibility	The site is located some distance away from the Keyworth Connection which runs along the A606 on a 15 minute frequency during weekdays. This is at least a 20 minute walk. Hourly bus service during the day runs along Tollerton Lane to West Bridgford and to Cotgrave and beyond.
Other issues	Part of the site identified as fundamentally constrained in Green Belt terms. Area that isn't is 13.9 hectares therefore dwelling capacity is adjusted accordingly.
Agricultural land	The majority of the site is Grade 3 agricultural land with a proportion of Grade 2 agricultural land at the south-western corner of the site.
Deliverability	Site being was promoted on behalf of landowner through the Local Plan Pt2 Process. No known developers involved.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary There are a number of identified issues in relation to the site as a whole. The site performs an important function in relation to its inclusion in the Green Belt. In particular the Green Belt review identifies the northern portion of the site as of particular importance, given that separation is required between Tollerton and the strategic allocation to the north. Other issues in relation to the site is that the site is some distance from facilities. It provides a visual break between the historic core of Tollerton and old Tollerton village. In terms of landscape and visual impacts, the site performs well in terms of the landscape assessment. Site being promoted on behalf of landowner through the previous Local Plan Process. No known developers involved.

Tollerton

Site reference	SHLAA/TOL/003	Site name	Land east of Tollerton Lane
Parish/town	Tollerton	Site area (hectares)	2.8
Dwelling capacity	30	Density (dwellings/hectare)	11
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	30	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>The Green Belt designation prevents further development east of Tollerton Lane on land which slopes down gently towards the east. The land is visible over a wide area in this direction. As the submitted site does not follow a physical boundary feature the land is not contained and the Green Belt prevents visible urban sprawl. The approval of affordable units as an exception has weakened the Green Belt designation regarding safeguarding the countryside from encroachment, however the land's contribution to the open arable landscape results in an open countryside character.</p> <p>Whilst the site performed well against Green Belt purposes which prevented sprawl and encroachment, the land's poorer performance against purposes which prevent merging and protect historic setting reduce its overall score to 12. This identifies the site as being of low-medium Green Belt importance.</p>
Flood Risk	<p>The site is not identified as at risk of flooding from any source other than a negligible area near to the rural exception development from surface water.</p>
Landscape assessment	<p>Landscape Appraisal score 61/100. The site comprises part of two fields with arable characteristics and is situated immediately east of Tollerton Lane. There is a network of PRow's within the study area with Tollerton FP2 intersecting the north-eastern section of the site. There are some conservational interests within the study area, including some TPO's and several listed buildings. There is an overall low landscape value within the study area with some areas of well managed agricultural land and a strong domestic setting. There is a medium susceptibility to change with a small loss of strong rural setting to village and an extension to the urban edge. The sensitivity of the landscape character is medium overall. Visually, there are no indicators or recognition of value. There is a medium number of potential receptors as the site forms part of the village edge. The overall visual susceptibility is medium as the site is part of the villages rural setting. Overall, there is medium visual sensitivity.</p>
Green Infrastructure	<p>No identified Green Infrastructure on site, in agricultural use. Hedgerow along the frontage of the site could be enhanced to provide green infrastructure, however this may lead to conflict with the need to provide a footway along the frontage of the site.</p>
Historic Environment	<p>The site does not contain, nor does it have an impact on the setting of a heritage asset. Roman and medieval pottery found in field to east of site, pottery may be an isolated find but may be related to nearby archaeology, possibly within the site. Grounds of Tollerton hall (including a Decoy) to the east of the site are identified as non designated park and garden.</p>
Nature conservation	<p>There are no designated nature conservation interests within or adjacent to the site. It is however bounded on one of its boundaries by hedgerows in poor condition. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.</p>
AQMA/contamination	<p>The site is not within or will have a direct effect on an air quality management area.</p>
Community facilities	<p>Tollerton contains a primary school, a Post Office, pub petrol station, a parish office and</p>

Site reference	SHLAA/TOL/003	Site name	Land east of Tollerton Lane
Parish/town	Tollerton	Site area (hectares)	2.8
Dwelling capacity	30	Density (dwellings/hectare)	11
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	30	Source of number of dwellings	Details obtained through external Site Submission

	several small shop units.
Highways and access	The shape of the site is only likely to allow ribbon development fronting Tollerton Lane with direct vehicular access. Satisfactory access should be achievable. Would prefer to see as much frontage development as possible. The existing footway to the south will require extending across the frontage of the site entailing the loss of a significant amount of hedgerow (taken from 2012 response to the SHLAA from NCC highways).
Accessibility	The Keyworth connection runs along the A606 Melton Road. Service is every 15 minutes during the day and there is also a service in the evenings and weekends. This is between a 5 and 10 minute walk away.
Other issues	None identified
Agricultural land	The site is classified as Grade 3 agricultural land.
Deliverability	Site available as indicated by further options response and larger site submission during consultation on Strategic Plan Growth Options.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is located along the edge of Tollerton, however fronts the main road from Tollerton northwards. There is existing ribbon development in part along this eastern frontage to Tollerton. Whilst the land is of low-medium green belt value it does not have a discernible eastern boundary, and its configuration would suggest that frontage development onto Tollerton Lane would be the only suitable form of development. Site available as indicated by further options response. Larger site (SHLAA/TOL/015), submitted during consultation on Strategic Plan Growth Options, overlaps this site. Possible that the site has been sold on since this submission was made as different site promoter.
------------------------	---

Tollerton

Site reference	SHLAA/TOL/004	Site name	Jubilee Wood
Parish/town	Tollerton	Site area (hectares)	5.0
Dwelling capacity	60	Density (dwellings/hectare)	12
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	<p>The site consists of trees, scrubland and a number of agricultural prefabricated buildings in various states of use, together with a dwelling. Whilst there is development within the site, this is well screened from the wider area and can only be viewed from the south east of the site.</p> <p>The major issue with the site is that it is located in an isolated area and would not be released from the Green Belt without additional land between it and Tollerton. If the site were to be released together with other land, the gap between Tollerton and the strategic allocation would be significantly diminished. As the site crosses the brow of the hill development would visually link Tollerton to the strategic allocation, defeating one of the fundamental purposes of including land within the Green Belt. The site is therefore of high Green Belt importance.</p> <p>Whilst the site overall is considered to be of medium-to-high green belt importance, the issues relating to merging lead to the site being of fundamental importance to the function of the green belt.</p>
Flood Risk	The site is not at risk of flooding from any source.
Landscape assessment	The site has not been assessed within the LVIA as it is remote from any settlement. Adjacent site has been assessed and landscape appraisal score 69/100. The site comprises several fields with strong arable characteristics and is situated west of Tollerton Lane. There is a good network of PRoW's within the study area that link the various settlements together. Tollerton FP4 runs through the northern section of the site and Tollerton BW5 runs along the sites northern boundary. There are some conservational interests within the study area, including some TPO's and several listed buildings. There is an overall medium landscape value within the study area due to well managed agricultural land and a strong domestic setting. There is a medium susceptibility to change with a loss of rural setting to village evident as well as a large urban extension. The sensitivity of the landscape character is medium overall. Visually, there are no indicators or recognition of value. There is a medium number of potential receptors as the site forms part of the village edge. The overall visual susceptibility is high with some long distance views of the site and surrounding landscape. Overall, there is medium visual sensitivity.
Green Infrastructure	Site contains significant tree coverage across its northern half, with some hedgerow cover around the site, both of which are a biodiversity priority habitat.
Historic Environment	Site does not contain any designated or undesignated historic assets.
Nature conservation	The site has no identified nature conservation interest, however there is extensive tree cover across the site, hedgerows and rough grassland which are all LBAP priority habitats.
AQMA/contamination	Site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Tollerton contains a primary school, a Post Office, pub petrol station, a parish office and several small shop units.

Site reference	SHLAA/TOL/004	Site name	Jubilee Wood
Parish/town	Tollerton	Site area (hectares)	5.0
Dwelling capacity	60	Density (dwellings/hectare)	12
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Highways and access	Site is accessed off Little Lane which is a single highway and therefore unlikely to be suitable for significant housing development. Development would likely come forward with neighbouring TOL2. Combined these sites would require two points of access. Possible upgrade to Tollerton Lane /A606 and Cotgrave Lane junctions. Questionable from a sustainability standpoint lack of facilities in Tollerton means mainly car based travel.
Accessibility	The site is some distance away from any bus service and also any facilities therefore it is not accessible to services and facilities other than by car.
Other issues	Telecommunications mast within the site, together with a residence and number of buildings used for the keeping of pigs in various states of condition.
Agricultural land	The site is predominantly classified as Grade 3 agricultural land, with some areas of Grade 2 to the north and south extremes.
Deliverability	Site is available for development however its suitability is unclear given its location and other constraints.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	There are significant concerns in relation to the suitability of the site for development given its location, accessibility and significant loss of biodiversity and prominent landscape features. Jubilee Wood and the site adjacent sit on top of a prominent ridge. The site performs an important function in Green Belt terms, separating Tollerton from the strategic allocation.

Tollerton

Site reference	SHLAA/TOL/008	Site name	East of Gamston North of Tollerton
Parish/town	Tollerton	Site area (hectares)	245.6
Dwelling capacity	4000	Density (dwellings/hectare)	16
Site source	Housing Allocation	Planning reference	20/03244/OUT (Pending)
Allocated site reference		Status	Planning application under consideration
Number of dwellings remaining	4000	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	N/A - Strategic Allocation.
Flood Risk	EA Maps suggest <1/2 site at risk from flooding (1 in 100 or greater) - Eastern part of the site
Landscape assessment	Land is within SN04 Cotgrave and Tollerton Village Farmlands. The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character.
Green Infrastructure	Site is adjacent to the Grantham Canal, which is identified as a strategically important green infrastructure asset. There are significant opportunities to provide GI and link to the canal.
Historic Environment	Grade II Listed Buildings present on site - 18 pillboxes within the site have been listed Grade II in January 2012. Setting of pillboxes would be significantly affected by development of the airfield. Removing their historical context. Incorporate pillboxes into GI infrastructure that connects them and protects their setting. Information should explain their historic value.
Nature conservation	No designated sites. However site contains hedgerows which are a priority habitat within the LBAP.
AQMA/contamination	The site is not covered by any AQMA. Site may contain some legacy contamination at the airport. There are also areas of made and worked ground within the wider site.
Community facilities	Adjacent to Main Urban Area and Gamston Centre of Neighbourhood Importance. No facilities within 10-15 minute walk - New facilities would have to be provided on the site.
Highways and access	Major infrastructure works are required, potentially impacting on viability and timescale for development - Highways modelling has identified improvements required to the strategic road network together with mitigation measures. Proportionate cost on development will be required to fund mitigation measures.
Accessibility	No tram or rail stops within 20 minute walk. Currently there is a bus service (number 33) that provides an irregular service during weekdays (hourly or worse). A few uncoordinated routes that may be unsafe, poorly designed or that do not conveniently link with the main residential areas nearby - These would require enhancement to improve connectivity as part of the planning application process, in particular across Lings Bar Road.
Other issues	
Agricultural land	Grade 3a and 3b (Good/Moderate) - Identified as grade 3.
Deliverability	Issues between private landowners have now been resolved and the one of the public landowners have signed an option with a developer. The Consortium of "willing landowners" are Master planning the entire site and working with RBC on an SPD for the site. A planning application submitted during 2020/21. Whilst the land is allocated and progress has been made with willing landowners. Development rates will be less per annum however as one of

Site reference	SHLAA/TOL/008	Site name	East of Gamston North of Tollerton
Parish/town	Tollerton	Site area (hectares)	245.6
Dwelling capacity	4000	Density (dwellings/hectare)	16
Site source	Housing Allocation	Planning reference	20/03244/OUT (Pending)
Allocated site reference		Status	Planning application under consideration
Number of dwellings remaining	4000	Source of number of dwellings	Details obtained through external Site Submission

the landowners is not progressing their portion of the scheme at the present time. Under paragraph 68 of the NPPF, the Local Planning Authority is working with the willing landowners to progress part of the scheme. The area of land being promoted by willing landowners is considered to be suitable and available now, but is not considered achievable until years 6-10. Delivery rates on the site however are anticipated to be at a lesser rate than envisaged, as not all of the site is considered to be available at present.

Delivery Period	18 Years	Delivery	5 Year Tranche - 6-10 Years
-----------------	----------	----------	-----------------------------

Overall summary The site is allocated for development in local Plan Part 1 Rushcliffe Core Strategy. Site owners indicated through Local Plan submissions that delivery would commence during 2016 at a steady pace increasing to between 220 and 250 dwellings per annum for the rest of the build out period, and that there are no barriers to delivery subject to the phasing of infrastructure in a viable fashion. Outline application submitted for roughly half of the site. John Wells, Bovis, Taylor Wimpey and Barwood have agreed to develop an SPD that will ensure development complies with the Core Strategy. The start of delivery anticipated within 6-10 years

Tollerton

Site reference	SHLAA/TOL/010	Site name	Land South of Tollerton/Gamston Strategic Allocation
Parish/town	Tollerton	Site area (hectares)	39.4
Dwelling capacity	475	Density (dwellings/hectare)	12
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	475	Source of number of dwellings	Assumption made on best estimate

Green Belt	Green Belt Review Part 1 states that Zone 5.1 is considered to have an overall medium-high importance in relation to purposes of the Green Belt. However this review occurred prior to the allocation of the Gamston Strategic Site. Zone 5.2 is considered to have an overall medium importance.
Flood Risk	Entire site is within Flood Zone 1.
Landscape assessment	Land is within SN04 Cotgrave and Tollerton Village Farmlands. The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character.
Green Infrastructure	A right of way crosses the site from Lodge Lane to Edwalton Golf Course. A right of way runs along the southern edge of the site parallel. Recent submission proposes open space and woodland between these rights of way (within Green Belt Area 5.1). This will enhance the required buffer between Tollerton and the main urban area.
Historic Environment	There are no designated or non designated heritage assets identified within the site. HER picks up cropmarks and a well as possible archaeological features. Archaeological investigation – nature of archaeology should be readily detectable via magnetometry survey in support of planning application.
Nature conservation	There are no designated nature conservation assets identified within the site.
AQMA/contamination	Land is not within AQMA. Area of made ground to the west of Hoylands Farm and along the side of the A52 identified as potentially contaminated land.
Community facilities	No facilities within 10-15 minute walk - New facilities will be provided within the adjacent Tollerton/Gamston SUE.
Highways and access	Most recent submission (GNSP Growth Options) states that the allocation of this site can provide one or two junctions onto the A52 and unlock the adjacent Gamston SUE which has been delayed.
Accessibility	The A52 is adjacent to the site. Site is currently a 20m from a bus stop (Tollerton Lane). A neighbourhood centre will be located within the allocated SUE.
Other issues	
Agricultural land	The majority of the site is within Grade 2 very good quality agricultural land.
Deliverability	Site is adjacent to the Gamston/Tollerton Strategic Allocation. Land has been submitted by landowner during the Core Strategy Review call for sites (July 2019) and Growth Options consultation. It was also previously promoted during Local Plan Part 2 consultations. Site could be suitable if policy changes.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Site reference	SHLAA/TOL/010	Site name	Land South of Tollerton/Gamston Strategic Allocation
Parish/town	Tollerton	Site area (hectares)	39.4
Dwelling capacity	475	Density (dwellings/hectare)	12
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	475	Source of number of dwellings	Assumption made on best estimate

Overall summary

Site is adjacent to the Gamston/Tollerton Strategic Allocation. Land has been submitted by landowner during the Core Strategy Review call for sites (July 2019) and is being promoted through the Strategic Plan. Site could be suitable if policy changes. The Growth Options Study concludes that this site is potentially suitable as a location for strategic development.

Tollerton

Site reference	SHLAA/TOL/012	Site name	Land to the West of Tollerton Lane
Parish/town	Tollerton	Site area (hectares)	1.3
Dwelling capacity	30	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	30	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the green belt
Flood Risk	The site is not identified as being at risk of flooding from any source
Landscape assessment	Land is within SN04 Cotgrave and Tollerton Village Farmlands. The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character.
Green Infrastructure	
Historic Environment	In the setting of 198 Tollerton Lane, a grade II listed building.
Nature conservation	No designated sites. However site contains hedgerows which are a priority habitat within the LBAP.
AQMA/contamination	The site is not within or in close proximity to and Air Quality Management Area
Community facilities	Tollerton contains a primary school, a Post Office, pub petrol station, a parish office and several small shop units.
Highways and access	Little Lane, a private unmaintained road located to the north of the site. Farm access to field. No footway on Tollerton lane adjacent to the site.
Accessibility	The site is some distance away from Tollerton and the main bus route.
Other issues	
Agricultural land	The provisional agricultural land classification is grade 3.
Deliverability	SHLAA site submission during 2016/17. No representations submitted by landowner during Local Plan preparation or consultation on Strategic Plan Growth Options.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	SHLAA site submission during 2016/17. No representations submitted by landowner during Local Plan preparation or consultation on Strategic Plan Growth Options. Site is outlying within the Green Belt. But could come forward with neighbouring SHLAA site SHLAA/TOL/002.

Deliverability	Planning permission for minor residential development. Deliverable within 5 years.

Delivery Period	1 Year	Delivery	5 Year Tranche - 0-5 Years
Overall summary	Planning permission for minor residential development. Deliverable within 5 years.		

