Comments

OBJECT

Although Bunny Parish Council are in favour of renewable energy schemes they feel that this site proposed is too large.

The size of the battery storage is concerning, along with the volume of traffic during the construction stage adding to the problems already on the A60 and neighbouring roads.

There are other concerns, being the Nottinghamshire Fire and Rescue service not being able to give their support, and with the current difficulties on flooding in the area they feel that this development would only add to these problems.

Finally with the existing planning already granted on adjacent land this will make the project exceed local council/government guidelines. This application should therefore be forwarded to the government for further comments and reviews.