Tollerton

Site reference	SHLAA/TOL/017	Site name	West of Tollerton
Parish/town	Tollerton	Site area (hectares)	16
Dwelling capacity	370	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is located within the green belt. Previous green belt review assessed the site as being of medium-high green belt importance. The site lies beyond the boundary of the A52, and development would cause coalescence between West Bridgford and Tollerton.
Flood Risk	The site is not identified as being at risk of flooding from watercourses. Areas of the site are at varying degrees of risk from surface water flooding, in particular to the north of the site.
Landscape assessment	The site lies within SN03 Mickleborough Fringe. The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is weak. Whilst the hills are distinctive features, other features are less distinctive with varied urban uses and pressures exerting a strong influence on the character. Small changes in land use could have a significant effect on landscape character.
Green Infrastructure	The site lies within the area identified as urban fringe within local plan part 2. Any development proposed within these areas are required to incorporate accessible infrastructure that provides recreational opportunities, wildlife benefits and enables pedestrian and cycle access to the wider countryside.
Historic Environment	No impact on designated heritage assets. Historic Environment Record indicates a shard of 17 century pottery found on the site.
Nature conservation	There are no designated features of wildlife importance within or surrounding the site. Watercourses and hedgerows are identified as biodiversity priority habitats.
AQMA/contamination	There are no Air Quality Management Areas within or within close proximity to the site.
Community facilities	The site is adjacent to Tollerton. Tollerton contains a primary school, a Post Office, pub petrol station, a parish office and several small shop units.
Highways and access	Based upon the site submission, vehicular access would have to come from the A606. There are substantial hedgerows and trees along this frontage. The embankment and railway bridge to the north of the site may be an issue in relation to adequate visibility. Further investigation would need to be undertaken in relation to this matter. Small part of the site adjoins the A52 (T). Highways England do not normally allow new connections to the strategic road network in order to serve new development.
Accessibility	The site is adjacent to Tollerton. Keyworth connection runs along the A606 are regular intervals which runs from the city centre to Keyworth. Foot and cycle accessibility is poor, in particular the path alongside the A606.
Other issues	Public right of way runs through the site. Adjacent to both a recreation ground (to the east) and railway test track (to the west). Ordnance Survey maps indicates that a spring within the site.
Agricultural land	The provisional agricultural land classification for the land is grade 3.
Deliverability	Site is being promoted a strategic land promoter. No obvious land ownership constraints.

Site reference	SHLAA/TOL/017		Site name	West of Tollerton	
Parish/town	Tollerton			Site area (hectares)	16
Dwelling capacity	370		Density (dwellings/hectare)	23	
Site source	Developer/Landowner Submission		Planning reference		
Allocated site reference			Status	No formal allocation or no extant planning permission for residential development	
Number of dwellings remaining	0		Source of number of dwellings	Details obtained through external Site Submission	

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary There are potential constraints identified in relation to accessing the site and connecting the site to the wider walking and cycling network. In addition it is considered that the site is within an important area of green belt which provides separation between West Bridgford and Tollerton.

Tollerton

Site reference	SHLAA/TOL/018	Site name	East of Tollerton
Parish/town	Tollerton	Site area (hectares)	23.8
Dwelling capacity	475	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	475	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is located within the green belt
Flood Risk	Parts of the site are at varying degrees of risk from surface water flooding and flooding from watercourses
Landscape assessment	The Greater Nottingham Growth Options (Landscape Assessment) Oct 22 highlights that the site has high potential for strategic growth. It feels like a logical extension to the settlement of Tollerton, and retains the village's southern defensible boundary of the A606. There is the potential for enhancement of watercourse and pond and incorporation into POS within the site. The developed site would feel like a relatively natural extension to Tollerton and would keep the village above the A606. Retain the hedgerows and riparian vegetation.
Green Infrastructure	Whilst the site is in agricultural use it contains watercourses and hedgerows some trees and a pond.. These features should be retained and enhanced.
Historic Environment	South of the grounds of Tollerton Hall, which is a non designated historic park and garden. Records of roman pottery scatter and medieval pottery found on the site.
Nature conservation	No designated sites of nature conservation importance within the site. Parts of the site are within 1km of the Normanton Pastures SSSI.
AQMA/contamination	The site is not within or in proximity to an Air Quality Management Area. Some areas of the site are identified as potentially contaminated, including a disused pit.
Community facilities	The site is adjacent to Tollerton. Tollerton contains a primary school, a Post Office, pub, petrol station, a parish office and several small shop units.
Highways and access	The indicative masterplan submitted with the representation received to the Greater Nottingham Strategic Plan shows a point of access onto Tollerton Lane and a point of Access onto Melton Road where the junction to the road to Keyworth is situated. There is currently no view from the highways authority whether the access arrangements are acceptable in principle. In addition the existing A606 junction requires improvement as a result existing allocations East of Gamston/North of Tollerton and at Keyworth.
Accessibility	The site is adjacent to Tollerton. The Keyworth Connection runs along Melton Road fairly frequently to Nottingham and Keyworth during the day, and the majority of basic facilities within the village are within walking distance. Tollerton itself has limited connectivity to the main built up area of Nottingham or to Keyworth.
Other issues	Capacity taken from site promoter estimate. Large parts of the site will remain undeveloped.
Agricultural land	The provisional agricultural land classification for the site is grade 3
Deliverability	Representation states that the site is in single ownership

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is located within the green belt adjacent to Tollerton. Beyond the policy constraints, there are a number of other issues that would require further consideration in relation to access,

Flintham

Site reference	SHLAA/FLI/001	Site name	Flintham Islamic Institute
Parish/town	Flintham	Site area (hectares)	2.3
Dwelling capacity	90	Density (dwellings/hectare)	39
Site source	Planning Application	Planning reference	15/03060/OUT
Allocated site reference	LP2 Policy 24	Status	Planning Permission for Residential Expired
Number of dwellings remaining	95	Source of number of dwellings	Planning Application

Green Belt	Flintham is not within the Green Belt - No constraint
Flood Risk	The land is within Flood zone 1. It is not at risk of surface water flooding.
Landscape assessment	Site has not been assessed within the Local Plan Part 2s LVIA as it already has planning permission.
Green Infrastructure	Site has small areas of natural greenspace (woodland). The limited size of the site prevents provision of GI beyond natural green space and amenity areas.
Historic Environment	There are no heritage assets within or in close proximity of the site.
Nature conservation	There are no designated nature conservation assets within the site. Nearest designated site is Flintham Park LWS. This is 130m south west of the site. Phase 1 habitat survey identified broadleaf woodland, scrub and semi-improved neutral grassland. These are LBAP habitats.
AQMA/contamination	The site is not within or in close proximity of an Air Quality Management Area.
Community facilities	Flintham has limited community facilities. It has a primary school, Village Hall, a small community shop (which is open during limited hours) and pub. These facilities are a 10 to 15 minute walk.
Highways and access	The Highway Authority does not envisage that this development will compromise the operational capacity of nearby junctions. Speeds should be reduced with the 30mph extended to slip road onto the A46. No significant concerns. Visibility splays required. Contributions to improving nearby bus stops may be sought.
Accessibility	The site is within a 10 minute walk of the village centre. Site is within walking distance of hourly bus service to Newark and Nottingham
Other issues	Site has planning permission for 95 units (15/03060/OUT).
Agricultural land	Site is previously developed. Not classified as agricultural land.
Deliverability	Whilst granting of planning permission indicates that significant constraints do not exist and that site is deliverable, the reserved matters application has not been submitted since outline approval in Sept 2016 and the outline permission has now expired (Sep 2019) with no renewals submitted. Whilst the site is identified as an allocation within Local Plan Part 2, it is not considered to be 'available now' or 'achievable now' as there are no active discussions to renew the permission, and no promotion of the site through the local plan process. Development is therefore placed to start 11-15 years.

Delivery Period	3 Years	Delivery	5 Year Tranche - 11 -15 Years
-----------------	---------	----------	-------------------------------

Overall summary	Whilst granting of planning permission indicates that significant constraints do not exist and that site is deliverable, the reserved matters application has not been submitted since outline approval in Sept 2016 and the outline permission has now expired (Sep 2019) with no renewals submitted. Whilst the site is identified as an allocation within Local Plan Part 2, it is not considered to be 'available now' or 'achievable now' as there are no active discussions to renew the permission, and no promotion of the site through the local plan process. Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is not in the Green Belt
Flood Risk	South of the site is at risk of flooding
Landscape assessment	SN06 – Aslockton Village Farmlands The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength is strong. The area has a relatively uniform character of arable fields, linear blocks and clumps of woodland and small distinctive rural villages (LCA 2009).
Green Infrastructure	Hedgerows should be retained and enhanced
Historic Environment	Site is located within the conservation area and is identified as a positive open space. Hedgerow along road and track identified as a significant hedgerow. Pinfold is a grade II listed structure and lies adjacent to the site.
Nature conservation	Hedgerow and grassland are priority habitats
AQMA/contamination	Not within or in proximity to an air quality management area.
Community facilities	Flintham has limited community facilities. It has a primary school, Village Hall, a small community shop (which is open during limited hours) and pub. These facilities are a 10 to 15 minute walk.
Highways and access	Unknown
Accessibility	The site is some distance away from main facilities and is also around a 15 minute walk from the nearest bus stops along Spring Lane which provides two bus routes (91 & 354) that run on an irregular basis.
Other issues	
Agricultural land	Grade 2 (Very good)
Deliverability	No known house builder

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary There are a number of significant challenges in developing this site. Firstly, the conservation area townscape appraisal has identified the whole of the site as a positive open space within the conservation area and the hedgerow that abuts the main road is identified as significant. Secondly, Pinfold lies adjacent to the site and is listed and development could adversely affect the setting of a designated heritage asset. The site is located some distance from any facilities of note and development of the site. The village is largely linear in fashion whereas this site has depth to it. Development would be contrary to open countryside policy as it is not located within the settlement. The spatial policy of the Core Strategy, and Local Plan Part 2 focuses future development in the Borough on West Bridgford, six main rural settlements and selected villages with a range of basic facilities across the Borough. This policy allows for limited infilling within

Flintham

Site reference	SHLAA/FLI/016	Site name	Main Street
Parish/town	Flintham	Site area (hectares)	1.18
Dwelling capacity	0	Density (dwellings/hectare)	0
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is not located within the Green Belt
Flood Risk	Small area of the site is at risk from surface water flooding
Landscape assessment	SN06 – Aslockton Village Farmlands The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength is strong. The area has a relatively uniform character of arable fields, linear blocks and clumps of woodland and small distinctive rural villages (LCA 2009).
Green Infrastructure	Traditional orchard essential green infrastructure that should be retained and enhance, together with hedgerow.
Historic Environment	The Mowbray is situated across the road. Impact considered to be negligible in previous appeal decisions. The site is located within the conservation area, and is identified as a positive open space within it. In addition, the townscape appraisal also identifies an important vista from the road across the site and a significant hedge across its frontage.
Nature conservation	Hedgerow boundary and traditional orchard biodiversity priority habitats
AQMA/contamination	Not within or in close proximity to an air quality management area
Community facilities	Flintham has limited community facilities. It has a primary school, Village Hall, a small community shop (which is open during limited hours) and pub. These facilities are a 10 to 15 minute walk.
Highways and access	Unknown
Accessibility	The site is some distance away from main facilities and is also around a 10 minute walk from the nearest bus stops along Spring Lane which provides two bus routes (91 & 354) that run on an irregular basis.
Other issues	
Agricultural land	Identified as lying within grade 2 agricultural land
Deliverability	Promoted by landowner. No known developer involved

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary Whilst there are no significant technical reasons for the development of the site, there are a number of significant policy constraints that would be difficult to overcome which would question the site's suitability for development given the two appeal decisions. In particular, these primarily concern the impact of development on the setting of the conservation area.

Flintham

Site reference	SHLAA/FLI/018	Site name	Land Adjacent to Police House, RAF Syerston
Parish/town	Flintham	Site area (hectares)	2.4
Dwelling capacity	48	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	48	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not located within the Green Belt
Flood Risk	The site is not at risk of flooding from any source
Landscape assessment	The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength is strong. The area has a relatively uniform character of arable fields, linear blocks and clumps of woodland and small distinctive rural villages (LCA 2009).
Green Infrastructure	Hedgerows should be retained and enhanced
Historic Environment	No built environment constraints identified
Nature conservation	No designations. Site is used as a tree nursery. Hedgerows surround the site on some sides
AQMA/contamination	Not within or in proximity to an air quality management zone
Community facilities	Flintham has limited community facilities. It has a primary school, Village Hall, a small community shop (which is open during limited hours) and pub. These facilities are a 10 to 15 minute walk.
Highways and access	Unknown
Accessibility	10 minute walk from the nearest bus stop of coney Grey Spinney which provides an hourly service to Nottingham or Newark and is also around a 15 minute walk to Flintham centre, which has a limited number of facilities.
Other issues	
Agricultural land	Not classified
Deliverability	Promoted on behalf of landowner. No known developer

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site is located beyond the built-up area of the settlement, within the countryside. Development would be contrary to open countryside policy as it is not located within the settlement. The spatial policy of the Core Strategy, and Local Plan Part 2 focuses future development in the Borough on West Bridgford, six main rural settlements and selected villages with a range of basic facilities across the Borough. This policy allows for limited infilling within settlements or exceptional need housing within and adjacent to smaller settlements where there is an identified need. Flintham has a limited range of facilities.

Whatton in the Vale

Site reference	SHLAA/WHA/001	Site name	Land either side of Dark Lane
Parish/town	Whatton in the Vale	Site area (hectares)	10.5
Dwelling capacity	125	Density (dwellings/hectare)	12
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Whatton is not within the Green Belt - No Constraint
Flood Risk	Half the site is Flood zone 3 (1 in 100 years) and also at low risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 66/100. The site comprises a series of arable and pastoral fields on the south-western edge of the small village of Whatton-in-the-Vale and includes part of the Whatton-in-the-Vale Conservation Area. The site has been noted within the Townscape Appraisal of the conservation area as positive open space and part of the conservation area setting. There is a medium landscape value within the study area, which is contributed to by the good levels of maintenance across the study area and the high degree of conservation interests including a scheduled monument. The susceptibility of the landscape to development of the site is medium; development of the site would result in loss of part of the conservation area and land assessed as positive open space in the Townscape Appraisal. Overall, the landscape sensitivity is medium. In terms of visual amenity, there is a medium visual value. This is attributed to in part by the conservation area and its setting, as well as the recreational value that the site offers. The site forms part of the visual amenity for both recreational and residential receptors and overall has a medium visual susceptibility. The visual sensitivity is medium.
Green Infrastructure	The River Smite and neighbouring land should be protected and enhanced as a Green Corridor, which would provide biodiversity, recreational and flood alleviation benefits. Development should not adversely affect the openness of the site as recognised in the Townscape Appraisal should be preserved.
Historic Environment	Land north of Dark Lane is within Whatton's Conservation Area. The Townscape Appraisal identifies the site as a Positive Open Space with important views from the Conservation Area across open countryside. Development of this site would directly effect the Conservation Area and its setting.
Nature conservation	River Smite Local Wildlife Site (LWS) is adjacent to the site. Avoidance measures, including buffer, are required to prevent adverse affects, including diffuse water pollution. Site is bounded by and contains hedgerows in a variety of conditions. It also contains areas of pasture which may contain locally important neutral grassland species. The Biodiversity Opportunity Mapping Report identifies the site as being located within an area where grassland should be created around Whatton and Aslockton to connect grasslands in the long term. Whilst development would prevent this opportunity being realised, it could facilitate improvements (quality and connectivity) within remaining areas. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects on designated and non-designated nature conservation assets should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The Jubilee Hall is the only community facility within Whatton. There are no shops or other services.

Site reference	SHLAA/WHA/001	Site name	Land either side of Dark Lane
Parish/town	Whatton in the Vale	Site area (hectares)	10.5
Dwelling capacity	125	Density (dwellings/hectare)	12
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Highways and access	Highly questionable from sustainability standpoint. Poor transport links and lack of facilities in village mean limited scope for none car based journeys. Dark Lane is unsuitable for access. Trees on Old Grantham Road are likely to impact on visibility, hence providing access from this Road may also prove problematical.
Accessibility	Site is within a 5 minute walk of bus stops on Dark Lane and Old Grantham Road. These stops are served by an hourly service during the day to Bingham surrounding villages, with no service during the evenings or on a Sunday.
Other issues	Due to the flooding , access and conservation area constraints the 2016 SHLAA determines the site is non deliverable/developable.
Agricultural land	The majority of the site is Grade 3 agricultural land, with part of the site at the south classified as Grade 2 (BMV).
Deliverability	Site includes significant area of land within flood zone 3. Sequential test and subsequent exception test is likely to restrict the extent of development on the site. These areas are also in close proximity to the LWS. Notwithstanding these constraints. Landowner believes the site is deliverable within 5 years.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary Whatton is not identified as a Key Settlement within the adopted Core Strategy. As Whatton has limited services and facilities the village has not been identified in the LAPP as an other village where additional housing development could occur. The site itself is constrained by flood risk issues (half the site is within Flood zone 3), heritage assets (impacts on setting of Conservation Area), agricultural land quality (2/3 Grade 2), biodiversity assets (proximity to River Smite LWS), landscape sensitivity (medium landscape and visual sensitivity) and accessibility constraints (limited public transport and visibility constraints on Old Grantham Road). Furthermore the recent appeal decisions within the adjoining settlement of Aslockton have supported the Council's position that further housing in villages with limited services should be prevented.

Whatton in the Vale

Site reference	SHLAA/WHA/010	Site name	Land North of Old Grantham Road
Parish/town	Whatton in the Vale	Site area (hectares)	9
Dwelling capacity	200	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	200	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not within the green belt
Flood Risk	The edges of the site are at risk of flooding from watercourses and from surface water.
Landscape assessment	SN06 – Aslockton Village Farmlands The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength is strong. The area has a relatively uniform character of arable fields, linear blocks and clumps of woodland and small distinctive rural villages (LCA 2009).
Green Infrastructure	As the site is in intensive farming use there is potentially an opportunity to improve biodiversity within the site.
Historic Environment	No designated or non designated heritage assets within the site. Conservation area close to but not adjoining the site.
Nature conservation	The River Smite LWS is located to the south of Grantham Road. The site is in intensive use for agriculture, however hedgerows surround the site
AQMA/contamination	The site is not within or within proximity of and Air Quality Management Area
Community facilities	The Jubilee Hall is the only community facility within Whatton. There are no shops or other services.
Highways and access	Access may have to be achieved off Old Grantham Road. Potential access points through adjacent estate to the east.
Accessibility	Site is within a 5 minute walk of bus stops on Dark Lane and Old Grantham Road. These stops are served by an hourly service during the day to Bingham surrounding villages, with no service during the evenings or on a Sunday.
Other issues	
Agricultural land	Grade 3
Deliverability	The site is being promoted through land promotion company. They have provided a number of examples in terms of sites gaining outline planning permission and the commencement of development.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Whilst there are few technical and physical constraints highlighted by the assessment, Whatton is not identified as a Key Settlement within the adopted Core Strategy. As Whatton has limited services and facilities the village has not been identified in the LAPP as an other village where additional housing development could occur.
------------------------	---

Holme Pierrepont and Gamston

Site reference	SHLAA/HOL/001	Site name	Simkins Farm
Parish/town	Holme Pierrepont and Gamston	Site area (hectares)	1.9
Dwelling capacity	10	Density (dwellings/hectare)	5
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	10	Source of number of dwellings	Assumption made on best estimate

Green Belt	Strategic review of broader area carried out in 2013. Whilst it performs well against most Green Belt criteria, the area should be examined no further due to it being a functional floodplain where only water-compatible uses should occur. Because of this showstopper, the area should not be carried forward into part 2 (a) of the assessment.
Flood Risk	EA maps indicate that the site lies in flood zone 3. According to the updated Strategic Flood Risk Assessment the site is located within Flood zone 1, however it is still surrounded by functional floodplain. A limited area in the middle of the site is at risk of surface water flooding.
Landscape assessment	Site Score 49/100. Site HOL/001 comprises two pastoral fields on the edge of West Bridgford. The study area is of medium landscape, with Victorian houses adding interest to the edge of West Bridgford and several recreational assets present in the area; there is an overall sense of tranquillity. Development of the site would result in a slight increase in perceived urbanisation in the eastern half of the study area, as the settlement is extended towards the rural setting to West Bridgford; there is no loss of key characteristics and overall the landscape susceptibility is low. The landscape sensitivity is also low. There is a low visual value, although the adjacent playing fields have recreational value. In terms of visual susceptibility, the site has little influence on the visual amenity of both residential and recreational receptors and an overall low susceptibility. The visual sensitivity is low.
Green Infrastructure	Site does not contain any existing GI assets. It is however located within the River Trent strategic green corridor and adjacent to Adbolton Playing Fields.
Historic Environment	Simkins Farm (Grade II listed) is located east of the site. It is however screened by converted and new outbuildings. The site contains archaeological evidence from multiple periods (Romano British, Saxon, Medieval and post medieval) of a old village.
Nature conservation	The site does not contain any designated nature conservation assets. Adbolton Ponds LWS is located beyond the site's northern boundary.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The site is within reasonable walking distance of some facilities that are located in the centre of Lady Bay.
Highways and access	No issues raised by highways authority
Accessibility	Site lies adjacent to the NCT 11 turning circle and bus stop for Local Link 22 and 23 (Gamston and Clifton). Some facilities within walking distance in Lady Bay
Other issues	
Agricultural land	Site is classified as Grade 3 agricultural land, although not in agricultural use.
Deliverability	Site is being promoted for development therefore it is available. Suitability however dependant on planning considerations

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Site reference	SHLAA/HOL/001	Site name	Simkins Farm
Parish/town	Holme Pierrepont and Gamston	Site area (hectares)	1.9
Dwelling capacity	10	Density (dwellings/hectare)	5
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	10	Source of number of dwellings	Assumption made on best estimate

Overall summary

Positives in relation to the site relate to its proximity to a regular bus service. The site is assessed to be of medium landscape value but of low landscape and visual sensitivity. The negatives in relation to the site are that whilst the site is defended from flood risk, it forms an effective island which is surrounded by functional floodplain. In respect of historic assets, the site is likely to require extensive archaeological mitigation and exploration required which could limit developable area and site viability.

Delivery Period	1 year	Delivery	5 Year Tranche - 0-5 Years
Overall summary	Planning permission for 37 additional bedspaces which equates to 21 dwellings under the housing delivery test measurement tool. No identified barriers to delivery.		

Holme Pierrepont and Gamston

Site reference	SHLAA/HOL/004	Site name	East of Gamston. Area to the north of Canal
Parish/town	Holme Pierrepont and Gamston	Site area (hectares)	151
Dwelling capacity	3000	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Green Belt. The Green Belt review that supported the Core Strategy scored the Western part of the site 12/25. Overall MEDIUM importance in relation to purposes of the Green Belt. The site lies beyond the boundary of the A52. Eastern part of the site 16/25 Overall MEDIUM-HIGH importance in relation to purposes of the Green Belt. Development within this part of the submission would effectively subsume Bassingfield into the urban area, which would provide a strong conflict with one of the main purposes of the Green Belt.
Flood Risk	A small part of the site is at risk of flooding from rivers and streams. Small area at risk of surface water flooding.
Landscape assessment	The area has a moderate sense of place retaining historic features characteristic of the Trent Washlands Regional Character Area. Bassingfield village has remained a small settlement in redbrick with quiet country lanes surrounding this. The only exception is the busy A52 to the north and west of this settlement. Around Bassingfield the narrow hedge lined lanes with their ditches and verges have a distinct rural feel. Holme Pierrepont village has a strong parkland character. Although it is surrounded by worked out gravel pits, the mature tree cover and several historic buildings including the Hall give it a strong sense of time depth. The villages of Bassingfield and Holme Pierrepont along with sections of the Grantham Canal all contribute to the Trent Washland Character Area. Only the disused railway lines and some of the larger former mineral sites and sports fields are all relatively indistinct and recent. The degree of visibility is moderate due to gently undulating landform and intermittent tree cover. A moderate sense of place with a moderate degree of visibility leads to a moderate landscape sensitivity.
Green Infrastructure	Where possible, hedgerows, watercourses and grassland should be retained and enhanced
Historic Environment	There are a number of non-designated heritage assets within the site, including a possible longbarrow, and old field system and cropmarks. Rectangular enclosure with circular feature within, small circular feature indicate possible Roman settlement. Grantham Canal to the south is also a non-designated heritage asset. Potential harm to archaeological features. Harm to the setting of the canal. Archaeological investigation – nature of archaeology should be readily detectable via magnetometry survey in support of planning application. Avoid development encroaching close to the canal. Utilise this undeveloped area to enhance the canal as a GI asset/corridor. Longbarrow feature might need particular attention if confirmed.
Nature conservation	There are numerous hedgerows that cross the site. Some scrubland in parts and some grassland and watercourses, including the Grantham Canal. All of these are priority habitats that should be retained and enhanced.
AQMA/contamination	Not within or in proximity to an air quality management zone. Areas of the site identified as having potential for contamination include farm buildings and former farm buildings at Holme Farm, Lea Farm, Holly Farm and Manor farm. Other areas with potential contamination include fields adjacent to Gamston Depot and made ground next to the A52.
Community facilities	No community facilities near the proposal. Gamston centre is some distance away from the majority of the site.

Site reference	SHLAA/HOL/004	Site name	East of Gamston. Area to the north of Canal
Parish/town	Holme Pierrepont and Gamston	Site area (hectares)	151
Dwelling capacity	3000	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Highways and access	Unknown at this stage.
Accessibility	Eastern part of the site within proximity to bus stops on the A52 stops which provide regular bus services for 7 different bus lines. Footpath and cycleway connectivity at the west of the site over the Lings Bar road via a toucan crossing with safer routes through the wider conurbation cycle network.
Other issues	
Agricultural land	The site is predominantly grade 3 agricultural land.
Deliverability	Land in multiple ownership if existing properties within the site are taken into account.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Site lies north of the Strategic allocation East of Gamston/North of Tollerton. There are a number of constraints on the site. The first constraint is that the site lies within the Green Belt and this status remains following on from adoption of the Rushcliffe Local Plan. Of particular concern is that wholesale development of the area would consume the settlement of Bassingfield. The site is identified as R07 (East of Gamston) within the Growth Options Study. Notwithstanding the impacts on Bassingfield, the study concludes that R07 offers the option to expand upon the extant allocation East of Gamston/North of Tollerton. The land has been promoted by the landowner during consultation on the Greater Nottingham Strategic Plan.

Holme Pierrepont and Gamston

Site reference	SHLAA/HOL/007	Site name	Land at Adbolton
Parish/town	Holme Pierrepont and Gamston	Site area (hectares)	46
Dwelling capacity	920	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Green Belt. No assessment undertaken against the purposes for including land within it
Flood Risk	SFRA suggests majority of site >90% in 1 in 20 annual chance flood outline. Vast majority of site identified as Zone 3b (functional floodplain), and at significant risk should flood defences be breached.
Landscape assessment	Majority of area within TW01 Gamston and Edwalton Meadowlands. A moderate sense of place with a moderate degree of visibility leads to a moderate landscape sensitivity. Flat open land offering views along Trent Valley to Nottingham and to open countryside. The site is very visible. The raised Regatta Way provides a reasonably prominent visual boundary to the site on its eastern side.
Green Infrastructure	Trees and hedgerows should be retained. Watercourses should be kept free of development.
Historic Environment	No significant historic assets present. Late Upper Palaeolithic and Mesolithic Flints. Linear features of unknown origin east of Regatta Way. Simkins Farmhouse, a Grade II listed building is situated adjacent to the northern part of the site. The southern aspect of the building can be viewed from the site and the open aspect of the agricultural fields form part of its setting. Archaeological investigation – nature of archaeology may be detectable via magnetometry survey in support of planning application. Listed farmhouse has little association beyond proximity, association with outbuildings and former orchard all to the north would be unaffected. Screening and set-back from the road frontage could serve to mitigate
Nature conservation	Some tree and hedgerow cover. Watercourses run through the site.
AQMA/contamination	The site is not within an AQMA. Development here may however have an impact on the Trent Bridge/Lady Bay bridge AQMA. No areas identified as potentially contaminated land.
Community facilities	Located on the edge of West Bridgford. West Bridgford has a full range of facilities
Highways and access	Access to Radcliffe Road via Regatta Way.
Accessibility	The site is served by frequent buses along Radcliffe Road. Terminus of No 11 at north of site. Site lies on strategic cycle network
Other issues	Parts of the site are used as playing fields all year around.
Agricultural land	Site is grade 3 agricultural land
Deliverability	The site is owned by Nottinghamshire County Council. Historically, NCC sites do not have a good track record of delivery within Rushcliffe from allocation to houses on the ground. The site is also proposed as a combined primary and secondary school.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	This potential urban extension site could be reasonably well integrated with the Lady Bay area of West Bridgford, particularly with the creation of a new route through to Rutland Road. The site is
------------------------	--

Site reference	SHLAA/HOL/007	Site name	Land at Adbolton
Parish/town	Holme Pierrepont and Gamston	Site area (hectares)	46
Dwelling capacity	920	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

relatively accessible to local services and facilities, although it would still be around 1500 metres to nearby centres from parts of the site. Development would also lead to the loss of a valuable recreational ground. The landowner also has a poor track record in delivery and considering the site as a potential combined primary and secondary school, therefore the site cannot be considered to be available or achievable now. The SFRA suggests majority of site >90% in Flood zone 3b (functional floodplain). This is equivalent to functional floodplain. Due to the site's location within a flood zone the Growth Study (2020) concludes that it is potentially unsuitable for development. Consequently the site is not considered to be suitable for development.

Holme Pierrepont and Gamston

Site reference	SHLAA/HOL/013	Site name	Willowbrook Farm, A52, Gamston
Parish/town	Holme Pierrepont and Gamston	Site area (hectares)	1.1
Dwelling capacity	20	Density (dwellings/hectare)	18
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The land is located within the Green Belt
Flood Risk	environment Agency maps identify the site as being located within Flood Zones 2 and 3. The GNSFRA does not identify the site as being at risk from flooding, only the land to the north, east and west, although it does identify a risk under a breach situation.
Landscape assessment	N/A
Green Infrastructure	Retain trees around the edges of the site
Historic Environment	No identified impacts on historic assets
Nature conservation	Some dense tree and scrub cover around the perimeter of the site.
AQMA/contamination	Not within or within close proximity
Community facilities	The site is located outside of West Bridgford, which has a range of facilities.
Highways and access	Site access is a small entrance directly off the A52 (70mph dual carriageway). Difficult and unsafe to access and leave the site.
Accessibility	Shared use path alongside A52. Whilst public transport runs past the site, it does not stop.
Other issues	Former pig farm activities may have caused contamination of the land.
Agricultural land	Not in agricultural use
Deliverability	Site actively promoted, however no known house builder involved

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary The site has potential Flood Risk constraints, with EA maps identifying the site as within Flood Zone 3. Issues with access are also identified due to the site's small-radius access from the A52 (70mph dual carriageway). The site is also isolated - not within an existing settlement so proposals for 7 to 20 dwellings would not be appropriate

Holme Pierrepont and Gamston

Site reference	SHLAA/HOL/014	Site name	Land at Gamston west and south of Holme Farm
Parish/town	Holme Pierrepont and Gamston	Site area (hectares)	22.2
Dwelling capacity	300	Density (dwellings/hectare)	13
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	300	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Green Belt Review Part 1 & 2b identified the site as being of medium GB importance. Site is beyond the A52, a robust and defensible barrier. Although removal of SUE to the south has already breached this barrier.
Flood Risk	Northern 1/5 of the site is within flood zone 2 (1:1000), however the remaining majority is within flood zone 1.
Landscape assessment	The overall landscape strategy is 'Conserve and Reinforce'. The degree of visibility is moderate due to gently undulating landform and intermittent tree cover. A moderate sense of place with a moderate degree of visibility leads to a moderate landscape sensitivity. The area has a moderate sense of place retaining historic features characteristic of the Trent Washlands Regional Character Area. Bassingfield village has remained a small settlement in redbrick with quiet country lanes surrounding this. The only exception is the busy A52 to the north and west of this settlement. Around Bassingfield the narrow hedge lined lanes with their ditches and verges have a distinct rural feel. Holme Pierrepont village has a strong parkland character. Although it is surrounded by worked out gravel pits, the mature tree cover and several historic buildings including the Hall give it a strong sense of time depth.
Green Infrastructure	
Historic Environment	No identified heritage assets
Nature conservation	No designated nature conservation assets within the site. However site does border the Grantham Canal and this is a Local Wildlife Site.
AQMA/contamination	Not within AQMA
Community facilities	
Highways and access	
Accessibility	The site is connected to wider walking and cycling network via a toucan crossing over Lings Bar. Not currently served by public transport.
Other issues	Site comprises a western section of the much larger SHLAA/HOL/004, which has also been resubmitted during the Growth Options Call for Sites (2019).
Agricultural land	Grade 3
Deliverability	Land is being promoted by a housing developer and is therefore available. Site could be suitable if policy changes, however the land is not available or achievable now.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Land is being promoted by a housing developer and is therefore available. Site comprises part of a larger site submission north of the allocated SUE. This site is identified as R07 (East of Gamston) within the Growth Options Study. The study concludes that R07 offers the option to expand upon the extant allocation East of Gamston/North of Tollerton. This would represent a sizeable increase
------------------------	--

Site reference	SHLAA/HOL/014	Site name	Land at Gamston west and south of Holme Farm
Parish/town	Holme Pierrepont and Gamston	Site area (hectares)	22.2
Dwelling capacity	300	Density (dwellings/hectare)	13
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	300	Source of number of dwellings	Details obtained through external Site Submission

to the main built up area of Nottingham and would require transport and social infrastructure improvements. A small part of the site is within the strategic allocation East of Gamston. The remainder of the site could be suitable if policy changes.

West Bridgford

Site reference	SHLAA/HOL/005	Site name	Land south of Greenacre Park
Parish/town	West Bridgford	Site area (hectares)	13.15
Dwelling capacity	130	Density (dwellings/hectare)	10
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	130	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Located in the Green Belt.
Flood Risk	Majority of the site lies within flood zone 3 with the remained in zone 2. Small areas of the site are at a low risk of surface water flooding.
Landscape assessment	N/A
Green Infrastructure	Located within a sub regional GI corridor so opportunity to enhance and contribute.
Historic Environment	There are no heritage assets within close proximity of the site.
Nature conservation	The site is adjacent to the Gamston Pits Local Wildlife Site.
AQMA/contamination	The site is not within or in close proximity of an AQMA.
Community facilities	West Bridgford contains a range of community and leisure facilities.
Highways and access	Cannot confirm if the access can be delivered.
Accessibility	Footpath along Adbolton Lane connects the site to West Bridgford. Nearest bus stops located on Adbolton Lane approximately 0.2km away from the site served by a bus an hour between 10AM-4PM.
Other issues	
Agricultural land	Grade 3.
Deliverability	Land being promoted for development.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary			

West Bridgford

Site reference	SHLAA/WBR/001	Site name	Central Works Depot Central Works Depot, Abbey Road
Parish/town	West Bridgford	Site area (hectares)	1.7
Dwelling capacity	71	Density (dwellings/hectare)	44
Site source	Major Large Scale Re-development	Planning reference	21/01464/REM
Allocated site reference		Status	Under Construction - infrastructure commenced but construction activity ceased
Number of dwellings remaining	71	Source of number of dwellings	Planning Application

Green Belt	The site is within West Bridgford, part of the Nottingham Main Urban Area, not within the Green Belt.
Flood Risk	Site is within Flood Zone 2. Areas to the north and south of the site are at a low risk of surface water flooding. Latest SFRA information identifies that given current defences, the site is not at risk of flooding.
Landscape assessment	n/a
Green Infrastructure	There are no GI or open space assets within the site. It is however adjacent to allotments on Buckfast Way, which link with recreational open space to the south. This development could incorporate open spaces which link with these areas.
Historic Environment	The site does not contain, nor does it have an impact on the setting of a heritage asset.
Nature conservation	There are no identified nature conservation interests within the site.
AQMA/contamination	The site is not within an Air Quality Management Area.
Community facilities	The site is less than a 10 minute walk from the District Centre of West Bridgford. The centre contains community facilities (library, police station, community centre, post office) and a wide range of shops and banks. There is a small parade of shops adjacent to the site on Abbey Road. Two primary schools are within a 5 minute walk. There are numerous medical facilities, including doctors, within a 10 minute walk.
Highways and access	Suitable access could be provided from either, access off of Buckfast Way may distribute traffic better.
Accessibility	The site is within the main urban area, close to the centre of West Bridgford where there are numerous community facilities and shops and services. The Local link L22 and L23 bus services are close to the site and these provides hourly services to Nottingham, Clifton and Gamston. The Green Line 6 service follows Gordon Road and is a short walk. This service runs every 15 minutes to Nottingham and Edwalton.
Other issues	Potential contamination issues from nature of use
Agricultural land	Land is classified as 'urban', no loss of agricultural land if redeveloped.
Deliverability	Outline planning permission granted 22 May 2019. Site now cleared and reserved matters approved. Regional housebuilder involvement. Site commenced.

Delivery Period	3 Years	Delivery	5 Year Tranche - 0-5 Years
-----------------	---------	----------	----------------------------

Overall summary	Outline planning permission granted 22 May 2019. Site now cleared and reserved matters approved. Regional housebuilder involvement. Site commenced.

West Bridgford

Site reference	SHLAA/WBR/004	Site name	Land Between Lady Bay Bridge/Radcliffe Road
Parish/town	West Bridgford	Site area (hectares)	0.2
Dwelling capacity	48	Density (dwellings/hectare)	275
Site source	Planning Application	Planning reference	16/01118/FUL
Allocated site reference		Status	Under Construction - infrastructure commenced but construction activity ceased
Number of dwellings remaining	48	Source of number of dwellings	Planning Application

Green Belt	The site is within West Bridgford, part of the Nottingham Main Urban Area, not within the Green Belt.
Flood Risk	The site is within Flood Zone 2. The site is at a low risk of surface water flooding.
Landscape assessment	n/a
Green Infrastructure	There are no GI/open space assets within the site. Limited potential to link into existing GI - canal, river and recreation ground.
Historic Environment	The site is does not contain, nor does it have an impact on the setting of a heritage asset.
Nature conservation	There are no identified nature conservation assets within the site. Biodiversity Statement indicates low ecological quality. Grantham Canal LWS is located 66m north of the site. This site is unlikely to be adversely affected however.
AQMA/contamination	Site is within the Air Quality Management Area along Radcliffe Road/Lady Bay Bridge.
Community facilities	The site is a 10 minute walk (0.5 miles) from the centre of West Bridgford, where there is a wide variety of shops, restaurants/cafes/pubs, banks, and community facilities (including library, police station, post office, park and playing fields, and council contact centre). There is also a parade of shops on Radcliffe Road and Nottinghamshire Sports ground in close proximity to the site.
Highways and access	No significant concerns, development would have to provide adequate vehicle and cycle parking.
Accessibility	The site is within the main urban area of Nottingham, and well served by public transport services into Nottingham and out towards Bingham, Balderton, Newark, Lady Bay and Gamston.
Other issues	
Agricultural land	Land is classified as 'urban'.
Deliverability	Under construction with three storeys half built. Assumed completion in year 2.

Delivery Period	2 Year	Delivery	5 Year Tranche - 0-5 Years
Overall summary	Under construction with three storeys half built. Assumed completion in year 2.

West Bridgford

Site reference	SHLAA/WBR/008	Site name	City Ground and surrounding car park
Parish/town	West Bridgford	Site area (hectares)	5.4
Dwelling capacity	170	Density (dwellings/hectare)	46
Site source	Developer/Landowner Submission	Planning reference	19/02589/HYBRID
Allocated site reference		Status	Planning application under consideration
Number of dwellings remaining	170	Source of number of dwellings	Planning Application

Green Belt	N/A
Flood Risk	EA Maps suggest site is at risk from flooding (1 in 100 or greater)
Landscape assessment	Although located within a prominent location adjacent to the Football Ground, Bridgford House (formally the Civic Centre) and Trent Bridge, the strength of character of the area is moderate. The features although regularly distributed are not strong enough to be distinctive or to give a highly unique sense of place except close to the river where the war memorial and river are distinctive features.
Green Infrastructure	Site is located within the River Trent GI corridor.
Historic Environment	No significant heritage issues.
Nature conservation	None identified.
AQMA/contamination	Site located within and adjacent to an Air Quality Management Area.
Community facilities	West Bridgford contains a range of community and leisure facilities.
Highways and access	Access achievable off Pavilion Road.
Accessibility	Site is located within walking distance of West Bridgford's District Centre and public transport links to the City Centre.
Other issues	Proximity of Football Stadium may create amenity issues.
Agricultural land	N/A
Deliverability	Hybrid planning application submitted November 2019, with outline planning permission sought for 250 units. Not yet determined.

Delivery Period	2 Years	Delivery	5 Year Tranche - 6-10 Years
-----------------	---------	----------	-----------------------------

Overall summary	Hybrid planning application submitted November 2019, with outline planning permission sought for 170 units. Not determined by the end of March 2022 however resolution to grant planning permission subject to S106. As the residential development consists of apartments then delivery will take place within a short timescale, although may initially take some time to complete any apartment blocks themselves. It is considered that delivery will occur within the timespan of the SHLAA but not within the first five years.

West Bridgford

Site reference	SHLAA/WBR/047	Site name	Land at Melton Road
Parish/town	West Bridgford	Site area (hectares)	79
Dwelling capacity	1776	Density (dwellings/hectare)	22
Site source	Housing Allocation	Planning reference	Numerous
Allocated site reference		Status	Under Construction - over 50% of dwellings completed
Number of dwellings remaining	539	Source of number of dwellings	Local Plan

Green Belt	The land was removed from the Green Belt and allocated for residential development within the Local Plan Part 1: Core Strategy.
Flood Risk	The site is located within EA Flood Zone 1.
Landscape assessment	The site will potentially lead to an impact on local landscape character due to the site being located on greenfield land. The site will create a new landscape character locally.
Green Infrastructure	The site is adjacent to Sharphill Wood. The provision of new open space at the between the early development phases and the existing houses on Edwalton Lodge Close has been laid out. Additionally a new community park within the site has outline planning permission with a reserved matters application (21/01349/REM) currently under consideration.
Historic Environment	The site will not result in a loss of, or harm the significance of, any designated or non-designated heritage assets or its setting. There are no heritage assets within close proximity of the site.
Nature conservation	Development of the site would not result in loss of a designated site of nature conservation interest. The site is adjacent to the Sharphill Woods Local Wildlife Site. Development of the site will result in the loss of some existing hedgerows/field trees within the site.
AQMA/contamination	The site is not within or in close proximity of an AQMA.
Community facilities	There are limited community facilities within the immediate vicinity of the site. West Bridgford is within 30 minutes by public transport and is accessible by bicycle.
Highways and access	Sites is located adjacent to Melton Road and the A52.
Accessibility	The site is accessible by public transport with the Keyworth bus route running adjacent to the site on Melton Road, which run every 13-20 minutes during the working day and lest frequent at other times. The site is adjoining to a existing business and retail stores. There are improvements that connects the site to the wider walking, cycling and public transport network secured during through planning permission, some of which have completed. The site is within 30 minutes public transport time of community facilities, schools, retail centres and employment areas.
Other issues

Site source	Housing Allocation	Planning reference	Numerous
Allocated site reference		Status	Under Construction - over 50% of dwellings completed
Number of dwellings remaining	539	Source of number of dwellings	Local Plan

Agricultural land	<p>The eastern parts of the site are predominantly classified as Grade 2 agricultural land with western and north-western parts being classified as Grade 3a or 3b.</p> <p>The site will result in the loss of some best and most versatile agricultural land but development of the majority of the areas classified as Grade 2 (with the exception of the paddock to the south of 245 Melton Road) and Grade 3a (with the exception of the area to the south of Alison Close) have been completed or are substantially under construction.</p>
Deliverability	<p>There are a number of phases ongoing with 165 dwellings under construction at April 2023. It is assumed that these will be complete during 2022-23, and that there will be 3 phases building out consecutively for the remaining duration of the development. All permissioned except a couple of areas that has the potential of accommodating around 100 dwellings, which are placed in the 6-10 year delivery period.</p>

Delivery Period	8 Years	Delivery	5 Year Tranche - 0-5 Years
------------------------	---------	-----------------	----------------------------

Overall summary	<p>There are a number of phases ongoing with 165 dwellings under construction at April 2023. Deliverability	Planning permission granted for minor residential development. Deliverable within five years.

Delivery Period	1 Year	Delivery	5 Year Tranche - 0-5 Years
Overall summary	Planning permission granted for minor residential development. Deliverable within five years.		

West Bridgford

Site reference	SHLAA/WBR/049	Site name	West of Sharphill
Parish/town	West Bridgford	Site area (hectares)	34.2
Dwelling capacity	300	Density (dwellings/hectare)	8.8
Site source	Urban Extension	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	300	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is within North of A52 Strategic Green Belt Area, as identified in the Green Belt Review 2022. It scored 11. Having regard to the strategic allocation at Edwalton, the area has more than one boundary to the urban edge. Whilst the area is contained by the A52 Ring Road, it spills over a prominent ridgeline. Development of this area at its maximum extent would effectively close the gap between West Bridgford and the area of low density housing at Ruddington that is not inset from the green belt. Predominantly agricultural in use. Whilst the cemetery is located within this area, its use is not inappropriate development within the green belt.
Flood Risk	Flood Zone 1. Minor areas of the site identified as being at risk from low to medium surface water flood risk.
Landscape assessment	- SN03 Mickleborough Fringe The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is weak. Whilst the hills are distinctive features, other features are less distinctive with varied urban uses and pressures exerting a strong influence on the character. Small changes in land use could have a significant effect on landscape character (LCA 2009). Very prominent site with steep slopes on the both north and south sides of the site, peaking at the ridgeline that runs between Sharphill and Wilford Hill. The site is visible from a very wide area and from large parts of the site offers considerable long distance views.
Green Infrastructure	Site is located within the Edwalton/ Sharphill Green Infrastructure Corridor, as identified within the RBC Local Plan. This corridor is also identified in the emerging Greater Nottingham GBI Strategy. Submitted plans identify extension of community park between the proposed retirement village and West Bridgford.
Historic Environment	No constraints
Nature conservation	SINCs, RIGS present on site - Sharphill Wood adjacent to site which is both a LWS and a Local Nature Reserve. The cumulative impact of any further development in addition to the area already granted planning permission would have to be assessed.
AQMA/contamination	Site is not within a AQMA
Community facilities	Site is on the edge of West Bridgford and the Edwalton Strategic Allocation. This allocation comprises a small local centre.
Highways and access	Access could be achieved through the neighbouring SUE
Accessibility	The site is not presently connected by walking cycling and public transport, as no footways are provided through Wheatcroft business park or along Landmere Lane
Other issues	
Agricultural land	Grade 2 (Very good) - Approx. 50% of site is Grade 2, approx. 40-50% Grade 3. The site contains best and most versatile agricultural land, which is not an absolute

Site reference	SHLAA/WBR/049		Site name	West of Sharphill	
Parish/town	West Bridgford			Site area (hectares)	34.2
Dwelling capacity	300		Density (dwellings/hectare)	8.8	
Site source	Urban Extension		Planning reference		
Allocated site reference			Status	No formal allocation or no extant planning permission for residential development	
Number of dwellings remaining	300		Source of number of dwellings	Assumption made on best estimate	

Deliverability	barrier to delivery. However the issue of releasing BMV land for development would need to be considered alongside other sustainability considerations.	
	As the site has been actively promoted throughout the recent LP2 plan making process and emerging Greater Nottingham Strategic Plan, the site is available. It would however only be deliverable or developable if the GB policy constraint is removed.	

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	Site has been promoted through LP2 process as a retirement village, Growth Options Study and Strategic Plan Growth Options Consultation. Landowner considers the site could accommodate 250-300 dwellings, plus significant areas of open space.

-----------------	--------	----------	-------------------------------

Overall summary	Planning permission expired June 2020. Not deliverable within 5 years.
-----------------	--

West Bridgford

Site reference	SHLAA/WBR/103	Site name	Land adjacent to Nottingham Knight Roundabout
Parish/town	West Bridgford	Site area (hectares)	3.44
Dwelling capacity	70	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	Site is within the Green Belt, adjacent to the PUA. GB Review Part 1 identifies the land as being of low-medium GB importance.
Flood Risk	EA Maps suggest area at no risk from flooding from rivers or watercourses
Landscape assessment	SN03: Mickleborough Fringe - SN03: Mickleborough Fringe The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is weak. Whilst the hills are distinctive features, other features are less distinctive with varied urban uses and pressures exerting a strong influence on the character. Small changes in land use could have a significant effect on landscape character (LCA 2009).
Green Infrastructure	Site is located within the Edwalton / Sharphill Wood / Ruddington GI Corridor where habitat protection, creation and enhancement (woodland and grassland) and the improvement of pedestrian and cycle connectivity between Edwalton/West Bridgford and Ruddington are key objectives.
Historic Environment	No constraints
Nature conservation	Site is adjacent to Wilford Hill LWS 'a mature deciduous woodland with a notable flora.'
AQMA/contamination	Site is not within AQMA
Community facilities	
Highways and access	Access would either be required directly from the A52 or from the A60 Loughborough Road. Direct access onto the A52 at Nottingham Knight Roundabout would likely be objected to from the HA. The alternate route from the A60 would be longer and require the removal of a large number of trees from the Wilford Hill wood, which is a LWS.
Accessibility	Busses stop nearby that run between Nottingham and Ruddington Every 15 minutes. Hourly bus service also follows similar route between Nottingham and Ruddington
Other issues	
Agricultural land	Grade 3
Deliverability	Site is within the Green Belt and requires significant access infrastructure, either off Loughborough Road (through woodland) or through improvements/remodelling of Nottingham Knights Roundabout. Site is currently not deliverable or developable.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	The site lies adjacent to the main urban area of West Bridgford in the Green Belt and is in agricultural use. It is bordered to the west by residential development, with woodland and a cemetery to the north and the A52 directly to the south. Fundamental constraint relates to access
------------------------	--

Site reference	SHLAA/WBR/103	Site name	Land adjacent to Nottingham Knight Roundabout
Parish/town	West Bridgford	Site area (hectares)	3.44
Dwelling capacity	70	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

which would either be required directly from the A52 or from the A60 Loughborough Road. Direct access onto the A52 would likely be objected to from the HA. The alternate route from the A60 would be longer and require the removal of a large number of trees from the Wilford Hill wood, which is a LWS. The impact of a new road through the LWS would clearly have a detrimental impact on this. Due to these obvious difficulties surrounding the access, unless the enquirer can show that access is feasible, the site cannot in our view be judged as developable.

West Bridgford

Site reference	SHLAA/WBR/146	Site name	Edwalton Golf Course
Parish/town	West Bridgford	Site area (hectares)	43.5
Dwelling capacity	740	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	740	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is not located within the green belt but is identified as safeguarded land
Flood Risk	Flood zone 1
Landscape assessment	Located within the A52, this site was not assessed within the Greater Nottingham LCA.
Green Infrastructure	Rights of way should be preserved and form GI corridors that link to the wider countryside. Golf course comprises a significant part of a GI corridor along the A52.
Historic Environment	Edwalton Conservation Area located adjacent to the site. Church of the Holy Rood is Grade II* listed and located adjacent to the site. Ridge and furrow embankment adjacent to Holy Rood Church. Open 'semi-natural' setting of Holy Rood Church, when viewed from the south would be significantly affected.
Nature conservation	The golf course is likely to contain areas of priority habitat - grassland, scrub, woodland.
AQMA/contamination	Site is not within a AQMA. Small area of made ground identified as area of potentially contaminated land alongside the A52.
Community facilities	Site is on the edge of West Bridgford and close to Edwalton Strategic Allocation. Loss of Golf course is a significant constraint.
Highways and access	Access is likely to be achieved of Lytham Drive and potentially off Wellin Lane. Confirmation required from NCC.
Accessibility	Rights of way cross the site linking to the wide network beyond the A52 (Tollerton). Site is within walking distance of number 6 bus service, which runs between Edwalton and Nottingham every 15 minutes.
Other issues	
Agricultural land	Grade 2 and Grade 3
Deliverability	Site is owned by Rushcliffe Borough Council. However it is currently in use as a Golf Course. The site is submitted as a potential growth option and will be assessed in the Growth Options Study, which will be published in 2020. Delivery is unknown.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	Site is owned by Rushcliffe Borough Council. However it is currently in use as a Golf Course. The site is submitted as a potential growth option and considers the site to be potentially suitable for growth.

-----------------	--

Barton in Fabis

Site reference	SHLAA/BIF/002	Site name	Land south west of Nottingham (East of A453)
Parish/town	Barton in Fabis	Site area (hectares)	226
Dwelling capacity	3000	Density (dwellings/hectare)	12
Site source	Urban Extension	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	3000	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is located within the Fairham West Strategic Area. It scored 15 within the Green Belt Review 2022. The location is adjacent to one green belt inset boundary. This is to the strategic allocation South of Clifton. The only strong features of note which could contain further development and act as a defensible boundary is the foot of the Gotham Hills, which is some distance south, and the A453. Limited existing features to the south west which could form a defensible boundary. Having regard to the nature of these features, development within this area could lead to a long limb into the open countryside. Development in this direction would reduce significantly the gap between the edge of the strategic allocation at Clifton and Gotham. Whilst the Gotham Hills may provide some degree of separation between the two, the perceptual impact has the potential to be significant. There are no inappropriate developments within this area. Thrumpton conservation area is to the west of this broad area, but it is considered that the potential impact will be limited. There is a Scheduled ancient monument within this broad area, however this is isolated and not connected to the setting or special character of a historic settlement.
Flood Risk	Small area of the site at risk of flooding in a 1-1000 year event. Some areas of the site are at risk from surface water flooding.
Landscape assessment	There is no individual landscape assessment for the site. The site lies within two zones in the Greater Nottingham Landscape Character Assessment. NW01 – Gotham and West Leake Hills and Scarps. The overall landscape strategy is ‘Conserve’. The landscape condition is good. The character strength of the area is strong. The hills are distinctive and consistent features across the landscape and exert their influence within the surrounding area. The pattern of arable, pasture and woodland is also consistent with moderate sized villages and some expanding commuter villages present on low ground.
Green Infrastructure	Site is within the urban fringe GI opportunity area. Existing hedgerows, watercourses trees and scrub should be retained where possible, and enhanced.
Historic Environment	Thrumpton is a large conservation area to the north of the site. Glebe farm, a Scheduled Ancient Monument is of National importance and it potentially covers a large area at the centre of the site. Archaeological features are distributed across this large strategic site. This includes linear features, mills, buildings and enclosures. There is also evidence of a Romano-British enclosed settlement and Villa complex at Glebe Farm. And also evidence of an Iron Age farmstead. Tramway existed between Barton mine and River Trent. Archaeological investigation – nature of archaeology should be readily detectable via magnetometry survey in support of any allocation and/or planning application. The neighbouring Roman site is of high significance being one of only a handful of confirmed Roman Temple sites in Britain, associated archaeology could be highly significant.
Nature conservation	There are Local Wildlife Sites situated along the southern edge of the site. Some hedgerows, scrub and trees within the site. Hedgerows should be protected and enhanced to enable connectivity of habitats.
AQMA/contamination	The site is not within or adjacent to an air quality management zone. Areas of potential

Site reference	SHLAA/BIF/002	Site name	Land south west of Nottingham (East of A453)
Parish/town	Barton in Fabis	Site area (hectares)	226
Dwelling capacity	3000	Density (dwellings/hectare)	12
Site source	Urban Extension	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	3000	Source of number of dwellings	Assumption made on best estimate

	contamination include legacy areas from gypsum mining and made ground.
Community facilities	The site lies away from any community facilities.
Highways and access	Access to the south of the site could potentially be achieved off West Leake Road. Access to the north of the site. SN01 – Clifton Slopes The overall landscape strategy is 'Enhance'. The landscape condition is moderate. The character strength of the area is moderate. This is a distinctive escarpment however it has a number of different land uses particularly land uses particularly close to the urban fringe (LCA 2009).
Accessibility	The site is currently not accessed by any roads, nor by public transport, walking and cycling.
Other issues	Series of high voltage electricity cables cross the site. High voltage gas pipeline runs north to south in the eastern part of the site.
Agricultural land	The site is largely grade 2 to the east and grade 3 to the west
Deliverability	Site submitted as part of the call for strategic sites. Submission at this stage does not contain any detail in terms of land ownership, tenancy agreement, options on the land, broad infrastructure requirements.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Site submitted as part of the 2019 Call for Strategic Sites. The site is located within the Green Belt and there are a number of constraints identified at the time of this assessment which would require further investigation. In addition there are also a number of deliverability issues that would require further investigation. Avoidance of the SAM in the middle of the site would be key. The extent of archaeology worthy of SAM status could cover a wider area than that identified. It is considered that the cumulative constraints in relation to this site mean that it is considered to be non deliverable. Site also being promoted as available for strategic distribution.
------------------------	---

Barton in Fabis

Site reference	SHLAA/BIF/003	Site name	South of Clifton
Parish/town	Barton in Fabis	Site area (hectares)	176
Dwelling capacity	3000	Density (dwellings/hectare)	20
Site source	Housing Allocation	Planning reference	Numerous including 19/02061/REM, 21/01829/REM
Allocated site reference	Core Strategy Policy 24	Status	Under Construction - less than 25% of dwellings or no completions
Number of dwellings remaining	3000	Source of number of dwellings	Planning Application

Green Belt	The site was removed from the Green Belt on adoption of the Local Plan Part 1: Core Strategy and allocated for mixed use development.
Flood Risk	Land adjacent to Fairham Brook adjacent to the allocation is identified as being within flood zones 2 and 3a. The allocation is within flood zone 1.
Landscape assessment	<p>The site is within the SN01 Clifton Slopes. The LCA (2006) identifies this area as having a moderate landscape condition and strength.</p> <p>The site is in a prominent location within this landscape. It's a sloping site with long views to south. South eastern portion of site never been enclosed – Extensive views from across the A453.</p>
Green Infrastructure	The Fairham Brook BGI network (identified in the GNBGI Strategy) and Biodiversity Opportunity Focal Area is adjacent to the site. Outline planning permission and reserved matters focus multifunctional BGI along the Fairham Brook and its environs.
Historic Environment	No designated assets on site. HER identifies linear features, however these may be former agricultural boundaries.
Nature conservation	<p>The Fairham Brook BGI network (identified in the GNBGI Strategy) and Biodiversity Opportunity Focal Area is adjacent to the site. Fairham Brook, further downstream, is a Local Wildlife Site.</p> <p>There are no designated nature conservation sites within the site.</p>
AQMA/contamination	Site is not within NUAZ and is over 5km from nearest AQMA (Radcliffe Road/Lady Bay).
Community facilities	<p>The allocated site is within a 30 minute walk of community facilities in Clifton, including the Highbank Community Centre, Highbank School, Milford Academy School, Clifton Post Office, and Clifton Library.</p> <p>A new school and community facilities will be provided as part of the strategic allocation's development.</p>
Highways and access	Access to the strategic road network will be achieved via the tram stop roundabout on the A453 and via Nottingham Road.
Accessibility	The site is within walking distance of community facilities in Clifton. It is adjacent to the South Clifton NET tram stop. The number 1 bus runs currently runs through the site. This service runs every 20 minutes during weekdays and is less frequent in the evening and at weekends. There is a package of measures proposed as part of the planning permission in order to improve access by non-car modes.
Other issues	
Agricultural land	Agricultural land is classified as Grade 2 and Grade 3. Will lead to loss of soils and may not enhance soil quality.

Site reference	SHLAA/BIF/003		Site name	South of Clifton

Bradmore

Site reference	SHLAA/KEY/012	Site name	Land north of Debdale Lane (2)
Parish/town	Bradmore	Site area (hectares)	7.9
Dwelling capacity	160	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	160	Source of number of dwellings	Assumption made on best estimate

Green Belt	Within Nottingham and Derby Green Belt the land is identified as KEY/Q in the Green Belt Review. KEY/Q scored 16 as the Green Belt prevents significant urban expansion west of Keyworth into an area which is open countryside in character.
Flood Risk	Flood zone 1. EA map indicates that a small area of the site is at a low risk of surface water flooding.
Landscape assessment	As an outlying site this site would not be developed in isolation without land to the east. The LVIA assesses both sites as one parcel of land. Aggregate LVIA score: 50/100. The site comprises two arable fields on the north-western edge of Keyworth. There is an inherent low landscape value within the study area due to the degraded elements and human influence, as well as the limited conservation and recreational interests. The site forms an extension of the existing urban edge with no loss of key characteristics, but the extension is a finger of development which appears illogical. The landscape susceptibility is considered to be low. Overall the landscape sensitivity is low. In terms of visual amenity, the value is low with no indicators of value, recognition of value or other value. The susceptibility in visual amenity terms is medium; the site forms part of the landscape setting for residential receptors and has a medium visibility, particularly from the north. Overall the visual sensitivity is low.
Green Infrastructure	No GI or open space constraints. Debdale Lane provides quiet car free access to the countryside for local residents. This would be lost if developed. The site offers opportunities to provide on-site amenity space/natural green space. Whilst the existing pedestrian access along Debdale lane would be affected, development may provide opportunity to link to and improve the neighbouring right of way and access to the wider countryside.
Historic Environment	There are no nationally designated or locally identified heritage assets within or adjacent to the site.
Nature conservation	There are no designated nature conservation interest within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP priority habitat. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within the Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated. Run-off into the ditch on Debdale Lane should be prevented to avoid diffuse water pollution.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keyworth as a Key Settlement with a Local Centre. The Centre includes convenience (including local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. The village has community centre/village hall with public park and play area, medical centre and gym.
Highways and access	If developed alongside land to the east, two points of access would be required as development would be greater than 150 dwellings. Debdale Lane would require upgrading in order to provide suitable access.

Site reference	SHLAA/KEY/012	Site name	Land north of Debdale Lane (2)
Parish/town	Bradmore	Site area (hectares)	7.9
Dwelling capacity	160	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	160	Source of number of dwellings	Assumption made on best estimate

Accessibility	Village centre is a 10 - 15 minute walk. Wolds Drive is 20 minute walk. Schools are within a 10 - 20 minute walk. Bus stops are within a 5 minute walk on Manor Road an Nottingham Road. These provide 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.
Other issues	Within Bradmore parish but closest to Keyworth, therefore site reference is for Keyworth
Agricultural land	The site is mainly classified as Grade 2 (BMV) agricultural land with a small area of Grade 3 to the north west.
Deliverability	The site is being promoted by the landowner. No known house builder involved.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	The site is not constrained by significant heritage, flooding, landscape or biodiversity issues which cannot be avoided or mitigated. The Green Belt review concludes that the land is of medium-high Green Belt importance however, and part of the site is identified as Grade 2 agricultural land. Debdale Lane would require upgrading to provide suitable access. It is less well located in terms of access to local facilities than some other sites.

Deliverability	Full planning permission granted for minor residential development. Noe on file that development has commenced if certain works done however no precommencement conditions have been discharged. 11-15 years

Delivery Period	1 Year	Delivery	5 Year Tranche - 11 -15 Years
Overall summary	Full planning permission granted for minor residential development. Noe on file that development has commenced if certain works done however no precommencement conditions have been discharged. 11-15 years		

Car Colston

Site reference	SHLAA/CAR/005	Site name	Land Southwest of Car Colston
Parish/town	Car Colston	Site area (hectares)	167
Dwelling capacity	1700	Density (dwellings/hectare)	10
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	1700	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not located within the green belt
Flood Risk	A significant area along the south and east of the site at risk of flooding from watercourses. Parts of the site are also identified as being at varying risk from surface water flooding.
Landscape assessment	Greater Nottingham Growth Options Report (October 22) highlights that the site would be of medium potential for strategic development. It feels very rural in the east particularly, which would struggle to accommodate development. The west of the site feels more suitable for development due to scattered built form on the western boundary and proximity to the busy A46 - building this out would feel like creating a new settlement. The vegetated boundary to south separates the site from Bingham, and the strong vegetation line in north-east buffers from Car Colston.
Green Infrastructure	The site contains a number of small woodlands, trees, hedgerows and watercourses. Potential opportunities to enhance these features and provide links between the woodlands.
Historic Environment	Car Colston Conservation Area is located approximately 300m north east. The Roman settlement of Margidunum is a Scheduled Ancient Monument. This is located either side of the Fosse Way, including land within the site's south west corner in the vicinity of the B692 roundabout. Linear archaeological features and enclosures are identified in the HER. Potential harm to archaeological features which may be significant. Potential harm to the setting of Car Colston Conservation Area and views from within it. Roman occupation is known to extend beyond the scheduled site in other directions and could be here too. Archaeological investigation – nature of archaeology should be readily detectable via magnetometry survey in support of any allocation and/or planning application. Development within the vicinity of the Roman settlement should be avoided.
Nature conservation	High Westings Farm marsh Local Wildlife Site within the submitted area. Numerous small areas of woodland, trees, hedgerows and watercourses.
AQMA/contamination	The site is not within or within proximity of an air quality management area. No areas identified as potentially contaminated land.
Community facilities	The proposal is for a free standing settlement. Nearest facilities at Bingham or East Bridgford.
Highways and access	The only existing road that is within or adjacent to the site is the Fosse Way.
Accessibility	The site is not presently served by public transport, walking or cycling, other than a an hourly bus service during the day along the route of the Fosse Way between Bingham and Nottingham via East Bridgford and Newton.
Other issues	The site is crossed by a number of public rights of way. The site is being promoted for mixed use. Estimate approx. 90ha for residential use.
Agricultural land	The site largely consists of grade II agricultural land.
Deliverability	Appears to be one landowner from the representation made in response to a local plan consultation. No known housebuilder involvement.

Site reference	SHLAA/CAR/005		Site name	Land Southwest of Car Colston	
Parish/town	Car Colston			Site area (hectares)	167
Dwelling capacity	1700		Density (dwellings/hectare)	10	
Site source	Developer/Landowner Submission		Planning reference		
Allocated site reference			Status	No formal allocation or no extant planning permission for residential development	
Number of dwellings remaining	1700		Source of number of dwellings	Assumption made on best estimate	

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site is located away from any settlement. As such any proposal within this area would have to be developed as a freestanding development. There are a number of considerations in relation to the suitability of the site, relating to ecological value of parts of the site, proximity to a scheduled ancient monument and agricultural land quality.

Delivery Period	1 year	Delivery	5 Year Tranche - 0-5 Years
Overall summary	Planning permission for minor residential development. Deliverable within 5 years.		

Costock

Site reference	SHLAA/COS/006	Site name	Six Acre Nursery, Loughborough Road
Parish/town	Costock	Site area (hectares)	3.6
Dwelling capacity	10	Density (dwellings/hectare)	3
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	10	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not located in the green belt
Flood Risk	Small area to the east of the site is at low risk from surface water flooding
Landscape assessment	The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength of the area is strong. The area has a strong intact rural character with arable pasture farming, prominent small woodlands, villages and a network of farmsteads key features (LCA 2009).
Green Infrastructure	Opportunity to maintain and enhance hedgerow corridors. Retention of trees within the site.
Historic Environment	No identified heritage assets
Nature conservation	Some trees and scrubland within the site. Hedgerows intermittent around and through the site.
AQMA/contamination	Not within or in the vicinity of an air quality management area
Community facilities	Costock has limited community facilities. Pub, village hall and primary school
Highways and access	a number of existing accesses onto the A60, which is 50mph in this location
Accessibility	Bus stop on Nottingham-Loughborough route 400m away. The stop operates two bus services, the 05 and the 9. The 9 operate on an hourly basis Monday to Saturday, including evenings. There is limited services on Sundays. The site is just over 500 metres to the nearest primary school.
Other issues	
Agricultural land	Grade 2
Deliverability	Site being prompted but no known developer involved. Number of buildings and hardstanding that will need clearing and removing to enable development.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	Redevelopment of northern half of the site, adjacent to the A60, may be acceptable given its closer proximity to Costock and its predominant brownfield status. The nursery is more open and rural in character.		

Costock

Site reference	SHLAA/COS/008	Site name	Main Street / Leake Road
Parish/town	Costock	Site area (hectares)	3.1
Dwelling capacity	40	Density (dwellings/hectare)	13
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	40	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is not located within the Green Belt
Flood Risk	A very minor area of the site is identified at risk of flooding from rivers and streams.
Landscape assessment	The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength of the area is strong. The area has a strong intact rural character with arable pasture farming, prominent small woodlands, villages and a network of farmsteads key features (LCA 2009).
Green Infrastructure	Retain and enhance hedgerow corridors around and through the site.
Historic Environment	No heritage assets identified
Nature conservation	No designated features of nature conservation value. Some hedgerows around and through the site which may have nature conservation value, although they are intermittent at present
AQMA/contamination	Not within or within the vicinity of an air quality management area
Community facilities	Costock has limited community facilities. Pub, village hall and primary school
Highways and access	Access is currently a single track metalled farm access. Unknown whether appropriate access could be provided given the limited width indicated on the plan
Accessibility	2 bus stops are located under 100 metres from the site on Main Street, with 2 bus lines operating (05 & 863) operating a limited service throughout the week. The site is located in close proximity to the nearest Primary school which is also located on the south side of Main Street.
Other issues	
Agricultural land	Grade 2 agricultural land
Deliverability	The site is being promoted for development

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	This greenfield site is currently used for farming, specifically cattle grazing. One constraint is the narrow access to the site between two existing properties, which may need widening to some capacity. The site is also located beyond the physical edge of the village within the countryside where development is restricted by Policy 22 of Local Plan Part 2..Hedgerow habitats do run through the site which may be impacted by any development.

Costock

Site reference	SHLAA/COS/012	Site name	Land at Leake Road
Parish/town	Costock	Site area (hectares)	3.1
Dwelling capacity	70	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	70	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is not located within the green belt
Flood Risk	Areas of the site, particularly in the north are identified as at risk from surface water flooding. No identified risk of flooding from rivers and streams.
Landscape assessment	NW02 – East Leake Rolling Farmland The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength of the area is strong. The area has a strong intact rural character with arable pasture farming, prominent small woodlands, villages and a network of farmsteads key features (LCA 2009).
Green Infrastructure	Protect hedgerows around the site and provide for enhanced grassland.
Historic Environment	There are no designated or non designated heritage assets within the site. The conservation area lies some distance to the east. Limited bus service to Keyworth, East Leake and Ruddington
Nature conservation	There are hedgerows around the site and grassland within it, which are priority habitats.
AQMA/contamination	The site is not within or in proximity to an air quality management area
Community facilities	Costock has limited community facilities. Pub, village hall and primary school
Highways and access	Access would have to be from either Leake Road or Bars Hill
Accessibility	Two bus stops are located just under 100 metres from the site on Main Street, with 2 bus lines operating (05 & 863) both operating a limited service throughout the week. The site is located in close proximity to the nearest Primary school which is also located on the south side of Main Street.
Other issues	Part of the site previously refused planning permission for development (fronting Leake Road) 13/01797/OUT. Appeal dismissed.
Agricultural land	The provisional agricultural land classification is grade 2
Deliverability	Single client. Appears to be a land speculator. Such promoters generally have a good track record of bringing sites forward within Rushcliffe through allocated sites and planning applications.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	The site is located within the countryside adjacent to Costock. Costock has a limited amount of facilities. No major technical constraints highlighted on the site.

Kingston-on-Soar

Site reference	SHLAA/KOS/004	Site name	Land to the east of Kingston on Soar and South of Ratcliffe-on-Soar Power Station
Parish/town	Kingston-on-Soar	Site area (hectares)	358
Dwelling capacity	6000	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	6000	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is located within the Kingston on Soar Broad Green Belt Area. This area scores 13. As a freestanding area, the land is isolated from the built up area of Nottingham and outlying settlements. The area is not contained by any substantial boundary features. A field drain comprises a significant extent of the northern and western boundary. Farm tracks and roads form the southern boundary. Woodlands and the West Leake Hills to the east provide a more robust strategic boundary to the east. Isolated from existing built up areas, this broad area is not visually connected to any built up area. Its removal would result in a significant area of land being removed between West Leake, Gotham, Kingston on Soar, and Ratcliffe on Soar Power Station. The character is open countryside, comprising arable farmland, woodlands and small ribbon developments along West Leake Road. The land is located approximately half a mile from Kingston on Soar, which contains a number of listed buildings. Kingston Hall and its grounds separate the site from the village. There are two notable heritage assets within the site - Land south of Kingston Farm forms part of historic Kingston Park and Kingston Fields Farmhouse is Grade 2 Listed. These however are not associated with a settlement.
Flood Risk	Limited areas at risk of flooding from rivers. Some areas within the site at medium to high risk from surface water flooding.
Landscape assessment	The area has scenic quality and conservation interest related to Kingston Pleasure Grounds Registered Park and Gardens south of the area of search boundary at Kingston on Soar. A limited network of PRow provide some recreational access, notably in the south and east. Flat topography means the area is visually open, and has high intervisibility. Woodland south of the A453 offers the potential to create a distinctive place based on an existing green infrastructure network. Defensible boundaries are largely limited to the transport network, although woodland offers the opportunity to screen development, for example the area surrounding Winking Farm and the area east of Gotham could be developed without perceived sprawl creating adverse impacts on long views. Suitable for development. If the area north of Kingston Pleasure Grounds is developed this may have an adverse impact on the setting of the Registered Park and Garden.
Green Infrastructure	Woodland within the site should be retained and enhanced, Hedgerows and watercourses should also be retained and enhanced. Significant area is located within the Gotham Hills, West Leake and Bunny Ridgeline Biodiversity opportunity area, where existing priority habitats are woodland and grassland.
Historic Environment	Kingston Pleasure Grounds is a historic park and garden (Grade II), part of which lies adjacent to the site. HER identifies old quarry (at Scotland Farm), clay pits and Gypsum mine (both along Dark Lane). Avoid allocation of land within the setting of the Historic Park and Garden where this would cause harm. Standard historical / archaeological investigations as part of any proposal.
Nature conservation	A number of local wildlife sites adjacent to the site. Tree, woodland and grassland contained

Parish/town	Kingston-on-Soar	Site area (hectares)	358
Dwelling capacity	6000	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	6000	Source of number of dwellings	Details obtained through external Site Submission

	within the site.
AQMA/contamination	Not within or within proximity to an air quality management area. Areas identified as potentially contaminated include Oaks Farm and the site of New Kingston sewage works
Community facilities	No community facilities within the site. Would need provision to support any development.
Highways and access	Unknown at this stage whether satisfactory access can be achieved to the site at this present time. There is a grade-separated junction at the north of the site onto the A453 trunk road.
Accessibility	Connectivity by foot or cycle to surrounding area is limited. No community facilities within the vicinity of the site. There are several bus routes located around the site for example, College Road, Kegworth Road and Gotham Road.
Other issues	No known contamination. Utilities would require upgrading to serve the site. There are known gypsum workings under parts of the site and unworked gypsum resources. British Gypsum advises that minerals sterilisation should not occur, and that the making good of former gypsum workings involves grouting which comes at a significant cost
Agricultural land	Majority of site is grade 3a/b, but also a significant amount of grade 2.
Deliverability	A number of important constraints have been identified. Perhaps the most significant of which is the significant amount of land that would have to be taken from the Green Belt. The proposal may also lead to a degree of quality has been identified as good. Further work has been undertaken through the Growth Options Study and this will inform the selection of strategic sites within the Greater Nottingham Strategic Plan. Therefore there are no firm conclusions at present in relation to the sites suitability for housing and it could be suitable if policy changes. There are however some issues raised in terms of whether the site is 'available now'.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	A number of important constraints have been identified. Perhaps the most significant of which is the significant amount of land that would have to be taken from the Green Belt. Some of the land is BMV agricultural land, and may be an impact on the setting of heritage assets. Biggest technical constraint is the presence and legacy mining of gypsum under parts of the site.

Kinoulton

Site reference	SHLAA/KIN/012	Site name	West of Owthorpe Lane
Parish/town	Kinoulton	Site area (hectares)	13.6
Dwelling capacity	310	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	310	Source of number of dwellings	Assumption made on best estimate

Green Belt	the site is not located within the green belt
Flood Risk	The allotments area is identified as at risk of flooding from the adjacent watercourse. The wider site is at varying risk from surface water flooding.
Landscape assessment	<p>The area is within Natural England's National Character Area (NCA) 48 Trent and Belvoir Vales. On a regional scale, the area is largely within East Midlands Councils' Unwooded Vales LCT. It also contains Floodplain Valleys LCT and a small area of Clay Wolds LCT.</p> <p>Land cover comprises arable farmland in mostly medium regular fields, with occasional larger and more irregular fields. Factors which contribute to the landscape value include: the quiet, rural character and sparseness of settlement. Factors which decrease the landscape susceptibility include: the simple topography and medium- and large-scale of the land cover.</p> <p>On a local level, the area is within VB01 –Vale of Belvoir The overall landscape strategy is 'Conserve and Enhance'. The landscape character is moderate. The character strength of the area is moderate. The area has a consistent rural character with few urban features. It is a flat arable landscape with large regular field patterns. The pattern varies closer to settlements, where smaller pastoral fields create a sense of enclosure (LCA 2009).</p>
Green Infrastructure	Within the River Smite focal area. The corridor holds significant potential for wetland and woodland enhancement and creation.
Historic Environment	No impact on designated heritage assets. Non-designated heritage assets: L7596 field system earthworks (likely medieval) and ridge and furrow remains.
Nature conservation	The site contains hedgerows and grassland, both priority biodiversity habitats. Drain runs alongside Owthorpe Lane, and watercourse along the northern boundary of the site.
AQMA/contamination	The site is not within or within proximity to an air quality management area.
Community facilities	Kinoulton Primary School, St Luke's Church, the Nevile Arms pub and a cricket club.
Highways and access	The site would have to be accessed off Owthorpe Lane as no other access opportunities are identified. Owthorpe lane is a country road with a national speed limit.
Accessibility	The number 853 bus service passes through Kinoulton and provides access to West Bridgford, Gamston and Hickling. The service only runs three times a day in each direction Monday to Saturday.
Other issues	The site is not within or within proximity to an air quality management area.
Agricultural land	The provisional agricultural land classification is grade 3
Deliverability	Unclear from the submission as whether the site is in single ownership. No option on the land.

Site reference	SHLAA/KIN/012	Site name	West of Owthorpe Lane
Parish/town	Kinoulton	Site area (hectares)	13.6
Dwelling capacity	310	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	310	Source of number of dwellings	Assumption made on best estimate

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site lies adjacent to Kinoulton within the countryside. Kinoulton has few basic facilities. There is limited accessibility by public transport. There are some constraints within the site in terms of the allotment use, where equal or better provision would need to be made if they were to be lost. Some issues identified in terms of flood risk from watercourses and from the surface.

Kinoulton

Site reference	SHLAA/KIN/013	Site name	West of Owthorpe Lane 2
Parish/town	Kinoulton	Site area (hectares)	24.7
Dwelling capacity	560	Density (dwellings/hectare)	23
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	560	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not located within the Green Belt
Flood Risk	The allotments area is identified as at risk of flooding from the adjacent watercourse. The wider site is at varying risk from surface water flooding.
Landscape assessment	The Greater Nottingham Growth Options Report (Landscape Assessment) Oct 22 concludes that the site would be of medium potential for strategic growth. Whilst the site is relatively large in scale compared to the existing village, it still feels that the scale is 'comfortable'. Development of the full site would, however, alter the form of the village from east-west and north-south linear village along Main Street and Owthorpe Lane to more of a block within the two axis.
Green Infrastructure	Within the River Smite focal area. The corridor holds significant potential for wetland and woodland enhancement and creation.
Historic Environment	No impact on designated heritage assets. May affect setting of the spire of the Church of St Luke when travelling towards Kinoulton from the north along Owthorpe Lane. The site contains archaeological evidence of field systems, plough headland, ridge and furrow, and terraced ground.
Nature conservation	The site contains hedgerows and grassland, both priority biodiversity habitats. Drain runs alongside Owthorpe Lane, and watercourse along the northern and southern boundary of the site.
AQMA/contamination	The site is not within or within proximity to an air quality management area. No areas of land identified as potentially contaminated.
Community facilities	Kinoulton Primary School, St Luke's Church, the Nevile Arms pub and a cricket club.
Highways and access	The site would have to be accessed off Owthorpe Lane as no other access opportunities are identified. Owthorpe lane is a country road with a national speed limit.
Accessibility	The number 853 bus service passes through Kinoulton and provides access to West Bridgford, Gamston and Hickling. The service only runs three times a day in each direction Monday to Saturday. There is limited opportunity to connect to any substantial walking and cycling network given its rural location.
Other issues	The site is not within or within proximity to an air quality management area.
Agricultural land	The provisional agricultural land classification is grade 3
Deliverability	Unclear from the submission as whether the site is in single ownership. No option on the land.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years

Langar cum Barnstone

Site reference	SHLAA/LAN/014	Site name	Langar Airfield
Parish/town	Langar cum Barnstone	Site area (hectares)	202
Dwelling capacity	3000	Density (dwellings/hectare)	14
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	3000	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Site is beyond the outer Green Belt boundary.
Flood Risk	There is no identified risk of flooding from watercourses. There is however areas of the site that are identified as at risk of flooding from surface water.
Landscape assessment	<p>Flat airfield in the north of the area of search with industrial land use to the north and west; small to medium arable fields in the south of the area of search with a small block of woodland.</p> <p>The area of search is representative of the surrounding quiet rural landscape, with the Grantham Canal contributing scenic beauty in the south. The canal and grassland within the airfield are of conservation value. The PRoW network is limited, but includes public access along the canal.</p> <p>The flat topography and hedgerows enclosing fields limit views in and out of the area of search. The Grantham Canal along with the area of search's RAF heritage, which includes being the base for Bomber Command in WWII, offer some potential for development to tie into to create a distinctive landscape. Defensible boundaries are limited to the boundary of the airfield and existing field boundaries.</p> <p>Suitable for development. Green buffer should be maintained in the south of the area of search between development and the Grantham Canal.</p>
Green Infrastructure	None identified, however opportunities would exist to incorporate significant GI and open space within any development.
Historic Environment	The whole airfield is identified as a non-designated heritage asset (including War Memorial) by the HER, together with anti-tank blocks. The historic value of the airfield would be affected if developed for housing. Preserve features of historic value that explain the site's/airfield's history and their setting.
Nature conservation	The airfield contains areas of grassland which are of county importance and designated LWS.
AQMA/contamination	Not within or within proximity to an air quality management area. Areas of made ground and its use as an airport identified as potential sources of contamination.
Community facilities	A new settlement would require a full range of local services and facilities, including convenience retailing, new schools, health facilities, sports and leisure provision.
Highways and access	Landowner proposes improvements to Bingham Road and access to the A52/A46.
Accessibility	There is no public transport that serves the site and no footpath or cycleway connectivity to surrounding service villages.
Other issues	A number of bad neighbour uses exist adjacent to the site with potential for noise disturbance.
Agricultural land	Grade 3
Deliverability	Whilst the site is in single ownership, this landowner owns or partially owns strategic housing

Site reference	SHLAA/LAN/014		Site name	Langar Airfield

allocations (Edwalton and Gamston) which have not come forward in the timeframes established and agreed within Core Strategy.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Whilst the site is in single ownership, this landowner owns or partially owns two strategic housing allocations (Edwalton and Gamston) which have not come forward in the timeframes established and agreed within Core Strategy. Land has been submitted as a strategic allocation (Garden Village). Growth options study considers that the site is not suitable for strategic growth.

Newton

Site reference	SHLAA/NEW/002	Site name	Land at RAF Newton (phase 2)
Parish/town	Newton	Site area (hectares)	29
Dwelling capacity	528	Density (dwellings/hectare)	18
Site source	Housing Allocation	Planning reference	10/02105/OUT, 19/02689/REM
Allocated site reference	Policy 22	Status	Under Construction - less than 25% of dwellings or no completions
Number of dwellings remaining	413	Source of number of dwellings	Planning Application

Green Belt	The site was removed from the Green Belt and allocated for mixed use development on adoption of the Local Plan Part 1: Core Strategy.
Flood Risk	The site is at very low risk of flooding (less than 0.1% each year) from rivers but with areas along the southern boundary along with small areas across the site that are at low to high risk surface water flooding.
Landscape assessment	<p>The site is within the East Bridgford Escarpment Farmlands DPZ (SN05). Both the condition and strength of the landscape within this DPZ are moderate.</p> <p>Given the presence of the existing hangers on the west side of the site and the earlier completed phase of residential development on the east side of the site, further development is unlikely to have an adverse impact on the existing landscape character.</p>
Green Infrastructure	The site is in close proximity of the A46, a national cycle route and BGI corridor (identified in the Greater Nottingham BGI Strategy).
Historic Environment	<p>There are no designated heritage assets within the site that would be affected by development.</p> <p>The HER identifies three records within the site (a WWII pillbox close to the east boundary and two Iron Age/ Romano British features in the south-east corner) that could be non-designated heritage assets.</p>
Nature conservation	<p>Development of the site would not result in loss of a designated site of nature conservation interest.</p> <p>The site is not adjacent to any designated site of nature or conservation interest.</p> <p>Development of the site may result in the loss of some trees in the centre of the site and at its south-eastern corner.</p>
AQMA/contamination	<p>Site is not within NUAZ and is over 5km from nearest AQMA (A52/Stragglethorpe Road).</p> <p>Unknown at this stage whether further development of the site would create a new AQMA.</p>
Community facilities	The site is allocated to provide a neighbourhood centre of appropriate scale to serve the residential development and has planning permission ancillary town centre uses. The site is within 30 travel time by bike and bus of Bingham District Centre. The site is not currently within close walking distance of community facilities but obligations to provide either a financial contribution towards or the provision of a new community centre and primary school within the site have been secured through a section 106 agreement.
Highways and access	The site is accessed via Wellington Avenue. Access to the strategic highway network (A46) can be achieved via the nearby junction with the A6097.
Accessibility	The developed part of the site is accessible to buses with stops on Fairway Crescent and Wellington Avenue providing services that run hourly during weekdays into Bingham, Newark

Number of dwellings remaining	413	Source of number of dwellings	Planning Application		

and Nottingham. Connectivity with Bingham by walking and cycling proposed to be improved in relation to the planning permission requirements

The site lacks a direct walking route into Bingham, being separated by the A46, however, the provision of a footbridge has been secured under the planning permission for the site, although this has not been delivered yet.

Other issues

Agricultural land

The site is classified as Grade 3 agricultural land but of unknown sub-grade.

Deliverability

Two phases underway which developed 91 dwellings during 2022-2023

Delivery Period

5 years

Delivery

5 Year Tranche - 0-5 Years

Overall summary

Two phases underway which developed 91 dwellings during 2022-2023. it is assumed that 2 phases will continue until site completion

Newton

Site reference	SHLAA/NEW/004	Site name	Land west of former RAF Newton
Parish/town	Newton	Site area (hectares)	136
Dwelling capacity	2300	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	2300	Source of number of dwellings	Assumption made on best estimate

Green Belt	Land is within the Green Belt. It was not assessed within the LP Green Belt Review. Removal of land and its development would significantly reduce the distance between Newton, Shelford and Radcliffe. As with other large strategic sites it would constitute significant urban sprawl and encroachment into the countryside.
Flood Risk	Flood Zone 1
Landscape assessment	SN05 - East Bridgford Escarpment Farmlands - Landscape condition is moderate (loss of hedgerows). Character strength is also moderate (uniform character of arable fields with prominent village fringes. Views of urban fringe are frequent from the escarpment).
Green Infrastructure	
Historic Environment	No designated heritage assets, however there will be assets associated with the former airfield which require preserving. These will likely be pillboxes, shelters etc. Setting of pillboxes and other structures would be significantly affected by development of the airfield. Removing their historical context., however examples remaining are only part of the original defensive scheme
Nature conservation	No designated nature conservation assets
AQMA/contamination	Not within an AQMA. The area is identified as having potential for contaminated land due to its previous use as and airfield together with areas of made ground.
Community facilities	Local facilities will be brought forward as part of the neighbouring Newton development. The nearest medical surgery is approximately 2.5km from the area of search with surplus capacity. The area of search wholly falls within catchments of existing GP practices.
Highways and access	
Accessibility	The A46 is accessed to the south and east of the area of search, providing routes south to Leicester and north to Newark-on-Trent. The National Cycle Network (NCN) Route 48 runs along the southeast area of search boundary following the A46. Several local bus services operate through the area of search due to the continued use of Newton.
Other issues	
Agricultural land	Not graded
Deliverability	Site is in single ownership (MOD) and is available. Land has been submitted as a strategic allocation and extensions to the Former RAF Newton site will be assessed within the Growth Options Study and established within the Greater Nottingham Strategic Plan. Site may be suitable if policy changes.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Site is in single ownership (MOD) and is available. Land has been submitted as a strategic allocation and extensions to the Former RAF Newton site has been assessed within the Growth
-----------------	--

Site reference	SHLAA/NEW/004	Site name	Land west of former RAF Newton
Parish/town	Newton	Site area (hectares)	136
Dwelling capacity	2300	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	2300	Source of number of dwellings	Assumption made on best estimate

Options Study (as part of a larger strategic growth area). The Growth Study states that the site provides sufficient land capable of delivering a co-dependent new settlement (with Bingham). Parts of the RAF Newton site (particularly its western extent) are some distance away from central Bingham and its existing services and rail station, with the A46 forming a physical barrier between the two. As such provision of new social infrastructure and improved linkages with Bingham are required in the location.

Newton

Site reference	SHLAA/NEW/005	Site name	Land north of Former RAF Newton Strategic Allocation
Parish/town	Newton	Site area (hectares)	8
Dwelling capacity	250	Density (dwellings/hectare)	31
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	250	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Land is inset from the Green Belt (part of the Former RAF Newton Allocation)
Flood Risk	Site is within Flood zone 1
Landscape assessment	SN05 - East Bridgford Escarpment Farmlands - Landscape condition is moderate (loss of hedgerows). Character strength is also moderate (uniform character of arable fields with prominent village fringes. Views of urban fringe are frequent from the escarpment).
Green Infrastructure	Site is identified as the location for sports pitches and open space within the outline planning application which has been granted permission. If developed for further housing, these facilities would be located further west, within the Green Belt.
Historic Environment	No designated heritage assets within or close proximity of the site.
Nature conservation	No designated nature conservation assets
AQMA/contamination	Site is not within or in close proximity of an AQMA
Community facilities	Local facilities will be brought forward as part of the neighbouring Newton development
Highways and access	Site would be accessed from the south, through the permitted site.
Accessibility	Bus services connect Newton with Bingham and Nottingham from the bus stops along wellington avenue and fairway crescent to the east of the sites location.
Other issues	Land is an extension to the Former RAF Newton Strategic Allocation (500 homes).
Agricultural land	Classified as 'other'
Deliverability	Delivery of the Former RAF Newton Strategic Allocation has been significantly delayed due to variations to the outline planning permission. Reserved matters application submitted 2019/20. Land within SHLAA/NEW/005 is identified as open space within CS Policy 22. Land has been submitted as a strategic allocation and extensions to the Former RAF Newton site will be assessed within the Growth Options Study and established within the Greater Nottingham Strategic Plan. Site may be suitable if policy changes.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	<p>Delivery of the Former RAF Newton Strategic Allocation has been significantly delayed due to variations to the outline planning permission. Reserved matters application submitted 2019/20. Land within SHLAA/NEW/005 is identified as open space within CS Policy 22. Land has been submitted as a strategic allocation and extensions to the Former RAF Newton site has been assessed within the Growth Options Study that concludes the land is suitable as part of a strategic allocation. However parts of the RAF Newton site (particularly its western extent) are some distance away from central Bingham and its existing services and rail station, with the A46 forming a physical barrier between the two. As such provision of new social infrastructure and improved linkages with Bingham are required in the location.</p>

Orston

Site reference	SHLAA/ORS/015	Site name	Orston Garden Village
Parish/town	Orston	Site area (hectares)	215
Dwelling capacity	3000	Density (dwellings/hectare)	14
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is not located within the green belt
Flood Risk	Majority of the site is within flood zone 1 with flood zones 2 and 3 running along some of the drains within the site. Larger area of land within the north east of the site is within flood zone 3. Large areas of land at varying risk from surface water flooding
Landscape assessment	Relatively flat area of south of Orston. Small to medium sized agricultural fields. This is an area with high perceptions of tranquillity, which feels remote from Nottingham, albeit with detractors including a solar farm, railway line and minor road. The landscape is representative of the surrounding rural area. A small number of PRoW provide recreational value, and vegetation, including ancient woodland alongside the railway has conservation value. The area of search is visually enclosed due to the flat topography and field boundaries. Small blocks of woodland and vegetation associated with the railway line offer potential for development to be tied in with the local landscape. Risk of coalescence with Elton on the Hill. The railway line and highways network provide defensible boundaries for development to the south of Orston. Green buffer should be maintained in the south to prevent coalescence with Elton on the Hill.
Green Infrastructure	There are a number of features that would require conservation and enhancement, including drain corridors, and trees and hedgerows. These could form the focus for the provision of additional green infrastructure in order to achieve biodiversity net gain.
Historic Environment	There are a number of features identified within the Historic Environment Record. Firstly the site is in the setting of the Orston conservation area. Secondly, parts of the site have the potential of being in the setting of The Gables, and Hamilton's Farmhouse. Thirdly, the Historic Environment Record identifies a number of archaeological alerts within and adjacent to the sites. Features within the site include M1608 windpump, L10520 and L10521 pillboxes, L1521 linear features and rectangular enclosure, L1532 pair of parallel lines, L1210 Cropmarks and M10 well. In addition surveys on immediately adjacent solar farm revealed iron age features and some finds through desktop surveying and trenching.
Nature conservation	There are a number of features within and adjacent to the site. The most important feature is the Orston Plaster Pits SSSI, which is adjacent to the site. Orston Railway LWS and Railway Pond LWS are within the site. Oldfield Plantation LWS adjacent to the site.
AQMA/contamination	The site is not within or affecting an air quality management area. Part of a disused pit within the western part of the site is identified as being potentially contaminated land.
Community facilities	No community facilities provided at present. Limited facilities located at Orston, with a primary school, a tea shop and a public house. Most major facilities are located at Bingham, which is 6 miles away, with some facilities located as Bottesford, which is 3 miles away.
Highways and access	Initial observations are that the site is served station Road, a small country road at National Speed limit. The road also contains no footways. To the north the narrow road network passes through Orston and to villages beyond. To the south the road joins the A52 at a crossroads. The A52 at this point is 40mph and the crossroads are not signalised. The site

Site reference	SHLAA/ORS/015	Site name	Orston Garden Village
Parish/town	Orston	Site area (hectares)	215
Dwelling capacity	3000	Density (dwellings/hectare)	14
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Details obtained through external Site Submission

	being served by this one country road may prove to be a barrier to delivery.
Accessibility	The 833 passes through the site but does not stop. The service is somewhat sporadic and serves Bingham and Orston. There is a railway station within the site. This is served by a parliamentary service only. Connectivity to any villages with facilities by walking and cycling is limited at present. National cycle network passes to the north of the site, however this is on road and only signed for such purposes without any other measures.
Other issues	The site is within a minerals safeguarding zone for Gypsum, which is a nationally important mineral resource given its scarcity. The R05 consultation area includes the former Orston mine and factory. British Gypsum state that this area has potential for Gypsum and should be protected from development that sterilises the gypsum resources. Part of the site is within Elton parish.
Agricultural land	The area is identified as grade 3 agricultural land
Deliverability	The site would require its own infrastructure in order to function as a self sustaining free standing settlement. Experiences within Rushcliffe is that it takes some time before the allocation of such a site and its development. From the evidence contained within representations received, there appears to be a landowner consortium involved. Such arrangement often lead to further delays in terms of equalisation of values.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
Overall summary	A number of constraints exist meaning not suitable at the present time. Minerals sterilisation, accessibility, together with potential impact on ecology (Orston Plaster Pits SSSI). The road that runs through the site is effectively a country lane. Available as being promoted. Achievable longer term given multiple land ownerships, equalisation, infrastructure planning and planning process.

Plumtree

Site reference	SHLAA/PLU/002	Site name	Land at Manor Farm
Parish/town	Plumtree	Site area (hectares)	17.34
Dwelling capacity	340	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	Land south of Melton Road has not be assessed with a Green Belt Review. The development of this land (either side of Melton Road) would merge Tollerton with Plumtree.
Flood Risk	Parts of the site are at varying degrees of risk from surface water flooding and flooding from watercourses.
Landscape assessment	SN04 – Cotgrave and Tollerton Village Farmlands The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character (LCA 2009).
Green Infrastructure	Whilst the site is in agricultural use it contains watercourses and hedgerows some trees and a pond. These features should be retained and enhanced.
Historic Environment	South of the grounds of Tollerton Hall, which is a non designated historic park and garden. Records of roman pottery scatter and medieval pottery found on the site.
Nature conservation	No designated sites of nature conservation importance within the site. Parts of the site are within 1km of the Normanton Pastures SSSI.
AQMA/contamination	Land is not within or close proximity to an AQMA.
Community facilities	The site is adjacent to Tollerton. Tollerton contains a primary school, a Post Office, pub, petrol station, a parish office and several small shop units.
Highways and access	The indicative masterplan submitted with the representation received to the Greater Nottingham Strategic Plan shows a point of access onto Tollerton Lane and a point of Access onto Melton Road where the junction to the road to Keyworth is situated. There is currently no view from the highways authority whether the access arrangements are acceptable in principle. In addition the existing A606 junction requires improvement as a result existing allocations East of Gamston/North of Tollerton and at Keyworth.
Accessibility	The site is adjacent to Tollerton. The Keyworth Connection runs along Melton Road and the majority of basic facilities within the village are within walking distance.
Other issues	
Agricultural land	The provisional agricultural land classification for the site is grade 3
Deliverability	Site is fundamentally constrained by the Green Belt which prevents the merging of Plumtree and Tollerton

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	The adjacent settlements of Tollerton and Plumtree are inset from the Green Belt, however the site lies outside of the inset, therefore development would be contrary to Green Belt policy. The Core Strategy identifies that growth will be to satisfy local need and this need will be primarily met
------------------------	--

Site reference	SHLAA/PLU/002	Site name	Land at Manor Farm
Parish/town	Plumtree	Site area (hectares)	17.34
Dwelling capacity	340	Density (dwellings/hectare)	20
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

through infill and rural exception development. The supporting text to policy 3 of the Core strategy does state that where small-scale allocations are appropriate to provide further for local needs, these will be included in Local Plan Part 2. However no allocations are located at this settlement.

Development of the site would effectively coalesce Tollerton and Plumtree, where one of principles of the Green Belt is to prevent places from merging. It is therefore extremely unlikely that development would be acceptable on this scale and in this location.

Plumtree

Site reference	SHLAA/PLU/003	Site name	Land at Pinfold Lane
Parish/town	Plumtree	Site area (hectares)	0.5
Dwelling capacity	5	Density (dwellings/hectare)	
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	5	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is located within the green belt
Flood Risk	The site has not been identified as at risk from any forms of flooding
Landscape assessment	SN04 – Cotgrave and Tollerton Village Farmlands The overall landscape strategy is 'Enhance and Restore'. The landscape condition is moderate. The character strength of the area is moderate. The area has a relatively uniform character of arable fields with prominent village fringes. Urban elements are frequent and exert a strong influence. Man-made elements and landform have a localised influence on character (LCA 2009).
Green Infrastructure	The site is not within a green and blue infrastructure corridor
Historic Environment	Located in the setting of Church of St Mary the Virgin, (grade 1) and Hall farmhouse (Grade 2).
Nature conservation	The site consists of grassland. No other features of note
AQMA/contamination	The site is not located within or in proximity to an AQMA
Community facilities	Plumtree is a settlement with limited community facilities. It has a public house, a private school and a cricket club.
Highways and access	The site is off a private street. May limit the amount of development that can be served
Accessibility	The Keyworth Connection runs through and stops on the main road through Plumtree. The service runs regularly between Keyworth and Nottingham during the day. It is not currently running on a Sunday
Other issues	
Agricultural land	The site is identified as grade 2 agricultural land
Deliverability	The site appears to be within one ownership

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Suggested capacity 5-10 dwellings. Given the sites location suggest the lower is more appropriate. The site is within the green belt a distance away from the recently defined inset boundary. The important considerations in relation to this site are its potential impacts on the settings of grade 1 and grade 2 listed buildings, the present site access and its green belt status.

Plumtree

Site reference	SHLAA/PLU/004	Site name	Orchard Barn, Bradmore Lane

Rempstone

Site reference	SHLAA/REM/002	Site name	Welfare Field (Land north of Main Street)
Parish/town	Rempstone	Site area (hectares)	1.9
Dwelling capacity	21	Density (dwellings/hectare)	11
Site source	Planning Application	Planning reference	20/00716/OUT, 19/00109/OUT
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	21	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	The site is not located within the green belt
Flood Risk	The site is not identified as at risk of flooding from any source
Landscape assessment	
Green Infrastructure	
Historic Environment	In the setting of a listed building and part of Rempstone Shrunken Village, a non designated heritage asset.
Nature conservation	The site contains trees hedgerows and grassland.
AQMA/contamination	The site is not within or in proximity of an air quality management area
Community facilities	Rempstone has limited facilities
Highways and access	Planning refusal partially related to access.
Accessibility	Number 9 bus runs along the A60
Other issues	The site contains a public right of way
Agricultural land	The provisional agricultural land class is grade 2
Deliverability	Permission refused and appeal dismissed on several grounds.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	Planning application 20/00716/OUT submitted for 21 units, but refused in July 2020. Site is constrained by policies that protect the countryside, heritage issues, and absence of local services. Previous application 19/00109/OUT refused and upheld on appeal on a number of grounds which are unlikely to be overcome.
------------------------	--

Rempstone

Site reference	SHLAA/REM/003	Site name	Land off A6006, Wymeswold Road

Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	0	Source of number of dwellings	Assumption made on best estimate

Green Belt	The site is not located within the green belt
Flood Risk	The site is not identified as at risk of flooding from any source
Landscape assessment	The site is an important open space in the heart of the village
Green Infrastructure	
Historic Environment	There are a number of listed buildings in the setting of the site.
Nature conservation	
AQMA/contamination	The site is not within or in proximity of an air quality management area
Community facilities	Rempstone has limited facilities
Highways and access	
Accessibility	The site has limited access to public transport with the nearest access to this being close to a 10 minute walk from the site. The nearest bus stop is located along the A60, Loughborough road, to the west of the site.
Other issues	
Agricultural land	The provisional agricultural land class is grade 2
Deliverability	Under construction

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	The site is an important open space within the heart of the village and within the setting of a number of listed buildings. It is not considered to be suitable for development.

Green Belt	N/A
Flood Risk	EA Maps suggest area at no risk from flooding from rivers or watercourses
Landscape assessment	SN06 Aslockton Village Farmlands - The overall landscape strategy is 'Conserve and Enhance'. The landscape condition is moderate. The character strength is strong. The area has a relatively uniform character of arable fields, linear blocks and clumps of woodland and small distinctive rural villages (LCA 2009).
Green Infrastructure	Site is located within the countryside. No open spaces within close proximity.
Historic Environment	Site not within a designated Conservation Area and has no impact upon a designated Conservation Area.
Nature conservation	No known constraints
AQMA/contamination	Site is not within an AQMA
Community facilities	Isolated location, away from the community facilities.
Highways and access	No known constraints.
Accessibility	There are no bus stops in proximity to the site and limited access to cycle or pedestrian infrastructure near the site. Therefore general access to the site is limited.
Other issues	
Agricultural land	N/A
Deliverability	Site is being promoted by the landowner. It is therefore available. However, it is in an isolated location and there are a series of refusals which raise concerns regarding delivery.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary	The site is in an isolated countryside location and there has been a series of refusals in the past in relation to a number of proposals. Site is therefore not considered to be suitable, available or achievable.

Stanton-on-the-Wolds

Site reference	SHLAA/STA/001	Site name	Land East of Willowbrook
Parish/town	Stanton-on-the-Wolds	Site area (hectares)	1.6
Dwelling capacity	45	Density (dwellings/hectare)	22
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	45	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	KEY1 comprises the field north of Willowbrook Primary School within KEY/G in the Green Belt Review. Part 2 of Green Belt Review scored KEY/G 11 (out of a maximum of 25). Whilst the land scored poorly against 3 of the 5 Green Belt purposes, due to the site's strategic value in preventing settlements merging, the land is considered to be fundamentally constrained.
Flood Risk	Flood zone 1. EA map identifies land adjacent to the school as being of high risk of surface water flooding.
Landscape assessment	Aggregate LVIA score: 48/100. KEY/001 is a pastoral field nestled between development on the eastern edge of Keyworth. Within the study area, there is a low landscape value, owing in part to the high degree of human influence and lack of conservation interests. Development of the site would be perceived as infill within the urban edge, giving no loss of key characteristics. Overall the landscape sensitivity is low. Visually there is a low value aside from a slight recreational value arising from the PRoW. The site does not have much relevance to residential and recreational receptors and is generally visually contained; the susceptibility is low. Overall the visual sensitivity is also low.
Green Infrastructure	No GI or open space constraints. The site is small and offers limited opportunities, beyond small amenity spaces, for green infrastructure.
Historic Environment	Potential loss of ridge and furrow. Site visit indicates that ridge and furrow evident, but not pronounced or best example.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP habitat and the pasture is identified as existing grassland within the Biodiversity Opportunity Mapping Report. It may therefore contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	Keyworth is a Key Settlement with a local centre that includes convenience (local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. Centre includes community centre with public park and play area, medical centre and gym.
Highways and access	Already considered as part of planning application, acceptable subject to conditions previously requested.
Accessibility	Main village centre beyond walking distance. Wolds Drive is a 15 minute walk. Schools are within a 15 minute walk. Bus services run along Selby Lane and Fairway providing access to Nottingham. Bus stop on Willow Brook provides 3-4 buses an hour to Nottingham and two further services to Asda and Morrison's in West Bridgford and Gamston.

Site reference	SHLAA/STA/001	Site name	Land East of Willowbrook
Parish/town	Stanton-on-the-Wolds	Site area (hectares)	1.6
Dwelling capacity	45	Density (dwellings/hectare)	22
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	Previously refused planning permission
Number of dwellings remaining	45	Source of number of dwellings	Details obtained through external Site Submission

Other issues	
Agricultural land	The site is identified as Grade 3 agricultural land. Further assessment required to establish whether Grade 3a (best and most versatile) or Grade 3b.
Deliverability	Previously refused planning permission (due to the site's Green Belt designation) in 2013 and subsequent representations on the LAPP and emerging Strategic Plan indicates the landowner is keen to develop the site.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Keyworth is identified as a Key Settlement in the Core Strategy. This site is not constrained by heritage, flooding, landscape, access or biodiversity issues which cannot be avoided or mitigated. The submission of a planning application (refused) and subsequent representations during LP2 preparation and Strategic Plan indicates willingness to develop the site. The Green Belt review however concludes that the sites location prevents further merging of Stanton on the Wolds and Keyworth. It is therefore fundamentally constrained by the Green Belt designation and would not be suitable until this policy constraint is removed.

Stanton-on-the-Wolds

Site reference	SHLAA/STA/002	Site name	Land CO Selby Lane and Willowbrook
Parish/town	Stanton-on-the-Wolds	Site area (hectares)	0.6
Dwelling capacity	15	Density (dwellings/hectare)	25
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Green Belt	Within Nottingham and Derby Green Belt, KEY2 is located within KEY/G, south of Willowbrook Primary School. Part 2 of Green Belt Review scored KEY/G 11 (out of a maximum of 25). Whilst the land scored poorly against 3 of the 5 Green Belt purposes, due to the site's strategic value in preventing settlements merging, the land is considered to be fundamentally constrained.
Flood Risk	Flood zone 1
Landscape assessment	Aggregate LVIA score: 53/100. Site KEY002 is a pastoral field situated on the eastern extent of Keyworth; it has a strongly vegetated boundary at present which helps to screen the settlement from the east. There is a low landscape value in the study area arising in part from the lack of conservation and recreational interests. Landscape susceptibility is also low; development of the site would result in no loss of key characteristics, but loss of the strong vegetated boundary has the potential to increase prominence of the settlement. Overall the landscape sensitivity is low. In terms of visual amenity, there is low value - despite the long views towards the Leicestershire Wolds - and the susceptibility is also low as the site is heavily screened and does not contribute to the visual amenity experienced by residential receptors. The visual sensitivity is overall low.
Green Infrastructure	No GI or open space constraints. The site is small and offers limited opportunities, beyond small amenity spaces, for green infrastructure.
Historic Environment	There are no recorded heritage assets within or in close proximity of this site.
Nature conservation	There are no designated nature conservation interests within or adjacent to the site. It is however bounded by established mature hedgerows which are a LBAP habitat and the pasture is identified as existing grassland within the Biodiversity Opportunity Mapping Report. It may therefore contain locally important neutral grassland plant species. Hedgerow quality and connectivity should be preserved and enhanced in accordance with Wider Landscape objectives within Biodiversity Opportunity Mapping Report. Adverse effects should be avoided, mitigated or as a last resort compensated.
AQMA/contamination	Site is not within an AQMA.
Community facilities	The adopted Core Strategy identifies Keyworth as a Key Settlement with a Local Centre. The Centre includes convenience stores (including local supermarket and pharmacy) and a limited number of comparison shops, restaurants, public houses and fast food establishments. There is also a second local centre at Wolds Drive and a small collection of shops on the corner of Nottingham Road and Debdale Lane. Centre includes community centre with public park and play area, medical centre and gym.
Highways and access	Use of existing access for residential development, will not be permitted. Applicant would need to prove visibility can be achieved onto Willow Brook. Widmerpool Lane is unlikely to be suitable for access unless speed limit is lowered, and pedestrian access improved.
Accessibility	Village centre is a 10 minute walk. Wolds Drive is a 5 minute walk. Schools are within a 10 minute walk. Bus services run along Selby Lane and Fairway providing access to Nottingham. Bus stop on Willow Brook provides 3-4 buses an hour to Nottingham and two further services

Site reference	SHLAA/STA/002	Site name	Land CO Selby Lane and Willowbrook
Parish/town	Stanton-on-the-Wolds	Site area (hectares)	0.6
Dwelling capacity	15	Density (dwellings/hectare)	25
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Other issues	to Asda and Morrison's in West Bridgford and Gamston.
Agricultural land	The site is classified as Grade 3 agricultural land.
Deliverability	No further representations/communication from landowner since SHLAA submission. Site was not proposed through the Keyworth Neighbourhood Plan, therefore it could be suitable, but is not available or achievable now.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary	Keyworth is identified as a Key Settlement. The site is not constrained by significant heritage, flooding, landscape, access or biodiversity issues which cannot be avoided or mitigated. As the development of this site would contribute to further merging of Keyworth and Stanton on the Wolds the Green Belt Review concludes that development is fundamentally constrained by the Green Belt designation and would not be suitable until this policy constraint is removed.

Stanton-on-the-Wolds

Site reference	SHLAA/STA/017	Site name	Land at Jerico Farm
Parish/town	Stanton-on-the-Wolds	Site area (hectares)	152
Dwelling capacity	2200	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	2000	Source of number of dwellings	Details obtained through external Site Submission

Green Belt	Land is in the Green Belt. It has not been assessed within the LP GB review as it is in an outlying location, isolated from a settlement or the main urban areas boundaries.
Flood Risk	Parts of the site are at risk of flooding from watercourses and from surface water.
Landscape assessment	NM03 - Widmerpool Clay Wolds - Landscape condition is good as features are well maintained. Landscape strength is strong. The area has a strong intact rural character with arable and pasture farming and pockets of woodland key features.
Green Infrastructure	Woodland blocks and the Roehoe Brook in the south offer potential to embed a new settlement into the existing green infrastructure.
Historic Environment	Headstones of St Wilfred's Church within the eastern corner of the site (east of the A46) are listed. St Wilfred's Church lies under pasture and is a SAM. HER identifies medieval coin find east of A46 in vicinity of former St Wilfred's Church. Site is located adjacent to the Foss Way and as such archaeological remains / artefacts may be present. Rural setting of listed gravestones would be adversely affected. Suggestion that Kinoulton Village would have been located nearer the church in the 12 century before migrating east, possibly within this site. West of the A46, Bank Farm is identified in the HER as a non-designated heritage asset. Archaeological DBA and geophysical survey as part of any application, area around the former church could have significant archaeology, possibly limiting development in this area.
Nature conservation	Site contains a LWS (Jericho Farm Grassland) which is noted as a neutral grassland. There are numerous hedgerows and small woodland/copses.
AQMA/contamination	The site is not within or in proximity to and air quality management area. No areas identified as potentially contaminated land.
Community facilities	The site is not within proximity to any community facilities.
Highways and access	Potential access off the A46 Roehoe junction and or A606 Melton Road.
Accessibility	The site is not close to any existing facilities. Walking and cycling links to surrounding area limited to narrow footway along Browns Lane towards Stanton on the Wolds and Keyworth.
Other issues	A number of public rights of way cross the site.
Agricultural land	Agriculture - Pasture. Grade 3.
Deliverability	It is a large site which appears to be under one ownership. As a stand alone proposal it is highly likely that it would require significant new infrastructure. This may affect significantly any lead in times.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary The site is owned by two landowners and was being promoted by a developer (Bloor Homes). Site is therefore available. The main constraint identified is that the site lies within the green belt. As a large freestanding proposal, it would be likely that the site would require connections to utilities,

Site reference	SHLAA/STA/017	Site name	Land at Jerico Farm
Parish/town	Stanton-on-the-Wolds	Site area (hectares)	152
Dwelling capacity	2200	Density (dwellings/hectare)	17
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	2000	Source of number of dwellings	Details obtained through external Site Submission

new accesses to the highway network. This would affect when such a site would be ready to start delivering housing. In addition areas of the site are at risk of flooding from various sources.

Stanton-on-the-Wolds

Site reference	SHLAA/STA/018	Site name	Land adjacent to the A46 south and east of Clipston Woods
Parish/town	Stanton-on-the-Wolds	Site area (hectares)	250
Dwelling capacity	4000	Density (dwellings/hectare)	
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	4000	Source of number of dwellings	Assumption made on best estimate

Green Belt	Land is in the Green Belt. It has not been assessed within the LP GB review as it is in an outlying location, isolated from a settlement or the main urban areas boundaries.
Flood Risk	Parts of the site are at risk of flooding from watercourses and from surface water.
Landscape assessment	<p>This is a reasonably flat area comprised of medium to large arable fields interspersed with small to medium blocks of woodland. This area of search is representative of the surrounding rural landscape. Blocks of woodland contribute towards scenic beauty, although the A46, A606 and railway line detract from this and perceptions of tranquillity locally. PRoW provide recreational value.</p> <p>Views are largely restricted to within the area of search due to the topography, blocks of woodland and field boundary vegetation. Woodland blocks and the Roehoe Brook in the south offer potential to embed a new settlement into the existing green infrastructure.</p> <p>Defensible boundaries are formed by the A606 and existing field boundaries, including the vegetation enclosing the PRoW south of Jerico Farm and Bank Farm. There is a risk of coalescence with Stanton-on-the-Wolds. Suitable for development. Maintain green buffer to prevent coalescence with Stanton-on-the-Wolds.</p>
Green Infrastructure	Woodland blocks and the Roehoe Brook in the south offer potential to embed a new settlement into the existing green infrastructure.
Historic Environment	Limited archaeological finds within the northern part of this larger site, however the site is substantial and is adjacent to the Foss Way. As such archaeological remains / artefacts may be present. Archaeological investigation within northern part of the site – nature of archaeology should be readily detectable via magnetometry survey in support of any allocation and/or planning application.
Nature conservation	Site contains part of aa LWS (Jerico Farm Grassland) which is noted as a neutral grassland. There are numerous hedgerows and small woodland/copses. Hill farm identified as a non designated heritage asset
AQMA/contamination	The site is not within or in proximity to and air quality management area. Pockets of made and worked ground, together with agricultural buildings and farm buildings identified as areas of potential contamination.
Community facilities	The site is not within proximity to any community facilities.
Highways and access	Potential access off the A46 Roehoe junction and or A606 Melton Road. Potential access point onto Owthorpe Road.
Accessibility	The site is not close to any existing facilities. Walking and cycling links to surrounding area limited to narrow footway along Browns Lane towards Stanton on the Wolds and Keyworth.
Other issues	A number of public rights of way cross the site
Agricultural land	Agriculture - Pasture. Grade 3.

Deliverability	Site is not deliverable or developable as it conflicts with Green Belt policy.

Delivery Period	N/A	Delivery	Non Deliverable or Developable
-----------------	-----	----------	--------------------------------

Overall summary Site lies outside of the settlement of Thrumpton in the Green Belt. Development would be contrary to existing Green Belt policy and Core Strategy spatial policy which only allows for limited infilling in existing settlements washed over by the Green Belt. As this site cannot be considered as part of the built up part of the settlement any future proposal would not be in accordance with this policy.

Wysall and Thorpe-in-the-Glebe

Site reference	SHLAA/WYS/004	Site name	Adjacent to Southfields Farm, Wymeswold Road
Parish/town	Wysall and Thorpe-in-the-Glebe	Site area (hectares)	0.1
Dwelling capacity	15	Density (dwellings/hectare)	100
Site source	Developer/Landowner Submission	Planning reference	
Allocated site reference		Status	No formal allocation or no extant planning permission for residential development
Number of dwellings remaining	15	Source of number of dwellings	Assumption made on best estimate

Green Belt	Site is beyond the Green Belt
Flood Risk	EA Maps suggest area at no risk from flooding from rivers or watercourses, low risk of surface flooding on the eastern part of the site.
Landscape assessment	NW03: Widmerpool Clay Wolds The overall landscape strategy is 'Conserve'. The landscape condition is good. The character strength of the area is strong. The area has a strong intact rural character with arable and pasture farming and pockets of woodland key features. There is a minor amount of fragmentation where fields have expanded in the south and north of the area (LCA 2009).
Green Infrastructure	Greenfield space in agricultural use.
Historic Environment	Site is not located within but has an impact upon a designated Conservation Area. Archaeological Site identified adjacent to the north west of the site.
Nature conservation	No environmental constraints or designations, however there is woodland on site.
AQMA/contamination	Not within AQMA.
Community facilities	Wysall has limited local services.
Highways and access	None identified.
Accessibility	Within 10 minutes walk of a bus stop. Village or local centre within 10-15 minute walk. A few uncoordinated routes that may be unsafe, poorly designed or that do not conveniently link with the main residential areas nearby
Other issues	Site is beyond the physical edge of the village within the countryside where development is restricted by Policy 22 of Local Plan Part 2.
Agricultural land	Grade 2 (Very good)
Deliverability	No current or previous planning application. Recent correspondence from the landowner confirms that the land is still available. SHLAA submission only.

Delivery Period	N/A	Delivery	Could be suitable if policy changes 5+ years
-----------------	-----	----------	--

Overall summary Whilst there are no site specific constraints, it is located beyond the physical edge of the village within the countryside where development is restricted by Policy 22 of Local Plan Part 2. Recent correspondence from the landowner confirms that the land is still available.
